

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-K

(Mark One)

☒ ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2024

OR

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 001-39778

Airbnb, Inc.

(Exact Name of Registrant as Specified in Its Charter)

Delaware

(State or Other Jurisdiction of Incorporation or Organization)

26-3051428

(I.R.S. Employer Identification No.)

888 Brannan Street

San Francisco, California 94103

(Address of Principal Executive Offices)(Zip Code)

(415) 728-0108

(Registrant's Telephone Number, Including Area Code)

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class	Trading Symbol(s)	Name of Each Exchange on Which Registered
Class A common stock, par value \$0.0001 per share	ABNB	The Nasdaq Stock Market

Securities registered pursuant to Section 12(g) of the Act:
None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☒ No ☐

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer ☐

Non-accelerated filer

Smaller reporting company ☐

Emerging growth company ☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. ☒

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements. ☐

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b). ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

As of June 30, 2024, the aggregate market value of the Class A common stock held by non-affiliates of the registrant was approximately \$66.1 billion based upon the closing price reported for such date on the NASDAQ Global Select Market.

As of January 31, 2025, 432,876,657 shares of the registrant's Class A common stock were outstanding, 188,462,942 shares of the registrant's Class B common stock were outstanding, no shares of the registrant's Class C common stock were outstanding, and 9,200,000 shares of the registrant's Class H common stock were outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

The information required by Part III of this Annual Report on Form 10-K, to the extent not set forth herein, is incorporated herein by reference from the registrant's definitive proxy

statement relating to the Annual Meeting of Shareholders to be held in 2025, which definitive proxy statement shall be filed with the Securities and Exchange Commission within 120 days after the end of the fiscal year to which this Annual Report on Form 10-K relates.

Special Note Regarding Forward-Looking Statements

This Annual Report on Form 10-K contains forward-looking statements, within the meaning of the Private Securities Litigation Reform Act of 1995, about us and our industry that involve substantial risks and uncertainties. All statements other than statements of historical facts contained in this Annual Report on Form 10-K, including statements regarding our strategy, future financial condition, future operations, projected costs, prospects, plans, objectives of management, and expected market growth, are forward-looking statements. In some cases, you can identify forward-looking statements because they contain words such as “may,” “will,” “shall,” “should,” “expects,” “plans,” “anticipates,” “could,” “intends,” “target,” “projects,” “contemplates,” “believes,” “estimates,” “predicts,” “potential,” “goal,” “commitment,” “objective,” “seeks,” or “continue” or the negative of these words or other similar terms or expressions that concern our expectations, strategy, plans, or intentions. Forward-looking statements contained in this Annual Report on Form 10-K include, but are not limited to, statements about:

- our expectations regarding our long-term growth strategy;
- our global expansion efforts, including our expectations regarding our global markets strategy and future investments in less mature markets;
- our expansion efforts beyond travel accommodations and our expectations regarding our multi-year product roadmap;
- our expectations regarding new products and offerings and investments in our platform;
- our initiatives related to trust and safety on our platform;
- our expectations regarding our technology platform and our continued technological investments and expectations around improvements to our foundational technology;
- our expectations regarding our investment in and the impact of our brand marketing, communications, and performance marketing strategy, and our ability to continue to attract guests and hosts to our platform through direct and unpaid channels;
- our approach to human capital management, including future headcount, our Live and Work Anywhere policy and other human capital initiatives and commitments;
- our expectations regarding our climate-related initiatives and commitments, including the purchase of carbon credits;
- our ability to stay in compliance with laws and regulations that currently apply or may become applicable to our business, both in the United States and internationally, and our expectations regarding various laws and restrictions that relate to our business;
- our expectations regarding the sufficiency of our insurance coverage;
- our expectations regarding the impact of future regulations on our business;
- our efforts to work with policymakers and governments to update laws and regulations that affect hosts and/or guests and to dispute regulations that unreasonably restrict the right to host;
- the effects of seasonal trends on our results of operations;
- our ability to attract and retain hosts and guests;
- our expectations regarding host activities, host earnings and our investments in our host community;
- our expectations regarding guest activities and our investments in our guest community;
- our expectations regarding our revenue growth rate;
- our expectations regarding our reliance on third-party payment service providers;
- our expectations regarding the success of integration acquisitions into our business or the success of businesses we may acquire;
- our ability to successfully compete in our industry;
- our ability to maintain, protect, and enhance our intellectual property;
- the effectiveness of our cybersecurity risk management program and strategy;
- our ability to successfully defend litigation brought against us and our expectations around the resolution of pending legal matters;
- our expectations around declaring or paying cash dividends, entering into credit agreements or other borrowing arrangements or repaying debt;
- future activity under our share repurchase program;
- the effects of our stakeholder approach to decision-making;
- our expectations regarding the resilience of our model and our ability to adapt to changes in the travel industry or economic environment;
- anticipated trends, developments, and challenges in our industry and business;
- the effects of inflation, tariffs, foreign currency fluctuations and other macroeconomic conditions, global events and geopolitical conflicts on the travel industry and our future operational results;
- our expectations regarding our financial performance, including our revenue, expenses, Adjusted Earnings Before Interest, Taxes, Depreciation, and Amortization, and Free Cash Flow;
- our expectations regarding future operating performance, including Nights and Experiences Booked, Gross Booking Value (“GBV”), Average Daily Rate, and GBV per Night and Experience Booked;
- our expectations regarding fluctuations to our global average nights per booking;
- the sufficiency of our cash, cash equivalents, and investments to meet our liquidity needs, and any future efforts to raise additional capital or incur additional indebtedness;
- the impact of exchange rate changes on our cash balances and our ability to effectively manage our exposure to fluctuations in foreign currency exchange rates;
- our expectations regarding our income tax liabilities, lodging tax obligations and other non-income tax liabilities, fluctuations in our effective tax rate, and uncertain tax positions;
- our expectations regarding the adequacy of our reserves and settlement discussions related to tax audits;
- our expectations regarding the impact of tax law changes;
- our expectations regarding our valuation allowance against our deferred tax assets, including related to our research and development tax credit generation; and
- our expectations regarding the impact of new accounting standards on our financial statements.

We caution you that the foregoing list does not contain all of the forward-looking statements made in this Annual Report on Form 10-K. You should not rely upon forward-looking statements as predictions of future events. We have based the forward-looking statements contained

in this Annual Report on Form 10-K primarily on our current expectations, estimates, forecasts, and projections about future events and trends that we believe may affect our business, results of operations, financial condition, and prospects. Although we believe that we have a reasonable basis for each forward-looking statement contained in this Annual Report on Form 10-K, we cannot guarantee that the future results, levels of activity, performance, or events and circumstances reflected in the forward-looking statements will be achieved or occur at all. The outcome of the events described in these forward-looking statements is subject to risks, uncertainties, and other factors described in the section titled "Item 1A. Risk Factors" in Part I and elsewhere in this Annual Report on Form 10-K. Moreover, we operate in a highly competitive and rapidly changing environment. New risks and uncertainties emerge from time to time, and it is not possible for us to predict all risks and uncertainties that could have an impact on the forward-looking statements contained in this Annual Report on Form 10-K. The results, events, and circumstances reflected in the forward-looking statements may not be achieved or occur, and actual results, events, or circumstances could differ materially from those described in the forward-looking statements.

The forward-looking statements made in this Annual Report on Form 10-K relate only to events as of the date on which the statements are made available. We undertake no obligation to update any forward-looking statements made in this Annual Report on Form 10-K to reflect events or circumstances after the date of this Annual Report on Form 10-K or to reflect new information or the occurrence of unanticipated events, except as required by law. We may not actually achieve the plans, intentions, or expectations disclosed in our forward-looking statements, and you should not place undue reliance on our forward-looking statements. Our forward-looking statements do not reflect the potential impact of any future acquisitions, mergers, dispositions, joint ventures, or investments we may make.

We include certain voluntary Environmental, Social and Governance ("ESG") disclosures on our website and herein. Such disclosures are informed by various considerations, including third-party frameworks and stakeholder expectations; therefore, the information should not necessarily be considered material for SEC reporting purposes, even if we use "material" or similar language, such as assessment of ESG "materiality." Particularly in the ESG context, "materiality" is subject to multiple definitions, which may differ from (and are often more expansive than) the definition of "materiality" under the federal securities laws for SEC reporting purposes. Furthermore, much of this information is subject to assumptions, estimates or information that is still evolving and subject to change, including the standards and expectations regarding greenhouse gas ("GHG") accounting and the processes for classifying, measuring, and counting GHG emissions and GHG emission reductions, which are evolving. Similarly, we cannot guarantee strict adherence to standard recommendations, and our disclosures based on any standards may change due to revisions in framework or legal requirements, availability of information, changes in our business or applicable government policies, or other factors, some of which may be beyond our control. Finally, any website or document references included herein are for convenience only and, unless indicated otherwise, are explicitly not incorporated by reference.

In addition, statements that "we believe" and similar statements reflect our beliefs and opinions on the relevant subject. These statements are based upon information available to us as of the date of this Annual Report on Form 10-K, and while we believe such information forms a reasonable basis for such statements, such information may be limited or incomplete, and our statements should not be read to indicate that we have conducted an exhaustive inquiry into, or review of, all potentially available relevant information. These statements are inherently uncertain, and you are cautioned not to unduly rely upon these statements.

You should read this Annual Report on Form 10-K and the documents that we reference in this Annual Report on Form 10-K and have filed as exhibits to this Annual Report on Form 10-K, completely and with the understanding that our actual future results may be materially different from what we expect. We qualify all of the forward-looking statements in this Annual Report on Form 10-K by these cautionary statements.

Risk Factors Summary

The following is a summary of the principal risks that could materially adversely affect our business, results of operations, and financial condition, all of which are more fully described in Part 1 in the section titled "Item 1A. Risk Factors" in this Annual Report on Form 10-K. This summary should be read in conjunction with the "Item 1A. Risk Factors" section and should not be relied upon as an exhaustive summary of the material risks facing our business.

- We may not be able to sustain our revenue growth rate or effectively manage growth or new opportunities.
- If we fail to retain or add hosts and guests, if hosts fail to provide high-quality stays and experiences, if our new offerings and initiatives are unsuccessful or if our community support offerings are inadequate, our business, results of operations, and financial condition would be materially adversely affected.
- If we are unable to successfully expand our global network or manage the risks presented by our business model internationally, our business, results of operations, and financial condition would be materially adversely affected.
- Certain host, guest, or third-party actions may undermine the safety or the perception of safety on our platform and our ability to attract and retain hosts and guests and materially adversely affect our reputation, business, results of operations, and financial condition.
- Any decline or disruption in the travel and hospitality industries or economic downturn could materially adversely affect our business, results of operations, and financial condition.
- The business and industry in which we participate are highly competitive, and we may be unable to compete successfully with our current or future competitors.
- We may experience significant fluctuations in our results of operations, which make it difficult to forecast our future results.
- Changes in tax laws or tax rulings could materially adversely affect our business, results of operations and financial condition.
- We may have exposure to greater than anticipated income tax liabilities.
- Uncertainty in the application of taxes to our hosts, guests, or platform could increase our tax liabilities and may discourage hosts and guests from conducting business on our platform.
- We are subject to a wide variety of laws, regulations, and rules applicable to short-term rental, long-term rental and home sharing businesses, or that govern our business practices.
- We offer travel insurance products to guests, which subject us and our business to extensive laws, regulations, and supervision.

- Any failure or perceived failure to comply with extensive, complex, overlapping and frequently changing government regulation and oversight related to our payments operations could materially adversely affect our business, results of operations, and financial condition.
- Compliance with and any actual or perceived failure by us or our vendors to comply with federal, state, and foreign laws relating to data privacy, data security, artificial intelligence, marketing and consumer protection could result in significant expenditure and could materially adversely affect our business, results of operations, and financial condition.
- Our use of artificial intelligence and machine learning gives rise to legal, business, and operational risks.
- We could face liability for information or content on or accessible through our platform.
- Our share price has been, and may continue to be, volatile, and the value of our Class A common stock may decline.
- Our multi-series structure may have a material adverse effect on the market price of our Class A common stock.

PART I

Item 1. Business

Overview

We operate a global marketplace, where hosts offer guests stays and experiences on our platform. We are a community based on connection and belonging—a community that was born in 2007 when two hosts welcomed three guests to their San Francisco home, and has since grown to over 5 million hosts who have welcomed over 2 billion guest arrivals in almost every country and region across the globe. Every day, hosts offer unique stays and experiences that make it possible for guests to connect with communities in a more authentic way.

Airbnb has five stakeholders and is designed with all of them in mind. Along with employees and shareholders, we serve hosts, guests, and the communities in which they live. We intend to make long-term decisions considering all of our stakeholders because their collective success is key for our business to thrive.

Our Long-Term Growth Strategy

Our key strategic priorities include perfecting our core business, accelerating growth in global markets, and launching and scaling new offerings. Over the past several years, we have introduced hundreds of new features and upgrades to our platform spanning nearly every part of our service from pricing to quality to customer support. Additionally, we are leveraging our global markets strategy, which includes a more localized approach to product updates and marketing investments to raise awareness and consideration in less mature markets. Lastly, we are planning to expand our business beyond travel accommodations using our multi-year product roadmap to help drive long-term growth across new businesses.

Our Platform

Our Platform for Hosts

We built our platform to seamlessly onboard new hosts, especially those who previously had not considered hosting. We partner with hosts throughout the process of setting up their listing and provide them with a robust suite of tools to successfully manage their listings, including scheduling, merchandising, integrated payments, community support, host protections, pricing tools, and feedback from reviews. During 2024, we introduced Co-Host Network, which enables our hosts to find co-hosts who can help manage their listing. Co-hosts are experienced hosts who provide personalized support based on the hosts' needs, from listing setup to managing bookings and communicating with guests.

Our Platform for Guests

Our website and mobile app provide our guests with an engaging way to explore and easily book a wide variety of unique homes and experiences. Over the last several years, we have launched a significant number of new features and upgrades through our biannual product releases to help guests find affordable, high quality and reliable stays across the platform.

Our System of Trust

The system for trust that we have designed includes the following components: host and guest reviews, account protection, risk scoring, secure payments, a nondiscrimination policy, watchlist and background checks in certain jurisdictions, cleanliness, fraud and scam prevention, insurance and similar protections, booking restrictions, an urgent safety line, a 24/7 neighborhood support line, anti-party technology, and a guest refund policy.

We offer protection for our hosts through AirCover for Hosts. AirCover for Hosts includes, among other features, guest property damage protection of up to \$3 million per stay, liability coverage to hosts of up to \$1 million per occurrence in the event of third-party claims of personal injury or property damage, deep cleaning protection, and pet damage protection.

We also offer AirCover for guests, which provides support for serious issues with a booking or during a stay, including host cancellations, inability to check-in, inaccurate listings, and a 24-hour safety support line.

We have new initiatives under development and will continue to create additional safety features to strengthen the trust and safety on our platform.

Our Technology

Our technology platform powers our two-sided marketplace and enables our global network of hosts and guests. Given the nature of the business, our technology platform has broad and complex requirements:

- *Support of global payments.* It enables guests and hosts to send and receive money in their preferred currency, supporting approximately 20 local payment methods. Designed for scalability and reliability, the platform ensures secure transactions through advanced protections against fraud and money laundering.
- *Delivery of global community support.* It provides multilingual, real-time community safety and support, and city-specific regulatory support.

- *Delivery of deep business insights.* It delivers deep business intelligence insights to manage our marketplace, including pricing insights and occupancy optimization for our hosts.
- *Incorporation of artificial intelligence ("AI") and machine learning.* It incorporates sophisticated AI into key areas, from fraud detection, to personalized listing matching and enabling customized and real-time community support.
- *Operation of a microservices architecture.* We operate a microservices architecture and are evolving our foundational components to enable us to move rapidly in response to evolving customer needs without sacrificing correctness or stability.

As we continue to evolve our foundational technology, we are focused on the following broad capabilities:

- Data management systems that are designed to support user privacy, analytics, machine learning/AI, and business insights.
- Service reliability leading to best-in-class performance centered on availability, latency, disaster recovery and business continuity, security, testability, observability, operability, and agility.
- Cloud support focusing on robust capabilities for granular attribution and usage patterns to realize efficiency gains.

These continued technological investments aim to create a robust platform that allows us to more quickly adapt to the needs of our hosts and guests around the world and increase the productivity of our product development organization.

Our Marketing

Our marketing strategy includes brand marketing, communications, and performance marketing. Brand marketing increases awareness among potential hosts and guests, helping them understand the benefits of hosting and booking stays and experiences, and what makes these stays and experiences distinctly Airbnb. Our global communications team works across press, policy, and online influencers to share timely and important news about Airbnb. They also oversee the execution of a global consumer, product, corporate, and policy-communications plan that supports our brand strategy and generates considerable press and social media coverage. While performance marketing is one component of our multi-pronged strategy, the strength of the Airbnb brand and our communications strategy allows us to be less reliant on performance marketing.

Our Human Capital

We consider the management of our global talent to be essential to the ongoing success of our business. As of December 31, 2024, we had approximately 7,300 employees.

As of December 31, 2024, we relied on a global network of approximately 11,000 third-party workers to handle the vast majority of our community support contacts. Our internal community support employees are comprised of operations teams who handle complex and sensitive issues, and enablement teams who support all community-facing teams, including our partners.

Attracting, recruiting, developing, and retaining talent from a wide range of backgrounds and experiences enables us to provide our hosts and guests with innovative products and services as well as serve our other stakeholders. Through our hiring process, we commit to finding the best, most qualified candidates for each role, while encouraging inclusion and eliminating bias. We are also focused on supporting all of our employees in continuing to grow and develop throughout the employee lifecycle.

Our Live and Work Anywhere policy allows for the vast majority of our employees to work remotely. We believe that expanding our talent pool beyond the commuting radius near our offices will allow us to attract the best employees over time, as it helps us to have a broader and more diverse range of qualified candidates for any given position. We aim to create a highly coordinated working culture, and as such, will continue to promote ways to keep employees highly engaged and connected by aligning employees' work through our product roadmap, as well as curating employee collaboration sessions either in the office or at off-site locations.

Climate Change

In 2021, we committed to a goal to operate as a net zero company for our global corporate operations by 2030, reducing greenhouse gas emissions associated with our corporate operations across Scope 1 (direct emissions from stationary combustion and refrigerants), Scope 2 (indirect emissions from purchased electricity, diesel generators and district heat), and the following Scope 3 categories defined by the Greenhouse Gas Protocol: purchased goods and services, capital goods, fuel- and energy-related activities (not included in Scope 1 or Scope 2), waste generated in operations, business travel, employee commuting, and upstream leased assets. To help meet our goals, we are implementing a broad range of initiatives designed to help decarbonize our business and make our corporate operations more sustainable.

We also purchase, and plan to continue purchasing, carbon credits to fully achieve our emissions goals in the long-term. Our aim is to procure such credits from high integrity projects, with a focus on nature-based solutions or projects with other co-benefits where feasible.

Regulations

We are subject to laws, regulations, and rules that affect the short-term and long-term rental and home sharing business at city, state, country, and regional levels. While a number of cities, counties, states and countries have implemented legislation to address short-term rentals, there are many others that are not yet explicitly addressing or enforcing short-term rental laws, and could follow suit and enact regulations.

We seek to work with governments to establish clear, fair, and workable home sharing rules to create clarity for our hosts, however certain cities have passed onerous restrictions on short-term rentals. For example, New York City passed regulations in 2023, which resulted in a de facto ban of short-term rental activities. Other smaller cities have also passed onerous restrictions on short-term rentals. We will continue to collaborate with policymakers to implement sensible legislation around the world and/or dispute regulations that unreasonably restrict the right to host.

In addition to laws, regulations, and rules directly applicable to the short-term and long-term rental and home sharing business, we are subject to a wide variety of laws, regulations and rules governing our business practices. These include those related to the Internet, Internet access, e-commerce, and electronic devices, and those involving taxation, privacy, data privacy, data security, insurance, pricing, content, advertising, discrimination, consumer protection, employment, protection of minors, copyrights, distribution, messaging, mobile communications, use of AI, electronic device certification, electronic waste, electronic contracts, communications, competition, and unfair commercial practices. We are also subject to laws, regulations, and rules governing the provision of online payment services, the design and operation of our platform, and the operations, characteristics, and quality of our platform and services. Additionally, we are subject to a variety of taxes and tax collection obligations in the United States (federal, state, and local) and numerous foreign jurisdictions.

Our payments platform is subject to various laws, rules, regulations, policies, legal interpretations, and regulatory guidance, including those governing cross-border and domestic money transmission and funds transfers, stored value and prepaid access, foreign exchange, data privacy, data security, cybersecurity, banking secrecy, payment services (including payment processing and settlement services), consumer protection, economic and trade sanctions, anti-corruption and anti-bribery, and anti-money laundering and counter-terrorist financing.

Our business collects, processes, and uses the personal data of individuals across the globe. As a result, we must comply with certain laws on data privacy and data security regulating the collection, storage, handling, use, disclosure, transfer, security, and other processing of personal data. We take a variety of technical and organizational security measures and other procedures and protocols designed to protect personal data, including data pertaining to hosts, guests, employees, and others.

Legal requirements relating to the collection, storage, handling, use, disclosure, transfer, security and other processing of personal data continue to evolve, and regulatory scrutiny in this area is increasing around the world. This increases the complexity of compliance requirements, may limit offerings, and result in additional expenses while also diverting attention and resources from other projects. Regulators around the world continue to propose more stringent data privacy and data security laws, and these laws are rapidly increasing in number, complexity, enforcement, fines, and penalties. Data privacy, data security and AI laws and their interpretations continue to develop and are inconsistent from jurisdiction to jurisdiction.

As we continue to expand the reach of our brand into additional markets, we will be increasingly subject to additional laws, regulations, and rules.

For additional information regarding these and other laws, regulations, and rules that affect us and our business, see Note 13, *Commitments and Contingencies – Legal and Regulatory Matters – Regulatory Matters*, to our consolidated financial statements included in Item 8 of Part I of this Annual Report on Form 10-K and Item 1A, *Risk Factors of Part I* of this Annual Report on Form 10-K.

Seasonality

Our business is seasonal, reflecting typical travel behavior patterns over the course of the calendar year. In a typical year, the first, second, and third quarters have higher Nights and Experiences Booked than the fourth quarter, as guests plan for travel during the peak travel season, which is in the third quarter for North America and Europe, the Middle East, and Africa ("EMEA").

Our key business metrics, including Gross Booking Value ("GBV") and Adjusted Earnings Before Interest, Taxes, Depreciation, and Amortization ("EBITDA"), can also be impacted by the timing of holidays and other events. We experience seasonality in our GBV that is generally consistent with the seasonality of Nights and Experiences Booked. Revenue and Adjusted EBITDA have historically been, and are expected to continue to be, highest in the third quarter when we have the most check-ins, which is the point at which we recognize revenue. Seasonal trends in our GBV impact Free Cash Flow for any given quarter. A significant portion of our costs are relatively fixed across quarters or vary inline with booking volume. We historically achieve our highest quarterly GBV in the first and second quarters of the year with comparatively lower check-ins. As a result, increases in unearned fees typically make our Free Cash Flow and Free Cash Flow as a percentage of revenue the highest in the first two quarters of the year. We typically see a slight decline in GBV and a peak in check-ins in the third quarter, which results in a decrease in unearned fees, a lower sequential decrease in Free Cash Flow, and a greater decline in GBV in the fourth quarter, where Free Cash Flow is typically lower. See the section titled "Management's Discussion and Analysis of Financial Condition and Results of Operations — Key Business Metrics and Non-GAAP Financial Measures" included in Item 7 of Part II of this Annual Report on Form 10-K for definitions of our key business metrics.

Competition

We operate in a highly competitive environment. As we seek to expand our community globally, we face competition in attracting hosts and guests.

Competition for Hosts

We compete to attract and retain hosts to and on our platform to list their homes and experiences, as hosts have a range of options for doing so. We compete for hosts based on many factors including the volume of bookings generated by guests, ease of use of our platform, the service fees we charge, host protections, such as those included in AirCover for Hosts, our brand, and community support.

Competition for Guests

We compete to attract and retain guests to and on our platform as guests have a range of options to find and book accommodations and experiences. We compete for guests based on many factors, including unique inventory and availability of listings, the value and all-in cost of host offerings on our platform relative to other options, our brand, ease of use of our platform, the trust and safety of our platform, and community support.

Our competitors include:

- online travel agencies (“OTAs”), such as Booking Holdings (including the brand Booking.com), Expedia Group (including the brand Expedia), Trip.com Group and other regional OTAs;
- internet search engines, such as Google and those powered by AI, including its travel search products;
- hotel chains, such as Marriott, Hilton, Accor, Wyndham, as well as boutique hotel chains and independent hotels;
- property management companies; and
- online platforms offering experiences.

Our Intellectual Property

Our intellectual property is an important component of our business. To establish and protect our proprietary rights, we rely on a combination of patents, trademarks, copyrights, domain names, social media handles, know-how, license agreements, confidentiality procedures, non-disclosure agreements with third parties, employee disclosure and invention assignment agreements, and other intellectual property and contractual rights.

We have a substantial patent portfolio, consisting of issued patents and pending patent applications (“patent assets”) from the United States and multiple foreign jurisdictions. The portfolio includes both organically grown and acquired patent assets. We own a trademark portfolio with protections around the world for our primary brands — AIRBNB and our Bélo logo, for other brands or protectable brand elements important to our business, including but not limited to Rausch, our primary corporate color, localizations, translations, and transliterations of our primary brands, and brands associated with businesses we have acquired. We have registered domain names that we use in or relate to our business, such as the airbnb.com domain name and country code top level domain name equivalents.

Available Information

Our website address is www.airbnb.com. Information contained on, or that can be accessed through, our website does not constitute part of this Annual Report on Form 10-K. The U.S. Securities and Exchange Commission (“SEC”) maintains an Internet site that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC at www.sec.gov. Our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and amendments to reports filed or furnished pursuant to Sections 13(a) and 15(d) of the Securities Exchange Act of 1934, as amended, (the “Exchange Act”) are also available free of charge on our investor relations website (investors.airbnb.com) as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. In addition, we routinely post other information, which could be deemed to be material to investors, on our investor relations website. Information regarding our corporate responsibility and sustainability initiatives is also available on our website. Information on our website, including the information published in our sustainability reports, is not incorporated by reference in this Report.

We webcast our quarterly results calls and certain events we participate in or host with members of the investment community on our investor relations website. Additionally, we provide notifications of news or announcements regarding our financial performance, including SEC filings, investor events, and press and earnings releases, as part of our investor relations website. The contents of these websites are not intended to be incorporated by reference into this Annual Report on Form 10-K or in any other report or document we file.

Item 1A. Risk Factors

Our business, operations, and financial results are subject to various risks and uncertainties, including those described below, that could materially adversely affect our business, results of operations, financial condition, and the trading price of our Class A common stock. The following material factors, among others, could cause our actual results to differ materially from historical results and those expressed in forward-looking statements made by us or on our behalf in filings with the SEC, press releases, communications with investors, and oral statements.

Risks Related to Our Business and Operations

Revenue and Growth Risks

We may not be able to sustain our revenue growth rate or effectively manage growth or new opportunities.

Our future revenue growth depends on the growth of supply and demand for listings on our platform and the development and adoption of new offerings and initiatives. Our business is also affected by general economic and business conditions worldwide as well as trends in the global travel and hospitality industries and the short and long-term accommodation regulatory landscape. A softening of supply or demand for our current or future offerings, whether caused by events outside of our control, challenging macroeconomic and political conditions, changes in host and guest preferences, public health crises such as pandemics, and any of the other factors described in these Risk Factors and elsewhere in this Annual Report on Form 10-K, or otherwise, may result in decreased revenue and our business, results of operations, and financial condition could be materially adversely affected.

If we fail to retain or add hosts and guests, if hosts fail to provide high-quality stays and experiences, if our new offerings and initiatives are unsuccessful, or if our community support offerings are inadequate, our business, results of operations, and financial condition would be materially adversely affected.

Our business success is heavily reliant on both hosts and guests engaging with our platform. Hosts must maintain and enhance their listings by offering a variety of desirable, competitively priced, and high-quality stays and experiences, while providing exceptional hospitality and timely responses to guest inquiries. These factors are largely outside our direct control, and if hosts fail to meet these expectations, or if they choose to cross-list or list exclusively with competitors, or if we are unable to attract and retain hosts in a cost-effective manner, or at all, our revenue and business operations could be adversely affected.

Our ability to attract and retain guests is crucial and can be impacted by external factors such as pandemics, political instability, climate change, and economic downturns, as well as internal factors like competition, brand perception, and platform usability. Additionally, our brand and reputation are critical to our success, as they influence our ability to attract and retain hosts, guests, and employees. Any negative perceptions or incidents related to safety, security, or quality could harm our public image and business operations. Issues such as unreliable reviews, regulatory scrutiny, or negative media coverage can further damage trust within our community, materially adversely affecting our business, results of operations, and financial condition.

We continue to invest in the development of new offerings and initiatives, including innovations focused on improving our host and guest experiences; however, developing and delivering these new offerings and initiatives increase our expenses and our organizational complexity, and we may experience difficulties in developing and implementing these new offerings and initiatives. Our new offerings and initiatives have a high degree of risk, as they may involve unproven businesses with which we have limited or no prior development or operating experience. There can be no assurance that our hosts and guests will adopt or respond positively to such offerings and initiatives, that we will be able to successfully manage the development and delivery of such offerings and initiatives, or that any of these offerings or initiatives will help attract and retain users on our platform and gain sufficient market acceptance to generate sufficient revenue to offset associated expenses or liabilities. If our new offerings and initiatives are not successful, or if we fail to provide a seamless and satisfactory experience for both hosts and guests, or if our host protection programs, including those provided through AirCover for hosts, become ineffective, our business, results of operations, and financial condition could be materially adversely affected.

Furthermore, our growth relies on delivering high-quality support to our community, which requires significant investment in staffing, technology, infrastructure, and training. As our global customer base expands, particularly outside of North America and Europe, we face increased pressure to provide efficient, multilingual support. The vast majority of our community support is performed by third-party service providers, and our reliance on third-party service providers necessitates stringent guidance and quality control to maintain satisfactory service levels. Inadequate support or dispute resolution can harm our reputation and affect retention, leading to potential revenue reductions through refunds or coupons. The cost of maintaining robust community support is expected to rise, and efforts to reduce support requests may not offset these costs, materially adversely affecting our business, results of operations, and financial condition.

If we are unable to successfully expand our global network or manage the risks presented by our business model internationally, our business, results of operations, and financial condition would be materially adversely affected.

We are a global platform with hosts in more than 220 countries and regions and over 100,000 cities and towns, and we serve a global guest community. For the year ended December 31, 2024, 58% of our revenue was generated from listings outside of the United States. We expect to continue to make investments to expand our international operations; however, there can be no assurance that our international expansion efforts will be successful or result in revenue growth. Managing a global organization is difficult, time consuming, and expensive, and requires significant management attention and careful prioritization. As such, any international expansion efforts that we may undertake may not be successful. In addition, conducting international operations subjects us to operational, tax, regulatory, and compliance risks.

Increased operating expenses, decreased revenue, negative publicity, negative reaction from our hosts and guests and other stakeholders, or other adverse impacts from any of the risks related to our international operations could materially adversely affect our brand, reputation, business, results of operations, and financial condition.

We rely on the value of our brand and traffic to our platform to grow revenue, and if we are unable to market our brand and drive traffic cost-effectively, it would materially adversely affect our business, results of operations, and financial condition.

We believe maintaining and strengthening our brand is crucial for attracting and retaining hosts and guests. We invest significantly in brand marketing across various channels to drive traffic to our platform, but these efforts may not always be cost-effective or successful. Additionally, increased spending by competitors on brand marketing could hinder our ability to grow platform traffic.

Our marketing strategy includes performance marketing through search engines and social media, as well as paid and unpaid channels like search engine optimization ("SEO"). However, rising costs for keywords and changes in search engine algorithms can impact our visibility and increase customer acquisition costs. If we cannot effectively grow traffic without increasing performance marketing spend, our business, results of operations, and financial condition could be adversely affected.

SEO efforts are vulnerable to changes in search engine algorithms and consumer behavior, which can reduce our platform's prominence. If our listings are less visible, we may need to increase paid marketing, raising costs and affecting our business, results of operations, and financial condition. If consumers become less reliant on search engines for travel searches and instead incorporate AI and machine learning and other channels, we may not be able to optimize for searches on these emerging channels and may risk losing traffic to competitors. Additionally, if major platforms like Google or Apple favor their own services or other partner services, our ability to engage users via mobile app or search could be impacted.

As guests compare offerings across multiple sites, our marketing efficiency may decline, necessitating increased expenditures that may not yield additional revenue. Additionally, negative publicity or complaints could harm our reputation, reducing platform usage and requiring further marketing spend to recover traffic.

Brand and Reputation Risks

Host, guest, or third-party actions that are criminal, violent, inappropriate, dangerous, or fraudulent, may undermine the safety or the perception of safety on our platform and our ability to attract and retain hosts and guests and materially adversely affect our reputation, business, results of operations, and financial condition.

We cannot control or predict the actions of users and third parties, such as neighbors or invitees, during stays or experiences, including actions that may compromise the safety of hosts, guests, and others. Incidents involving alleged fatalities, injuries, sexual violence, fraud, privacy invasion, property damage, and discrimination have occurred and may occur in the future, potentially leading to legal liabilities and reputational damage. When a user is identity verified, it means that they provided information we validated through our process. In addition, we do not currently and may not in the future require users to re-verify their identity following their successful completion of the initial verification process. We conduct background checks for certain U.S. and Indian users and we screen users against sanctions watch lists, but these are not exhaustive due to regulatory, information, and frequency limitations. We do not verify all listings for safety or compliance, relying instead on user-reported issues, which may be incomplete or inaccurate. We have not in the past and may not in the future undertake to independently verify the safety, suitability, location, quality, compliance with Airbnb policies or standards, and legal compliance, such as fire code compliance or the presence of carbon monoxide detectors, hidden cameras or pool safety, of all our hosts' listings or experiences. We have not in the past and may not in the future undertake to independently verify the location, safety, or suitability of experiences for individual guests, the suitability, qualifications, or credentials of experiences hosts, or the qualifications of individual experiences guests.

We have faced civil litigation, regulatory investigations, and inquiries involving allegations related to unsafe listings, discriminatory practices, and other misconduct. Despite efforts to enhance trust and safety, we may not fully succeed, impacting public perception and platform adoption.

If hosts, guests, or third parties engage in criminal activity, misconduct, fraudulent, negligent, or inappropriate conduct, or use our platform as a conduit for criminal activity, we may receive negative media coverage, or be subject to involvement in a government investigation concerning such activity, which could adversely impact our brand and reputation, potentially leading consumers to think our platform and the listings on our platform are not safe, and lower the adoption rate of our platform.

In addition, certain regions where we operate have higher reported rates of violent crime or varying safety requirements, which can lead to more safety and security incidents, and may adversely impact the adoption of our platform in those regions and elsewhere.

Further, claims have been asserted against us from our hosts, guests, and third parties for compensation due to alleged fatalities, shootings, other violent acts, carbon monoxide incidents, hidden camera incidents, accidents, injuries, assaults, theft, property damage, data privacy and data security issues, fraudulent listings, and other incidents that are caused by other hosts, guests, or third parties while using our platform. These claims subject us to potentially significant liability and reputational damage, increase our operating costs and could materially adversely affect our business, results of operations, and financial condition. We have obtained some third-party insurance, which is subject to certain conditions and exclusions, for claims and losses incurred based on incidents related to bookings on our platform. Our insurance policies, which may or may not be applicable to all claims and may not be available to us in the future on economically reasonable terms or at all, may be inadequate to fully cover alleged claims of liability, investigation costs, defense costs, and/or payouts. Even if these claims do not result in liability, we could incur significant time and cost investigating and defending against them. As we expand our offerings, or if the quantity or severity of incidents increases, our insurance rates and our financial exposure will grow, which could materially adversely affect our business, results of operations, and financial condition.

We track certain operational metrics, which are subject to inherent challenges in measurement, and real or perceived inaccuracies in such metrics may harm our reputation and materially adversely affect our stock price, business, results of operations, and financial condition.

We track operational metrics such as Nights and Experiences Booked, GBV, Average Daily Rate (“ADR”), active listings, active bookers, hosts, guest arrivals, greenhouse gas emissions, and other ESG metrics, which may differ from third-party estimates due to varying methodologies and assumptions. Our internal systems have limitations, and changes in tracking methods could lead to unexpected metric variations. Errors in these systems may result in inaccurate data reporting. Metrics like Nights and Experiences Booked and GBV are adjusted for cancellations and alterations that happen in the reporting period, but such cancellations and alterations can occur beyond the reporting period and can affect future metrics. Calculating these operational metrics requires ongoing data collection on new offerings that are added to our platform over time. Our business is complex, and the methodology used to calculate these metrics may require adjustments to accurately represent the full value of new offerings.

An active booker is a unique guest who has booked a stay or experience in a given time period. Certain individuals may have more than one guest account and therefore may be counted more than once in our count of active bookers. We count the number of hosts on our platform based on the number of hosts with an available listing as of a certain date. Some individuals may have more than one host account and therefore may be counted more than once as hosts.

Fraudulent activities not identified by our systems can also skew metrics, impacting their accuracy. Inaccurate metrics or perceptions of inaccuracy could harm our reputation, affect our stock price, lead to litigation, and materially adversely affect our business, results of operations, and financial condition.

Financial and Insurance Risks

Our failure to properly manage funds held on behalf of customers could materially adversely affect our business, results of operations, and financial condition.

We offer integrated payments in approximately 50 currencies to allow access to guest demand from more than 220 countries and regions and the ability for many hosts to be paid in their local currency or payment method of choice. When a guest books and pays for a stay or experience on our platform, we hold the total amount the guest has paid until check-in, at which time we recognize our service fee as revenue and initiate the process to remit the payment to the host, which generally occurs 24 hours after the scheduled check-in, barring any alterations or cancellations, which may result in funds being returned to the guest. Accordingly, at any given time, we hold on behalf of our hosts and guests a substantial amount of funds, which are generally held in bank deposit accounts and in U.S. government money market funds and recorded on our consolidated balance sheets as funds receivable and amounts held on behalf of customers. In certain jurisdictions, we are required to either safeguard customer funds in bankruptcy-remote bank accounts, or hold such funds in eligible liquid assets, as defined by the relevant regulators in such jurisdictions, equal to at least 100% of the aggregate amount held on behalf of customers. Our ability to manage and account accurately for the cash underlying our customer funds requires a high level of internal controls. As our business continues to grow and we expand our offerings, we must continue to strengthen our associated internal controls. Our success requires significant public confidence in our ability to handle large and growing transaction volumes and amounts of customer funds. Any failure to maintain the necessary controls or to manage the assets underlying our customer funds accurately could result in reputational harm, lead customers to discontinue or reduce their use of our platform and services, and result in significant penalties and fines from regulators, each of which could materially adversely affect our business, results of operations, and financial condition.

The insurance coverage afforded by or available from our insurers may be inadequate for the needs of our business, and losses under our damage protection program could materially adversely affect our business, results of operations, and financial condition.

We use a combination of insurance and self-insurance, including a wholly-owned captive insurance subsidiary, to manage the exposures related to our business operations. We support our host community by maintaining a variety of host protection programs, such as AirCover for Hosts, which includes Host Liability Insurance, Experiences Liability Insurance, and our Host Damage Protection program.

In relation to Airbnb's insurance programs, our business, results of operations, and financial condition would be materially adversely affected if (i) cost per claim premiums, or the number of claims significantly exceeds our expectations; (ii) we experience a claim in excess of our coverage limits; (iii) our insurance providers become insolvent or otherwise fail to pay on our insurance claims; (iv) we experience a claim for which coverage is denied by or disputed by our insurance providers; (v) claims costs exceed our captive insurance subsidiary's forecast or reserves; or (vi) the number of claims under our deductibles or self-insured retentions differs from historic averages. Our spending for insurance has increased as our business has grown and losses from covered claims have increased. Premiums have increased as a result, and we have experienced and expect to continue to experience increased difficulty in obtaining appropriate policy limits and levels of coverage at a reasonable cost and with reasonable terms and conditions. Our costs for obtaining these policies will continue to increase as our business grows and continues to evolve. Furthermore, as our business continues to develop and diversify, we may experience difficulty in obtaining insurance coverage for new and evolving offerings, which could require us to incur greater costs and materially adversely affect our business, results of operations, and financial condition.

In relation to our Host Damage Protection program, which is a commercial guaranty agreement that provides reimbursement of up to \$3 million for certain guest-caused loss or damages to a host property that are not reimbursed by the guest, we maintain a contractual liability insurance policy to provide coverage to us for losses incurred by us under the Host Damage Protection program. Increased frequency and severity and increased fraud could result in greater payouts, increased investigation costs, premium increases, and/or difficulty securing insurance coverage.

Additionally, if we fail to comply with insurance regulatory requirements in the regions where we operate, or other regulations governing insurance coverage, our brand, reputation, business, results of operations, and financial condition could be materially adversely affected.

We rely on third-party payment service providers to process payments made by guests and payments made to hosts on our platform. If these third-party payment service providers become unavailable or if we are subject to increased fees, our business, results of operations, and financial condition could be materially adversely affected.

We rely on a number of third-party payment service providers, including payment card networks, banks, payment processors, and payment gateways, to link us to payment card and bank clearing networks to process payments made by our guests and to remit payments to hosts on our platform. If these providers, some of whom are the sole providers of their particular service, become unable or unwilling to offer services on acceptable terms or at all, our business could be disrupted, requiring us to find alternative providers and they may not be able to be replaced in a timely manner, or at all, or on favorable terms. Transitioning to new providers would demand significant resources and might not be well-received by users, potentially leading to losses and necessitating payments to hosts from our funds, which could materially adversely affect our business, results of operations, and financial condition.

In addition, the software and services from these providers may fail to meet our expectations, contain errors or vulnerabilities, be compromised, or experience outages, all of which could impact our ability to process payments, make timely payments to hosts, or comply with regulatory requirements, which could deter users and harm our reputation, possibly leading to regulatory scrutiny, investigations, or enforcement action. Agreements with providers may even allow them to hold our cash as a reserve under certain conditions, such as adverse business changes, which could materially affect our business, results of operations, and financial condition.

For certain payment methods, including credit and debit cards, we pay interchange and other fees, and such fees result in significant costs. Payment card networks may impose special fees or assessments on any transaction that accesses their network. Our payment card processors have the right to pass any increases in interchange fees, assessments or special fees on to us. Such interchange and other fees may increase over time and raise our operating costs and lower profitability.

Credit card transactions result in higher fees to us than transactions made through debit cards. Any material increase in interchange fees in the United States or other geographies, including as a result of changes in interchange fee limitations imposed by law in some geographies, or other network fees or assessments, or a shift from payment with debit cards to credit cards among our guests could increase our operating costs and materially adversely affect our business, results of operations, and financial condition.

Additionally, inadequate investment in our payment infrastructure could hinder functionality and competitiveness, affecting usage. Further, expanding our payment services into additional geographies or offering new methods may introduce additional regulations and fraud risks, which would increase operating expenses.

If one or more of our counterparty financial institutions default on their financial or performance obligations to us or fail, we may incur significant losses or be unable to process payment transactions.

We have significant amounts of cash, cash equivalents, and other investments, including money market funds, certificates of deposit, U.S. government debt securities, commercial paper, corporate debt securities, government agency debt securities, mortgaged-backed and asset-backed securities, with banks or other financial institutions in the United States and abroad for both our corporate balances and for funds held on behalf of our hosts and guests. We also rely on such banks and financial institutions to help process payments transactions. We have both significant funds flows from and to various financial institutions as a result of our processing of payments from guests to hosts. As part of our currency hedging activities on these balances, we enter into transactions involving derivative financial instruments with various financial institutions. We regularly monitor our exposure to counterparty credit risk and manage this exposure in an attempt to mitigate the associated risk. Despite these efforts, we may be exposed to the risk of default by, or deteriorating operating results or financial condition, or service interruptions at, or failure of, these counterparty financial institutions. If one of our counterparties were to become insolvent or file for bankruptcy, our ability to recover losses or to access or recover our assets may be limited by the counterparty's liquidity or the applicable laws governing the insolvency or bankruptcy proceedings. Furthermore, our ability to process payment transactions via such counterparties would be severely limited or cease. In the event of default or failure of one or more of our counterparties, we could incur significant losses and be required to make payments to hosts and/or refunds to guests out of our own funds, which could materially adversely affect our results of operations and financial condition.

Our indebtedness could materially adversely affect our financial condition. Our indebtedness and liabilities could limit the cash flow available for our operations, expose us to risks that could materially adversely affect our business, results of operations, and financial condition, and impair our ability to satisfy our obligations under our indebtedness.

In March 2021, we issued \$2.0 billion aggregate principal amount of 0% convertible senior notes due 2026 (the "2026 Notes"). In addition, on October 31, 2022, we entered into a five-year unsecured revolving credit facility with \$1.0 billion of initial commitments from a group of lenders ("2022 Credit Facility"). As of December 31, 2024, there were no borrowings outstanding under the 2022 Credit Facility, and we had total outstanding letters of credit of \$19 million under the 2022 Credit Facility. We may also incur additional indebtedness to meet future financing needs.

Our ability to make payments under or to refinance our indebtedness, including the 2026 Notes, depends on our future performance, which is subject to economic, financial, competitive and other factors beyond our control. Our business may not generate sufficient funds, and we may otherwise be unable to maintain sufficient cash reserves, to pay amounts due under our indebtedness, including the 2026 Notes, and our cash needs may increase in the future.

Additionally, certain provisions of our 2026 Notes and related agreements could complicate or increase the cost for a third-party seeking to acquire us. Noteholders may require us to repurchase their notes for cash following a fundamental change, potentially straining our financial resources and leading to defaults under the indenture or other debt agreements.

In addition, the accounting treatment of the 2026 Notes as a liability and the use of the "if-converted" method for earnings per share calculations may negatively impact our reported financials.

Moreover, the capped call transactions entered into in connection with the pricing of the 2026 Notes may affect the value of our Class A common stock.

In addition, our existing credit agreement for our 2022 Credit Facility contains, and any future indebtedness that we may incur may contain, financial and other restrictive covenants, including a leverage ratio and fixed charge coverage ratio covenants, that limit our ability to operate our business, raise capital, or make payments under our other indebtedness. The covenants in the agreement governing our 2022 Credit Facility, among other things, limit our and our subsidiaries' abilities to (i) incur additional indebtedness at subsidiaries that are not guarantors of the 2022 Credit Facility; (ii) create or incur additional liens; (iii) partake in sale/leaseback transactions; (iv) engage in certain fundamental changes, including mergers or consolidations; and (v) enter into negative pledge clauses and clauses restricting subsidiary distributions.

If we fail to comply with these covenants or to make payments under our indebtedness when due, then we would be in default under that indebtedness, which could, in turn, result in that and our other indebtedness becoming immediately payable in full.

Operational Risks

The failure to successfully execute and integrate acquisitions could materially adversely affect our business, results of operations, and financial condition.

We have acquired multiple businesses and we regularly evaluate potential acquisitions. We may expend significant cash or incur substantial debt to finance such acquisitions, which indebtedness could result in restrictions on our business and significant use of available cash to make payments of interest and principal. In addition, we may finance acquisitions by issuing equity or convertible debt securities, which could result in further dilution to our existing stockholders. We may enter into negotiations for acquisitions that are not ultimately consummated. Those negotiations could result in diversion of management time and significant out-of-pocket costs. If we fail to evaluate and execute acquisitions successfully, our business, results of operations, and financial condition could be materially adversely affected.

In addition, we may not be successful in integrating acquisitions, or the businesses we acquire may not perform as well as we expect. While our acquisitions to date have not caused major disruptions in our business, any future failure to manage and successfully integrate acquired businesses could materially adversely affect our business, results of operations, and financial condition. Acquisitions involve numerous risks, including the following:

- difficulties in integrating and managing the combined operations, technology platforms, or offerings of the acquired companies and realizing the anticipated economic, operational, and other benefits in a timely manner, which could result in substantial costs and delays, and failure to execute on the intended strategy and synergies;
- failure of the acquired businesses to achieve anticipated revenue, earnings, or cash flow;
- diversion of management's attention or other resources from our existing business;
- our inability to maintain the key customers, business relationships, suppliers, and brand potential of acquired businesses;
- uncertainty of entry into businesses or geographies in which we have limited or no prior experience or in which competitors have stronger positions;
- unanticipated costs associated with pursuing acquisitions or greater than expected costs in integrating the acquired businesses;
- responsibility for the liabilities of acquired businesses, including those that were not disclosed to us or exceed our estimates, such as liabilities arising out of the failure to maintain effective data protection and privacy controls, and liabilities arising out of the failure to comply with applicable laws and regulations, including tax laws;
- difficulties in or costs associated with assigning or transferring to us or our subsidiaries the acquired companies' intellectual property or its licenses to third-party intellectual property;
- inability to maintain our culture and values, ethical standards, controls, procedures, and policies;
- challenges in integrating the workforce of acquired companies and the potential loss of key employees of the acquired companies;
- challenges in integrating and auditing the financial statements of acquired companies that have not historically prepared financial statements in accordance with GAAP; and
- potential accounting charges to the extent goodwill and intangible assets recorded in connection with an acquisition, such as trademarks, customer relationships, or intellectual property, are later determined to be impaired and written down in value.

From time to time, we also make investments in private companies, which are inherently risky. To the extent our investments in such companies have experienced a decline in value, we have recognized an expense to adjust the carrying value to its estimated fair value. Negative changes in the estimated fair value of private companies in which we invest could have a material adverse effect on our results of operations and financial condition.

Our results of operations and financial condition could be materially adversely affected by changes in accounting principles.

The accounting for our business is subject to change based on the evolution of our business model, interpretations of relevant accounting principles, enforcement of existing or new regulations, and changes in policies, rules, regulations, and interpretations of accounting and financial reporting requirements of the SEC or other regulatory agencies. Adoption of a change in accounting principles or interpretations

could have a significant effect on our reported results of operations and could affect the reporting of transactions completed before the adoption of such change. It is difficult to predict the impact of future changes to accounting principles and accounting policies over financial reporting, any of which could adversely affect our results of operations and financial condition and could require significant investment in systems and personnel.

Our business depends on attracting and retaining capable management and employees, and the loss of any key personnel could materially adversely affect our business, results of operations, and financial condition.

Our success depends in large part on our ability to attract and retain high-quality management and employees. Our founders and other members of our senior management team, as well as other employees, may terminate their employment with us at any time, which could materially adversely affect our business, results of operations, and financial condition.

As we continue to grow, we cannot guarantee that we will be able to attract and retain the personnel we need. The loss of qualified employees, or an inability to attract, retain, and motivate employees required for the planned expansion of our business, would materially adversely affect our business, results of operations, and financial condition and impair our ability to grow. To attract and retain key personnel, we use various measures, including an equity incentive program and our ability to attract, retain, and motivate employees may be adversely affected by declines in our stock price. Additionally, if we issue significant equity to attract employees or to retain our existing employees, we would incur substantial additional stock-based compensation expense and the ownership of our existing stockholders would be further diluted.

We have adopted a Live and Work Anywhere policy. The increase in remote working subjects us to certain operational challenges and could have adverse tax implications, which could materially adversely affect our business, results of operations, and financial condition.

In 2022, we adopted our Live and Work Anywhere policy, which permits the majority of our employees to work remotely. Remote working subjects us to operational challenges and risks. For example, a natural disaster, power outage, connectivity issue, or other event may impact our employees' ability to work remotely. In addition, members of our workforce who work remotely may not have access to technology that is as robust as that in our offices, which could cause the networks, information systems, applications, and other tools available to those remote workers to be more limited or less reliable than in our offices. We are also exposed to risks associated with the locations of remote workers, including compliance with local laws and regulations or exposure to compromised internet infrastructure. Allowing members of our workforce to work remotely creates intellectual property risk if employees create intellectual property on our behalf while residing in a jurisdiction with unenforced or uncertain intellectual property laws. Further, if employees fail to inform us of changes in their work location, we may unknowingly be exposed to additional risks. Remote working at our company (and at many third-party providers) also results in consumer, privacy, information technology and cybersecurity, and fraud risks due to the challenges associated with managing remote computing assets and security vulnerabilities that are present in many non-corporate and home networks.

Our transition to full or predominantly remote work environments also presents significant challenges to maintaining compliance with country and state requirements such as employee income tax withholding, the recording of reserves to cover withholding corrections or penalties, payroll tax remittance and reporting, payroll registration, and workers' compensation insurance. Additionally, foreign tax authorities may assert that certain of our entities have created permanent establishment in their countries, which could result in additional corporate income taxes and employee payroll withholding obligations. Any of these operational challenges or tax implications resulting from our Live and Work Anywhere policy may materially adversely affect our business, results of operations, and financial condition.

Industry, Economic and Market Risks

Industry and Climate Risks

Any decline or disruption in the travel and hospitality industries or economic downturn could materially adversely affect our business, results of operations, and financial condition.

Our financial performance is dependent on the strength of the travel and hospitality industries, which can be significantly impacted by events beyond our control such as extreme weather, natural disasters, pandemics or public health crises, economic downturns, political unrest, wars, and changes in travel-related policies. These unpredictable events can abruptly alter consumer travel behavior, reducing demand for our platform and services, and materially adversely affecting our business, results of operations, and financial condition. Climate change and other environmental or social pressures, as well as societal responses to same, may exacerbate or lead to additional impacts from such events. For more information, see our risk factor titled "We are subject to risks associated with the physical impacts of climate change as well as various efforts to transition to a low-carbon society."

Macroeconomic conditions, including economic downturns, inflation, tariffs, and currency fluctuations, also influence consumer discretionary spending, which is crucial for our business. Factors like unemployment, consumer debt, and financial market volatility can decrease consumer confidence and spending, particularly affecting leisure travel, which forms a substantial part of our business. Economic downturns have historically reduced travel spending, and future downturns could similarly decrease demand for our platform, leading to lower bookings, increased cancellations, and reduced revenue, thereby materially adversely affecting our business, results of operations, and financial condition.

The business and industry in which we participate are highly competitive, and we may be unable to compete successfully with our current or future competitors.

We operate in a highly competitive environment, and we face significant competition in attracting hosts and guests. Hosts have numerous options for listing their spaces and experiences, both online and offline, and often cross-list their offerings. We compete for hosts based on factors like booking volume, platform usability, service fees, host protections, and brand and reputation. Guests also have various options

for booking accommodations and experiences, and we compete on inventory uniqueness, value and all-in cost, brand and reputation, platform usability, search relevance and personalization, trust and safety, and customer support.

Our competitors include OTAs, search engines, listing and meta-search websites, hotel chains, property management companies, and online experience platforms. Many competitors have advantages such as greater brand recognition, larger marketing budgets, and more resources. They may offer a more comprehensive product experience and respond more effectively to market changes. They may develop technological advancements that allow them to offer better products and services at a lower price. Failure to offer or deploy new technologies as effectively as our competitors could adversely affect our business. Industry consolidation and emerging start-ups further intensify competition, potentially impacting our growth and financial condition.

Numerous companies offer homes for booking, often cross-listed on multiple platforms, which can make our pricing appear less competitive for a number of reasons, including differences in fee structure and policies. Some property managers and hosts encourage direct bookings, bypassing our platform, which reduces our usage. Competitors with established consumer relationships may leverage these to enter the travel market, creating "super-apps" that integrate multiple services, potentially increasing our customer acquisition costs and affecting our competitive position.

We also face competition from search engines like Google, which can influence search traffic and promote their own travel services, potentially disintermediating our platform. If major technology companies favor their own travel offerings or restrict our app distribution, it could impact our ability to engage with users, materially affecting our business, results of operations, and financial condition.

We are subject to risks associated with the physical impacts of climate change as well as various efforts to transition to a low-carbon society.

There are inherent climate-related risks wherever business is conducted. For example, the physical impacts of climate change (which may include more frequent or severe storms, extreme weather events, extreme temperatures and ambient temperature increases, hurricanes, flooding, rising sea levels, shortages of water, droughts, wildfires, and natural disasters) may interrupt infrastructure on which our platform relies, impact demand or supply for lodging, or otherwise adversely impact our business. Climate change is expected to increase the frequency and severity of certain such events, as well as contribute to chronic changes (such as changes to meteorological and hydrological patterns) that may also impact the behaviors of guests and hosts or infrastructure on which we rely.

Growing awareness of climate and other environmental or social pressures, including over-tourism, has also prompted responses by various actors in society, which may adversely impact the travel and hospitality industries and demand for our platform and services, whether due to the imposition of policies and regulations or changing societal attitudes towards travel. For example, both we and hosts are increasingly subject to regulatory requirements related to climate-related considerations, and any additional regulations may require increased costs or attention for compliance. Our platform and services may also be adversely impacted to the extent travel behavior or other societal expectations shift in response to climate considerations, including if we do not successfully navigate stakeholder expectations regarding our own response to climate change.

Economic and Market Risks

We may experience significant fluctuations in our results of operations, which make it difficult to forecast our future results.

Our results of operations can vary significantly and are not necessarily indicative of future performance due to seasonal fluctuations and other factors. We experience seasonality in our Nights and Experiences Booked and GBV, and seasonality in Adjusted Earnings Before Interest, Taxes, Depreciation, and Amortization ("EBITDA") that is consistent with seasonality of our revenue, which has historically been, and is expected to continue to be, highest in the third quarter when we have the most check-ins as it is the peak travel season for North America and EMEA. Revenue is recognized upon check-in, and as our business evolves, seasonal trends may change.

In addition, our results of operations may fluctuate as a result of a variety of other factors, some of which are beyond our control, including:

- reduced travel and cancellations due to events such as health concerns, including epidemics and pandemics, natural disasters, wars, political instability, regional hostilities or law enforcement demands, and other regulatory actions;
- global macroeconomic conditions;
- periods with increased investments in our platform for existing offerings, new offerings and initiatives, marketing, and the accompanying growth in headcount;
- our ability to maintain growth and effectively manage that growth;
- increased competition;
- our ability to expand our operations in new and existing regions;
- changes in governmental or other regulations affecting our business;
- changes to our internal policies or strategies;
- harm to our brand or reputation; and
- other risks described in these Risk Factors and elsewhere in this Annual Report on Form 10-K.

In addition, we may not accurately forecast our results of operations due to timing differences between when bookings are made and revenue recognition, which occurs at check-in. For example, the effect of significant downturns in bookings in a particular quarter may not be fully reflected in our financial results until future periods due to this timing difference. Our expense levels are based on revenue estimates that may be inaccurate, and fixed expenses may lead to greater-than-expected losses if revenue falls short. Incorrect assumptions or failure to address risks could materially affect our business, results of operations, and financial condition.

A significant portion of our bookings and revenue are denominated in foreign currencies, and our financial results are exposed to changes in foreign exchange rates.

A significant portion of our business is denominated and transacted in foreign currencies, which subjects us to foreign exchange risk. We offer integrated payments to our hosts and guests in approximately 50 currencies. Revenue could be negatively impacted by currency fluctuations.

Generally speaking, a strong U.S. dollar can negatively impact our revenue, as approximately 54% of our revenue in 2024 was in non-U.S. dollar currencies. We also face foreign exchange risk with certain assets, like cash balances held for hosts and guests, affecting our financial results through currency remeasurement and translation. Our platform allows guests to pay in their preferred currency, which may differ from the host's payment currency, leading to currency risk due to timing differences.

We utilize a foreign exchange cash flow hedging program to reduce the impact of currency fluctuations on our revenue. However, hedging may not fully mitigate losses, and our hedging positions may be incomplete or absent in the future. While we may hedge revenue and balance sheet exposures, predicting or eliminating foreign exchange rate effects is not possible.

Legal, Regulatory and Compliance Risks

Tax Compliance

Changes in tax laws or tax rulings could materially adversely affect our business, results of operations and financial condition.

We are subject to evolving global tax regimes, which could materially adversely affect our business, results of operations, and financial condition. The U.S. Inflation Reduction Act (the "IRA") introduced a corporate alternative minimum tax and an excise tax on stock repurchases. In the year ended December 31, 2024, we accrued approximately \$95 million of corporate alternative minimum tax, and approximately \$20 million of excise tax on stock repurchases. Additionally, the U.S. government may implement further changes, such as increasing the corporate income tax rate or altering the taxation of international income.

Many countries in Europe, as well as a number of other countries and states, have recently proposed or recommended changes to existing tax laws or have enacted new laws that could significantly increase our tax obligations in many countries and states where we do business or require us to change the manner in which we operate our business. For example, in Italy, a law enacted in 2017 purports to require short-term rental platforms that process payments to withhold and remit host income tax and collect and remit tourist tax, amongst other obligations. In December 2023, without admitting any liability, Airbnb Ireland signed an agreement with the Italian Revenue Agency in settlement of the 2017-2021 audit periods for an aggregate payment of 576 million Euro (\$621 million). Additionally, in December 2024, Airbnb Ireland signed a similar agreement in settlement of the 2022 audit period for an aggregate payment of 139 million Euro (\$150 million). Such agreements settle a dispute about Airbnb Ireland's obligations to withhold and remit host income tax, including taxes, interest, and penalties, for those relevant periods. Airbnb's subsidiary in Italy and Airbnb Ireland continue to be, or could in the future be, subject to tax audits in Italy, including in relation to permanent establishment, transfer pricing, withholding obligations, and tourist taxes. Such audits could result in the imposition of additional potentially significant prior and future tax obligations.

The Organization for Economic Cooperation and Development (the "OECD") is coordinating negotiations among more than 140 countries with the goal of achieving consensus around substantial changes to international tax policies, including the implementation of a minimum global effective tax rate of 15%. Our effective tax rate and cash tax payments could increase in future years as a result of these changes.

The European Commission is also conducting investigations into preferential tax treatments, which may lead to changes in how our foreign operations are taxed. As our international business expands, these developments could raise our effective tax rate and non-income tax obligations, materially adversely affecting our business, results of operations, and financial conditions. Additionally, some changes may apply retroactively, leading to unexpected tax liabilities beyond our current estimates.

We may have exposure to greater than anticipated income tax liabilities.

Our income tax obligations are based in part on our corporate operating structure and intercompany arrangements, including the manner in which we operate our business, develop, value, manage, protect, and use our intellectual property, and determine the value of our intercompany transactions. The tax laws applicable to our business, including those of the United States and other jurisdictions, are subject to interpretation, and certain jurisdictions are aggressively interpreting their laws in new ways in an effort to raise additional tax revenue from companies such as Airbnb. The taxing authorities of the jurisdictions in which we operate may challenge our methodologies for valuing developed technology or intercompany arrangements, which could increase our worldwide effective tax rate and materially adversely affect our results of operations and financial condition.

We are subject to regular review and audit by U.S. federal, state, local, and foreign tax authorities. For example, our 2008 to 2024 tax years remain subject to examination in the United States and California due to tax attributes and statutes of limitations, and our 2020 to 2024 tax years remain subject to examination in Ireland. We are currently under examination for income taxes by the Internal Revenue Service ("IRS") for the years 2013, 2016, 2017 and 2018. We are continuing to respond to inquiries related to these examinations. In December 2020, we received a Notice of Proposed Adjustment ("NOPA") from the IRS for the 2013 tax year relating to the valuation of our international intellectual property which was sold to a subsidiary in 2013. The notice proposed an increase to our U.S. taxable income that could result in additional income tax expense and cash tax liability of \$1.3 billion, plus penalties and interest, which exceeds our current reserve recorded in our consolidated financial statements by more than \$1.0 billion. We disagree with the proposed adjustment and intend to vigorously contest it. In January 2022, we entered into an administrative dispute process with the IRS Independent Office of Appeals ("IRS Appeals") regarding the proposed adjustment. An acceptable outcome was not reached with IRS Appeals, and in May 2024, we received a Statutory Notice of Deficiency ("Notice") from the IRS related to the aforementioned valuation of our international intellectual property. The Notice claims that we owe \$1.3 billion in tax, plus penalties and interest. We will continue to pursue all available remedies to resolve this dispute. In July 2024, we petitioned the U.S. Tax Court ("Tax Court") for redetermination, and if necessary, we will appeal the Tax Court's decision to the

appropriate appellate court. If the IRS prevails in the assessment of additional tax due based on its position and such tax and related interest and penalties, if any, exceeds our current reserves, such outcome could have a material adverse impact on our financial position and results of operations, and any assessment of additional tax could require a significant cash payment and have a material adverse impact on our cash flow.

Uncertainty in the application of taxes to our hosts, guests, or platform could increase our tax liabilities and may discourage hosts and guests from conducting business on our platform.

We face complex and evolving tax obligations across various jurisdictions, which could significantly impact our business. We are subject to numerous taxes, including income and indirect taxes, and have received demands from governments for data to enforce tax laws against our hosts and guests. We collect and remit taxes on behalf of hosts when legally required, but disputes and lawsuits over tax responsibilities persist. New or revised tax laws could increase our tax liabilities and operational costs, potentially leading to penalties for non-compliance.

The application of indirect taxes, such as lodging taxes, transactional taxes, hotel, sales and use tax, privilege taxes, excise taxes, VAT, goods and services tax, digital services taxes, harmonized sales taxes, business tax, and gross receipt taxes (together, "indirect taxes") to e-commerce activities such as ours and to our hosts or guests is a complex and evolving issue. These taxes could raise costs for hosts and guests, discourage platform use, and reduce revenue. For example, we recorded approximately \$53 million in expense related to digital service taxes relating to prior periods as a result of refining our interpretation of the law as it applies to us. Additionally, we recorded \$18 million of lodging tax expense in a particular jurisdiction over uncertainty as to how a new law applies to us. Compliance with tax reporting may require disclosing personal data, risking privacy concerns and regulatory actions. Competitors may adopt different tax strategies, potentially attracting our hosts and guests.

We devote significant resources, including management time, to the application and interpretation of laws and working with various jurisdictions to clarify whether taxes are applicable and the amount of taxes that apply. Rapid regulatory changes and lack of uniformity complicate compliance, risking errors and enforcement actions. As our business evolves, tax obligations may increase, further affecting our financial condition and platform usage.

Our ability to use our net operating loss carryforwards and certain other tax attributes may be limited.

While federal net operating loss carryforwards generated on or after January 1, 2018 are not subject to expiration, the deductibility of such net operating loss carryforwards is limited to 80% of our taxable income for taxable years beginning on or after January 1, 2021. Utilization of our net operating loss carryforwards depends on our future taxable income, and there is a risk that some of our existing net operating loss carryforwards and tax credits could expire unused (to the extent subject to expiration) and be unavailable to offset future taxable income, which could materially adversely affect our results of operations and financial condition. In addition, under Sections 382 and 383 of the Internal Revenue Code of 1986, as amended (the "Code"), if a corporation undergoes an "ownership change," generally defined as a greater than 50 percentage point change (by value) in its equity ownership by significant stockholders or groups of stockholders over a three-year period, the corporation's ability to use its pre-change net operating loss carryforwards and other pre-change tax attributes, such as research tax credits, to offset its post-change taxable income or income tax liabilities may be limited. Similar rules may apply under state tax laws. We may have undergone ownership changes in the past, and we may experience ownership changes in the future because of shifts in our stock ownership, many of which are outside of our control. As a result, our ability to use our net operating loss carryforwards and other tax attributes to offset future U.S. federal taxable income or income tax liabilities may be, or may become, subject to limitations, which could result in increased future tax liability to us.

Compliance with Laws and Regulations, Litigation and Disputes

We are subject to a wide variety of laws, regulations, and rules applicable to short-term rental, long-term rental, and home sharing businesses, or that govern our business practices, including among others, e-commerce, data privacy, payment services, advertising, consumer protection, employment, and commercial practices. Such laws and regulations are complex, evolving, and sometimes inconsistent and have limited and may continue to limit the ability or willingness of new or existing hosts to share their spaces through our platform. These regulations may expose our users or us to regulatory inquiries, litigation, and/or other disputes and to potentially significant liabilities, including taxes, compliance costs, fines, and criminal or other penalties, which have had and could continue to have a material effect on our business, results of operations, and financial condition.

Hosts list, and guests search for, stays and experiences on our platform in more than 220 countries and regions across the globe. There are national, state, local, and foreign laws and regulations in jurisdictions that relate to or affect our business and, since we began our operations in 2008, there have been and continue to be legal and regulatory developments and inconsistent or ambiguous interpretations among local, regional, or national laws or regulations that affect the short-term rental, experiences, long-term rental, and home sharing business. These laws and regulations may impact the ability of hosts to list properties entirely and/or may limit the location and/or duration of stays permitted, or may establish other conditions upon which they are allowed to host. In addition, regulations may require that we, rather than local, state or national regulatory enforcement agencies, limit hosts' ability to list within those requirements.

Compliance Costs

Compliance with diverse and evolving laws across jurisdictions is costly and complex, increasing our operational expenses and potential liabilities (including potential criminal or other penalties). For example, we incur significant operational costs to comply with requirements of jurisdictions and cities that have disparate requirements around tax collection, tax reporting, data sharing, host registration, limits on lengths of stays, and other regulations, each of which may require us to dedicate significant resources to provide the infrastructure and tools needed on our platform for our hosts to meet these legal requirements and for us to fulfill any obligations we may have. Environmental, health, and safety requirements have also become increasingly stringent, and our costs, and our hosts' costs, to comply with such requirements may increase as a result. The complexity of our platform and changes required to comply with the large number of varying

requirements can lead to constraints on supply as well as compliance gaps. Additionally, unclear and changing laws can deter hosts and guests from using our platform, reduce supply and demand, and increase litigation risks, adversely affecting our business. Failure or delays in complying with laws, even if unclear or in dispute, could subject us to penalties, including fines, business disruption and site blocking.

We require hosts and guests to comply with all applicable legal obligations under our terms of service, but governments may nonetheless seek to hold us accountable for hosts' and guests' compliance. This can lead to penalties and costs that impact our reputation and financial condition.

Our compliance measures, such as requiring hosts to include registration numbers for listings in some jurisdictions, may increase platform friction and reduce listings and bookings. Host listings may also be limited by night caps, density restrictions, onerous permitting requirements, primary residence or host presence requirements, permit caps, minimum night stays, and/or discretionary permitting or lottery systems. Additional regulations could necessitate significant platform changes, discouraging use and increasing scrutiny and liability.

We are subject to laws and regulations governing our business practices, the Internet, e-commerce, and electronic devices, including those relating to taxation, data privacy, data security, pricing, content, advertising, discrimination, consumer protection, protection of minors, insurance, copyrights, distribution, messaging, mobile communications, electronic device certification, electronic waste, electronic contracts, communications, Internet access, competition, AI, and unfair commercial practices as well as federal, state, local, and foreign laws regulating employment, employee working conditions, including wage and hour laws, employment dispute and employee bargaining processes, collective and representative actions, employment classification, and other employment compliance requirements. Violation of these laws could subject the company to fines and penalties, including in some cases, criminal penalties.

Regulatory Developments

Hotels and groups affiliated with hotels have engaged and will likely continue to engage in various lobbying and political efforts for stricter regulations governing our business in both local and national jurisdictions. Additionally, private groups, such as homeowners and neighborhood associations, may adopt contracts or regulations that purport to ban or otherwise restrict the ability of hosts to list their spaces. In some jurisdictions, regulations imposing restrictions on short-term rentals are increasingly fragmented at the local level, leading to increased compliance burden. These efforts, along with existing and potential new laws, could restrict short-term rentals, impose registration requirements and other limits to hosts' ability to list, and lead to significant fines and liabilities, materially affecting our platform's operations and financial condition. For instance, EU Member State laws pertaining to the recently enacted EU STR Regulation will require additional compliance efforts, potentially discouraging and prohibiting current and potential hosts from listing properties. As another example, the City of New York has effectively banned short-term rentals, and this has led to similar restrictions being considered throughout the State of New York. If other geographies emulate these regulations, it could have a material adverse effect on our business and financial condition.

We face ongoing disputes with government agencies over regulations, which may result in fines and operational changes. Some jurisdictions have imposed or may seek to impose taxes and licensing requirements on our platform and failure to comply could lead to penalties. We have resolved some disputes by agreeing to remove listings or share data with authorities. From time to time, we attempt to defend against application of laws and regulations that limit hosts' or guests' ability or willingness to list and search for accommodations, but have sometimes been and may continue to be unsuccessful in certain of those efforts.

Increased regulatory interest in technology companies, particularly regarding AI, data privacy, competition, and sustainability, could lead to further compliance challenges. New or changing laws could impose significant costs and liabilities, affecting our business operations and financial condition. Our attempts to influence legislation face uncertainty and may divert resources from core operations.

Regulatory Inquiries, Litigation & Disputes

We are frequently involved in legal and regulatory claims, including government inquiries and litigation related to short-term rentals, taxes, consumer protection, payment services, insurance, and data privacy. These proceedings are complex, costly, and time-consuming, requiring significant resources and potentially leading to fines, penalties, and operational changes. As our business grows, the number and complexity of these claims are expected to increase, potentially impacting our brand and financial condition.

We face litigation, inquiries, investigations, audits, and proceedings with governments and other entities over regulations affecting short-term rentals and platform liability. Changes in legal interpretations could further impact our operations. Additionally, we are subject to claims related to incidents at listings, such as personal injuries, cancellations and refunds, and privacy violations, as well as class action lawsuits and government inquiries. If we become more involved in hosts' listings and conduct related to bookings, then we are more likely to draw scrutiny and additional regulations from governments and undercut various defenses we may have to claims or attempts to regulate us, which further constrain our business and impose additional liability on us as a platform.

We may also become more vulnerable to third-party claims as U.S. laws such as the Digital Millennium Copyright Act ("DMCA"), the Stored Communications Act, and the Communications Decency Act ("CDA"), and non-U.S. laws such as the Digital Services Act ("DSA"), the EU STR Regulation, and the European E-Commerce Directive and their national transpositions are interpreted by the courts or if they are otherwise modified or amended, as our platform and services to our hosts and guests continue to expand, and as we expand geographically into jurisdictions where the underlying laws with respect to the potential liability of online intermediaries such as ourselves are either unclear or less favorable.

We also face intellectual property disputes and indemnification obligations, which could lead to further litigation. In addition, compliance with escheatment laws and audits could result in additional liabilities and impact our financial results.

Adverse outcomes in legal proceedings may result in significant financial penalties, changes to business practices, increased costs and reputational damage. Litigation diverts resources and may not be fully covered by our existing insurance policies, which may not be available to us on financially reasonable terms in the future or at all. Additionally, if we enter an agreement with a government or governmental agency to resolve a dispute, the terms of such agreement may be publicly available and could create a precedent that may lead to similar disputes in other jurisdictions and may put us in a weaker bargaining position in future disputes with other governments. As we expand, we anticipate continued legal challenges that could materially adversely affect our business, results of operations, and financial condition.

We offer travel insurance products to guests, which subject us and our business to extensive laws, regulations, and supervision.

Since June 2022, guests in certain jurisdictions have had the opportunity to purchase travel insurance when they make a booking. Over time, we expect to make travel insurance available to guests in additional countries. In the United States, travel insurance products are subject to extensive regulation in the states in which we transact business by state insurance departments. This regulation is generally designed to protect the interests of consumers. States have also adopted legislation defining and prohibiting unfair methods of competition and unfair or deceptive acts and practices in the business of insurance that may apply to insurance agencies. Noncompliance with any of such state statutes may subject us to regulatory action by the relevant state insurance regulator, and, in certain states, private litigation. In addition, we cannot predict the impact that any new laws, rules, or regulations, or unfavorable changes in or interpretations of existing laws, rules or regulations, may have on our business and financial results. States also regulate various aspects of the contractual relationships between insurers and independent agents. State insurance regulators may also conduct periodic examinations, the results of which could give rise to regulatory orders requiring remedial, injunctive, or other corrective action. Similarly, travel insurance products are subject to extensive regulation and supervision by the applicable regulators in the United Kingdom, Canada, Australia and the European Union. The failure to comply with applicable state and foreign laws and regulations could result in fines, investigations and/or civil or criminal proceedings against us by governmental agencies and/or consumers which, if material, could adversely affect our business, results of operations, and financial condition.

Additionally, insurance carriers with which we place business are subject to regulations, which may affect how we conduct our operations. We may need to expend resources to address questions or concerns regarding our relationships with these insurers and underwriters, diverting resources away from operating our business, which could adversely affect our business, results of operations, and financial condition.

Our payments operations are subject to extensive, complex, overlapping and frequently changing government regulation and oversight and any failure or perceived failure to comply with such laws, rules, regulations, policies, legal interpretations, and regulatory guidance could materially adversely affect our business, results of operations, and financial condition.

Our payments platform is subject to various laws, rules, regulations, policies, legal interpretations, and regulatory guidance, including those governing: cross-border and domestic money transmission and funds transfers; stored value and prepaid access; foreign exchange; data privacy, and data security; banking secrecy; payment services (including payment processing and settlement services); consumer protection; economic and trade sanctions; anti-corruption and anti-bribery; and anti-money laundering ("AML") and counter-terrorist financing ("CTF"). As we expand further, we face varying and sometimes conflicting legal obligations. For example, certain transactions that may be permissible in one jurisdiction may be prohibited by sanctions, AML, CTF, or other regulations in a different jurisdiction. We regularly assess our compliance programs and may identify gaps requiring costly enhancements to our policies and controls.

Non-compliance or perceived failure to comply with these existing or new laws and regulations, including changes to or expansion of their interpretations, can lead to significant fines, lawsuits, regulatory and/or governmental investigations, enforcement actions, loss of required licenses and other civil and criminal penalties, forcing us to alter operations or delay product launches, adversely affecting our brand, business, results of operations, financial condition and future prospects. The complexity of global regulations may trigger overlapping investigations by multiple authorities, impacting our relationships with financial institutions. Maintaining robust internal controls is essential to comply with these regulations, and failure to do so could result in reputational damage and substantial penalties.

Airbnb Ireland Unlimited Company ("AIUC") and Airbnb UK Services Limited ("AUKSL") each operate as an "appointed representative" and utilize the license of regulated third parties ("principal firms") to: (i) in the case of AIUC, act as a credit broker (presenting regulated third party consumer credit products to UK customers); and (ii) in the case of AUKSL, distribute guest travel insurance and host and experiences liability insurance. We are reliant on the principal firms to continue to permit us to use their licenses to offer or distribute these services/products and they can cancel our agreement, with notice, at any time, which could have an adverse impact on these revenue streams if we were unable to find suitable replacement principal firms. If we were found to have breached the terms of our agreement with the principal firms and/or breached regulatory requirements applicable to us, for example, by misrepresenting credit products to UK consumers, despite our not holding the licenses to perform these activities, we could nevertheless be liable to penalties imposed by the UK regulators. This could potentially also impact the UK licenses from the Financial Conduct Authority other of our group entities do currently hold (see *Payments Regulation* below).

Payments Regulation

In the United States, our wholly-owned subsidiary, Airbnb Payments, Inc. ("Airbnb Payments"), is regulated as a "Money Services Business" by the Financial Crimes Enforcement Network and requires state licenses to act as a money transmitter. Compliance involves handling customer funds, record-keeping, and reporting, with potential licensing needs in unlicensed states due to regulatory changes.

Airbnb Payments Luxembourg SA ("AFLux") operates as a licensed payments institution across the EEA from Luxembourg, while Airbnb Payments UK Limited ("APUK") is licensed as an electronic money institution ("EMI") providing payment services from the United Kingdom. Compliance with EEA and UK regulations, such as the EU Digital Operational Resilience Act Regulation, the Luxembourg implementation of the EU Second Payment Services Directive ("PSD2") and the UK's Payment Services Regulations 2017 ("UK PSR"), involves complex and

potentially onerous requirements, including operational and payment security and strong customer authentication, which may increase compliance costs, raise risk of non-compliance, and impact the ease of usage of the payment features of the platform.

Additionally, the proposed EU Third Payment Services Directive ("PSD3") and proposed regulation on the same ("EU PSR") will include amendments to strong customer authentication and anti-fraud obligations amongst other day-to-day requirements. The United Kingdom is also considering areas for reform for its payment services regime, including information requirements regarding currency conversion charges, and notice provisions for the termination of customer contracts. When these proposed measures are finalized and in-force, they may increase our compliance costs and require additional resources as well as changes to our processes and operations.

From time to time, we apply for licenses in new jurisdictions, which subject us to additional compliance requirements and regulatory scrutiny. In unclear regulatory environments, we partner with local banks and processors, but may face restrictions from local regulators or need additional licenses or approvals. Obtaining and maintaining compliance with global licensing and regulatory requirements incurs significant costs and operational changes, with potential fines or other enforcement actions for violations. These challenges could delay or restrict our services, affecting our business, results of operations, financial condition, and future prospects.

Consumer Protection

We are subject to consumer protection laws in the United States and other countries where we operate. In the United States, the Dodd-Frank Act established the Consumer Financial Protection Bureau ("CFPB"), which enforces federal consumer financial protection laws. We must comply with these laws, including the Electronic Fund Transfer Act and Regulation E, which require service disclosures, error resolution, and consumer reimbursement for unauthorized transactions. The CFPB may adopt other regulations governing consumer financial services, including regulations defining unfair, deceptive, or abusive acts, potentially increasing our compliance costs and litigation risks. Consumer protection laws could also be violated inadvertently, for example as a result of technical bugs.

Violations of consumer protection laws could lead to fines, penalties, and changes in business practices, incurring substantial costs. State attorneys general and other officials can enforce federal consumer protection laws, and various agencies can conduct investigations that may result in significant penalties.

In the United Kingdom and Luxembourg, payments-related consumer protection laws apply to APUK and APLux, and EU regulators may impose additional local requirements, including on our local banks and processors, potentially increasing costs or delaying business expansion in EU countries.

We also issue gift cards in the United States, United Kingdom, European Union and many other jurisdictions, which are subject to consumer protection laws, and may face additional regulations if we expand these services.

Additionally, our payment services are subject to U.S. data privacy laws, including the Gramm-Leach-Bliley Act of 1999 ("GLBA"), which governs the handling of personal information and imposes data security standards. Non-compliance could result in financial penalties. See our risk factor on data privacy and security compliance for more details.

Anti-Money Laundering and Counter-Terrorist Financing

We are subject to various AML and CTF laws and regulations around the world, including the BSA and the UK Money Laundering, Terrorist Financing and Transfer of Funds (Information on the Payer) Regulations 2017 (as amended) (the "MLRs"). Among other things, the BSA and MLRs require money services businesses (including money transmitters like Airbnb Payments) to implement risk-based AML and CTF programs, report suspicious transactions or activities, and maintain transaction records. We must also comply with, among other requirements, the UK Proceeds of Crime Act 2002 and Terrorism Act 2000, which prohibit the handling of criminal proceeds. We provide information to government agencies to assist in the detection and prevention of illegal activities and may be required to deny certain transactions, risking inadvertent denials of legal transfers.

Regulators may demand enhancements to our compliance programs, including customer identity verification and transaction monitoring. In the United Kingdom and European Union, stricter AML regulations could increase compliance costs and operational challenges and/or require us not to provide services to certain clients, potentially reducing business. Non-compliance with local laws implementing EU directives could result in fines up to 10% of APLux's annual revenue, and similar penalties apply to APUK under the MLRs.

The EU has agreed and adopted a comprehensive package of measures to reform the primary AML, CTF legislation across all EU 27 Member States (the package together is known as "MLD6"). This means that APLux will need to undertake a detailed impact assessment to the required uplifts to existing policies and procedures. This will likely result in material changes to the day to day AML and CTF operating procedures of APLux and material divergence between the AML and CTF rules applicable to APUK in the UK and those applicable to APLux, bringing with it increased costs and the regulatory enforcement risks (such as fines, censures and potentially the suspension or removal of regulatory licenses or controls placed on APLux's ability to onboard new customers) associated with designing compliance with a nascent regime.

We are subject to governmental economic and trade sanctions laws and regulations that limit the scope of our offerings. Additionally, failure to comply with applicable economic and trade sanctions laws and regulations could subject us to liability and negatively affect our business, results of operations, and financial condition.

We must comply with economic and trade sanctions from governments where we operate, including U.S. agencies like the U.S. Treasury Department's Office of Foreign Assets Control ("OFAC"), the Council of the European Union, the Office of Financial Sanctions Implementation of His Majesty's Treasury in the United Kingdom ("OFSI"), and Luxembourg's Ministry of Finance. These sanctions restrict transactions or dealings with certain countries, regions, and governments, and certain individuals or entities, such as those operating,

organized, or resident in certain countries or regions or those listed on OFAC's List of Specially Designated Nationals and Blocked Persons. Future sanctions in key business areas could materially impact our business, results of operations and financial condition.

To comply, we maintain and regularly update internal controls and report to OFAC, OFSI, and Luxembourg authorities on blocked or rejected payments and potential violations. Despite having these controls in place, there is a risk that we might inadvertently engage in transactions inconsistent with applicable sanctions laws. Any breaches or investigations could lead to claims or actions against us, affecting our business, results of operations, and financial condition. As we grow and as regulations evolve, we may need to invest further in our internal controls or adjust our operations.

We are subject to payment network rules, and any material modification of our payment card acceptance privileges could have a material adverse effect on our business, results of operations, and financial condition.

The loss of our credit and debit card acceptance privileges or the significant modification of the terms under which we obtain card acceptance privileges would significantly limit our business model since a vast majority of our guests pay using credit or debit cards. We must comply with payment card network rules, including the Payment Card Industry Data Security Standards (the "PCI DSS"), which requires robust internal controls over the use, storage, and transmission of card data to help prevent fraud. Compliance demands significant resources and ongoing attention, and any system failures could materially adversely affect our business, results of operations, and financial condition.

Non-compliance with PCI DSS or payment network rules could breach our contracts with payment processors, leading to fines, penalties, and potential loss of card processing capabilities. Payment networks may also change rules, causing operational disruptions and compliance challenges. Even with compliance, we cannot guarantee the maintenance of our card acceptance privileges or the prevention of data or security breaches, illegal or improper use of our payments platform, or the theft, loss, or misuse of card data or the maintenance of card acceptance privileges.

We are also subject to network operating rules and guidelines promulgated by the National Automated Clearing House Association ("NACHA") relating to payment transactions we process using the Automated Clearing House ("ACH") Network, which may change and result in costly compliance measures. Failure to comply with these standards could result in losing our payment card acceptance privileges, materially affecting our business, results of operations, and financial condition.

Avoiding regulation under the Investment Company Act may adversely affect our operations.

The Investment Company Act of 1940, as amended (the "Investment Company Act"), contains substantive legal requirements that regulate the manner in which "investment companies" are permitted to conduct their business activities. We currently conduct, and intend to continue to conduct, our operations so that neither we nor any of our subsidiaries are required to register as an investment company under the Investment Company Act. We are not engaged primarily, nor do we hold ourselves out as being engaged primarily, in the business of investing, reinvesting, or trading in securities. We do, however, make minority investments in companies and acquire other financial instruments from time to time that may be deemed investment securities. As such, there is no guarantee that we will continue to be exempt from registration under the Investment Company Act without taking actions that may adversely affect our operations. For example, to avoid being deemed an investment company we may be required to sell certain of our assets and pay significant taxes upon the sale or transfer of such assets, which may have a material adverse effect on our business, results of operations, and financial condition.

Evolving focus on environmental, social, and governance issues by shareholders, customers, regulators, politicians, employees, and other stakeholders may impose additional risks and costs on our business.

ESG matters are an area of growing and evolving focus among our shareholders and other stakeholders, including customers, employees, regulators, politicians, and the general public in the United States and abroad. Companies like Airbnb face heightened expectations regarding matters such as environmental sustainability, diversity, human rights, and data privacy. We engage in various initiatives to serve our stakeholders in these and other areas, and to respond to stakeholder expectations regarding ESG, but such initiatives can be costly and may not have the desired effect. For example, many ESG initiatives (including related metrics and targets) are based on methodologies, standards, and data that are still evolving or are subject to variable interpretation; as with other companies, our approach to such matters evolves, and we cannot guarantee that our approach, either now or in future, will align with the expectations or preferences of any particular stakeholder or that certain disclosures will not be considered erroneous or subject to misinterpretation.

Moreover, stakeholders have varying and sometimes conflicting perceptions of ESG matters. Both advocates and opponents of various issues are increasingly resorting to activism (including media campaigns and litigation) to advocate for their positions. Responding to such issues involves inherent costs, and any failure to successfully navigate stakeholder expectations could negatively impact our business, results of operations, financial condition, and stock price.

The regulatory landscape for ESG issues is also rapidly evolving, and various policymakers, including the European Union and State of California, among others, have adopted (or are considering adopting) requirements for climate- or other ESG-related disclosures or other actions. We may face risks related to sustainability reporting obligations under the evolving regulatory landscape in the European Union. Specifically, the Corporate Sustainability Reporting Directive ("CSRD") and the Corporate Sustainability Due Diligence Directive ("CSDDD") impose stringent requirements on companies to disclose detailed information regarding their ESG practices. Furthermore, the transposition of the CSRD by EU member states will also impact the scope of these requirements. Many member states have not yet transposed the directive, adding another layer of uncertainty to compliance efforts. Additionally, the EU's Omnibus Simplification Package introduces further complexity and uncertainty in the European Union. Compliance involves significant expenses and resources, with risks of errors in implementing necessary changes. These requirements are not uniform and may not be interpreted or applied uniformly, which may increase the cost and complexity of compliance, as well as any related risks. Various of our suppliers and other stakeholders are subject to similar risks, which may exacerbate, or create additional, risks on such matters.

We have been, and may in the future be, subject to claims that we or others violated certain third-party intellectual property rights, which, even where meritless, can be costly to defend and could materially adversely affect our business, results of operations, and financial condition.

The Internet and technology industries frequently face litigation over intellectual property rights, including allegations of infringement or misappropriation. We may encounter claims from third parties, including practicing and non-practicing entities, asserting that our platform technologies, or branding infringe on or misappropriate their intellectual property rights. These claims can be costly and time-consuming to address, potentially diverting management's attention and resources.

Intellectual property disputes could lead to significant liabilities, force us to cease using certain technologies or branding, or require us to obtain costly licenses or develop alternative solutions. These outcomes could increase our expenses and reduce our competitiveness, adversely affecting our business, results of operations, and financial condition.

We receive from time to time, communications from third parties, including practicing and non-practicing entities, claiming that we have infringed, misused, or otherwise misappropriated their intellectual property rights, including alleged patent infringement. Additionally, from time to time we have been involved in claims, suits, regulatory proceedings, and other proceedings involving alleged infringement, misuse, or misappropriation of third-party intellectual property rights, or relating to our intellectual property holdings and rights. While a number of the infringement claims raised against us have been based on our use or implementation of third-party technologies for which those third parties have been required to defend against the claims on our behalf and indemnify us from liability, intellectual property claims against us, regardless of merit, could be time consuming and expensive to litigate or settle, and could divert our management's attention and other resources.

As we expand our offerings or acquire new businesses, our exposure to intellectual property claims may increase. Third parties may assert infringement claims related to newly acquired technologies or business areas, which could materially adversely affect our ability to compete and our business, results of operations, and financial condition.

Claims for indemnification by our directors and officers may reduce our available funds to satisfy successful third-party claims against us and may reduce the amount of money available to us.

Our restated certificate of incorporation and amended and restated bylaws provide that we will indemnify our directors and officers who are, or are threatened to be, made a party to or otherwise involved in an action, suit or proceeding by reason of the fact of their service to the Company, in each case to the fullest extent permitted by Delaware law.

In addition, as permitted by Section 145 of the Delaware General Corporation Law, our amended and restated bylaws and/or our indemnification agreements that we have entered or intend to enter into with our directors and officers and certain other employees provide that:

- we will indemnify our directors and officers to the fullest extent permitted by Delaware law. Delaware law provides that a corporation may indemnify such person if such person acted in good faith and in a manner such person reasonably believed to be in or not opposed to the best interests of the registrant and, with respect to any criminal proceeding, had no reasonable cause to believe such person's conduct was unlawful;
- under certain circumstances we are required to advance expenses, as incurred, to our directors and officers in connection with defending a proceeding in advance of its final disposition, except that our obligation to provide advancement to such directors or officers is contingent upon their agreement to repay such advances if it is ultimately determined that such person is not entitled to indemnification;
- we may, in our discretion, (i) indemnify employees and agents in those circumstances where indemnification is permitted by applicable law, and (ii) advance expenses, as incurred, to our employees and agents in connection with defending a proceeding in advance of its final disposition, contingent on such employees' or agents' agreement to repay such advances if it is ultimately determined that such person is not entitled to indemnification;
- we are bound by any existing indemnification agreements for employees or agents;
- the rights conferred in our amended and restated bylaws are not exclusive, and we are authorized to enter into indemnification agreements with our directors, officers, employees, and agents and to obtain insurance to indemnify such persons; and
- we may not retroactively amend or repeal our amended and restated bylaws to reduce our indemnification or advancement obligations relating to any act or omission occurring prior to the time of such amendment or repeal.

While we have procured directors' and officers' liability insurance policies, such insurance policies may not be available to us in the future at a reasonable rate, may not cover all potential claims for indemnification, and may not be adequate to indemnify us for all liability that may be imposed.

We have operations in countries known to experience high levels of corruption, and any violation of anti-corruption laws could subject us to penalties and other adverse consequences.

We are subject to anti-corruption laws and regulations including the U.S. Foreign Corrupt Practices Act ("FCPA") and other laws in the United States and elsewhere (including the UK Bribery Act 2010) that prohibit improper payments or offers of payments to foreign governments and their officials, political parties, state-owned or controlled enterprises, and/or private entities and individuals for the purpose of obtaining or retaining business. We have operations in and deal with countries known to experience corruption. Our activities in these countries create the risk of unauthorized payments or offers of payments by one of our employees, contractors, agents, or users that could be in violation of various laws, including the FCPA and anti-corruption and anti-bribery laws in these countries. We have implemented policies, procedures, systems, and controls designed to ensure compliance with applicable laws and to discourage corrupt practices by our employees, consultants, and agents, and to identify and address potentially impermissible transactions under such laws and regulations; however, our

existing and future safeguards, including training and compliance programs to discourage corrupt practices by such parties, may not prove effective, and we cannot ensure that all such parties, including those that may be based in or from countries where practices that violate U.S. or other laws may be customary, will not take actions in violation of our policies, for which we may be ultimately responsible. Additional compliance requirements may require us to revise or expand our compliance programs, including the procedures we use to monitor international and domestic transactions. Failure to comply with any of these laws and regulations may result in extensive internal or external investigations as well as significant financial penalties and reputational harm, which could materially adversely affect our business, results of operations, and financial condition.

Technology, Data and Cybersecurity Risks

Technology, Data Security and Cybersecurity

Compliance with federal, state, and foreign laws relating to data privacy, data security, artificial intelligence, marketing and consumer protection involves significant expenditure and resources, and any actual or perceived failure by us or our vendors to comply may result in significant liability, litigation or other legal action against us, negative publicity, an erosion of trust, and/or result in regulatory scrutiny, fines and penalties and could materially adversely affect our business, results of operations, and financial condition.

Data privacy, data security, AI, marketing and consumer protection laws, rules, and regulations are complex and rapidly evolving and we could be materially adversely affected by new legal requirements or changes to existing requirements including their interpretations and enforcement practices. Compliance with such laws may require changes to our data processing practices, potentially increasing compliance costs or adversely affecting our business. We process personal data, such as names, dates of birth, email addresses, nationality, location information, Social Security numbers, phone numbers, and identity verification information (for example, government issued identification or passport), as well as credit card, bank account or other financial information, from and about hosts and guests, as well as our employees, job applicants, contractors and representatives of our third-party vendors, and other companies we do business with. We utilize third-party vendors, some of whom process data for us and provide various services, including but not limited to digital storage technology, business technology support, and other support functions. We and our vendors must comply with various state, federal, and foreign data privacy and security laws, rules, regulations, industry standards and other requirements, including those that generally require that we implement reasonable measures to keep such information secure and otherwise restrict the ways in which such information can be collected and used. These requirements, and their application, interpretation, and amendment are constantly evolving.

Additionally, we note that as the use of AI and machine learning technologies ("AI and ML Technologies") continues to grow, regulators (including data protection regulators) are expected to take an increased interest in issues, such as how we and our vendors collect, maintain and process and provide transparency on the use of personal data of our users and/or hosts in that context. Our technology platform incorporates the use of AI and ML Technologies, for example, for fraud detection, search, enabling customized features and enhancing community support. Enhanced scrutiny of the use of AI and ML Technologies means that regulators may increasingly seek advance engagement with businesses like ours in respect of certain types of data processing. In addition, certain existing legal regimes, including those relating to data privacy and consumer protection, regulate certain aspects of AI and ML Technologies, and new laws regulating AI and ML Technologies have been or may be enacted or have entered into force in jurisdictions that we operate. This may affect our use of AI and ML Technologies and our ability to provide, improve or commercialize our services effectively and efficiently and result in increased costs. For example, in the United States, California enacted seventeen new laws in 2024 that further regulate the use of AI and ML Technologies and provide consumers with additional protections around companies' use of AI and ML Technologies, such as requiring companies to disclose certain uses of generative AI. Other states have also passed AI-focused legislation, such as Colorado's Artificial Intelligence Act, which will require developers and deployers of "high-risk" AI systems to implement certain safeguards against algorithmic discrimination, and Utah's Artificial Intelligence Policy Act, which establishes disclosure requirements and accountability measures for the use of generative AI in certain consumer interactions. Other legislation has been introduced or proposed at the federal and state level, and there remains uncertainty at the federal level regarding the regulation of AI and ML Technologies. Further, the EU Artificial Intelligence Act (the "EU AI Act") entered into force in August 2024, and establishes a comprehensive, risk-based governance framework for AI in the EU market. The majority of the substantive requirements will apply from August 2026. The EU AI Act applies to companies that develop, use and/or provide AI in the EU and – depending on the AI use case – includes requirements around transparency, conformity assessments and monitoring, risk assessments, human oversight, security, accuracy, general purpose AI and foundation models, and fines for breach of up to 7% of worldwide annual turnover. These regulations may impact our ability to use, procure and commercialize AI and ML Technologies in the future, and we may need to expend resources to adjust our products or services, including if the laws are not consistent across jurisdictions.

In the European Union and the UK, we are subject to the European Union General Data Protection Regulation (the "EU GDPR") and to the UK General Data Protection Regulation and Data Protection Act 2018 (the "UK GDPR"), respectively (the EU GDPR and UK GDPR together referred to as the "GDPR"), both of which have resulted, and will continue to result, in significantly greater compliance burdens and costs for companies like ours. The GDPR comprehensively regulates our use of personal data, including cross-border transfers of personal data out of Europe. Many large geographies in which we operate, including Australia, Brazil, Canada, China, India, and South Korea have passed or are in the process of passing comparable or other robust data privacy and security legislation or regulation, which may lead to additional costs and increase our overall risk exposure.

In relation to cross-border transfers of personal data outside of Europe, we expect the existing legal complexity and uncertainty regarding international personal data transfers to continue. In particular, the European Commission approval of the current EU-US Data Privacy Framework for data transfers to certified entities in the United States may be challenged, which could also lead to challenges to, or impact the effectiveness of, other data transfer mechanisms such as the standard contractual clauses (a standard form of contract approved by the European Commission as an adequate personal data transfer mechanism). In general, we expect that international transfers to the United States and to other jurisdictions more generally to continue to be subject to enhanced scrutiny by regulators and we cannot guarantee the ongoing efficacy of our data transfer mechanisms. It is also possible that transfers of personal data outside the United States could be restricted or impacted by developments at the federal level. As the regulatory guidance and enforcement landscape in relation to data transfers continue to develop, we could suffer additional costs, complaints, and/or regulatory investigations or fines, we may have to stop using certain tools and vendors and make other operational changes, including updating agreements or implementing additional safeguards which could otherwise affect the manner in which we provide our services, our ability to provide our services and adversely affect our business, results of operations, and financial condition.

From time to time, we receive correspondence, and are subject to more formal inquiries, from regulators including the Irish Data Protection Commission, our lead EU data protection regulator, regarding our personal data processing activities. To date, we have not received any fines in respect of statutory inquiries and have in place an internal process to review and process such inquiries to ensure we respond appropriately and update our privacy compliance with any findings.

In the United States, there are numerous federal and state data privacy and security laws, rules, and regulations governing the collection, maintenance, disclosure and processing of personal data, including federal and state data privacy laws, data breach notification laws, electronic communications laws, and marketing and consumer protection laws. For example, the Federal Trade Commission ("FTC") and state regulators enforce a variety of data privacy issues, such as misrepresentations in privacy policies or failures to appropriately protect information about individuals, as unfair or deceptive acts or practices in or affecting commerce in violation of the FTC Act or similar state laws. Additionally, the GLBA and its implementing regulations, restrict and impose certain requirements on the processing of personal data, including notice to individuals of privacy practices and requirements for the safeguarding and proper destruction of personal data. Moreover, as we send marketing messages via email and short message service, or SMS, text messages, we are subject to the CAN-SPAM Act, which imposes certain obligations regarding the content of emails and providing and honoring opt-outs, and the Telephone Consumer Protection Act, which imposes restrictions on the ability to send text messages without prior consent.

The U.S. government, including Congress, the FTC, the CFPB and the Department of Commerce, has announced that it is reviewing the need for greater regulation for the collection of information concerning personal data processing practices and consumer behavior on the Internet, including regulation aimed at restricting certain targeted advertising practices. In addition, numerous states have enacted or are in the process of enacting state level data privacy laws and regulations governing the processing of state residents' personal data that have and may continue to require us to modify our data processing practices and policies and incur related costs and expenses. For example, the California Consumer Privacy Act ("CCPA") provides enhanced data privacy rights to California residents, such as affording residents the right to access and delete their data and to opt out of certain sharing and sales of personal data. The CCPA imposes a range of other compliance obligations and imposes severe statutory damages, which could lead to injunctive relief or agreed settlements providing for ongoing audit and reporting requirements, as well as a private right of action, for certain data breaches. This private right of action has increased the risks associated with data breach litigation. The enactment of the CCPA prompted a wave of similar legislative developments in other states, which creates a patchwork of overlapping but different state laws. For example, since the CCPA went into effect, comprehensive privacy statutes that share similarities with the CCPA are now in effect and enforceable in other states. Many other states have passed or proposed similar laws and there remains increased interest at the federal level as well.

We are also subject to evolving EU and UK privacy laws on cookies, tracking technologies and e-marketing. In the European Union and United Kingdom, informed consent is required for the placement of certain cookies or similar tracking technologies on an individual's device and for direct electronic marketing. Recent European court and regulator decisions are driving increased attention to cookies and similar tracking technologies, which may lead to additional costs and increase our overall risk exposure.

Further, the majority of the substantive provisions of the DSA took effect in February 2024. The DSA governs, among other things, our potential liability for illegal services/products or content on our platform, obligations around traceability of business users, and requires enhanced transparency measures. In particular our obligations to diligence the services offered on our platform could require significant additional resources. Further, the DSA contains general requirements that user interfaces may not deceive or manipulate users which are yet to be clarified further by guidance. The DSA may increase our compliance costs, require changes to our user interfaces, processes, operations, and business practices which may adversely affect our ability to attract, retain and provide our services to customers, and may otherwise adversely affect our business, operations and financial condition. Failure to comply with the DSA can result in fines of up to 6% of total annual worldwide turnover and recipients of services have the right to seek compensation from providers in respect of damage or loss suffered due to infringement by the provider to comply with the DSA. Similarly, in the United Kingdom, the Online Safety Act 2023, or the OSA, establishes an extensive regulatory framework for certain user-to-user and search services and imposes obligations to protect users from illegal content which, if applicable, may increase compliance costs and may otherwise adversely affect our business, operations and financial condition. Failure to comply with the OSA can result in fines of up to 10% of total annual worldwide turnover or £18 million (whichever is greater).

Various other governments and consumer agencies around the world have also called for new regulation and changes in industry practices for protecting personal information collected and maintained electronically. Together, these existing and proposed laws add additional complexity, variation in requirements, restrictions and potential legal risk, require additional investment in resources to compliance programs and cybersecurity, which could impact strategies, and could result in increased compliance costs and/or changes in business practices and policies. Compliance with numerous and often contradictory requirements of different jurisdictions is particularly difficult for an online business such as ours, which collects personal information from hosts, guests, and other individuals in multiple jurisdictions. If any jurisdiction in which we operate adopts new laws or changes its interpretation of its laws, rules, or regulations relating to data residency or localization such that we are unable to comply in a timely manner or at all, we could risk losing our rights to operate in such jurisdictions. As in many cases these laws are relatively new and the interpretation and application of these laws is uncertain. There may be litigation, claims and enforcement relating to data privacy, and the processing of personal data may involve new interpretations of privacy laws. For example, there has been a noticeable increase in class actions in the United States where plaintiffs have utilized a variety of laws, including state wiretapping laws, in relation to the use of tracking technologies, such as cookies and pixels.

Furthermore, to help improve the trust and safety on our platform we conduct certain verification procedures aimed at our hosts, guests, and listings in certain jurisdictions. Such verification procedures may include utilizing public information on the Internet, accessing public databases such as court records, utilizing third-party vendors to analyze host or guest data, or physical inspection. These types of activities expose us to requirements of other laws and regulations, and to the risk of regulatory engagement and/or enforcement from privacy regulators, consumer protection agencies, consumer credit reporting agencies, and civil litigation.

When we are required to disclose personal data to government agencies, such as tax authorities and law enforcement agencies, this could be perceived by third parties as non-compliance with data privacy and security laws, potentially leading to legal proceedings or actions

against us. Conversely, if we refuse to provide requested information due to a disagreement, such as on the interpretation of the law, we may face actions, litigation, and increased regulatory scrutiny, which could harm our relationships with governments and limit our ability to operate in certain regions. Any of the foregoing could materially adversely affect our brand, reputation, business, results of operations, and financial condition.

Any failure or perceived failure by us and/or our vendors or third-party providers to comply with data privacy and data security laws, rules, or regulations could expose us to material penalties, significant legal liability, changes in how we operate or offer our products, and interruptions or cessation of our ability to operate in key geographies, any of which could materially adversely affect our business, results of operations, and financial condition. For example, as we are subject to both the EU GDPR and the UK GDPR, we could be fined under each regime independently in respect of the same breach. Penalties for certain breaches are up to the greater of €20 million or £17.5 million, or up to 4% of the annual global revenue of the infringer, whichever is greater.

In addition, any failure or perceived failure to comply with consumer protection, marketing, data privacy or data security laws, rules, and regulations; policies; industry standards; or enforcement notices and/or assessment notices (for a compulsory audit) could lead to legal actions by individuals, consumer rights groups, government agencies, or others. We may also face civil claims including representative actions and other class action type litigation (where individuals have suffered harm), potentially amounting to significant compensation, injunctive relief, or damages liabilities, as well as associated costs, and diversion of internal resources or other regulatory orders adversely impacting the ways our business can use personal data. These proceedings could be costly to litigate, whether or not they have merit, and result in negative publicity and erode trust, potentially requiring us to make costly changes to our business practices. If these events occur, they could materially and adversely impact our business operations, financial condition, and overall results.

IT System capacity constraints, system or other operational failures could materially adversely affect our business, results of operations, and financial condition.

Since our founding, we have experienced rapid growth in consumer traffic to our platform. We rely on computer systems, hardware, software, technology infrastructure, and online sites and networks for both internal and external operations that are critical to our business (collectively, "IT Systems"). We own and manage some of these IT Systems but also rely on third-party IT Systems for certain operations, including payment processing and accounting. Significant consumer growth or third-party failures may require costly upgrades, potentially affecting our business, and if our systems and network infrastructure cannot be expanded or are not scaled to cope with increased demand or fail to perform, we could experience significant operational interruptions, including poor performance, incorrect payments, search ranking issues, unanticipated disruptions in service, slower response times, and delays in the introduction of new offerings, decreased customer satisfaction, and loss of users. Our reliance on the Internet and mobile networks could also lead to disruptions in access. Our IT Systems, including those from third-party providers, are also vulnerable to damage or interruption from natural disasters. For example, our San Francisco operations are at risk from earthquakes and power outages, which could disrupt business operations. Such disruptions could materially adversely impact our business, results of operations, and financial condition. We have experienced IT System failures from time to time. While we invest in system reliability, these measures may not fully prevent downtime, and our existing business interruption insurance may not cover all losses or be available to us on economically reasonable terms in the future or at all. For further information, see the risk factor titled "If we or our third-party providers fail to protect confidential information and/or experience security incidents, there may be damage to our brand and reputation, material financial penalties, and legal liability, along with a decline in use of our platform, which would materially adversely affect our business, results of operations, and financial condition."

If we do not adequately protect our intellectual property and our data, then our business, results of operations, and financial condition could be materially adversely affected.

We hold a broad collection of intellectual property rights, including those related to our brand; certain content and design elements on our platform; our code and our data; inventions and processes related to our platform services, and research and development efforts; an extensive repository of wholly-owned audio and visual assets; marketing and promotional concepts and materials; a collection of editorial content; and certain entertainment-related assets. This includes registered domain names, registered and unregistered trademarks, service marks, and copyrights, patents, and patent applications, trade secret rights, licenses of intellectual property rights of various kinds, and other forms of intellectual property rights in the United States and in a number of countries around the world. To further protect our proprietary rights, from time to time we have acquired or licensed patents, trademarks, domain name registrations, and copyrights from third parties. Despite these protections, the use or misappropriation of our intellectual property rights by third parties can diminish the value of our brand and allow competitors to replicate our offerings.

Our intellectual property assets and rights are essential to our business, and in the future, we may acquire or license additional patents or patent portfolios, or other intellectual property assets and rights from third parties, which could require significant cash expenditures. If the protection of our proprietary rights and data is inadequate to prevent unauthorized use or misappropriation by third parties, the value of our brand and other intangible assets may be diminished and competitors may be able to mimic our technologies, offerings, or features or methods of operations more effectively. If we fail to protect our intellectual property and data in a cost-effective and meaningful manner, our competitive standing could be harmed; our hosts, guests, other consumers, and corporate and community partners could devalue the content of our platform and our brand, reputation, business, results of operations, and financial condition could be materially adversely affected.

Our use of artificial intelligence and machine learning gives rise to legal, business, and operational risks, which may result in diminished performance, regulatory scrutiny, social impacts, reputational harm, and liability arising from the use of this technology.

We currently use AI and ML Technologies in our offerings, for example with respect to fraud detection, search, enabling customized features and enhancing community support.

The rapid evolution of AI and ML Technologies will continue to require the application of significant resources to adopt, develop, test, integrate, and maintain AI and ML Technologies included in our offerings in order to remain competitive and to help implement these

technologies responsibly and minimize unintended or harmful impacts. There are significant risks involved in adopting, developing, maintaining, and deploying these technologies, and there can be no assurance that the usage of such technologies will enhance our products or services or be beneficial to our business, including our efficiency or profitability. In particular, AI and ML Technologies may be incorrectly designed or implemented; may be trained or reliant on incomplete, inadequate, inaccurate, biased, or otherwise poor quality data or on data to which we or third parties do not have sufficient rights; and/or may be adversely impacted by unforeseen defects, technical challenges, cybersecurity threats, third-party litigation or regulatory action, or material performance issues. Any of the above could negatively impact the performance of our products, services and business, as well as our reputation, and we could incur liability and costs resulting from the actual or perceived violation of laws or contracts to which we are a party or civil claims.

In addition, AI and ML Technologies, including generative AI, may be vulnerable to adversarial user behavior or create inaccurate or misleading content or other discriminatory or unexpected results or behaviors, such as hallucinatory behavior that can generate irrelevant, unintended, nonsensical, or factually incorrect results. Our hosts, guests or others may rely on or use this flawed content or information to their detriment, which may expose us to brand or reputational harm, competitive harm, consumer complaints, legal liability, and other adverse consequences, any of which could materially adversely affect our business, results of operations, and financial condition. The use of AI and ML Technologies presents emerging ethical and social issues, and if we enable or offer solutions that draw scrutiny or controversy due to their perceived or actual impact on our customers or on society as a whole, we may experience brand or reputational harm, competitive harm, consumer complaints, legal liability, and other adverse consequences, any of which could materially adversely affect our business, results of operations, and financial condition.

Development, maintenance and operation of AI and ML Technologies requires additional investment in the development of proprietary datasets, machine learning models, and systems to monitor and test for accuracy, bias, and other variables, which are complex, costly, and could impact our profit margin as we expand the use of AI and ML Technologies in our offerings. Developing, testing, and deploying AI and ML Technologies also increase associated computing costs.

In addition to our proprietary technologies, we use AI and ML Technologies licensed from third parties. Our ability to continue to adopt, integrate and use such technologies at the scale we may need may be dependent on access to specific third-party software and infrastructure, such as processing hardware or third-party AI models, and we cannot control the quality, availability or pricing of such third-party software and infrastructure, especially in a highly competitive environment. If any such third-party AI and ML Technologies become incompatible with our offerings or unavailable for use or have degradations in performance, or if the providers of such models unfavorably change the terms on which their AI and ML Technologies are offered or terminate their relationship with us, our solutions may become less appealing to our customers. In addition, to the extent any third-party AI and ML Technologies are used as a vendor hosted service, any disruption, outage, or loss of information through such hosted services could disrupt our operations or solutions, damage our reputation, cause a loss of confidence in our solutions, or result in legal claims or proceedings, for which we may be unable to recover damages from the affected provider.

We face competition from other companies in our industry with respect to the development and deployment of AI and ML Technologies to enhance our competitive offerings. Those other companies may develop AI and ML Technologies that are similar or superior to ours and/or are more cost-effective and/or quicker to develop, deploy and maintain. Any inability to develop, offer or deploy new AI and ML Technologies as effectively, quickly and/or as cost-efficiently as our competitors could have a materially adverse impact on our operating results, customer relationships and growth.

The regulatory and intellectual property frameworks governing the use and protection of AI and ML Technologies and of its outputs are rapidly evolving, and we cannot predict how future legislation and regulation will impact our ability to offer and protect products or services that we develop which leverage AI and ML Technologies. Many federal, state and foreign government bodies and agencies have introduced or proposed additional laws and regulations. Additionally, existing laws and regulations may be interpreted in ways that would affect the operation of and availability of IP protection for our AI and ML Technologies. As a result, implementation standards, enforcement practices, and available scope of protection are likely to remain uncertain for the foreseeable future, and we cannot yet determine the impact future laws, regulations, or standards may have on our business (including our positioning with respect to our competition) and may not always be able to anticipate how to respond to these laws or regulations. Already, certain existing legal regimes (e.g., relating to data privacy) regulate certain aspects of AI and ML Technologies, and new laws regulating AI and ML Technologies are expected to continue to be proposed and enacted in the United States and globally. For further information related to AI laws and regulations that may affect our business, see the risk factor titled "Compliance with federal, state, and foreign laws relating to data privacy, data security, artificial intelligence, marketing and consumer protection involves significant expenditure and resources, and any actual or perceived failure by us or our vendors to comply may result in significant liability, litigation or other legal action against us, negative publicity, an erosion of trust, and/or result in regulatory scrutiny, fines and penalties and could materially adversely affect our business, results of operations, and financial condition."

It is also possible that new laws and regulations will be adopted in the United States and in other non-U.S. jurisdictions, or that existing laws and regulations, including data privacy, consumer protection, competition laws, may be interpreted in ways that would limit our ability to use AI and ML Technologies for our business, or require us to change the way we use AI and ML Technologies in a manner that negatively affects the performance of our products, services, and business and requires us to expend resources and adjust our products or services in certain jurisdictions. Further, the cost to comply with such laws, regulations, or decisions and/or guidance interpreting existing laws, could be significant and would increase our operating expenses (such as by imposing additional reporting obligations regarding our use of AI and ML Technologies). Such an increase in operating expenses, as well as any actual or perceived failure to comply with such laws and regulations, could adversely affect our business, financial condition and results of operations.

Platform Performance and Integrity

We could face liability for information or content on or accessible through our platform.

We could face claims relating to information or content that is made available on our platform. Our platform relies upon content that is created and posted by hosts, guests, or other third parties. Although content on our platform is typically generated by third parties, and not by us, claims of defamation, disparagement, negligence, warranty, personal harm, intellectual property infringement, or other alleged damages could be asserted against us, in addition to our hosts and guests. While we rely on legal exemptions and protections like the DMCA and CDA in the United States and the E-Commerce Directive in the European Union, varying laws and interpretations regarding immunity and responsibility across jurisdictions may limit these exemptions or defenses or create uncertainty regarding liability for information or content uploaded by hosts, guests, or other third parties. To the extent that Airbnb creates or is deemed to create or facilitate such content on the platform, these defenses may be less available. New regulations could increase our liability and compliance costs, impacting our business.

In the United States, changes to the CDA could reduce protections for online platforms. In the EU, the DSA and Digital Markets Act (“DMA”) introduced new compliance requirements and potential fines. Other regions, like Asia and Latin America, have or are developing regulations that could impose direct or secondary liability on platforms for harmful content. These laws may require us to implement costly measures to mitigate liability, affecting our platform’s appeal and our brand reputation.

The EU’s Consumer Rights Directive and the Unfair Commercial Practices Directive impose strict consumer protection requirements, with potential fines for non-compliance. Consumers and certain Consumer Protection Associations may bring individual claims against us, and the Collective Redress Directive allows for class actions across the EU, increasing our litigation risk. Compliance with these evolving regulations may increase operational costs and materially adversely affect our business, results of operations, and financial condition.

Measures that we are taking to improve the trust and safety of our platform may cause us to incur significant expenditures and may not be successful.

We have taken and continue to take measures to help improve the trust and safety on our platform, combat fraudulent activities and other misconduct, and help improve community trust, such as requiring identity and other information from hosts and guests, attempting to confirm the location of listings, removing suspected fraudulent listings or listings repeatedly reported by guests to be significantly not as described, and removing hosts and guests who fail to comply with our policies. While these initiatives are crucial for community trust, they can increase platform friction, potentially reducing host and guest activity and materially adversely affecting our business. These trust and safety efforts, including limited verification of hosts and listings and restrictions on certain types of bookings, our neighborhood hotline, or other initiatives, incur significant costs and may lead to fewer listings and bookings.

As a global platform, the implementation of these measures varies by region and may be limited by local laws. Despite our investments, we cannot guarantee these measures will be successful, significantly reduce criminal or fraudulent activity on or off our platform, or be sufficient to protect our reputation in the event of such activity. Additionally, our community standards, including commitments to inclusion and belonging that are required when a user joins Airbnb, may not always be clearly communicated or well understood by all parts of our community, leading to unmet expectations among hosts and guests, which may lead to fewer listings and bookings.

We are subject to payment-related fraud, and an increase in or failure to deal effectively with fraud, fraudulent activities, fictitious transactions, or illegal transactions would materially adversely affect our business, results of operations, and financial condition.

We process a significant volume and dollar value of transactions on a daily basis. When hosts do not fulfill their obligations to guests, there are fictitious listings or fraudulent bookings on our platform, or there are host account takeovers, we have incurred and will continue to incur losses from claims by hosts and guests, and these losses may be substantial. Such instances have and can lead to the reversal of payments received by us for such bookings, referred to as a “chargeback.” For the year ended December 31, 2024, total chargeback expense was \$96 million. The capabilities of criminal fraudsters and the susceptibility of individuals to fraud pose ongoing risks. Despite measures to detect and reduce fraud, these efforts require continuous improvement to address evolving threats, especially with new payment methods and technology platforms.

Our payments platform is vulnerable to illegal uses, such as money laundering and fraudulent listings, which can lead to legal claims, regulatory investigations, and reputational harm. While we strive to combat these activities, our measures may not always be effective, and failure to reduce fraud could result in fines, higher fees, or loss of payment card network access, which could materially adversely affect our business, results of operations and financial condition.

Our use of third-party open-source software and our open-source contributions could adversely affect our ability to offer or protect our platform and services and subject us to costly litigation and other disputes.

From time to time, we incorporate certain open-source software into our code base as we continue to develop our platform and services. Open source software is licensed by its authors or owners under open source licenses, which in some instances may subject us to certain unfavorable conditions, including requirements that we offer our products that incorporate the open source software for no cost, that we make publicly available the source code for any modifications or derivative works we create based upon, incorporating, or using the open source software, or that we license such modifications or derivative works under the terms of the particular open source license. In addition, the use of third-party open-source software could expose us to greater risks than the use of third-party commercial software to the extent open-source licensors do not provide warranties or controls on the functionality or origin of the software equivalent to those provided by third-party commercial software providers. We also license to others some of our software through open-source projects. Open sourcing our own software requires us to make the source code publicly available, and therefore can limit our ability to protect our intellectual property rights with respect to that software. From time to time, companies that use open-source software have faced claims challenging the use of open-source software or compliance with open-source license terms. Furthermore, there is an increasing number of open-source software license types, almost none of which have been tested in a court of law, resulting in a dearth of guidance regarding the proper legal interpretation of such licenses. We could be subject to suits by parties claiming ownership of what we believe to be open-source software or claiming noncompliance with open-source licensing terms.

Inadvertent use of open-source software can occur in software development in the Internet and technology industries. Such inadvertent use of open source software could expose us to claims of non-compliance with the applicable terms of the underlying licenses, which could lead to unforeseen business disruptions, including being restricted from offering parts of our platform which incorporate the software, being required to publicly release proprietary source code, being required to re-engineer parts of our code base to comply with license terms, or being required to extract the open source software at issue. Our exposure to these risks may be increased as a result of evolving our core source code base, introducing new offerings, integrating acquired-company technologies, or making other business changes, including in areas where we do not currently compete. Any of the foregoing could adversely impact the value or enforceability of our intellectual property, and materially adversely affect our business, results of operations, and financial condition.

If we or our third-party providers fail to protect confidential information and/or experience security incidents, there may be damage to our brand and reputation, material financial penalties, and legal liability, along with a decline in use of our platform, which would materially adversely affect our business, results of operations, and financial condition.

We own and manage some IT Systems but also rely on third parties for a range of IT Systems and related products and services, including, among others, cloud computing services and other third parties for the provision of our community support operations. We face evolving cybersecurity risks that threaten the confidentiality, integrity, and availability of our and our third-party providers' IT Systems and confidential information, including personal data and proprietary information. As we expand our technology use and collaborate with third parties, managing these threats becomes more challenging. These risks come from diverse threat actors, such as state-sponsored organizations, opportunistic hackers and hacktivists, as well as through diverse attack vectors, such as social engineering/phishing, malware (including ransomware), malfeasance by company insiders, suppliers or providers, and human or technological error, and as a result of malicious code embedded in open-source software, or misconfigurations, bugs, or other vulnerabilities in software and hardware that is integrated into our or our providers' IT Systems, products or services. We have, from time to time, found defects or errors in our IT Systems that have resulted in, and may discover additional issues in the future that could result in, platform unavailability or system disruption, or the inability of our systems to implement timely updates that are required for regulatory compliance. Additionally, any integration of AI or machine learning in our or any providers' operations, products or services poses new or unknown cybersecurity risks and challenges. Acquisitions of companies with vulnerable IT Systems further expose us to cybersecurity risks.

We encrypt certain data in transit and at rest, but advances in hacking and AI and machine learning may challenge our defenses. We and certain of our third-party service providers have experienced cyberattacks and other security incidents in the past, including distributed denial-of-service type attacks on our IT Systems that have made portions of our platform slow or unavailable for periods of time. Cyberattacks are expected to accelerate on a global basis in both frequency and magnitude as threat actors are becoming increasingly sophisticated in using techniques—including AI—that circumvent controls, evade detection, and remove forensic evidence, which means that we and our third-party providers may be unable to detect, investigate, contain or recover from future attacks or incidents in a timely or effective manner. Despite significant investments in security, we cannot fully mitigate these risks, and such security incidents could disrupt operations and lead to negative publicity, reputational damage, loss of users, increased support costs, regulatory fines, legal claims (including class actions), and significant financial losses, especially under laws which impose statutory damages per breached record, all of which could materially impact our business, results of operations, and financial condition.

We currently rely on a number of third-party service providers to host and deliver a significant portion of our platform and services, and any interruptions or delays in services from these third parties, such as those resulting from cybersecurity incidents, could impair the delivery of our platform and services, and our business, results of operations, and financial condition could be materially adversely affected.

We rely primarily on Amazon Web Services in the United States and abroad to host and deliver our platform. Third parties also provide services to key aspects of our operations, including Internet connections and networking, messaging, data storage and processing, trust and safety, security infrastructure, source code management, and testing and deployment. In addition, we rely on third parties for many aspects of our payments platform, and the vast majority of our community support operations is performed by a limited number of third-party service providers. We also rely on Google Maps and other third-party services for maps and location data that are core to the functionality of our platform, and we integrate applications, content, and data from third parties to deliver our platform and services.

We do not control the operation, physical security, or data security of any of these third-party providers. Despite our efforts to use commercially reasonable diligence in the selection and retention of such third-party providers, such efforts may be insufficient or inadequate to prevent or remediate such risks. Some of our third-party providers, including our cloud computing providers and our payment processing partners, have been and may be subject to further intrusions, computer viruses, malicious software (such as ransomware), denial-of-service attacks, phishing attacks, sabotage, acts of vandalism, terrorism, or other misconduct, and incidents due to inadvertent error or malfeasance by employees, contractors or other parties. There can be no assurance that our service providers will anticipate or prevent all types of attacks or that any security measures will be effective against all types of cybersecurity threats and risks. Our service providers are vulnerable to damage or interruption from power loss, telecommunications failures, fires, floods, earthquakes, hurricanes, tornadoes, and similar events, and they may be subject to financial, legal, regulatory, and labor issues, each of which may impose additional costs or requirements on us or prevent these third parties from providing services to us or our customers on our behalf. In addition, these third parties may breach their agreements with us, disagree with our interpretation of contract terms or applicable laws and regulations, refuse to continue or renew these agreements on commercially reasonable terms or at all, fail to or refuse to process transactions or provide other services adequately, take actions that degrade the functionality of our platform and services, increase prices, impose additional costs or requirements on us or our customers, or give preferential treatment to our competitors. If we are unable to procure alternatives in a timely and efficient manner and on acceptable terms, or at all, we may be subject to business disruptions, losses, or costs to remediate any of these deficiencies and reputational harm. Our systems currently do not provide complete redundancy of data storage or processing or payment processing, and business continuity and disaster recovery plans may not be effective. The occurrence of any of the above events could result in hosts and guests ceasing to use our platform, reputational damage, legal or regulatory proceedings, or other adverse consequences, which could materially adversely affect our business, results of operations, and financial condition.

Risks Related to Ownership of Our Class A Common Stock

Stock Price and Volatility Risks

Our focus on the long-term best interests of our Company and our consideration of all of our stakeholders, including our hosts, guests, the communities in which we operate, employees, and shareholders, may conflict with short- or medium-term financial interests and business performance, which may negatively impact the value of our Class A common stock.

We believe that prioritizing the long-term interests of our Company and stakeholders, including hosts, guests, the communities in which we operate, employees, and shareholders, will help ensure sustained success and long-term shareholder value. This focus may lead us to make decisions that negatively impact short- or medium-term business performance or the trading price of our Class A common stock, potentially making it less attractive to short-term investors. Our long-term strategies, such as enhancing platform trust and safety, improving community support, investing in relationships, and adapting to regulations, may not result in the long-term benefits that we expect, in which case our business, results of operations, and financial condition, as well as the trading price of our Class A common stock, could be materially adversely affected.

Our share price has been, and may continue to be, volatile, and the value of our Class A common stock may decline.

The market price of our Class A common stock has been, and may continue to be, volatile and could be subject to wide fluctuations in response to the Risk Factors described in this Annual Report on Form 10-K, and others beyond our control, including:

- actual or anticipated fluctuations in our revenue or other operating metrics;
- our actual or anticipated operating performance and the operating performance of our competitors;
- changes in the financial projections we provide to the public or our failure to meet these projections;
- failure of securities analysts to initiate or maintain coverage of us, changes in financial estimates by any securities analysts who follow our Company, or our failure to meet the estimates or the expectations of investors;
- any major change in our board of directors, management, or key personnel;
- the economy as a whole and market conditions in our industry;
- rumors and market speculation involving us or other companies in our industry;
- announcements by us or our competitors of significant innovations, new products, services, features, integrations, or capabilities, acquisitions, strategic investments, partnerships, joint ventures, or capital commitments;
- the legal and regulatory landscape and changes in the application of existing laws or adoption of new laws that impact our business, hosts, and/or guests, including changes in short-term occupancy and tax laws;
- legal and regulatory claims, litigation, or pre-litigation disputes and other proceedings;
- the impact of pandemics, epidemics, or other health emergencies on the travel and accommodations industries;
- other events or factors, including those resulting from war, incidents of terrorism, or responses to these events; and
- sales or expected sales of our Class A common stock by us, our officers, directors, principal stockholders, and employees.

In addition, stock markets, and the trading of travel companies' and technology companies' stocks in particular, have experienced significant price and volume fluctuations that have affected and continue to affect the market prices of equity securities of many companies. Stock prices of many companies, including travel companies and technology companies, have fluctuated in a manner often unrelated to the operating performance of those companies. In the past, stockholders have instituted securities class action litigation following periods of stock volatility. If we were to become involved in securities litigation, it could subject us to substantial costs, divert resources and the attention of management from our business, and materially adversely affect our business, results of operations, and financial condition.

Our multi-series structure may have a material adverse effect on the market price of our Class A common stock.

Our multi-series structure may result in a lower or more volatile market price of our Class A common stock, adverse publicity, or other adverse consequences. The multi-series structure of our common stock could make us ineligible for inclusion in certain indices and, as a result, mutual funds, exchange-traded funds, and other investment vehicles that attempt to passively track those indices may not invest in our Class A common stock. It is unclear what effect, if any, such policies and restrictions could have on the valuations of publicly-traded companies excluded from such indices, but it is possible that they may depress valuations, as compared to similar companies that are included, and could make our Class A common stock less attractive to other investors. As a result, the market price of our Class A common stock could be adversely affected.

We cannot guarantee that our share repurchase program will be utilized to the full value approved or that it will enhance long-term stockholder value.

Our board of directors has authorized management to repurchase shares of our Class A common stock at management's discretion. Share repurchases may be made through a variety of methods, which may include open market purchases, privately negotiated transactions, block trades, or accelerated share repurchase transactions or by any combination of such methods. Any such repurchases will be made from time to time subject to market and economic conditions, applicable legal requirements, and other relevant factors. The manner, timing and amount of any share repurchases may fluctuate and will be determined by us based on a variety of factors, including the market price of our common stock, our priorities for the use of cash to support our business operations and plans, general business and market conditions, tax laws, and alternative investment opportunities, all of which may be further impacted by macroeconomic conditions and factors, including rising interest rates, and inflation, tariffs, global conflicts, and public health crises. Our share repurchase program authorizations do not have an expiration date nor do they obligate us to acquire any specific number or dollar value of shares. Our share repurchase programs may be modified, suspended, or terminated at any time, which may result in a decrease in the trading prices of our Class A common stock. Additionally, the Inflation Reduction Act of 2022 introduced a 1% excise tax on share repurchases, which increases the costs associated with

repurchasing shares of our common stock. Even if our share repurchase programs are fully implemented, they may not enhance long-term stockholder value or may not prove to be the best use of our cash. Share repurchases could have an impact on our share trading prices, increase the volatility of the price of our Class A common stock, or reduce our available cash balance such that we will be required to seek financing to support our operations.

Under our restated certificate of incorporation, we are authorized to issue 2,000,000,000 shares of Class C common stock. Any future issuance of Class C common stock may have the effect of further concentrating voting control in the holders of our Class B common stock, including the Class B common stock held by our founders, and may discourage potential acquisitions of our business, and could have an adverse effect on the trading price of our Class A common stock.

Under our restated certificate of incorporation, we are authorized to issue 2,000,000,000 shares of Class C common stock. We may in the future issue shares of Class C common stock for a variety of corporate purposes, including financings, acquisitions, investments, and equity incentives to our employees, consultants, and directors. Our authorized but unissued shares of Class C common stock are available for issuance with the approval of our board of directors without stockholder approval, except as may be required by the Listing Rules of The Nasdaq Stock Market LLC ("Nasdaq"). Because the Class C common stock carries no voting rights (except as otherwise required by law), is not convertible into any other capital stock, and is not listed for trading on an exchange or registered for sale with the SEC, shares of Class C common stock may be less liquid and less attractive to any future recipients of these shares than shares of Class A common stock, although we may seek to list the Class C common stock for trading and register shares of Class C common stock for sale in the future. In addition, because our Class C common stock carries no voting rights (except as otherwise required by law), if we issue shares of Class C common stock in the future, the holders of our Class B common stock, including our founders who are parties to a Nominating Agreement and a Voting Agreement, may be able to elect all of our directors and to determine the outcome of most matters submitted to a vote of our stockholders for a longer period of time than would be the case if we issued Class A common stock rather than Class C common stock in such transactions. This concentrated control could delay, defer, or prevent a change of control, merger, consolidation, takeover, or other business combination involving us that stockholders may otherwise support, and could allow us to take actions that some of our stockholders do not view as beneficial, which could reduce the trading price of our Class A common stock. Furthermore, this concentrated control could also discourage a potential investor from acquiring our Class A common stock due to the limited voting power of such stock relative to the Class B common stock and might harm the trading price of our Class A common stock. In addition, if we issue shares of Class C common stock in the future, such issuances would have a dilutive effect on the economic interests of our Class A and Class B common stock. Any such issuance of Class C common stock could also cause the trading price of our Class A common stock to decline.

We may raise additional capital in the future or otherwise issue equity, which could have a dilutive effect on existing stockholders and adversely affect the market price of our common stock. If we require additional funding to support our business, this additional funding may not be available on reasonable terms or at all.

We may from time to time issue additional shares of common stock, including as consideration for any future acquisitions. As a result, our stockholders may experience immediate dilution. We may engage in equity or debt financings to secure additional funds. If we raise additional funds through future issuances of equity or convertible debt securities, our existing stockholders could suffer significant dilution, and any new equity securities we issue could have rights, preferences, and privileges superior to those of holders of our Class A common stock. In addition, our stockholders will experience additional dilution when option holders exercise their right to purchase common stock under our equity incentive plans, when RSUs vest and settle, when we issue equity awards to our employees under our equity incentive plans, or when we otherwise issue additional equity. Additionally, the terms of future debt agreements could include more restrictive covenants, which could further restrict our business operations.

There has been increased volatility in the financial and securities markets, which has generally made access to capital less certain and increased the cost of obtaining new capital. Should we require additional funding, we cannot be sure that additional financing will be available to us on reasonable terms or at all. If we cannot raise additional funds when we need them, our ability to continue to support our business and to respond to business challenges would be significantly limited, and our business, results of operations, and financial condition would be materially adversely affected.

Corporate Governance and Control

The multi-series structure of our common stock has the effect of concentrating voting control with certain holders of our common stock, including our directors, executive officers, and 5% stockholders, and their respective affiliates. This ownership limits or precludes other stockholders' ability to influence corporate matters, including the election of directors, amendments of our organizational documents, and any merger, consolidation, sale of all or substantially all of our assets, or other major corporate transaction requiring stockholder approval.

Our Class A common stock has one vote per share, our Class B common stock has 20 votes per share, our Class C common stock has no votes per share, and our Class H common stock has no votes per share. Because of the 20-to-one voting ratio between our Class B and Class A common stock, the holders of our Class B common stock collectively continue to control a significant percentage of the combined voting power of our common stock and therefore are able to control all matters submitted to our stockholders for approval until all such outstanding shares of Class B common stock have converted into shares of our Class A common stock. Furthermore, our founders, who collectively hold a majority of the voting power of our outstanding capital stock, are party to a Voting Agreement under which each founder and his affiliates and certain other entities agree to vote their shares for the election of each individual founder to our board of directors. We and each of our founders are party to a Nominating Agreement under which we and the founders are required to take certain actions to include the founders in the slate of nominees nominated by our board of directors for the applicable class of directors, include them in our proxy statement, and solicit proxies or consents in favor of electing each founder to our board of directors. This concentrated control limits or precludes other stockholders' ability to influence corporate matters for the foreseeable future, including the election of directors, amendments of our organizational documents, and any merger, consolidation, sale of all or substantially all of our assets, or other major

corporate transaction requiring stockholder approval. In addition, this may prevent or discourage unsolicited acquisition proposals or offers for our capital stock that stockholders may believe are in their best interest.

Transfers by holders of Class B common stock will generally result in those shares converting to Class A common stock, subject to limited exceptions, such as certain transfers effected for estate planning purposes or transfers among our founders, if all of our founders agree to such transfers. Each share of our Class B common stock is convertible at any time at the option of the Class B holder into one share of Class A common stock. The conversion of Class B common stock to Class A common stock will have the effect, over time, of increasing the relative voting power of those holders of Class B common stock who retain their shares in the long term. As a result, it is possible that one or more of the persons or entities holding our Class B common stock could gain significant voting control as other holders of Class B common stock sell or otherwise convert their shares into Class A common stock. In addition, the conversion of Class B common stock to Class A common stock dilutes holders of Class A common stock in terms of voting power within the Class A common stock. In addition, any future issuances of common stock would be dilutive to holders of Class A common stock. For example, because our Class C common stock carries no voting rights (except as otherwise required by law), if we issue Class C common stock in the future, the holders of Class B common stock may be able to elect all of our directors and to determine the outcome of most matters submitted to a vote of our stockholders for a longer period of time than would be the case if we issued Class A common stock rather than Class C common stock in such transactions. Further, each outstanding share of Class H common stock will convert into a share of Class A common stock on a share-for-share basis upon the sale of such share of Class H common stock to any person or entity that is not our subsidiary, which would dilute holders of Class A common stock in terms of voting power within the Class A common stock.

Anti-takeover provisions contained in our restated certificate of incorporation and amended and restated bylaws, as well as provisions of Delaware law, could impair a takeover attempt.

Our restated certificate of incorporation and amended and restated bylaws contain, and Delaware law contains, provisions which could have the effect of rendering more difficult, delaying, or preventing an acquisition deemed undesirable by our board of directors. These provisions provide for the following:

- a multi-series structure which provides our holders of Class B common stock with the ability to significantly influence the outcome of matters requiring stockholder approval, even if they own significantly less than a majority of the shares of our outstanding Class A common stock, Class B common stock, Class C common stock, and Class H common stock;
- a classified board of directors with three-year staggered terms, who can only be removed for cause, which may delay the ability of stockholders to change the membership of a majority of our board of directors;
- no cumulative voting in the election of directors, which limits the ability of minority stockholders to elect director candidates;
- the exclusive right of our board of directors to set the size of the board of directors and to elect a director to fill a vacancy, however occurring, including by an expansion of the board of directors, which prevents stockholders from being able to fill vacancies on our board of directors;
- the ability of our board of directors to authorize the issuance of shares of preferred stock and to determine the price and other terms of those shares, including voting or other rights or preferences, without stockholder approval, which could be used to significantly dilute the ownership of a hostile acquiror;
- the ability of our board of directors to alter our amended and restated bylaws without obtaining stockholder approval;
- in addition to our board of directors' ability to adopt, amend, or repeal our amended and restated bylaws, our stockholders may adopt, amend, or repeal our amended and restated bylaws only with the affirmative vote of the holders of at least 66 2/3% of the voting power of all our then-outstanding shares of capital stock;
- the required approval of (i) at least 66 2/3% of the voting power of the outstanding shares of capital stock entitled to vote generally in the election of directors, voting together as a single class, to adopt, amend, or repeal certain provisions of our restated certificate of incorporation and (ii) for so long as any shares of Class B common stock are outstanding, the holders of at least 80% of the shares of Class B common stock outstanding at the time of such vote, voting as a separate series, to adopt, amend, or repeal certain provisions of our restated certificate of incorporation;
- the ability of stockholders to act by written consent only as long as holders of our Class B common stock hold at least 50% of the voting power of our capital stock;
- the requirement that a special meeting of stockholders may be called only by an officer of our Company pursuant to a resolution adopted by a majority of our board of directors then in office or the chairperson of our board;
- advance notice procedures that stockholders must comply with in order to nominate candidates to our board of directors or to propose matters to be acted upon at a stockholders' meeting, which may discourage or deter a potential acquiror from conducting a solicitation of proxies to elect the acquiror's own slate of directors or otherwise attempting to obtain control of us; and
- the limitation of liability of, and provision of indemnification to, our directors and officers.

These provisions, alone or together, could delay or prevent hostile takeovers and changes in control or changes in our management.

As a Delaware corporation, we are also subject to provisions of Delaware law, including Section 203 of the General Corporation Law of the State of Delaware (the "Delaware General Corporation Law"), which prevents some stockholders holding more than 15% of our outstanding common stock from engaging in certain business combinations without approval of the holders of substantially all of our outstanding common stock.

Any provision of our certificate of incorporation, bylaws or Delaware law that has the effect of delaying or deterring a change in control could limit the opportunity for our stockholders to receive a premium for their shares of our common stock, and could also affect the price that some investors are willing to pay for our common stock.

Our restated certificate of incorporation and amended and restated bylaws provide for an exclusive forum in the Court of Chancery of the State of Delaware for certain disputes between us and our stockholders, and that the federal district courts of the United States

will be the exclusive forum for the resolution of any complaint asserting a cause of action under the Securities Act, which could limit our stockholders' ability to obtain a favorable judicial forum for disputes with us or our directors, officers, or other employees.

Our restated certificate of incorporation and amended and restated bylaws provide, that: (i) unless we consent in writing to the selection of an alternative forum, the Court of Chancery of the State of Delaware (or, if such court does not have subject matter jurisdiction thereof, the federal district court of the State of Delaware) will, to the fullest extent permitted by law, be the sole and exclusive forum for: (a) any derivative action or proceeding brought on behalf of the Company, (b) any action asserting a claim for or based on a breach of a fiduciary duty owed by any of our current or former director, officer, other employee, agent, or stockholder to the Company or our stockholders, including without limitation a claim alleging the aiding and abetting of such a breach of fiduciary duty, (c) any action asserting a claim against the Company or any of our current or former director, officer, employee, agent, or stockholder arising pursuant to any provision of the Delaware General Corporation Law or our certificate of incorporation or bylaws or as to which the Delaware General Corporation Law confers jurisdiction on the Court of Chancery of the State of Delaware, or (d) any action asserting a claim related to or involving the Company that is governed by the internal affairs doctrine; (ii) unless we consent in writing to the selection of an alternative forum, the federal district courts of the United States will, to the fullest extent permitted by law, be the sole and exclusive forum for the resolution of any complaint asserting a cause of action arising under the Securities Act, and the rules and regulations promulgated thereunder; (iii) any person or entity purchasing or otherwise acquiring or holding any interest in shares of capital stock of the Company will be deemed to have notice of and consented to these provisions; and (iv) failure to enforce the foregoing provisions would cause us irreparable harm, and we will be entitled to equitable relief, including injunctive relief and specific performance, to enforce the foregoing provisions. Nothing in our restated certificate of incorporation or amended and restated bylaws precludes stockholders that assert claims under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), from bringing such claims in federal court to the extent that the Exchange Act confers exclusive federal jurisdiction over such claims, subject to applicable law.

We believe these provisions may benefit us by providing increased consistency in the application of Delaware law and federal securities laws by chancellors and judges, as applicable, particularly experienced in resolving corporate disputes, efficient administration of cases on a more expedited schedule relative to other forums, and protection against the burdens of multi-forum litigation. If a court were to find the choice of forum provision that is contained in our restated certificate of incorporation or amended and restated bylaws to be inapplicable or unenforceable in an action, we may incur additional costs associated with resolving such action in other jurisdictions, which could materially adversely affect our business, results of operations, and financial condition. For example, Section 22 of the Securities Act creates concurrent jurisdiction for federal and state courts over all suits brought to enforce any duty or liability created by the Securities Act or the rules and regulations thereunder. Accordingly, there is uncertainty as to whether a court would enforce such a forum selection provision as written in connection with claims arising under the Securities Act.

The choice of forum provisions may limit a stockholder's ability to bring a claim in a judicial forum that it finds favorable for disputes with us or any of our current or former directors, officers, other employees, agents, or stockholders of the Company, which may discourage such claims against us or any of our current or former directors, officers, other employees, agents, or stockholders of the Company and result in increased costs for investors to bring a claim.

Item 1B. Unresolved Staff Comments

None.

Item 1C. Cybersecurity

Cybersecurity Risk Management and Strategy

We have developed and implemented a cybersecurity risk management program intended to protect the confidentiality, integrity, and availability of our critical systems and information, including information pertaining to hosts, guests, employees, and other users. Our cybersecurity risk management program includes a cybersecurity incident response plan ("Incident Response Plan").

Our cybersecurity risk management program is integrated into our overall enterprise risk management program and, while distinct in certain aspects described below, the program shares common methodologies, reporting channels and governance processes that apply across the enterprise risk management program to other legal, compliance, strategic, operational, and financial risk areas.

Our cybersecurity risk management program includes:

- risk assessments designed to help identify material cybersecurity risks to our critical systems, information, products, services, and our broader enterprise IT environment;
- an information security team who, in collaboration with the broader technology organization, manages and maintains our (1) cybersecurity risk assessment processes including our Incident Response Plan, (2) security controls, and (3) response to cybersecurity incidents;
- the use of external service providers, where appropriate, to assess, test or otherwise assist with aspects of our security controls;
- cybersecurity awareness training of our employees, incident response personnel, and senior management;
- an Incident Response Plan that includes procedures for recognizing and responding to cybersecurity incidents; and
- a third-party risk management process for service providers, suppliers, and vendors who have access to our critical systems and information.

There can be no assurance that our cybersecurity risk management program and processes, including our policies, controls or procedures, will be fully implemented, complied with or effective in protecting our systems and confidential information. We have not identified risks from known cybersecurity threats, including as a result of any prior cybersecurity incidents, that have materially affected or are reasonably likely to materially affect us, including our operations, business strategy, results of operations, or financial condition.

Cybersecurity Governance

Our board of directors considers cybersecurity risk as part of its risk oversight function and has delegated to the Audit Risk and Compliance Committee (the “Audit Committee”) oversight of cybersecurity, privacy and other information technology risks. The Audit Committee has responsibility for oversight of management’s implementation of our cybersecurity risk management program.

The Audit Committee receives regular reports and briefings from management on our cybersecurity risks and cybersecurity risk management program updates. In addition, management updates the Audit Committee, as necessary, regarding any material cybersecurity incidents, as well as any incidents with lesser impact potential.

Our management team, including our Chief Legal Officer, our Chief Security Officer and our Chief Technology Officer, is responsible for assessing and managing our material risks from cybersecurity threats. The team has primary responsibility for our overall cybersecurity risk management program and supervises both our internal information security team and our retained external cybersecurity consultants. Our management team has over 20 years of cybersecurity technology leadership experience.

Our management team supervises our information security team’s efforts to prevent, detect, mitigate, and remediate cybersecurity risks and incidents through various means, which may include briefings from internal security personnel; threat intelligence and other information obtained from governmental, public or private sources, or external consultants engaged by us; and alerts and reports produced by security tools deployed in the IT environment.

Item 2. Properties

We are headquartered in San Francisco, California, where we have lease commitments for approximately 0.8 million square feet, including approximately 0.5 million square feet offered for sublease, across multiple buildings.

As of December 31, 2024, we leased office facilities totaling approximately 1.5 million square feet, including approximately 0.9 million square feet offered for sublease, in multiple locations in the United States and internationally. We believe our facilities are adequate and suitable for our current needs.

Item 3. Legal Proceedings

We are currently involved in, and may in the future be involved in, legal proceedings, claims, and government investigations in the ordinary course of business. These include proceedings, claims, and investigations relating to, among other things, regulatory matters, commercial matters, intellectual property, competition, tax, employment, pricing, discrimination, consumer rights, personal injury, and property rights. See Note 13, *Commitments and Contingencies – Legal and Regulatory Matters*, to our consolidated financial statements included in Item 8 of this Annual Report on Form 10-K.

Depending on the nature of the proceeding, claim, or investigation, we may be subject to monetary damage awards, fines, penalties, or injunctive orders. Furthermore, the outcome of these matters could materially adversely affect our business, results of operations, and financial condition. The outcomes of legal proceedings, claims, and government investigations are inherently unpredictable and subject to significant judgment to determine the likelihood and amount of loss related to such matters. While it is not possible to determine the outcomes, we believe based on our current knowledge that the resolution of all such pending matters will not, either individually or in the aggregate, have a material adverse effect on our business, results of operations, cash flows, or financial condition.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market Information for Class A Common Stock

Our Class A common stock has been listed on the Nasdaq Global Select Market under the symbol "ABNB" since December 10, 2020. Prior to that date, there was no public trading market for our Class A common stock. Our Class B, Class C, and Class H common stock are neither listed nor publicly traded.

Holders of our Common Stock

Holders of our common stock as of January 31, 2025, were as follows:

- Class A common stock: 905 stockholders of record. This number does not include stockholders for whom shares were held in "nominee" or "street name."
- Class B common stock: 74 stockholders of record.
- Class C common stock: There were no shares outstanding.
- Class H common stock: All outstanding shares were held by our wholly-owned Host Endowment Fund subsidiary.

Dividend Policy

We intend to retain any future earnings and do not anticipate declaring or paying any cash dividends in the foreseeable future. We may enter into credit agreements or other borrowing arrangements in the future that may restrict our ability to declare or pay cash dividends or make distributions. Any future determination to declare cash dividends will be made at the discretion of our board of directors, subject to applicable laws and will depend on a number of factors, including our financial condition, results of operations, capital requirements, contractual restrictions, general business conditions, and other factors our board of directors may deem relevant.

Unregistered Sales of Equity Securities

None.

Issuer Purchases of Equity Securities

The following table sets forth information relating to repurchases of our equity securities during the three months ended December 31, 2024 (in millions, except average price paid per share amounts):

Period	Total Number of Shares Purchased	Average Price Paid per Share ⁽¹⁾	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares That May Yet be Purchased Under the Plans or Programs ⁽²⁾
October 1 - 31	2.3	\$ 132.84	2.3	\$ 3,853
November 1 - 30	1.9	\$ 136.12	1.9	\$ 3,590
December 1 - 31	2.0	\$ 134.95	2.0	\$ 3,320
Total	6.2	\$ 134.54	6.2	

(1) Includes broker commissions.

(2) On February 13, 2024, we announced that our board of directors approved a share repurchase program with authorization to purchase up to 6.0 billion of our Class A common stock at management's discretion. The share repurchase program does not have an expiration date, does not obligate us to repurchase any specific number of shares, and may be modified, suspended or terminated at any time at our discretion.

Performance Graph

The following performance graph and related information shall not be deemed "soliciting material" or to be "filed" with the SEC for purposes of Section 18 of the Exchange Act or incorporated by reference into any filing of Airbnb, Inc. under the Securities Act or the Exchange Act.

The graph below compares the cumulative total stockholder return on our Class A common stock with the cumulative total return on the S&P 500 Index ("S&P 500"), the S&P 500 Information Technology Index ("S&P 500 IT"), and the Nasdaq Composite Index ("NASDAQ"). The graph assumes \$100 was invested at the market close on December 10, 2020, which was the first day our Class A common stock began trading. Data for the S&P 500, S&P 500 IT, and NASDAQ assume reinvestment of dividends. The graph uses the closing market price on December 10, 2020 of \$144.71 per share as the initial value of our Class A common stock. The comparisons in the graph below are based upon historical data and are not indicative of, nor intended to forecast, future performance of our Class A common stock.

Performance Graph for 10-K.jpg

Item 6. [Reserved]

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

You should read the following discussion and analysis of our financial condition and results of operations together with our consolidated financial statements and related notes included in Item 8 of this Annual Report on Form 10-K. This discussion contains forward-looking statements based upon current expectations that involve risks and uncertainties. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of various factors, including those set forth under the section titled “Risk Factors” or in other parts of this Annual Report on Form 10-K. Our historical results are not necessarily indicative of the results that may be expected for any period in the future. Except as otherwise noted, all references to 2024 refer to the year ended December 31, 2024, references to 2023 refer to the year ended December 31, 2023, and references to 2022 refer to the year ended December 31, 2022.

This section of this Annual Report on Form 10-K discusses 2024 and 2023 items and year-to-year comparisons between 2024 and 2023. Discussions of 2022 items and year-to-year comparisons between 2023 and 2022 are not included in this Form 10-K, and can be found in “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in Item 7 of Part II of our Annual Report on Form 10-K for the year ended December 31, 2023, filed on February 16, 2024.

Glossary of Terms

Active booker	An active booker is a unique guest who has booked a stay or experience in a given period.
Active listing	We consider a listing of a home or an experience to be an active listing if it is viewable on Airbnb and has been previously booked at least once on Airbnb (excluding HotelTonight).
Available listings	Available listings are accommodations and experiences that are viewable on a certain date on our platform (excluding HotelTonight).
Check-ins	Check-ins represent individual stays or experiences that occur during a period that have not been canceled.
Co-hosts	Co-hosts are experienced hosts who provide personalized support based on the hosts’ needs, from listing setup to managing bookings and communicating with guests.
Guest arrivals	Guest arrivals represent an individual and all co-travelers included on a reservation for a stay for completed check-ins during a given period.
Hosts	We count the number of hosts on our platform based on the number of users with available listings as of a certain date.
Payments to customers	We make payments to customers as part of our referral programs and marketing promotions, and refund activities. The payments are generally in the form of coupon credits to be applied toward future bookings or as cash refunds.

Overview

We are a community based on connection and belonging—a community that was born in 2007 when two hosts welcomed three guests to their San Francisco home, and has since grown to over 5 million hosts who have welcomed over 2 billion guest arrivals in almost every country and region across the globe. Every day, hosts offer unique stays and experiences that make it possible for guests to connect with communities in a more authentic way.

We have five stakeholders and we have designed our Company with all of them in mind. Along with employees and shareholders, we serve hosts, guests, and the communities in which they live. We intend to make long-term decisions considering all of our stakeholders because their collective success is key for our business to thrive.

2024 Financial Highlights

In 2024, revenue increased by 12% to \$11.1 billion compared to 2023, primarily due to a 10% increase in Nights and Experiences Booked of 43.3 million combined with higher Average Daily Rate (“ADR”) driving a 12% increase in Gross Booking Value of \$8.5 billion. The growth in GBV and revenue demonstrated continued strong travel demand.

In 2024, net income decreased by 45% to \$2.6 billion, compared to the prior year, primarily due to the release of the majority of our valuation allowance on U.S. federal and state deferred tax assets of \$2.9 billion in 2023, and the recognition of deferred tax expense related to the utilization of some of those assets in 2024 (see Note 14, *Income Taxes*, to our consolidated financial statements included in Item 8 of this Annual Report on Form 10-K for further details). This was partially offset due to a decrease in withholding taxes, associated fees, and penalties and interest expense due to a withholding tax settlement related to Italy of \$770 million, \$196 million and \$64 million respectively.

Adjusted EBITDA¹ increased 11% to \$4.0 billion in 2024 demonstrating the continued strength of our business, growth in revenue and discipline in managing our cost structure.

Our net cash provided by operating activities was \$4.5 billion in 2024, compared to \$3.9 billion, in the prior year. We generated Free Cash Flow¹ of \$4.5 billion for the year ended December 31, 2024, compared to \$3.8 billion, in the prior year.

During 2024, we repurchased an aggregate of 24.5 million shares of Class A common stock for \$3.4 billion. As of December 31, 2024, we completed the repurchases under the August 2, 2022 share repurchase program and had \$3.3 billion available for repurchase of Class A common stock under the May 9, 2023 share repurchase program.

Trends

Inflation and other macroeconomic pressures in the United States and the global economy, such as tariffs, foreign currency fluctuations, as well as wars and other geopolitical conflicts, have contributed to an increasingly complex business environment. As a result, our future operational results may be subject to volatility. Additionally, health-related events, political instability, acts of terrorism, and natural disasters, are examples of other events that could have a negative impact on the travel industry in the future.

Key Business Metrics and Non-GAAP Financial Measures

We track the following key business metrics and financial measures that are not calculated and presented in accordance with generally accepted accounting principles in the United States of America (“U.S. GAAP”) (“non-GAAP financial measures”) to evaluate our operating performance, identify trends, formulate financial projections, and make strategic decisions. Accordingly, we believe that these key business metrics and non-GAAP financial measures provide useful information to investors and others in understanding and evaluating our results of operations in the same manner as our management team. We believe that non-GAAP financial information, when taken collectively, may be helpful to investors because it provides consistency and comparability with past financial performance, and assists in comparisons with other companies, some of which use similar non-GAAP financial information to supplement their U.S. GAAP results.

These key business metrics and non-GAAP financial measures are presented for supplemental informational purposes only, should not be considered a substitute for financial information presented in accordance with U.S. GAAP, and may be different from similarly titled metrics or measures presented by other companies. A reconciliation of each non-GAAP financial measure to the most directly comparable financial measure stated in accordance with U.S. GAAP is provided under the subsection titled “—Adjusted EBITDA Reconciliation” and “—Free Cash Flow Reconciliation” below. Investors are encouraged to review the related U.S. GAAP financial measures and the reconciliation of these non-GAAP financial measures to their most directly comparable U.S. GAAP financial measures.

Key Business Metrics

We review the following key business metrics to measure our performance, identify trends, formulate financial projections, and make strategic decisions. We are not aware of any uniform standards for calculating these key metrics, which may hinder comparability with other companies that may calculate similarly titled metrics in a different way.

¹ A reconciliation of non-GAAP financial information to the most comparable U.S. GAAP financial measures is provided under the subsection titled “Key Business Metrics and Non-GAAP Financial Measures—Adjusted EBITDA Reconciliation” and “—Free Cash Flow Reconciliation” below.

The following table summarizes our key business metrics, for each period presented below (in millions, except percentages):

	2023	2024	% Change
Nights and Experiences Booked	448	492	10 %
Gross Booking Value	\$ 73,252	\$ 81,784	12 %

Nights and Experiences Booked

Nights and Experiences Booked is a key measure of the scale of our platform, which in turn drives our financial performance. Nights and Experiences Booked on our platform in a period represents the sum of the total number of nights booked for stays and the total number of seats booked for experiences, net of cancellations and alterations that occurred in that period. For example, a booking made on February 15 would be reflected in Nights and Experiences Booked for our quarter ended March 31. If, in the example, the booking was canceled on May 15, Nights and Experiences Booked would be reduced by the cancellation for our quarter ended June 30. A night can include one or more guests and can be for a listing with one or more bedrooms. Nights and Experiences Booked grows as we attract new customers to our platform and as repeat guests increase their activity on our platform. A seat is booked for each participant in an experience. Substantially all of the bookings on our platform to date have come from nights. We believe Nights and Experiences Booked is a key business metric to help investors and others understand and evaluate our results of operations in the same manner as our management team, as it represents a single unit of transaction on our platform.

The increase in our Nights and Experiences Booked was driven by strong growth across all regions.

Gross Booking Value

GBV represents the dollar value of bookings on our platform in a period and is inclusive of host earnings, service fees, cleaning fees, and taxes, net of cancellations and alterations that occurred during that period. The timing of recording GBV and any related cancellations is similar to that described in the subsection titled “— Key Business Metrics and Non-GAAP Financial Measures — Nights and Experiences Booked” above. Revenue from the booking is recognized upon check-in; accordingly, GBV is a leading indicator of revenue. The entire amount of a booking is reflected in GBV during the quarter in which booking occurs, whether the guest pays the entire amount of the booking upfront or elects to use our Pay Less Upfront program. Growth in GBV reflects our ability to attract and retain customers and reflects growth in Nights and Experiences Booked.

The increase in our GBV was primarily due to an increase in Nights and Experiences Booked, combined with a modest increase in ADR. Similar to Nights and Experiences Booked, our GBV improvement was driven by growth in bookings in all regions.

Non-GAAP Financial Measures

Our non-GAAP financial measures include Adjusted EBITDA, Adjusted EBITDA Margin, Free Cash Flow and Free Cash Flow Margin, which are described below. A reconciliation of each non-GAAP financial measure to the most directly comparable financial measure stated in accordance with U.S. GAAP is provided below. Investors are encouraged to review the related U.S. GAAP financial measures and the reconciliation of these non-GAAP financial measures to their most directly comparable U.S. GAAP financial measures. Adjusted EBITDA and Adjusted EBITDA Margin have limitations as a financial measure, should be considered as supplemental in nature, and are not meant as a substitute for the related financial information prepared in accordance with U.S. GAAP. Because of these limitations, you should consider Adjusted EBITDA and Adjusted EBITDA Margin alongside other financial performance measures, including net income and net income margin as well as our other U.S. GAAP results. Free Cash Flow and Free Cash Flow Margin have limitations as an analytical tool and should not be considered in isolation or as a substitute for analysis of other U.S. GAAP financial measures, such as net cash provided by operating activities and net cash provided by operating activities margin. Free Cash Flow and Free Cash Flow Margin do not reflect our ability to meet future contractual commitments and may be calculated differently by other companies in our industry, limiting its usefulness as a comparative measure.

Non-GAAP Measure	Definition	Purpose of Non-GAAP Measure
Adjusted EBITDA & Adjusted EBITDA Margin	<p><i>Adjusted EBITDA:</i> Net income adjusted for:</p> <ul style="list-style-type: none"> • provision for (benefit from) income taxes; • other income (expense), net; • interest income; • depreciation and amortization; • stock-based compensation expense; • acquisition-related impacts consisting of gains (losses) recognized on changes in the fair value of contingent consideration arrangements, and • lodging taxes for which we may have joint and several liability with hosts for collecting and remitting such taxes, withholding taxes on payments made to hosts and any related settlements, and transactional taxes where there is significant uncertainty as to how the taxes apply to our platform. <p><i>Adjusted EBITDA Margin:</i> Adjusted EBITDA divided by revenue.</p>	<ul style="list-style-type: none"> • Enhances comparability on a consistent basis and provides investors with useful insight into the underlying trends of the business. • Used by management to make operating decisions such as evaluating performance, performing strategic planning, and budgeting.
Free Cash Flow & Free Cash Flow Margin	<p><i>Free Cash Flow:</i> Net cash provided by operating activities less purchases of property and equipment.</p> <p><i>Free Cash Flow Margin:</i> Free Cash Flow divided by revenue.</p>	<ul style="list-style-type: none"> • Indicator of liquidity that provides information to our management and investors about the amount of cash generated from operations, after purchases of property and equipment, that can be used for strategic initiatives.

The following table summarizes our non-GAAP financial measures, along with the most directly comparable U.S. GAAP measure, for each period presented below (in millions, except percentages):

	2023	2024
Net income	\$ 4,792	\$ 2,648
Net income margin	48 %	24 %
Adjusted EBITDA	\$ 3,653	\$ 4,041
Adjusted EBITDA Margin	37 %	36 %
Net cash provided by operating activities	\$ 3,884	\$ 4,518
Net cash provided by operating activities margin	39 %	41 %
Free Cash Flow	\$ 3,837	\$ 4,484
Free Cash Flow Margin	39 %	40 %

Adjusted EBITDA Reconciliation

The following is a reconciliation of net income to Adjusted EBITDA (in millions, except percentages):

	2023	2024
Revenue	\$ 9,917	\$ 11,102
Net income	\$ 4,792	\$ 2,648
Adjusted to exclude the following:		
Provision for (benefit from) income taxes	(2,690)	683
Other expense, net	137	40
Interest income	(721)	(818)
Depreciation and amortization	44	65
Stock-based compensation expense	1,120	1,407
Acquisition-related impacts	(3)	(7)
Lodging taxes, host withholding taxes, and transactional taxes, net	974	23
Adjusted EBITDA	\$ 3,653	\$ 4,041
Adjusted EBITDA Margin	37 %	36 %

The above items are excluded from our Adjusted EBITDA measure because they are non-cash in nature, or because the amount and timing of these items are unpredictable, not driven by core results of operations, and renders comparisons with prior periods and competitors less meaningful.

The increase in Adjusted EBITDA for the year ended December 31, 2024, compared to the prior year, was primarily driven by growth in revenue which was driven by the increase in the number of check-ins relating to Nights and Experiences Booked and a modest increase in ADR.

During 2023, we released \$2.9 billion of our valuation allowance related to our U.S. federal and state deferred tax assets (see Note 14, *Income Taxes*, to our consolidated financial statements included in Item 8 of Part II of this Annual Report on Form 10-K for further details).

Free Cash Flow Reconciliation

The following is a reconciliation of net cash provided by operating activities to Free Cash Flow (in millions, except percentages):

	2023	2024
Revenue	\$ 9,917	\$ 11,102
Net cash provided by operating activities	\$ 3,884	\$ 4,518
Purchases of property and equipment	(47)	(34)
Free Cash Flow	\$ 3,837	\$ 4,484
Free Cash Flow Margin	39 %	40 %

Our Free Cash Flow is impacted by the timing of GBV because we collect our service fees at the time of booking, which is generally before a stay or experience occurs. Funds held on behalf of our customers and amounts payable to our customers do not impact Free Cash Flow, except interest earned on these funds.

Geographic Mix

Our operations are global, and certain trends in our business, such as Nights and Experiences Booked, GBV, revenue, ADR, and Nights per Booking vary by geography. We measure Nights and Experiences Booked by region based on the location of the listing.

	2023	% of Total	2024	% of Total	% Change
	(in millions, except percentages)				
Nights and Experiences Booked					
North America	146	33 %	154	31 %	5 %
EMEA	187	42	201	41	7
Latin America	64	14	76	16	19
Asia Pacific	51	11	61	12	20
Total	448	100 %	492	100 %	10 %
Gross Booking Value					
North America	\$ 34,941	48 %	\$ 37,816	46 %	8 %
EMEA	26,241	36	29,750	36	13
Latin America	6,054	8	7,092	9	17
Asia Pacific	6,016	8	7,126	9	18
Total	\$ 73,252	100 %	\$ 81,784	100 %	12 %
Revenue					
North America	\$ 4,638	47 %	\$ 5,006	45 %	8 %
EMEA	3,615	36	4,135	37	14
Latin America	824	8	969	9	18
Asia Pacific	840	9	992	9	18
Total	\$ 9,917	100 %	\$ 11,102	100 %	12 %

We saw a 2% increase in ADR in 2024 compared to the prior year, primarily due to higher ADR in EMEA, which increased by 5%.

Our total Company average nights per booking, excluding experiences, was 3.8 in 2024 compared to 3.9 in 2023. Average nights per booking in 2024 was 4.1 for North America, 3.8 for EMEA, 3.7 for Latin America, and 3.3 for Asia Pacific. We expect that our blended global average nights per booking will continue to fluctuate based on our geographic mix and changes in traveler behaviors.

No single city represented more than 2% of our revenue before adjustments for incentives and refunds during the years ended December 31, 2023 and 2024, or more than 1% of our active listings as of December 31, 2023 and 2024.

Results of Operations

The following table sets forth our results of operations for the periods presented (in millions, except percentages):

	2023		2024		% Change
	Amount	% of Revenue	Amount	% of Revenue	
Revenue	\$ 9,917	100 %	\$ 11,102	100 %	12 %
Costs and expenses:					
Cost of revenue	1,703	17	1,878	16	10
Operations and support ⁽¹⁾	1,186	12	1,282	12	8
Product development ⁽¹⁾	1,722	17	2,056	19	19
Sales and marketing ⁽¹⁾	1,763	18	2,148	19	22
General and administrative ⁽¹⁾	2,025	20	1,185	11	(41)
Total costs and expenses	8,399	84	8,549	77	2
Income from operations	1,518	16	2,553	23	68
Interest income	721	7	818	7	13
Other expense, net	(137)	(2)	(40)	—	(71)
Income before income taxes	2,102	21	3,331	30	58
Provision for (benefit from) income taxes	(2,690)	(27)	683	6	(125)
Net income	\$ 4,792	48 %	\$ 2,648	24 %	(45) %

(1) Includes stock-based compensation expense as follows (in millions, except percentages):

	2023	% of Total	2024	% of Total	% Change
Operations and support	\$ 68	6 %	\$ 90	6 %	32 %
Product development	694	62 %	886	63 %	28 %
Sales and marketing	130	12 %	170	12 %	31 %
General and administrative	228	20 %	261	19 %	14 %
Stock-based compensation expense	\$ 1,120	100 %	\$ 1,407	100 %	26 %

Comparison of the Years Ended December 31, 2023 and 2024

Revenue

Our revenue consists of service fees, net of incentives and refunds, charged to our customers. For stays, service fees, which are charged to customers as a percentage of the value of the booking, excluding taxes, vary based on factors specific to the booking, such as booking value, the duration of the booking, geography, and host type. For experiences, we only earn a host fee. Substantially all of our revenue comes from stays booked on our platform. Incentives include our referral programs and marketing promotions to encourage the use of our platform and attract new customers. We experience a difference in timing between when a booking is made and when we recognize revenue, which occurs upon check-in. We record the service fees that we collect from customers prior to check-in on our balance sheet as unearned fees. Revenue is net of incentives and refunds provided to customers.

(in millions, except percentages)	2023	2024	% Change
Revenue	\$ 9,917	\$ 11,102	12 %

Revenue increased \$1.2 billion, or 12%, in 2024 compared to 2023, primarily due to an increase in the number of check-ins relating to Nights and Experiences Booked and a modest increase in ADR driven by our North America and EMEA regions.

Cost of Revenue

Cost of revenue includes payment processing costs, including merchant fees and chargebacks, costs associated with third-party data centers used to host our platform and amortization of internally developed software and acquired technology. Because we act as the merchant of record, we incur all payment processing costs associated with our bookings, and we have chargebacks, which arise from account takeovers and other fraudulent activities. Cost of revenue may vary as a percentage of revenue from year to year based on activity.

on our platform and may also vary from quarter to quarter as a percentage of revenue based on the seasonality of our business and the difference in the timing of when bookings are made and when we recognize revenue.

(in millions, except percentages)	2023	2024	% Change
Cost of revenue	\$ 1,703	\$ 1,878	10 %
Percentage of revenue	17 %	16 %	

Cost of revenue increased \$175 million, or 10%, in 2024 compared to 2023, primarily due to an increase in merchant fees of \$173 million, due to an increase in GBV, the impact of certain one-time incentives in 2023, and an increase in cloud computing costs of \$26 million, due to increased server and data storage usage. These increases were partially offset by a reduction in chargebacks of \$34 million.

Operations and Support

Operations and support expense primarily consists of personnel-related expenses and third-party service provider fees associated with community support provided via phone, email, and chat to customers; customer relations costs, which include refunds and credits related to customer satisfaction and expenses associated with our host protection programs; and allocated costs for facilities and information technology.

(in millions, except percentages)	2023	2024	% Change
Operations and support	\$ 1,186	\$ 1,282	8 %
Percentage of revenue	12 %	12 %	

Operations and support expense increased \$96 million, or 8%, in 2024 compared to 2023, primarily due to a \$38 million increase in payroll-related expenses, an increase in customer relations costs of \$25 million, mainly due to higher nights booked, and an increase in insurance costs of \$25 million, due to higher premiums as a result of higher nights booked.

Product Development

Product development expense primarily consists of personnel-related expenses and third-party service provider fees incurred in connection with the development of our platform, and allocated costs for facilities and information technology.

(in millions, except percentages)	2023	2024	% Change
Product development	\$ 1,722	\$ 2,056	19 %
Percentage of revenue	17 %	19 %	

Product development expense increased \$334 million, or 19%, in 2024, compared to 2023, primarily due to a \$288 million increase in payroll-related expenses.

Sales and Marketing

Sales and marketing expense primarily consists of brand and performance marketing, personnel-related expenses, including those related to our field operations, policy and communications, portions of referral incentives and coupons, and allocated costs for facilities and information technology.

(in millions, except percentages)	2023	2024	% Change
Brand and performance marketing	\$ 1,208	\$ 1,455	20 %
Field operations and policy	555	693	25 %
Total sales and marketing	\$ 1,763	\$ 2,148	22 %
Percentage of revenue	18 %	19 %	

Sales and marketing expense increased \$385 million, or 22%, in 2024, compared to 2023, primarily due to a \$294 million increase in marketing activities associated with ongoing marketing campaigns and search engine marketing, a \$58 million increase in payroll-related expenses, and a \$26 million increase in consultant and other service provider costs.

General and Administrative

General and administrative expense primarily consists of personnel-related expenses for management and administrative functions, including finance and accounting, legal, and human resources. General and administrative expense also includes certain professional services fees, general corporate and director and officer insurance, allocated costs for facilities and information technology, indirect taxes,

including lodging tax reserves for which we may be held jointly liable with hosts for collecting and remitting such taxes, and bad debt expense.

(in millions, except percentages)	2023	2024	% Change
General and administrative	\$ 2,025	\$ 1,185	(41) %
Percentage of revenue	20 %	11 %	

General and administrative expense decreased \$840 million, or 41%, in 2024, compared to 2023, primarily due to decreased non-income taxes and related fees and penalties, partially offset by an increase in payroll-related expenses. Non-income taxes and related fees and penalties decreased \$656 million and \$194 million, respectively, primarily due to a withholding tax settlement related to Italy, partially off-set by an increase in payroll-related expenses of \$22 million.

Interest Income

Interest income consists primarily of interest earned on our cash, cash equivalents, marketable securities, and amounts held on behalf of customers.

(in millions, except percentages)	2023	2024	% Change
Interest income	\$ 721	\$ 818	13 %

Interest income increased \$97 million, or 13%, in 2024 compared to 2023, primarily due to higher cash and investment balances.

Other Expense, Net

Other expense, net consists primarily of realized and unrealized gains and losses on foreign currency transactions and balances, unrealized gains and losses on derivatives, the change in fair value of investments and financial instruments, including our share of income or loss from our equity method investments, and interest expense, which consists primarily of interest associated with various indirect tax reserves, amortization of debt issuance and debt discount costs.

(in millions, except percentages)	2023	2024	% Change
Other expense, net	\$ (137)	\$ (40)	71 %

The change in other expense, net of \$177 million in 2024 compared to 2023 was primarily due to increased foreign exchange gains of \$77 million and a decrease in interest expense of \$58 million related to interest on withholding taxes recorded in 2023, partially offset by an impairment charge of \$45 million on an investment in a privately-held company in 2024.

Provision for (benefit from) Income Taxes

We are subject to income taxes in the United States and foreign jurisdictions in which we do business. Foreign jurisdictions have different statutory tax rates than those in the United States. Additionally, certain of our foreign earnings may also be taxable in the United States. We expect our effective tax rate in the future to depend upon the proportion between the following items and income before income taxes: U.S. tax benefits from foreign-derived intangible income, U.S. tax on foreign income net of allowable credits, tax effects from share-based compensation, research tax credits, tax effects from capital losses not expected to be utilized, restructurings, settlement of tax contingency items, tax effects of changes in our business, and the effects of changes in tax law.

(in millions, except percentages)	2023	2024	% Change
Provision for (benefit from) income taxes	\$ (2,690)	\$ 683	125 %
Effective tax rate	(128)%	21 %	

The provision for income taxes during 2024 was driven by current tax on U.S. and foreign earnings and deferred tax expense resulting from prior year's valuation allowance release on our U.S. federal and state deferred tax assets and the utilization of some of those assets in 2024. The income tax benefit for 2023, was primarily due to the release of \$2.9 billion of our valuation allowance related to certain of our U.S. federal and state deferred tax assets, as a discrete tax benefit.

In 2021, the Organization for Economic Co-operation and Development ("OECD") established an inclusive framework on base erosion and profit shifting and agreed on a two-pillar solution to global taxation, focusing on global profit allocation, known to as Pillar One and a 15% global minimum effective tax rate, known as Pillar Two. In December of 2022, the EU member states agreed to implement the OECD's global minimum tax rate of 15%. The OECD issued Pillar Two model rules and continues to release guidance on these rules. The inclusive framework calls for tax law changes by participating countries to take effect in 2024 and 2025. Various countries have enacted or have announced plans to enact new tax laws to implement the global minimum tax. We considered the applicable tax law changes on Pillar Two implementation in the relevant countries, and concluded there was no material impact to our tax provision for 2024. We will continue to evaluate the impact of these tax law changes on future reporting periods.

Liquidity and Capital Resources

Sources and Conditions of Liquidity

As of December 31, 2024, our principal sources of liquidity were cash, cash equivalents and short-term investments totaling \$10.6 billion. As of December 31, 2024, cash and cash equivalents totaled \$6.9 billion, which included \$2.6 billion held by our foreign subsidiaries. Cash and cash equivalents consist of checking and interest-bearing accounts and highly-liquid securities with an original maturity of 90 days or less. As of December 31, 2024, short-term investments totaled \$3.7 billion. Short-term investments primarily consist of highly-liquid investment grade corporate debt securities, time deposits, commercial paper, certificates of deposit, U.S. government and government agency debt securities ("government bonds"), and mortgage-backed and asset-backed securities. These amounts do not include funds of \$5.9 billion as of December 31, 2024, that we held for bookings in advance of guests completing check-ins that we record separately on our consolidated balance sheet in funds receivable and amounts held on behalf of customers with a corresponding liability in funds payable and amounts payable to customers.

Our cash and cash equivalents are generally held at large global systemically important banks (or G-SIBs), which are subject to high capital requirements and are required to regularly perform stringent stress tests related to their ability to absorb capital losses. Our cash, cash equivalents, and short-term investments held outside of the United States may be repatriated, subject to certain limitations, and would be available to be used to fund our domestic operations. However, repatriation of such funds may result in additional tax liabilities. We believe that our existing cash, cash equivalents, and short-term investments balances in the United States are sufficient to fund our working capital needs in the United States.

We have access to \$1.0 billion of commitments and a \$200 million sub-limit for the issuance of letters of credit under the 2022 Credit Facility. As of December 31, 2024, no amounts were drawn under the 2022 Credit Facility and outstanding letters of credit totaled \$19 million. See Note 10, *Debt*, to our consolidated financial statements included in Item 8 of Part II of this Annual Report on Form 10-K for a description of the 2022 Credit Facility.

Material Cash Requirements

As of December 31, 2024, we had outstanding \$2.0 billion in aggregate principal amount of indebtedness of our 0% convertible senior notes due on March 15, 2026. On March 3, 2021, in connection with the pricing of the 2026 Notes, we entered into privately negotiated capped call transactions (the "Capped Calls") with certain of the initial purchasers and other financial institutions (the "option counterparties") at a cost of approximately \$100 million. The cap price of the Capped Calls was \$360.80 per share of Class A common stock, which represented a premium of 100% over the last reported sale price of the Class A common stock of \$180.40 per share on March 3, 2021, subject to certain customary adjustments under the terms of the Capped Call Transactions.

As of December 31, 2024, our total minimum lease payments were \$299 million, of which \$83 million is due in the succeeding 12 months. We have a commercial agreement with a data hosting services provider to spend or incur an aggregate of at least \$672 million for vendor services through 2027. See Note 9, *Leases*, Note 10, *Debt*, and Note 13, *Commitments and Contingencies*, to our consolidated financial statements included in Item 8 of Part II of this Annual Report on Form 10-K for further information regarding these commitments.

During 2024, we repurchased an aggregate of 24.5 million shares of Class A common stock for \$3.4 billion through two share repurchase programs. As of December 31, 2024, we had \$3.3 billion available to repurchase shares of Class A common stock under our share repurchase program.

Cash Flows

The following table summarizes our cash flows for the periods indicated (in millions):

	2023	2024
Net cash provided by operating activities	\$ 3,884	\$ 4,518
Net cash used in investing activities	(1,042)	(616)
Net cash used in financing activities	(2,430)	(3,572)
Effect of exchange rate changes on cash, cash equivalents, and restricted cash	152	(237)

Net Cash Provided by Operating Activities

Net cash provided by operating activities in 2024 was \$4.5 billion, which was primarily due to income from operations of \$2.6 billion and interest income of \$818 million, adjusted for non-cash items including stock-based compensation expense of \$1.4 billion.

Net Cash Used in Investing Activities

Net cash used in investing activities in 2024 was \$616 million, which was primarily due to purchases of short-term investments, partially offset by proceeds resulting from sales and maturities of short-term investments.

Net Cash Used in Financing Activities

Net cash used in financing activities in 2024 was \$3.6 billion, primarily due to share repurchases of \$3.4 billion, and an increase in taxes paid related to net share settlement of equity awards of \$630 million, partially offset by the increase in funds payable and amounts payable to customers of \$320 million.

Effect of Exchange Rates

During 2024, we recorded a reduction of \$237 million in cash, cash equivalents, and restricted cash, primarily due to the strengthening of the U.S. dollar. The impact of exchange rate changes on cash balances can serve as a natural hedge for the effect of exchange rates on our liabilities to our hosts and guests. The effect of exchange rate changes on cash, cash equivalents, and restricted cash on our consolidated statements of cash flows relates to certain of our assets, principally cash balances held on behalf of customers, that are denominated in currencies other than the functional currency of certain of our subsidiaries.

We assess our liquidity in terms of our ability to generate cash to fund our short and long-term cash requirements. As such, we believe that the cash flows generated from operating activities will meet our anticipated cash requirements in the short-term. In addition to normal working capital requirements, we anticipate that our short- and long-term cash requirements will include share repurchases, introduction of new products and offerings, timing and extent of spending to support our efforts to develop our platform, debt repayments, and expansion of sales and marketing activities. Our future capital requirements, however, will depend on many factors, including, but not limited to our growth, headcount, and ability to attract and retain customers on our platform. Additionally, we may in the future raise additional capital or incur additional indebtedness to continue to fund our strategic initiatives. On a long-term basis, we would rely on either our access to the capital markets or our credit facility for any long-term funding not provided by operating cash flows and cash on hand. In the event that additional financing is required from outside sources, we may seek to raise additional funds at any time through equity, equity-linked arrangements, and/or debt, which may not be available on favorable terms, or at all. If we are unable to raise additional capital when desired and at reasonable rates, our business, results of operations, and financial condition could be materially adversely affected. Our liquidity is subject to various risks including the risks identified in the section titled "Risk Factors" in Item 1A of Part I of this Annual Report on Form 10-K and the market risks identified in the section titled "Quantitative and Qualitative Disclosures about Market Risk" in Item 7A of Part II of this Annual Report on Form 10-K.

Indemnification Agreements

In the ordinary course of business, we include limited indemnification provisions under certain agreements with parties with whom we have commercial relations of varying scope and terms. See Note 13, *Commitments and Contingencies*, to our consolidated financial statements included in Item 8 of Part II of this Annual Report on Form 10-K for further information regarding our indemnification agreements.

Critical Accounting Estimates

Our consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the reporting periods. On an ongoing basis, we reconsider and evaluate our estimates and assumptions.

We base our estimates on historical experience, current trends and various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results could materially differ from any of our estimates under different assumptions or conditions. Our significant accounting policies are discussed in Note 2, *Summary of Significant Accounting Policies*, to our consolidated financial statements included in Item 8 of Part II of this Annual Report on Form 10-K. We believe the accounting estimates listed below are the most critical to aid in fully understanding and evaluating our reported financial results, and they require our most difficult, subjective or complex judgments, resulting from the need to make estimates about the effect of matters that are inherently uncertain.

Lodging Tax Obligations and Other Non-Income Tax Matters

In jurisdictions where we do not collect and remit lodging taxes, the responsibility for collecting and remitting these taxes, if applicable, generally rests with hosts. Airbnb is also subject to other non-income taxes primarily arising from transactions with our customers such as transactional taxes (sales, value-added, business, digital service, and similar taxes) where there may be significant uncertainty as to how the taxes apply to our platform, as well as uncertainty on the applicability of withholding taxes on certain payments made to hosts. We estimate liabilities for a certain number of jurisdictions with respect to federal, state, city, and local taxes related to lodging and other non-income taxes where we believe it is probable that Airbnb could be held liable, or, in the case of lodging taxes, jointly and severally liable with hosts for collecting and remitting such taxes, and the related amounts can be reasonably estimated. Changes to these liabilities are recorded in general and administrative expense in our consolidated statements of operations.

Evaluating potential outcomes for lodging and other non-income taxes is inherently uncertain and requires us to utilize various judgments, assumptions, and estimates in determining our liability reserves. A variety of factors could affect our potential obligation for collecting and remitting such taxes, which include, but are not limited to, whether we determine, or any tax authority asserts, that we have a responsibility to collect lodging or other non-income and related taxes on either historic or future transactions; the introduction of new ordinances and taxes which subject our operations to such taxes; or the ultimate resolution of any historic claims that may be settled. Accordingly, the ultimate resolution of lodging and other non-income taxes may be greater or less than reserve amounts we have established. See Note 13,

Commitments and Contingencies, to our consolidated financial statements included in Item 8 of Part II of this Annual Report on Form 10-K for additional information.

Income Taxes

We are subject to income taxes in the United States and foreign jurisdictions. We account for income taxes using the asset and liability method. We account for uncertainty in tax positions by recognizing a tax benefit from uncertain tax positions when it is more likely than not that the position will be sustained upon examination. Evaluating our uncertain tax positions, determining our provision for (benefit from) income taxes, and evaluating the impact of tax law changes, are inherently uncertain and require making judgments, assumptions, and estimates.

In assessing the need for a valuation allowance, we consider both positive and negative evidence regarding the realizability of deferred tax assets across our operating jurisdictions. Significant judgment is required in determining our provision for income taxes and income tax assets and liabilities, including evaluating uncertainties in the application of accounting principles and complex tax laws. Our actual and forecasted income (loss) before provision is subject to change due to economic, political and other conditions and significant judgment is required in determining our ability to recognize our net deferred tax assets.

As of December 31, 2024, we have determined that it is more likely than not that our U.S. federal and state deferred tax assets are realizable, except for California research and development credits, capital loss carryovers, and certain losses subject to dual consolidated loss rules. We maintain a valuation allowance for California research and development credits due to uncertainty about their realizability, as they have not met the "more likely than not" criteria. Changes in valuation allowance during interim periods are reflected in the annual effective tax rate, with any releases based on future taxable income recorded as discrete tax benefits. In 2023, we released \$2.9 billion of our valuation allowance and will continue to review the need for such allowances quarterly.

While we believe that we have adequately reserved for our uncertain tax positions, no assurance can be given that the final tax outcome of these matters will not be different. We adjust these reserves in light of changing facts and circumstances, such as the closing of a tax audit. To the extent that the final tax outcome of these matters is different than the amounts recorded, such differences will impact the provision for (benefit from) income taxes and the effective tax rate in the period in which such determination is made.

Recent Accounting Pronouncements

See Note 2, *Summary of Significant Accounting Policies*, to our consolidated financial statements included in Item 8 of Part II of this Annual Report on Form 10-K.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Our substantial operations around the world expose us to various market risks. These risks primarily include foreign currency risk and investment risk.

Foreign Currency Exchange Risk

We offer the ability to transact on our platform in approximately 50 currencies, of which the most significant foreign currencies to our operations in 2024 were the Euro, British pound, Canadian dollar, Australian dollar, Brazilian real, and Mexican peso. Our international revenue, as well as costs and expenses denominated in foreign currencies, expose us to the risk of fluctuations in foreign currency exchange rates against the U.S. dollar. Accordingly, we are subject to foreign currency risk, which may adversely impact our financial results.

We have foreign currency exchange risks related primarily to:

- revenue and cost of revenue associated with bookings on our platform denominated in currencies other than the U.S. dollar;
- balances held as funds receivable and amounts held on behalf of customers and funds payable and amounts payable to customers;
- unbilled amounts for confirmed bookings under the terms of our Pay Less Upfront program; and
- intercompany balances primarily related to our payment entities that process customer payments.

For revenue and cost of revenue associated with bookings on our platform outside of the United States, we generally receive net foreign currency amounts and therefore benefit from a weakening of the U.S. dollar and are adversely affected by a strengthening of the U.S. dollar. Movements in foreign exchange rates are recorded in other income (expense), net in our consolidated statements of operations. Furthermore, our platform generally enables guests to make payments in the currency of their choice to the extent that the currency is supported by Airbnb, which may not match the currency in which the host elects to be paid. As a result, in those cases, we bear the currency risk of both the guest payment as well as the host payment due to timing differences in such payments.

We enter into foreign currency derivative contracts to protect against foreign exchange risks. These hedges are primarily designed to manage foreign exchange risk associated with forecasted foreign denominated revenue, balances held as funds payable and amounts payable to customers, and unbilled amounts for confirmed bookings under the terms of our Pay Less Upfront program. These contracts reduce, but do not entirely eliminate, the impact of foreign currency exchange rate movements on our revenue, assets and liabilities. However, we may choose not to hedge certain exposures for a variety of reasons including accounting considerations or the prohibitive economic cost of hedging particular exposures.

We have experienced and will continue to experience fluctuations in foreign exchange gains and losses related to changes in exchange rates. If our foreign-currency denominated assets, liabilities, revenues or expenses increase, our results of operations may be more significantly impacted by fluctuations in the exchange rates of the currencies in which we do business.

If an adverse 10% foreign currency exchange rate change was applied to total net monetary assets and liabilities denominated in currencies other than the local currencies as of December 31, 2024, it would have resulted in a loss of approximately \$28 million.

Investment and Interest Rate Risk

We are exposed to interest rate risk related primarily to our investment portfolio. Changes in interest rates affect the interest earned on our total cash, cash equivalents, available-for-sale short-term investments, and the fair value of those securities.

We had cash and cash equivalents of \$6.9 billion and short-term investments of \$3.7 billion as of December 31, 2024, which primarily consisted of corporate debt securities, mortgage-backed and asset-backed securities, U.S. government and government agency debt securities ("government bonds"), commercial paper, certificates of deposit and time deposits. As of December 31, 2024, we had an additional \$5.9 billion that we held for bookings in advance of guests completing check-ins, which we record separately on our consolidated balance sheets as funds receivable and amounts held on behalf of customers. The primary objective of our investment activities is to preserve capital and meet liquidity requirements without significantly increasing risk. We invest primarily in highly-liquid, investment grade debt securities, and we limit the amount of credit exposure to any one issuer. We do not enter into investments for trading or speculative purposes and have not used any derivative financial instruments to manage our interest rate risk exposure. Because our cash equivalents and short-term investments generally have short maturities, the fair value of our portfolio is relatively insensitive to interest rate fluctuations. Due to the short-term nature of our investments, we have not been exposed to, nor do we anticipate being exposed to, material risks due to changes in interest rates. A hypothetical 100 basis point increase in interest rates would have resulted in a decrease of \$27 million to our investment portfolio as of December 31, 2024.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Airbnb, Inc.

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Airbnb, Inc. and its subsidiaries (the "Company") as of December 31, 2024 and 2023, and the related consolidated statements of operations, of comprehensive income, of stockholders' equity and of cash flows for each of the three years in the period ended December 31, 2024, including the related notes and schedule of valuation and qualifying account for each of the three years in the period ended December 31, 2024 listed in the accompanying index (collectively referred to as the "consolidated financial statements"). We also have audited the Company's internal control over financial reporting as of December 31, 2024, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2024 and 2023, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2024 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2024, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the COSO.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on the Company's consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that (i) relates to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Uncertain Tax Positions

As described in Notes 2 and 14 to the consolidated financial statements, the Company has recorded gross unrecognized tax benefits of \$869 million relating to uncertain tax positions as of December 31, 2024. Management evaluates and accounts for uncertain tax positions using a two-step approach. Recognition, step one, occurs when management concludes that a tax position, based solely on its technical merits, is more-likely-than-not to be sustained upon examination. Measurement, step two, determines the largest amount of benefit that is

greater than 50% likely to be realized upon ultimate settlement with a taxing authority that has full knowledge of all relevant information. The Company is in various stages of examination in connection with its ongoing tax audits globally and management believes that an adequate provision has been recorded for any adjustments that may result from tax audits. However, the outcome of tax audits cannot be predicted with certainty. If any issues addressed in the Company's tax audits are resolved in a manner not consistent with management's expectations, management may be required to record an adjustment to the provision for (benefit from) income taxes in the period such resolution occurs.

The principal considerations for our determination that performing procedures relating to uncertain tax positions is a critical audit matter are (i) the significant judgment by management when determining uncertain tax positions, including a high degree of estimation uncertainty relative to the technical merits and the measurement of the tax positions based on interpretations of tax laws and legal rulings; (ii) a high degree of auditor judgment, subjectivity, and effort in performing procedures and evaluating audit evidence relating to management's recognition and measurement of uncertain tax positions; and (iii) the audit effort involved the use of professionals with specialized skill and knowledge.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the recognition and measurement of the liability for uncertain tax positions and controls addressing completeness of the uncertain tax positions. These procedures also included, among others, (i) testing the completeness of management's assessment of the identification of uncertain tax positions; (ii) testing the recognition and measurement of the liability for uncertain tax positions, including management's assessment of the technical merits of the tax positions and the amount of tax benefit expected to be sustained; (iii) testing the information used in the calculation of the liability for uncertain tax positions, including intercompany agreements, international, federal, and state filing positions, and the related final tax returns; (iv) evaluating the status and results of income tax audits with the relevant tax authorities; and (v) evaluating third party income tax documentation obtained by the Company. Professionals with specialized skill and knowledge were used to assist in the evaluation of the completeness and measurement of the Company's uncertain tax positions, including evaluating the reasonableness of management's assessment of whether tax positions are more-likely-than-not of being sustained and the amount of potential benefit to be realized, the application of relevant tax laws, and estimated interest and penalties.

Airbnb, Inc.

Notes to Consolidated Financial Statements

Note 1. Description of Business

Airbnb, Inc. (the “Company” or “Airbnb”) was incorporated in Delaware in June 2008 and is headquartered in San Francisco, California. The Company operates a global platform for unique stays and experiences. The Company’s marketplace model connects hosts and guests (collectively referred to as “customers”) online or through mobile devices to book spaces and experiences around the world.

Note 2. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying consolidated financial statements have been prepared in conformity with generally accepted accounting principles in the United States of America (“U.S. GAAP”) and include accounts of the Company and its wholly-owned subsidiaries. All intercompany accounts and transactions have been eliminated in consolidation. Certain immaterial amounts in prior periods have been reclassified to conform with current period presentation.

Principles of Consolidation

The accompanying consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries in accordance with consolidation accounting guidance. All intercompany transactions have been eliminated in consolidation.

Use of Estimates

The preparation of the Company’s consolidated financial statements in conformity with U.S. GAAP requires management to make certain estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. The Company regularly evaluates its estimates, including those related to bad debt reserves, fair value of investments, useful lives of long-lived assets and intangible assets, valuation of goodwill and intangible assets from acquisitions, contingent liabilities, insurance reserves, revenue recognition, valuation of common stock, stock-based compensation, and income and non-income taxes, among others. Actual results could differ materially from these estimates.

As the impact of the uncertain macroeconomic conditions, including inflation, tariffs, and wars and other geopolitical conflicts continue to evolve, estimates and assumptions about future events and their effects cannot be determined with certainty and therefore require increased judgment. These estimates and assumptions may change in future periods and will be recognized in the consolidated financial statements as new events occur and additional information becomes known. To the extent the Company’s actual results differ materially from those estimates and assumptions, the Company’s future consolidated financial statements could be affected.

Cash and Cash Equivalents

Cash and cash equivalents are held in checking and interest-bearing accounts and consist of cash and highly-liquid securities with an original maturity of 90 days or less.

Short-term Investments

The Company considers all highly-liquid investments with original maturities of greater than 90 days to be short-term investments. Short-term investments include time deposits, which are accounted for at amortized cost, and available-for-sale debt securities that consist of corporate debt securities, commercial paper, certificates of deposit, U.S. government and government agency debt securities (“government bonds”), and mortgage-backed and asset-backed securities. The Company determines the appropriate classification of its investments at the time of purchase. The Company determines realized gains or losses on the sale of equity and debt securities on a specific identification method.

Unrealized gains and non-credit related losses on available-for-sale debt securities are reported as a component of accumulated other comprehensive income (loss) (“AOCI”) in stockholders’ equity. Realized gains and losses and impairments are reported within other income (expense), net on the consolidated statements of operations. The assessment for impairment takes into account the severity and duration of the decline in value, adverse changes in the market or industry of the investee, the Company’s intent to sell the security, and whether it is more likely than not that it will be required to sell the security before recovery of the amortized cost basis.

The Company’s equity investments with readily determinable fair values are measured at fair value on a recurring basis with changes in fair value recognized within other income (expense), net on the consolidated statements of operations.

The Company records an impairment of its available-for-sale debt securities if the amortized cost basis exceeds its fair value and if the Company has the intention to sell the security or if it is more likely than not that the Company will be required to sell the security before recovery of the amortized cost basis. If the Company does not have the intention to sell the security and it is not more likely than not that the Company will be required to sell the security before recovery of the amortized cost basis and the Company determines that the unrealized loss is entirely or partially due to credit-related factors, the credit loss is measured and recognized as an allowance in the consolidated balance sheets with a corresponding charge in the consolidated statements of operations. The allowance is measured as the amount by which the debt security’s amortized cost basis exceeds the Company’s best estimate of the present value of cash flows expected to be collected. Any remaining decline in fair value that is non-credit related is recognized in other comprehensive income (loss). Improvements in expected cash flows due to improvements in credit are recognized through reversal of the credit loss and corresponding reduction in the allowance for credit loss.

Airbnb, Inc.

Notes to Consolidated Financial Statements

Non-Marketable Investments

Non-marketable investments consist of debt and equity investments in privately-held companies, which are classified as other assets, noncurrent on the consolidated balance sheets. The Company classifies its non-marketable investments that meet the definition of a debt security as available-for-sale. The accounting policy for debt securities classified as available-for-sale is described above. The Company's non-marketable equity investments are accounted for using either the equity method of accounting or as equity investments without readily determinable fair values under the measurement alternative.

The Company uses the equity method if it has the ability to exercise significant influence, but not control, over the operating and financial policies of the investee. For investments accounted for using the equity method, the Company's proportionate share of its equity interest in net income and other comprehensive income (loss) of these companies is recorded in the consolidated statements of operations within other income (expense), net. The carrying amount of the investment in equity interests is adjusted to reflect the Company's interest in the investee's net income and any impairments, and is classified in other assets, noncurrent on the consolidated balance sheets.

Equity investments for which the Company is not able to exercise significant influence over the investee and for which fair value is not readily determinable are accounted for using the measurement alternative. Such investments are carried at cost, less any impairments, and are adjusted for subsequent observable price changes obtained from orderly transactions for identical or similar investments issued by the same investee. This election is reassessed each reporting period to determine whether non-marketable equity securities have a readily determinable fair value, in which case they would no longer be eligible for this election. Changes in the basis of the equity investment are recognized in other income (expense), net on the consolidated statements of operations.

The Company reviews its non-marketable debt and equity investments for impairment at the end of each reporting period or whenever events or circumstances indicate that the carrying value may not be fully recoverable. Impairment indicators might include negative changes in industry and market conditions, financial performance, business prospects, and other relevant events and factors. Upon determining that an impairment exists, the Company recognizes as an impairment in other income (expense), net on the consolidated statements of operations the amount by which the carrying value exceeds the fair value of the investment.

Fair Value of Financial Instruments

The Company applies fair value accounting for all financial assets and liabilities that are recognized or disclosed at fair value in the consolidated financial statements. The authoritative guidance on fair value measurements establishes a hierarchical disclosure framework, which prioritizes and ranks the level of market price observability used in measuring financial instruments at fair value. This hierarchy requires the Company to use observable market data when available and to minimize the use of unobservable inputs when determining fair value. Financial instruments with readily available quoted prices in active markets generally will have a higher degree of market price observability and a lesser degree of judgment used in measuring fair value.

Financial instruments measured and disclosed at fair value are classified and disclosed based on the observability of inputs used in the determination of fair value as follows:

- *Level 1:* Observable inputs such as quoted prices in active markets.
- *Level 2:* Observable inputs other than Level 1 prices, such as quoted prices in less active markets or model-derived valuations that are observable either directly or indirectly.
- *Level 3:* Unobservable inputs in which there is little or no market data that are significant to the fair value of the assets or liabilities.

The carrying amount of the Company's financial instruments, including cash equivalents, funds receivable and amounts held on behalf of customers, accounts payable, accrued liabilities, funds payable and amounts payable to customers, and unearned fees approximate their respective fair values because of their short maturities.

Level 2 Valuation Techniques

Financial instruments classified as Level 2 within the Company's fair value hierarchy are valued on the basis of prices from an orderly transaction between market participants provided by reputable dealers or pricing services. Prices of these securities are obtained through independent, third-party pricing services and include market quotations that may include both observable and unobservable inputs. In determining the value of a particular investment, pricing services may use certain information with respect to transactions in such investments, quotations from dealers, pricing matrices and market transactions in comparable investments, and various relationships between investments. The Company's foreign exchange derivative instruments are valued using pricing models that take into account the contract terms, as well as multiple inputs where applicable, such as interest rate yield curves and currency rates.

Foreign Currency

The Company's reporting currency is the U.S. dollar. The Company determines the functional currency for each of its foreign subsidiaries by reviewing their operations and currencies used in their primary economic environments. Assets and liabilities for foreign subsidiaries with functional currency other than U.S. dollar are translated into U.S. dollars at the rate of exchange existing at the balance sheet date. Statements of operations amounts are translated at average exchange rates for the period. Translation gains and losses are recorded in accumulated other comprehensive income (loss) as a component of stockholders' equity. No amounts were reclassified from accumulated other comprehensive income (loss) for the years ended December 31, 2022, 2023 and 2024.

Airbnb, Inc.

Notes to Consolidated Financial Statements

Remeasurement gains and losses are included in other income (expense), net on the consolidated statements of operations. Monetary assets and liabilities are remeasured at the exchange rate on the balance sheet date and nonmonetary assets and liabilities are measured at historical exchange rates. As of December 31, 2023 and 2024, the Company had a cumulative translation loss of \$5 million and \$32 million, respectively. Total net realized and unrealized gains (losses) on foreign currency transactions and balances totaled \$29 million, \$(48) million and \$29 million for the years ended December 31, 2022, 2023 and 2024, respectively.

Derivative Instruments and Hedging

The Company's primary objective for holding derivative instruments is to manage foreign currency exchange rate risk. The Company enters into master netting arrangements to mitigate credit risk in derivative transactions by permitting net settlement of transactions with the same counterparty. All derivative instruments are recorded in the consolidated balance sheets at fair value. The accounting treatment for derivative gains and losses is based on intended use and hedge designation.

Gains and losses arising from amounts that are included in the assessment of cash flow hedge effectiveness are initially deferred in AOCI and subsequently reclassified into earnings when the hedged transaction affects earnings and in the same line item within the consolidated statements of operations. The Company does not exclude any components in the assessment of hedge effectiveness for forwards and options.

If it is no longer probable that a forecasted hedged transaction will occur in the initially identified time period, hedge accounting is discontinued and the Company accounts for the associated derivatives as undesignated derivative instruments. Gains and losses associated with derivatives no longer designated as hedging instruments in AOCI are recognized immediately in other income (expense), net, if it is probable that the forecasted hedged transaction will not occur by the end of the initially identified time period or within an additional two month period thereafter. In rare circumstances, the additional period of time may exceed two months due to extenuating circumstances related to the nature of the forecasted transaction that are outside the control or influence of the Company.

Gains and losses arising from changes in the fair value of derivative instruments that are not designated as accounting hedges are recognized in the consolidated statements of operations in other income (expense), net.

The Company presents derivative assets and liabilities at their gross fair values in the consolidated balance sheets, even if they are subject to master netting arrangements with the counterparties. The Company classifies cash flows related to derivative instruments as operating activities in the consolidated statement of cash flows.

Internal-Use Software

The Company capitalizes certain costs in connection with obtaining or developing software for internal use. Amortization of such costs begins when the project is substantially complete and ready for its intended use. Capitalized software development costs are classified as property and equipment, net on the consolidated balance sheets and are amortized using the straight-line method over the estimated useful life of the applicable software.

Property and Equipment

Property and equipment are stated at cost, less accumulated depreciation and amortization. Depreciation and amortization on property and equipment is calculated using the straight-line method over the estimated useful lives indicated below:

Asset Category	Period
Computer equipment	5 years
Computer software and capitalized internal-use software	1.5 to 3 years
Office furniture and equipment	5 years
Buildings	25 to 40 years
Leasehold improvements	Lesser of estimated useful life or remaining lease term

Costs of maintenance and repairs that do not improve or extend the useful lives of assets are expensed as incurred. Upon retirement or sale, the cost and related accumulated depreciation are removed from the consolidated balance sheets and the resulting gain or loss is reflected in the consolidated statements of operations.

Leases

The Company determines whether an arrangement is or contains a lease at inception. Operating lease right-of-use ("ROU") assets and liabilities are recognized at commencement date based on the present value of lease payments over the lease term. Operating lease liabilities represent the present value of lease payments not yet paid. Operating lease ROU assets represent the Company's right to use an underlying asset and are based upon the operating lease liabilities adjusted for prepayments or accrued lease payments, initial direct costs, lease incentives, and impairment of operating lease assets. As most of the Company's leases do not provide an implicit rate, the Company uses its incremental borrowing rate based on the information available at commencement date in determining the present value of lease

Airbnb, Inc.

Notes to Consolidated Financial Statements

payments. The Company has real estate and equipment lease agreements that contain lease and non-lease components, which are accounted for as a single lease component.

The Company's leases often contain rent escalations over the lease term. The Company recognizes expense for these leases on a straight-line basis over the lease term. Additionally, tenant incentives, primarily used to fund leasehold improvements, are recognized when earned and reduce the Company's ROU asset related to the lease. These are amortized through the ROU asset as reductions of expense over the lease term.

The Company's lease agreements may contain variable costs such as common area maintenance, operating expenses, or other costs. Variable lease costs are expensed as incurred in the consolidated statements of operations. The Company's lease agreements generally do not contain any residual value guarantees or restrictive covenants.

For substantially all leases with an initial non-cancelable lease term of less than one year and no option to purchase, the Company elected not to recognize the lease on its consolidated balance sheets and instead recognize rent payments on a straight-line basis over the lease term within operating expense on its consolidated statements of operations.

Goodwill

Goodwill represents the excess of the purchase price over the fair value of net assets acquired in a business combination. The Company has one reporting unit. The Company tests goodwill for impairment at least annually in the fourth quarter, or whenever events or changes in circumstances indicate that goodwill might be impaired. The Company uses a two-step process to assess the realizability of goodwill. The first step, Step 0, is a qualitative assessment that analyzes current economic indicators associated with a particular reporting unit. For example, the Company analyzes changes in economic, market and industry conditions, business strategy, cost factors, and financial performance, among others, to determine if there would be a significant decline to the fair value of a reporting unit. A qualitative assessment also includes analyzing the excess fair value of a reporting unit over its carrying value from impairment assessments performed in previous years. If the qualitative assessment indicates a stable or improved fair value, no further testing is required.

If a qualitative assessment indicates that a significant decline to fair value of a reporting unit is more likely than not, or if a reporting unit's fair value has historically been closer to its carrying value, the Company will proceed to Step 1 testing where the Company calculates the fair value of a reporting unit. If Step 1 indicates that the carrying value of a reporting unit is in excess of its fair value, the Company will record an impairment equal to the amount by which a reporting unit's carrying value exceeds its fair value.

There were no impairment charges in any of the periods presented in the consolidated financial statements.

Intangible Assets

Intangible assets are amortized on a straight-line basis over the estimated useful lives ranging from one to ten years. The Company reviews intangible assets for impairment under the long-lived asset model described below. There were no impairment charges in any of the periods presented in the consolidated financial statements.

Impairment of Long-Lived Assets

Long-lived assets that are held and used by the Company are reviewed for impairment when events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. The determination of the recoverability of long-lived assets is based on an estimate of the undiscounted cash flows resulting from the use of the asset and its eventual disposition. If the carrying value of the long-lived asset is not recoverable on an undiscounted cash flow basis, impairment is recognized to the extent that the carrying value exceeds its fair value. Fair value is determined through various valuation techniques including discounted cash flow models, quoted market values, and third-party independent appraisals, as necessary.

Any impairments to ROU assets, leasehold improvements, or other assets as a result of a sublease, abandonment, or other similar factors are recorded as an operating expense. Similar to other long-lived assets, management tests ROU assets for impairment whenever events or changes in circumstances occur that could impact the recoverability of these assets. For ROU assets, such circumstances may include subleases that do not fully recover the costs of the associated leases or a decision to abandon the use of all or part of an asset. For the year ended December 31, 2022, the Company recorded \$91 million of long-lived asset impairment, of which \$89 million was recorded within restructuring charges and the remainder within general and administrative, on the consolidated statements of operations. For the years ended December 31, 2023 and 2024, the Company did not record any restructuring charges.

Revenue Recognition

The Company generates substantially all of its revenue from facilitating guest stays at accommodations offered by hosts on the Company's platform.

The Company considers both hosts and guests to be its customers. The customers agree to the Company's Terms of Service ("ToS") to use the Company's platform. Upon confirmation of a booking made by a guest, the host agrees to provide the use of the property. At such time, the host and guest also agree upon the applicable booking value as well as host fees and guest fees (collectively "service fees"). The Company charges service fees in exchange for certain activities, including the use of the Company's platform, customer support, and payment processing activities. These activities are not distinct from each other and are not separate performance obligations. As a result, the Company's single performance obligation is to facilitate a stay, which occurs upon the completion of a check-in event (a "check-in"). The Company recognizes revenue upon check-in as its performance obligation is satisfied upon check-in and the Company has the right to receive payment for the fulfillment of the performance obligation.

Airbnb, Inc.

Notes to Consolidated Financial Statements

The Company charges service fees to its customers as a percentage of the value of the booking, excluding taxes. The Company collects both the booking value from the guest on behalf of the host and the applicable guest fees owed to the Company using the guest's pre-authorized payment method. After check-in, the Company disburses the booking value to the host, less the fees due from the host to the Company. The Company's ToS stipulates that a host may cancel a confirmed booking at any time up to check-in. Therefore, the Company determined that for accounting purposes, each booking is a separate contract with the host and guest, and the contracts are not enforceable until check-in. Since an enforceable contract for accounting purposes is not established until check-in, there were no partially satisfied or unsatisfied performance obligations as of December 31, 2023 and 2024. The service fees collected from customers prior to check-in are recorded as unearned fees. Unearned fees are not considered contract balances because they are subject to refund in the event of a cancellation.

Guest stays of at least 28 nights are considered long-term stays. The Company charges service fees to facilitate long-term stays on a monthly basis. Such stays are generally cancelable with 30 days advance notice for no significant penalty. Accordingly, long-term stays are treated as month-to-month contracts; each month is a separate contract with the host and guest, and the contracts are not enforceable until check-in for the initial month as well as subsequent monthly extensions. The Company's performance obligation for long-term stays is the same as that for short-term stays. The Company recognizes revenue for the first month upon check-in, similar to short-term stays, and recognizes revenue for any subsequent months upon each month's anniversary from initial check-in date.

The Company presents revenue net, as an agent, because it does not control the right to use the properties either before or after completion of its service. It does not fulfill rental promises, bear inventory risk, or set prices. Accordingly, the Company has concluded that it is acting in an agent capacity and therefore revenue is presented net reflecting the service fees received from customers to facilitate a stay.

The Company excludes from revenue, taxes assessed by a governmental authority that are both imposed on and are concurrent with specific revenue producing transactions. Accordingly, such amounts are not included as a component of revenue or cost of revenue.

Payments to Customers

The Company makes payments to customers as part of its referral programs and marketing promotions, collectively referred to as the Company's incentive programs, and refund activities. The payments are generally in the form of coupon credits to be applied toward future bookings or as cash refunds.

Incentive Programs

The Company encourages the use of its platform and attracts new customers through its incentive programs. Under the Company's referral program, the referring party (the "referrer") earns a coupon when the new guest or host (the "referee") completes their first stay on the Company's platform. Incentives earned by customers for referring new customers are paid in exchange for a distinct service and are accounted for as customer acquisition costs. The Company records the incentive as a liability at the time the incentive is earned by the referrer with the corresponding charge recorded to sales and marketing expense in the same way the Company accounts for other marketing services from third-party vendors. Any amounts paid in excess of the fair value of the referral service received are recorded as a reduction of revenue. Fair value of the service is established using amounts paid to vendors for similar services. Customer referral coupon credits generally expire within one year from issuance and the Company estimates the redemption rates using its historical experience. As of December 31, 2023 and 2024, the referral coupon liability was immaterial.

Through marketing promotions, the Company issues customer coupon credits to encourage the use of its platform. After a customer redeems such incentives, the Company records a reduction to revenue at the date it records the corresponding revenue transaction, as the Company does not receive a distinct good or service in exchange for the customer incentive payment.

Refunds

In certain instances, the Company issues refunds to customers as part of its customer support activities in the form of cash or credits to be applied toward a future booking. There is no legal obligation to issue such refunds to hosts or guests on behalf of its customers. The Company accounts for refunds, net of any recoveries, as variable consideration, which results in a reduction to revenue. The Company reduces the transaction price by the estimated amount of the payments by applying the most likely outcome method based on known facts and circumstances and historical experience. The estimate for variable consideration was immaterial as of December 31, 2023 and 2024.

The Company evaluates whether the cumulative amount of payments made to customers that are not in exchange for a distinct good or service received from customers exceeds the cumulative revenue earned since inception of the customer relationships. Any cumulative payments in excess of cumulative revenue are presented within operations and support or sales and marketing on the consolidated statements of operations based on the nature of the payments made to customers.

Funds Receivable and Funds Payable

Funds receivable and amounts held on behalf of customers represent cash received or in-transit from guests via third-party credit card processors and other payment methods, which the Company remits for payment to the hosts following check-in. This cash and related receivable represent the total amount due to hosts, and as such, a liability for the same amount is recorded to funds payable and amounts payable to customers.

The Company records guest payments, net of service fees, as funds receivable and amounts held on behalf of customers with a corresponding amount in funds payable and amounts payable to customers when cash is received in advance of check-in. Host and guest fees are recorded as cash with a corresponding amount in unearned fees. For certain bookings, a guest may opt to pay a percentage of the

Airbnb, Inc.

Notes to Consolidated Financial Statements

total amount due when the booking is confirmed, with the remaining balance due prior to the stay occurring (the "Pay Less Upfront Program"). Under the Pay Less Upfront Program, when the Company receives the first installment payment from the guest upon confirmation of the booking, the Company records the first installment payment as funds receivable and amounts held on behalf of customers with a corresponding amount in funds payable and amounts payable to customers, net of the host and guest fees. The full value of the service fees is recorded as cash and cash equivalents and unearned fees upon receipt of the first installment payment to represent what the Company expects to be recognized as revenue if the underlying booking is not canceled. Upon receipt of the second installment, such payment amounts are also recorded as funds receivable and amounts held on behalf of customers with a corresponding amount in funds payable and amounts payable to customers. Following check-in, the Company remits funds due to hosts and recognizes unearned fees as revenue as its performance obligation is satisfied.

Bad Debt

The Company generally collects funds related to bookings from guests on behalf of hosts prior to check-in. In limited circumstances, the Company disburses funds to a host or a guest on behalf of a counterparty guest or host prior to collecting such amounts from the counterparty. These customer receivables, reflected in prepaids and other current assets on the consolidated balance sheets, are subject to a customer receivable allowance for potential credit losses. The Company estimates uncollectible amounts based on historical data, economic forecasts, and the age of the debt, writing off assets deemed uncollectible.

Cost of Revenue

Cost of revenue primarily consists of payment processing charges, including merchant fees and chargebacks, costs associated with third-party data centers used to host the Company's platform, and amortization of internally developed software, and acquired technology.

Operations and Support

Operations and support costs primarily consist of personnel-related expenses and third-party service provider fees associated with customer support provided via phone, email, and chat to customers, customer relations costs, which include refunds and credits related to customer satisfaction and expenses associated with the Company's host protection programs, and allocated costs for facilities and information technology. These costs are expensed as incurred.

Product Development

Product development costs primarily consist of personnel-related expenses and third-party service provider fees incurred in connection with the development of the Company's platform and new products as well as the improvement of existing products, and allocated costs for facilities and information technology. These costs are expensed as incurred.

Sales and Marketing

Sales and marketing costs primarily consist of performance and brand marketing, personnel-related expenses, including those related to field operations, portions of referral incentives and coupons, policy and communications, and allocated costs for facilities and information technology. These costs are expensed as incurred. Advertising expenses were \$786 million, \$953 million and \$1.1 billion for the years ended December 31, 2022, 2023 and 2024, respectively.

General and Administrative

General and administrative costs primarily consist of personnel-related expenses for executive management and administrative functions, including finance and accounting, legal, and human resources, as well as general corporate and director and officer insurance. General and administrative costs also include certain professional services fees, allocated costs for facilities and information technology expenses, indirect taxes including lodging taxes where the Company may be held jointly liable with hosts for collecting and remitting such taxes, withholding taxes, other transactional taxes, and bad debt expense. These costs are expensed as incurred.

Restructuring Charges

Costs and liabilities associated with management-approved restructuring activities are recognized when they are incurred. One-time employee termination costs are recognized at the time of communication to employees, unless future service is required, in which case the costs are recognized ratably over the future service period. Ongoing employee termination benefits are recognized as a liability when it is probable that a liability exists and the amount is reasonably estimable. Restructuring charges are recognized as an operating expense within the consolidated statements of operations and related liabilities are recorded within accrued expenses, accounts payable, and other liabilities on the consolidated balance sheets. The Company periodically evaluates and, if necessary, adjusts its estimates based on currently available information.

Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax law in effect for the years in which the temporary differences are expected to be recovered or settled. The effect of a change in tax rates on deferred tax assets and liabilities is recognized in the period that includes the enactment date. Accrued interest and penalties related to unrecognized tax benefits are recognized in the provision for (benefit from) income taxes.

Airbnb, Inc.

Notes to Consolidated Financial Statements

A valuation allowance is recorded for deferred tax assets if it is more likely than not that some portion or all of the deferred tax assets will not be realized. In determining the need for a valuation allowance, the Company weighs both positive and negative evidence in the various jurisdictions in which it operates to determine whether it is more likely than not that its deferred tax assets are recoverable. The Company regularly assesses all available evidence, including cumulative historic losses, forecasted earnings, if carryback is permitted under the law, carryforward periods, and prudent and feasible tax planning strategies.

The Company evaluates and accounts for uncertain tax positions using a two-step approach. Recognition, step one, occurs when the Company concludes that a tax position, based solely on its technical merits, is more-likely-than-not to be sustained upon examination. Measurement, step two, determines the largest amount of benefit that is greater than 50% likely to be realized upon ultimate settlement with a taxing authority that has full knowledge of all relevant information. Derecognition of a tax position that was previously recognized would occur when the Company subsequently determines that a tax position no longer meets the more-likely-than-not threshold of being sustained.

Share Repurchase

Share repurchases may be made through a variety of methods, which may include open market purchases, privately negotiated transactions, block trades, or accelerated share repurchase transactions, or by any combination of such methods. Share repurchases are recorded at settlement date. When shares are retired, the value of repurchased shares is deducted from stockholders' equity through capital with the excess over par value recorded to accumulated deficit.

Stock-Based Compensation

Stock-based compensation expense relates to restricted stock units ("RSUs"), stock options, and the Employee Stock Purchase Plan ("ESPP") (collectively referred to as "equity awards"). RSUs, stock options and warrants are measured at the fair market value of the underlying stock at the grant date and the expense is recognized over the requisite service period. The fair value of stock options and ESPP shares are estimated on the date of grant using the Black-Scholes option pricing model to determine the fair value of stock options on the date of grant. The Company estimates the expected term of stock options granted based on the simplified method and estimates the volatility of its common stock on the date of grant based on the average historical stock price volatility of comparable publicly-traded companies. The simplified method calculates the expected term as the mid-point between the weighted-average time to vesting and the contractual maturity. The simplified method is used as the Company does not have sufficient historical data regarding stock option exercises. The contractual term of the Company's stock options is ten years. The Company accounts for forfeitures as they occur. The benefits of tax deductions in excess of recognized stock-based compensation costs are recognized in the income statement as a discrete item when an option exercise or a vesting and release of shares occurs.

Net Income Per Share Attributable to Common Stockholders

The Company applies the two-class method when computing net income per share attributable to common stockholders when shares are issued that meet the definition of a participating security. The two-class method determines net income per share for each class of common stock and participating securities according to dividends declared or accumulated and participation rights in undistributed earnings. The two-class method requires earnings available to common stockholders for the period to be allocated between common stock and participating securities based upon their respective rights to receive dividends as if all earnings for the period had been distributed. The Company's previously outstanding redeemable convertible preferred stock was a participating security as the holders of such shares participated in dividends but did not contractually participate in the Company's losses.

Basic net income per share attributable to common stockholders is computed by dividing the net income by the weighted-average number of shares of common stock outstanding during the period, less weighted-average shares subject to repurchase. The diluted net income per share is computed by giving effect to all potentially dilutive securities outstanding for the period, including RSUs, stock options, and warrants using the treasury stock method, and convertible notes, using the if-converted method.

Comprehensive Income

Comprehensive income consists of net income and other comprehensive income. Other comprehensive income reflects gains and losses that are recorded as a component of stockholders' equity and are excluded from net income. Other comprehensive income consists of unrealized gains (losses) on derivative instruments designated as cash flow hedges, net of tax, foreign currency translation adjustments related to consolidation of foreign entities and unrealized gains (losses), net of tax, on securities classified as available-for-sale.

Contingencies

The Company is subject to legal proceedings and claims that arise in the ordinary course of business. The Company accrues for losses associated with legal claims when such losses are probable and can be reasonably estimated. These accruals are adjusted as additional information becomes available or circumstances change.

Recently Adopted Accounting Standards

In November 2023, the Financial Accounting Standards Board (the "FASB") issued an update to improve disclosure of reportable segments on an annual and interim basis, primarily through enhanced disclosures about significant segment expenses. The update is effective for public companies in fiscal years beginning after December 15, 2023, and for interim periods beginning after December 15, 2024, on a retrospective basis. The Company adopted the guidance effective December 31, 2024 (refer to Note 16, *Segment and Geographic Information*).

Airbnb, Inc.

Notes to Consolidated Financial Statements

In June 2022, the FASB issued guidance related to the fair value measurement of an equity security subject to contractual sale restrictions that prohibit the sale of the equity security. The new guidance also introduced new disclosure requirements for equity securities subject to contractual sale restrictions that are measured at fair value. The Company adopted the guidance effective January 1, 2024. There was no impact to the Company's consolidated financial statements or disclosures upon adoption.

Recently Issued Accounting Standards Not Yet Adopted

In November 2024, the FASB issued an update to improve the disclosures about an entity's expenses, for both annual and interim periods in a tabular format in the footnotes to the financial statements, to include disaggregated information about specific categories underlying certain income statement expense line items. The update is effective for public companies on a prospective basis, with the option for retrospective application in fiscal years beginning after December 15, 2026, and interim periods within fiscal years beginning after December 15, 2027. Early adoption is permitted. The Company does not expect the adoption of the new guidance to have a material impact on its consolidated financial statements other than the expanded footnote disclosure.

In December 2023, the FASB issued ASU 2023-09, *Improvements to Income Tax Disclosures*, which expands income tax disclosure requirements to include disaggregated information about a reporting entity's effective tax rate reconciliation as well as information on income taxes paid. The standard is effective for public companies in fiscal years beginning after December 15, 2024, and will be applied prospectively with the option to apply the standard retrospectively. Early adoption is permitted. The Company does not expect the adoption of the new guidance to have a material impact on its consolidated financial statements other than the expanded footnote disclosure.

There are other new accounting pronouncements issued by the FASB that the Company has adopted or will adopt, as applicable, and the Company does not believe any of these accounting pronouncements have had, or will have, a material impact on its consolidated financial statements or disclosures.

Note 3. Supplemental Financial Statement Information

Cash, Cash Equivalents, and Restricted Cash

The following table reconciles cash, cash equivalents, and restricted cash reported on the Company's consolidated balance sheets to the total amount presented in the consolidated statements of cash flows (in millions):

	December 31,	
	2023	2024
Cash and cash equivalents	\$ 6,874	\$ 6,864
Cash and cash equivalents included in funds receivable and amounts held on behalf of customers	5,769	5,871
Restricted cash included in prepaids and other current assets	24	25
Total cash, cash equivalents, and restricted cash presented on the consolidated statements of cash flows	\$ 12,667	\$ 12,760

Supplemental Disclosures of Cash Flow Information

Supplemental cash flow information consisted of the following (in millions):

	Year Ended December 31,		
	2022	2023	2024
Cash paid for:			
Income taxes, net of refunds	\$ 68	\$ 132	\$ 350
Interest	\$ 8	\$ 55	\$ 2
Operating leases	\$ 102	\$ 84	\$ 89

(1) Classified within other assets, noncurrent on the consolidated balance sheets.

As of December 31, 2023 and December 31, 2024, the Company did not have any available-for-sale debt securities for which the Company recorded credit-related losses.

Unrealized gains and losses, net of tax before reclassifications from AOCI to other income (expense), net were immaterial for the years ended December 31, 2022, 2023 and 2024. Realized gains and losses reclassified from AOCI to other income (expense), net were immaterial for the years ended December 31, 2022, 2023 and 2024.

Debt securities in an unrealized loss position had an estimated fair value of \$777 million and \$1.1 billion, and unrealized losses were immaterial as of December 31, 2023 and 2024, respectively. A total of \$283 million and \$269 million of these securities were in a continuous unrealized loss position for more than twelve months as of December 31, 2023 and December 31, 2024, respectively.

The following table summarizes the contractual maturities of the Company's available-for-sale debt securities (in millions):

		December 31, 2024	
		Amortized Cost	Estimated Fair Value
Due within one year	\$	1,790	\$ 1,792
Due after one year through five years		1,172	1,162
Due after five years		98	95
Total	\$	3,060	\$ 3,049

Equity Investments Without Readily Determinable Fair Values

The Company holds investments in privately-held companies in the form of equity securities without readily determinable fair values and in which the Company does not have a controlling interest or significant influence. These investments had a net carrying value of \$83 million and \$38 million as of December 31, 2023 and December 31, 2024, respectively, and are classified within other assets, noncurrent on the consolidated balance sheets.

The Company recorded an impairment charge of \$45 million for the year ended December 31, 2024, and did not have any impairment charges nor downward adjustments for observable price changes during the years ended December 31, 2022 and 2023.

The Company recorded an immaterial upward adjustment during the year ended December 31, 2023, and did not have any upward adjustments for observable price changes during the years ended December 31, 2022 and 2024.

As of December 31, 2024, the cumulative impairment and downward adjustments for observable price changes were \$101 million.

Investments Accounted for Under the Equity Method

As of December 31, 2023 and 2024, the carrying values of the Company's equity method investments were \$8 million and \$47 million, respectively. For the years ended December 31, 2022, 2023 and 2024, the Company recorded immaterial losses within other income.

Airbnb, Inc.

Notes to Consolidated Financial Statements

(expense), net on the consolidated statements of operations, representing its proportionate share of net income or loss based on the investee's financial results. There were no impairment charges for the years ended December 31, 2022, 2023 and 2024.

Note 5. Fair Value Measurements and Financial Instruments

The following tables summarize the Company's financial assets and liabilities measured at fair value on a recurring basis (in millions):

	December 31, 2023

There were no transfers of financial instruments between valuation levels during the years ended December 31, 2023 and 2024.

There were no material changes in unrealized losses included in other comprehensive income (loss) relating to investments measured at fair value for which the Company has utilized Level 3 inputs to determine fair value during the years ended December 31, 2022, 2023 and 2024.

Note 6. Derivative Instruments and Hedging

The Company has a portion of its business denominated and transacted in foreign currencies, which subjects the Company to foreign exchange risk, and uses derivative instruments to manage financial exposures that occur in the normal course of business. The Company does not hold or issue derivatives for trading or speculative purposes.

The Company may elect to designate certain derivatives to partially offset its business exposure to foreign exchange risk. However, the Company may choose not to hedge certain exposures for a variety of reasons including accounting considerations or the prohibitive economic cost of hedging particular exposures. There can be no assurance the hedges will offset more than a portion of the financial impact resulting from movements in foreign exchange rates.

Foreign Exchange Risk

To protect revenue from fluctuations in foreign currency exchange rates, the Company may enter into forward contracts, option contracts, or other instruments, and may designate these instruments as cash flow hedges. The Company generally hedges portions of its forecasted foreign currency exposure associated with revenue, typically for up to 18 months. In the first quarter of 2023, the Company initiated a foreign exchange cash flow hedging program to minimize the effects of foreign currency fluctuations on future revenue.

The Company may also enter into derivative instruments that are not designated as accounting hedges to offset a portion of the foreign currency exchange gains and losses generated by the remeasurement of certain assets and liabilities denominated in non-functional currencies.

Airbnb, Inc.

Notes to Consolidated Financial Statements

The following table summarizes the effect of derivative instruments on the Company's consolidated balance sheets (in millions):

		Derivative Assets ⁽¹⁾	
		Fair value as of December 31,	
	Location	2023	2024
Derivatives designated as hedging instruments:			
Foreign exchange contracts (current)	Prepays and other current assets	\$ 4	\$ 90
Foreign exchange contracts (noncurrent)	Other assets, noncurrent	—	7
Total derivatives designated as hedging instruments		\$ 4	\$ 97
Derivatives not designated as hedging instruments:			
Foreign exchange contracts (current)	Prepays and other current assets	\$ 23	\$ 23

		Derivative Liabilities ⁽¹⁾	
		Fair value as of December 31,	
	Location	2023	2024
Derivatives designated as hedging instruments:			
Foreign exchange contracts (current)	Accrued expenses, accounts payable, and other current liabilities	\$ 25	\$ —
Foreign exchange contracts (noncurrent)	Other liabilities, noncurrent	5	—
Total derivatives designated as hedging instruments		\$ 30	\$ —
Derivatives not designated as hedging instruments:			
Foreign exchange contracts (current)	Accrued expenses, accounts payable, and other current liabilities	\$ 30	\$ 20

(1) Derivative assets and derivatives liabilities are measured using Level 2 inputs.

To limit credit risk, the Company generally enters into master netting arrangements with the respective counterparties to the Company's derivative contracts, under which the Company is allowed to settle transactions with a single net amount payable by one party to the other. As of December 31, 2024, the potential effect of these rights of offset associated with the Company's derivative contracts would be a reduction to both derivative assets and liabilities of \$20 million, resulting in net derivative assets of \$100 million.

Realized gains on derivative instruments designated as hedging instruments reclassified from AOCI to revenue in the consolidated statements of operations were immaterial for the years ended December 31, 2023 and 2024.

Effect of Derivative Instruments Designated as Hedging Instruments on AOCI

The following table summarizes the activity of derivative instruments designated as cash flow hedges before reclassifications from AOCI to revenue and the impact of these derivative contracts on AOCI, net of tax (in millions):

		Year Ended December 31,	
		2023	2024
Derivatives designated as cash flow hedges:			
Foreign exchange contracts ⁽¹⁾		\$ (30)	\$ 125

(1) Gain (loss) recognized in other comprehensive income (loss).

As of December 31, 2023 and December 31, 2024, cumulative unrealized gains (losses) recorded in AOCI, net of tax, related to derivative instruments designated as hedging instruments were \$(31) million and \$80 million, respectively.

Airbnb, Inc.

Notes to Consolidated Financial Statements

Effect of Derivative Instruments not Designated as Hedging Instruments on the Consolidated Statements of Operations

The following table presents the activity of derivative instruments not designated as hedging instruments and the impact of these derivative contracts on the consolidated statements of operations (in millions):

	Realized Gain (Loss) on Derivatives			Unrealized Gain (Loss) on Derivatives		
	Year Ended December 31,			Year Ended December 31,		
	2022	2023	2024	2022	2023	2024
Derivatives not designated as hedging instruments:						
Foreign exchange contracts	\$ 92	\$ (43)	\$ (59)	\$ (33)	\$ 10	\$ 11

The total notional amount of outstanding derivatives not designated as hedging instruments was \$2.4 billion and \$2.1 billion as of December 31, 2023 and December 31, 2024, respectively.

Cash Flow Hedges

The total notional amount of outstanding foreign currency derivatives designated as cash flow hedges was \$2.0 billion and \$2.5 billion as of December 31, 2023 and December 31, 2024, respectively.

As of December 31, 2024, approximately \$68 million of deferred net gains on both outstanding and matured derivatives in AOCI are expected to be reclassified to revenue during the next 12 months concurrent with the underlying hedged transactions which will be recorded in revenue. Actual amounts ultimately reclassified to revenue are dependent on the exchange rates in effect when derivative contracts currently outstanding mature.

Note 7. Goodwill and Intangible Assets

Goodwill

The changes in the carrying amount of goodwill for the years ended December 31, 2023 and 2024 were as follows (in millions):

	Amount
Balance as of December 31, 2022	\$ 650
Additions related to acquisitions	101
Foreign currency translation adjustments	1
Balance as of December 31, 2023	752
Foreign currency translation adjustments	(2)
Balance as of December 31, 2024	\$ 750

Intangible Assets

As of December 31, 2023 and 2024, intangible assets, net were \$40 million and \$27 million, respectively, net of accumulated amortization of \$55 million and \$67 million, respectively. The estimated future amortization expense of \$27 million will be amortized through 2029. Amortization expense related to intangible assets was immaterial for the years ended December 31, 2022, 2023 and 2024.

Airbnb, Inc.

Notes to Consolidated Financial Statements

Note 8. Property and Equipment, Net

Property and equipment, net, consisted of the following (in millions):

	December 31,			
	2023		2024	
Computer software and capitalized internal-use software	\$	51	\$	122
Leasehold improvements		90		110
Computer equipment		22		15
Buildings and land		17		17
Office furniture and equipment		8		8
Construction in progress		82		16
Total property and equipment, gross		270		288
Less: Accumulated depreciation and amortization		(110)		(141)
Total property and equipment, net	\$	160	\$	147

Depreciation expense related to property and equipment for the years ended December 31, 2022, 2023 and 2024 was \$43 million, \$18 million and \$16 million, respectively. For the years ended December 31, 2022, 2023 and 2024, amortization of capitalized internal-use software costs was \$28 million, \$13 million and \$34 million, respectively.

The net carrying value of capitalized internal-use software as of December 31, 2023 and 2024 was \$27 million and \$69 million, respectively.

Note 9. Leases

The Company's material operating leases consist of office space. The Company's leases generally have remaining terms of one to 14 years, some of which include one or more options to extend the leases up to 10 years. Additionally, some lease contracts include termination options. Generally, the lease term is the minimum of the non-cancelable period of the lease or the lease term inclusive of reasonably certain renewal periods.

The components of lease cost, excluding the immaterial impact from sublease income, were as follows (in millions):

	Year Ended December 31,			
	2022		2023	
Operating lease cost	\$	77	\$	58
Short-term lease cost		2		6
Variable lease cost		17		16
Lease cost, net	\$	96	\$	80

Lease costs are classified within operations and support, product development, sales and marketing, and general and administrative expenses on the consolidated statements of operations.

Lease costs, net do not include lease impairments due to restructuring. Refer to Note 17. *Restructuring* for additional information.

Weighted-average lease term and discount rate were as follows:

	December 31,	
	2023	2024
Weighted-average remaining lease term (years)	5.3	7.2
Weighted-average discount rate	7.2 %	7.3 %

Airbnb, Inc.

Notes to Consolidated Financial Statements

Maturities of lease liabilities (excluding short-term leases) were as follows as of December 31, 2024 (in millions):

Year Ending December 31,	Amount ⁽¹⁾
2025	\$ 83
2026	69
2027	—
2028	32
2029	43
Thereafter	181
Total lease payments	408
Less: Imputed interest	(109)
Present value of lease liabilities	299
Less: Current portion of lease liabilities	(63)
Total long-term lease liabilities	\$ 236

(1) Amounts are net of tenant improvement allowances.

Note 10. Debt

Convertible Senior Notes

On March 8, 2021, the Company issued \$2.0 billion aggregate principal amount of 0% convertible senior notes due 2026 (the "2026 Notes") pursuant to an indenture, dated March 8, 2021 (the "Indenture"), between the Company and U.S. Bank National Association, as trustee. The 2026 Notes were offered and sold in a private offering to qualified institutional buyers pursuant to Rule 144A under the Securities Act of 1933, as amended.

As of both December 31, 2023 and December 31, 2024, total outstanding debt, net of unamortized debt discount and debt issuance costs, was \$2.0 billion and the effective interest rate was 0.2%. Debt issuance costs related to the 2026 Notes totaled \$21 million and were comprised of commissions payable to the initial purchasers and third-party offering costs and are amortized to interest expense using the effective interest method over the contractual term. For the years ended December 31, 2022, 2023 and 2024, interest expense, which includes the amortization of debt discount and issuance costs, was immaterial.

The 2026 Notes are senior unsecured obligations of the Company and do not bear interest. The 2026 Notes mature on March 15, 2026, unless earlier converted, redeemed, or repurchased.

The initial conversion rate for the 2026 Notes is 3.4645 shares of the Company's Class A common stock per \$1,000 principal amount of 2026 Notes, which is equivalent to an initial conversion price of approximately \$288.64 per share of the Class A common stock. The conversion rate and conversion price are subject to customary adjustments under certain circumstances in accordance with the terms of the Indenture.

The 2026 Notes will be convertible at the option of the holders before December 15, 2025 only upon the occurrence of certain events, and from and after December 15, 2025, at any time at their election until the close of business on the second scheduled trading day immediately preceding March 15, 2026, only under certain circumstances. Upon conversion, the Company may satisfy its conversion obligation by paying or delivering, as applicable, cash, shares of the Company's Class A common stock, or a combination of cash and shares of the Company's Class A common stock, at the Company's election, based on the applicable conversion rate. In addition, if certain corporate events that constitute a make-whole fundamental change (as defined in the Indenture) occur, then the conversion rate will, in certain circumstances, be increased for a specified period of time. Additionally, in the event of a corporate event constituting a fundamental change (as defined in the Indenture), holders of the 2026 Notes may require the Company to repurchase all or a portion of their 2026 Notes at a repurchase price equal to 100% of the principal amount of the Notes being repurchased, plus accrued and unpaid special interest or additional interest, if any, to, but excluding, the date of the fundamental change repurchase.

As of December 31, 2024, the if-converted value of the 2026 Notes did not exceed the outstanding principal amount.

As of December 31, 2024 the total estimated fair value of the 2026 Notes was \$1.9 billion and was determined based on a market approach using actual bids and offers of the 2026 Notes in an over-the-counter market on the last trading day of the period, or Level 2 inputs.

Capped Calls

On March 3, 2021, in connection with the pricing of the 2026 Notes, the Company entered into privately negotiated capped call transactions (the "Capped Calls") with certain of the initial purchasers and other financial institutions (the "option counterparties") at a cost of \$100 million. The Capped Calls cover, subject to customary adjustments, the number of shares of Class A common stock initially underlying the 2026 Notes. By entering into the Capped Calls, the Company expects to reduce the potential dilution to its Class A common stock (or, in the event a conversion of the 2026 Notes is settled in cash, to reduce its cash payment obligation) in the event that at the time of conversion of the 2026 Notes its common stock price exceeds the conversion price of the 2026 Notes. The cap price of the Capped Calls was \$360.80 per share of Class A common stock, which represented a premium of 100% over the last reported sale price of the Class A common stock of \$180.40 per share on March 3, 2021, subject to certain customary adjustments under the terms of the Capped Calls.

The Capped Calls meet the criteria for classification in equity, are not remeasured each reporting period, and are included as a reduction to additional paid-in-capital within stockholders' equity.

Airbnb, Inc.

Notes to Consolidated Financial Statements

2022 Credit Facility

In October 2022, the Company terminated its then existing credit facility and entered into a five-year unsecured Revolving Credit Agreement, which provides for initial commitments by a group of lenders led by Morgan Stanley Senior Funding, Inc. of \$1.0 billion ("2022 Credit Facility"). The 2022 Credit Facility provides a \$200 million sub-limit for the issuance of letters of credit. The 2022 Credit Facility has a commitment fee based on ratings and leverage ratios with amounts that range from 0.10% to 0.20% per annum on any undrawn amounts, payable quarterly in arrears. Interest on borrowings is based on ratings and leverage ratios with amounts that range from (i) in the case of the Secured Overnight Financing Rate ("SOFR") borrowings, 1.0% to 1.5%, plus SOFR, subject to a floor of 0.0%, or (ii) in the case of base rate borrowings, 0.0% to 0.5%; plus the greatest of (a) the rate of interest in effect for such day by Morgan Stanley Senior Funding, Inc. as its "prime rate"; (b) the federal funds effective rate plus 0.5%; and (c) SOFR for a one-month period plus 1.0%. Outstanding balances may be repaid prior to maturity without penalty. The 2022 Credit Facility contains customary events of default, affirmative and negative covenants, including restrictions on the Company's and certain of its subsidiaries' ability to incur debt and liens, undergo fundamental changes, as well as certain financial covenants. The Company was in compliance with all financial covenants as of December 31, 2024. As of December 31, 2024, no amounts were drawn under the 2022 Credit Facility and outstanding letters of credit totaled \$19 million.

Note 11. Stockholders' Equity

Common Stock

The Company's restated certificate of incorporation authorizes the Company to issue 2.0 billion shares of Class A common stock and 710.0 million shares of Class B common stock. Both classes of common stock have a par value of \$0.0001 per share. Class A common stock is entitled to one vote per share and Class B common stock is entitled to 20 votes per share. One share of Class B common stock is convertible into one share of Class A common stock voluntarily at any time by the holder, and will convert automatically into one share of Class A common stock upon the earlier of (a) the date and time, or the occurrence of an event, specified by vote or written consent of the holders of at least 80% of the outstanding shares of Class B common stock at the time of such vote or consent voting as a separate series, and (b) the 20-year anniversary of the closing of the IPO. In addition, with certain exceptions as further described in the Company's restated certificate of incorporation, transfers of one share of Class B common stock will result in the conversion of such share of Class B common stock into one share of Class A common stock.

Under the Company's restated certificate of incorporation, the Company is also authorized to issue 2.0 billion shares of Class C common stock and 26.0 million shares of Class H common stock. Each share of Class C common stock is entitled to no votes and will not be convertible into any other shares of the Company's capital stock. Each share of Class H common stock is entitled to no votes and will convert into one share of Class A common stock on a share-for-share basis upon the sale of such share of Class H common stock to any person or entity that is not the Company's subsidiary.

Class A Common Stock Warrants

As of December 31, 2023, the Company had warrants outstanding to purchase 0.8 million shares of Class A common stock with an exercise price of \$28.355 per share, subject to adjustment upon the occurrence of certain specified events. During the year ended December 31, 2024, the warrants were exercised, on a cashless basis, to purchase 0.8 million shares of Class A common stock, resulting in the issuance of 0.7 million shares of the Company's Class A common stock. As of December 31, 2024, there were no outstanding warrants.

Share Repurchase Programs

In May 2023 and February 2024, the Company announced that its board of directors had approved share repurchase programs to purchase up to \$2.5 billion and \$6.0 billion of the Company's Class A common stock, respectively.

Share repurchases under these share repurchase programs may be made through a variety of methods, such as open market purchases, privately negotiated transactions, block trades or accelerated share repurchase transactions or by any combination of such methods. Any such repurchases will be made from time to time subject to market and economic conditions, applicable legal requirements and other relevant factors. These share repurchase programs do not obligate the Company to repurchase any specific number of shares and may be modified, suspended or terminated at any time at the Company's discretion.

During the year ended December 31, 2024, the Company repurchased and subsequently retired 24.5 million shares of Class A common stock for \$3.4 billion. As of December 31, 2024, the Company completed the repurchases under the May 2023 share repurchase program and had \$3.3 billion available for repurchase of Class A common stock under the February 2024 share repurchase program.

The Inflation Reduction Act imposed a nondeductible 1% excise tax on the net value of certain stock repurchases made after December 31, 2022. For the years ended December 31, 2023 and 2024, the excise tax on share repurchases was immaterial.

Note 12. Stock-Based Compensation and Employee Benefit Plan

Stock-Based Compensation Expense

Stock-based compensation expense was \$930 million, \$1.1 billion and \$1.4 billion for the years ended December 31, 2022, 2023 and 2024, respectively.

Airbnb, Inc.

Notes to Consolidated Financial Statements

There was no income tax benefit related to stock-based compensation expense recognized for the year ended December 31, 2022. The income tax benefit recognized in the consolidated statement of operations on stock-based compensation expense was \$227 million and \$273 million for the years ended December 31, 2023 and 2024, respectively.

The Company realized an income tax benefit of \$19 million, \$435 million and \$39 million in the consolidated statements of operations related to awards vested or exercised during the years ended December 31, 2022, 2023 and 2024, respectively. These amounts do not include the indirect effects of stock-based awards, which primarily relate to the research and development tax credit.

Equity Incentive Plans

2018 Equity Incentive Plan

In 2018, the Company adopted the 2018 Equity Incentive Plan (the "2018 Plan"). A total of 50.0 million shares of Class B common stock were reserved for issuance under the 2018 Plan and the 13.2 million shares remaining for issuance under a prior plan were added to the number of shares available under the 2018 Plan.

2020 Incentive Award Plan

In 2020, the Company adopted the 2020 Incentive Award Plan (the "2020 Plan," and together with the 2018 Plan, and a plan assumed in connection with a 2019 acquisition, the "Plans"). Under the 2020 Plan, 62.1 million shares of Class A common stock were initially reserved for issuance. The number of shares initially reserved for issuance pursuant to awards under the 2020 Plan will be increased by (i) the number of shares subject to awards outstanding under the 2018 Plan and the Assumed Equity Incentive Plan, as of the effective date of the 2020 Plan that subsequently terminate, are exchanged for cash, surrendered or repurchased, or are tendered or withheld to satisfy any exercise price or tax withholding obligations and (ii) an annual increase on the first day of each year beginning in 2022 and ending in 2030, equal to the lesser of (a) 5% of the shares of all series of the Company's common stock outstanding on the last day of the immediately preceding year and (b) such smaller number of shares of stock as determined by the Company's board of directors; provided, however, that no more than 371.2 million shares of stock may be issued upon the exercise of incentive stock options.

Stock Option and Restricted Stock Unit Activity

The fair value of each stock option award is estimated on the date of grant using the Black-Scholes option-pricing model using the assumptions in the following table:

	Year Ended December 31,			
	2022	2023	2024	
Expected term (years)	6.1	1.4 - 6.1	6.1	
Risk-free interest rate	0.3% - 2.2%	3.6% - 5.0%	4.3% - 4.4%	
Expected volatility	48.6% - 58.4%	51.3% - 54.4%	51.8% - 52.7%	
Expected dividend yield	—	—	—	

A summary of stock option and RSU activity under the Plans was as follows (in millions, except per share amounts):

	Outstanding Stock Options		Outstanding Restricted Stock Units	
	Number of Shares	Weighted- Average Exercise Price	Number of Shares	Weighted- Average Grant Date Fair Value
Balances as of December 31, 2022	22	\$ 23.41	34	\$ 77.07
Granted	1	115.15	12	122.84
Increase in shares available for grant	—	—	—	—
Exercised/Vested	(16)	5.37	(14)	93.25
Canceled	—	98.60	(2)	120.36
Balances as of December 31, 2023	7	71.76	30	85.35
Granted	1	168.18	13	153.36
Increase in shares available for grant	—	—	—	—
Exercised/Vested	(3)	41.55	(11)	119.00
Canceled	—	—	(2)	143.07
Balances as of December 31, 2024	5	\$ 93.53	30	\$ 97.93

Airbnb, Inc.

Notes to Consolidated Financial Statements

	Number of Shares	Weighted- Average Exercise Price	Weighted- Average Remaining Contractual Life (years)	Aggregate Intrinsic Value
Options outstanding as of December 31, 2023	7	\$ 71.76	5.77	\$ 500
Options exercisable as of December 31, 2023	6	60.89	5.11	448
Options outstanding as of December 31, 2024	5	93.53	5.43	260
Options exercisable as of December 31, 2024	4	80.55	4.69	253

In May 2023, 11.2 million stock options were exercised in cashless transactions pursuant to which the Company withheld and retired 5.7 million shares of common stock, valued at their fair market value on the exercise date, to cover the related \$567 million of employee withholding tax and \$36 million of exercise cost.

During the years ended December 31, 2022, 2023 and 2024, the weighted-average fair value of stock options granted under the Plans was \$79.75, \$65.22 and \$93.29 per share, respectively.

During the years ended December 31, 2022, 2023 and 2024, the aggregate intrinsic value of stock options exercised was \$326 million, \$1.6 billion and \$254 million, respectively, and the total grant-date fair value of stock options that vested was \$45 million, \$44 million and \$51 million, respectively.

As of December 31, 2024, there was \$80 million of total unrecognized compensation cost related to stock option awards granted under the Plans. The unrecognized cost as of December 31, 2024 is expected to be recognized over a weighted-average period of 2.6 years.

RSUs are measured at the fair market value of the underlying stock at the grant date and the expense is recognized over the requisite service period. The service-based vesting condition for these awards is generally satisfied over four years.

Employee Benefit Plan

The Company maintains a 401(k) defined contribution benefit plan that covers substantially all of its domestic employees. The plan allows U.S. employees to make voluntary pre-tax contributions in certain investments at the discretion of the employee, up to maximum annual contribution subject to Internal Revenue Code limitations. The Company's contributions to the plan were immaterial for the years ended December 31, 2022, 2023 and 2024.

Note 13. Commitments and Contingencies

Commitments

The Company has commitments including purchase obligations for web-hosting services and other commitments for brand marketing. The following table presents these non-cancelable commitments and obligations as of December 31, 2024 (in millions):

	Total	Less than 1 year	1 to 3 years	3 to 5 years	More than 5 years
Purchase obligations	\$ 719	\$ 312	\$ 407	\$ —	\$ —
Other commitments	120	29	60	31	—
Total	\$ 839	\$ 341	\$ 467	\$ 31	\$ —

Purchase commitments include amounts related to the Company's commercial agreement with a data hosting services provider, pursuant to which the Company committed to spend an aggregate of at least \$672 million for vendor services through 2027.

Lodging Tax Obligations and Other Non-Income Tax Matters

Lodging Tax Obligations

Some states and localities in the United States and elsewhere in the world impose transient occupancy or lodging accommodations taxes ("Lodging Taxes") on the use or occupancy of lodging accommodations or other traveler services. As of December 31, 2024, the Company collects and remits Lodging Taxes in approximately 33,000 jurisdictions around the world on behalf of its hosts. Such Lodging Taxes are generally remitted to tax jurisdictions within a 30 to 90-day period following the end of each month.

As of December 31, 2023 and December 31, 2024, the Company had an obligation to remit Lodging Taxes collected from guests on bookings in these jurisdictions totaling \$274 million and \$312 million, respectively. These payables were recorded in accrued expenses, accounts payable, and other current liabilities on the consolidated balance sheets.

In jurisdictions where the Company does not collect and remit Lodging Taxes, hosts are primarily responsible for such taxes. The Company has estimated Lodging Tax liabilities in a certain number of jurisdictions with respect to state, city, and local taxes where management believes it is probable that the Company can be held jointly liable with hosts for taxes and the related amounts can be reasonably estimated. As of December 31, 2023 and December 31, 2024, accrued obligations related to these estimated taxes, including estimated penalties and

Airbnb, Inc.

Notes to Consolidated Financial Statements

interest, totaled \$114 million and \$83 million, respectively. As of December 31, 2024, the Company estimates that the reasonably possible loss related to certain Lodging Taxes that can be determined in excess of the amounts accrued is between \$47 million to \$56 million; however, no assurance can be given as to the outcomes and the Company could be subject to significant additional tax liabilities. With respect to all other jurisdictions' Lodging Taxes for which a loss is probable or reasonably possible, the Company is unable to determine an estimate of the possible loss or range of loss beyond the amounts already accrued.

The Company's potential obligations with respect to Lodging Taxes could be affected by various factors, which include, but are not limited to, whether the Company determines or any tax authority asserts that the Company has a responsibility to collect lodging and related taxes on either historical or future transactions, or by the introduction of new ordinances and taxes that subject the Company's operations to such taxes. Accordingly, the ultimate resolution of Lodging Taxes may be greater or less than the liabilities that the Company has recorded.

The Company is currently involved in disputes brought by certain domestic and international states and localities involving the payment of Lodging Taxes. These jurisdictions are asserting that the Company is liable or jointly liable with hosts to collect and remit Lodging Taxes. These disputes are in various stages and the Company continues to vigorously defend these claims. The Company believes that the statutes at issue impose a Lodging Tax obligation on the person exercising the taxable privilege of providing accommodations, or the Company's hosts.

The imposition of such taxes on the Company could increase the cost of a guest booking and potentially cause a reduction in the volume of bookings on the Company's platform which would adversely impact the Company's results of operations. The Company will continue to monitor the application and interpretation of lodging and related taxes and ordinances and will adjust accruals based on any new information or further developments.

Other Non-Income Taxes

The Company is under audit and inquiry by various domestic and foreign tax authorities with regard to non-income tax matters. The subject matter of these contingent liabilities primarily arises from the Company's transactions with its customers. Such disputes involve the applicability of transactional taxes (such as sales, value-added, business, digital service, and similar taxes) to services provided, as well as the applicability of withholding tax on payments made to hosts.

The Company has estimated transactional taxes where there is significant ambiguity as to how the taxes apply to our platform; management believes it is probable that the Company can be held liable for such taxes, and the related amounts can be reasonably estimated. As of December 31, 2024, accrued obligations related to these estimated taxes, including estimated penalties and interest, totaled \$55 million. In addition, the Company has identified reasonably possible exposures related to transactional taxes and has not accrued for these amounts since the likelihood of the contingent liability is less than probable. As of December 31, 2024, the Company estimates that the reasonably possible loss related to these matters in excess of the amounts accrued is between \$210 million and \$240 million; however, no assurance can be given as to the outcomes and the Company could be subject to significant additional tax liabilities.

As of December 31, 2023 and December 31, 2024, the Company accrued a total of \$521 million and \$227 million of estimated tax liabilities, including interest and penalties, related to withholding taxes on payments made to hosts, respectively. As of December 31, 2024, the Company estimates that the reasonably possible loss related to withholding income taxes that can be determined in excess of the amounts accrued is between \$125 million to \$135 million; however, no assurance can be given as to the outcomes and the Company could be subject to significant additional tax liabilities. Due to the inherent complexity and uncertainty of these matters and judicial processes in certain jurisdictions, the final outcomes may exceed the estimated liabilities recorded.

In 2017, Italy passed a law purporting to require short-term rental platforms that process payments to withhold and remit host income tax and collect and remit tourist tax, amongst other obligations ("2017 Law"). The Company challenged this law before the Italian courts and the Court of Justice of the European Union ("CJEU"). In December 2022, the CJEU found that European law does not prohibit member states from passing legislation requiring short-term rental platforms to withhold income taxes from their hosts, however a requirement to appoint a tax representative, on which the 2017 Law and the withholding obligations are based, is contrary to European Union ("EU") law. In October 2023, the Italian national court upheld the ruling of the CJEU. The subsidiary in Ireland continues to be subject to tax audits in Italy. It and other group subsidiaries, including the Italian subsidiary, could in the future be subject to further tax audits in Italy, including in relation to permanent establishment, transfer pricing, and withholding obligations.

In May 2023, the Guardia di Finanza de Milano ("GdF") issued a Tax Audit Report recommending to the Italian tax authorities a formal tax assessment of 779 million Euro on Airbnb's subsidiary in Ireland relating to the 2017 Law and associated withholding tax obligations. On December 13, 2023, without admitting any liability, Airbnb Ireland signed an agreement with the Italian Revenue Agency ("ITA") in settlement of the 2017-2021 audit period for an aggregate payment of 576 million Euro (\$621 million). Such agreement settled a dispute about Airbnb Ireland's obligations to withhold and remit host income tax, including taxes, interest, and penalties, for those relevant periods. The GdF conducted a withholding tax audit of Airbnb Ireland for the 2022 and 2023 tax years and issued a report to the ITA in March 2024. In December 2024, Airbnb Ireland signed a similar agreement in settlement of the 2022 audit period for an aggregate payment of 139 million Euro (\$150 million). In January 2025, Airbnb Ireland entered into an agreement with the Italian Revenue Agency to close the 2023 audit period for an aggregate payment of 179 million Euro (\$186 million); 123 million Euro was paid in December of 2024 and 56 million Euro was paid in January of 2025. In 2024, Airbnb Ireland started withholding on host payments related to Italian listings.

With respect to all other transactional taxes and withholding tax on payments made to hosts for which a loss is probable or reasonably possible, the Company is unable to determine an estimate of the possible loss or range of loss beyond the amounts already accrued.

Airbnb, Inc.

Notes to Consolidated Financial Statements

Payroll Taxes

The Company is subject to regular payroll tax examinations by various international, state and local jurisdictions. Although management believes its tax withholding remittance practices are appropriate, the Company may be subject to additional tax liabilities, including interest and penalties, if any tax authority disagrees with the Company's withholding and remittance practices, or if there are changes in laws, regulations, administrative practices, principles or interpretations related to payroll tax withholding in the various international, state and local jurisdictions.

Legal and Regulatory Matters

The Company has been and is currently a party to various legal and regulatory matters arising in the normal course of business. Such proceedings and claims, even if not meritorious, can require significant financial and operational resources, including the diversion of management's attention from the Company's business objectives.

Regulatory Matters

The Company operates in a complex legal and regulatory environment and its operations are subject to various U.S. and foreign laws, rules, and regulations, including those related to: Internet activities; short-term rentals, long-term rentals and home sharing; real estate, property rights, housing and land use; travel and hospitality; privacy and data protection; intellectual property; competition; health and safety; protection of minors; consumer protection; employment; payments, money transmission, economic and trade sanctions, anti-corruption and anti-bribery; taxation; and others. In addition, the nature of the Company's business exposes it to inquiries and potential claims related to the compliance of the business with applicable law and regulations. In some instances, applicable laws and regulations do not yet exist or are being applied, interpreted or implemented to address aspects of the Company's business, and such adoption or interpretation could further alter or impact the Company's business.

In certain instances, the Company has been party to litigation with municipalities relating to or arising out of certain regulations. In addition, the implementation and enforcement of regulation can have an impact on the Company's business.

Intellectual Property

The Company has been and is currently subject to claims relating to intellectual property, including alleged patent infringement. Adverse results in such lawsuits may include awards of substantial monetary damages, costly royalty or licensing agreements, or orders preventing the Company from offering certain features, functionalities, products, or services, and may also cause the Company to change its business practices or require development of non-infringing products or technologies, which could result in a loss of revenue or otherwise harm its business. To date, the Company has not incurred any material costs as a result of such cases and has not recorded any material liabilities in its consolidated financial statements related to such matters.

Litigation and Other Legal Proceedings

The Company is currently involved in, and may in the future be involved in, legal proceedings, claims, and government investigations in the ordinary course of business. These include proceedings, claims, and investigations relating to, among other things, regulatory matters, commercial matters, intellectual property, competition, tax, employment, pricing, discrimination, consumer rights, personal injury, and property rights.

Depending on the nature of the proceeding, claim or investigation, the Company may be subject to monetary damage awards, fines, penalties, and/or injunctive orders. Furthermore, the outcome of these matters could materially adversely affect the Company's business, results of operations, and financial condition. The outcomes of legal proceedings, claims, and government investigations are inherently unpredictable and subject to significant judgment to determine the likelihood and amount of loss related to such matters. While it is not possible to determine the outcomes, the Company believes based on its current knowledge that the resolution of all such pending matters will not, either individually or in the aggregate, have a material adverse effect on the Company's business, results of operations, financial condition, or cash flows.

The Company establishes an accrued liability for loss contingencies related to legal matters when a loss is both probable and reasonably estimable. These accruals represent management's best estimate of probable losses. Such currently accrued amounts are immaterial to the Company's consolidated financial statements. However, management's views and estimates related to these matters may change in the future, as new events and circumstances arise and the matters continue to develop. Until the final resolution of legal matters, there may be an exposure to losses in excess of the amounts accrued. With respect to outstanding legal matters, based on current knowledge, the amount or range of reasonably possible loss will not, either individually or in the aggregate, have a material adverse effect on the Company's business, results of operations, financial condition, or cash flows. Legal fees are expensed as incurred.

Host Protections

The Company offers AirCover coverage, which includes but is not limited to, the Company's Host Damage Protection program that provides protection of up to \$3 million for direct physical loss or damage to a host's covered property caused by guests during a confirmed booking and when the host and guest are unable to resolve the dispute. The Company retains risk and also maintains insurance from third parties on a per claim basis to protect the Company's financial exposure under this program. In addition, through third-party insurers and self-insurance mechanisms, including a wholly-owned captive insurance subsidiary, the Company provides insurance coverage for third-party bodily injury or property damage liability claims that occur during a stay. The Company's Host Liability Insurance and Experiences Liability Insurance consists of a commercial general liability policy, with hosts and the Company as named insureds and landlords of hosts as

Airbnb, Inc.

Notes to Consolidated Financial Statements

additional insureds. The Host Liability Insurance and Experiences Liability Insurance provides primary coverage for up to \$1 million per occurrence, subject to a \$1 million cap per listing location, and includes various market standard conditions, limitations, and exclusions.

Indemnifications

The Company has entered into indemnification agreements with certain of its employees, officers and directors. The indemnification agreements and the Company's Amended and Restated Bylaws (the "Bylaws") require the Company to indemnify its directors and officers and those employees who have entered into indemnification agreements to the fullest extent not prohibited by Delaware law. Subject to certain limitations, the indemnification agreements and Bylaws also require the Company to advance expenses incurred by its directors and officers and those employees who have entered into indemnification agreements. No demands have been made upon the Company to provide indemnification or advancement under the indemnification agreements or the Bylaws, and thus, there are no indemnification or advancement claims that the Company is aware of that could have a material adverse effect on the Company's business, results of operations, financial condition, or cash flows.

In the ordinary course of business, the Company has included limited indemnification provisions in certain agreements with parties with whom the Company has commercial relations, which provisions are of varying scope and terms with respect to indemnification of certain matters, which may include losses arising out of the Company's breach of such agreements or out of intellectual property infringement claims made by third parties. It is not possible to determine the maximum potential loss under these indemnification provisions due to the limited history of prior indemnification claims and the unique facts and circumstances involved in each particular provision. To date, no significant costs have been incurred, either individually or collectively, in connection with the Company's indemnification provisions.

Note 14. Income Taxes

The domestic and foreign components of Income before income taxes were as follows (in millions):

	Year Ended December 31,		
	2022	2023	2024
Domestic	\$ 1,820	\$ 1,913	\$ 3,047
Foreign	169	189	284
Income before income taxes	\$ 1,989	\$ 2,102	\$ 3,331

The components of the provision for (benefit from) income taxes were as follows (in millions):

	Year Ended December 31,		
	2022	2023	2024
Current			
Federal	\$ 19	\$ 19	\$ 103
State	10	8	23
Foreign	68	158	124
Total current provision for income taxes	97	185	250
Deferred			
Federal	—	(2,410)	397
State	—	(461)	36
Foreign	(1)	(4)	—
Total deferred provision for (benefit from) income taxes	(1)	(2,875)	433
Total provision for (benefit from) income taxes	\$ 96	\$ (2,690)	\$ 683

Airbnb, Inc.

Notes to Consolidated Financial Statements

The following is a reconciliation of the U.S. federal statutory federal income tax rate to the Company's effective tax rate:

	Year Ended December 31,		
	2022	2023	2024
Expected income tax expense at U.S. federal statutory rate	21.0 %	21.0 %	21.0 %
State taxes, net of federal benefits	0.4	0.3	1.3
Foreign tax rate differential	1.0	2.9	0.8
Stock-based compensation	(6.9)	(16.7)	(0.2)
Other statutorily non-deductible expenses	0.3	0.1	0.1
Research and development credits	(4.7)	(5.5)	(2.2)
Uncertain tax positions—prior year positions	0.1	1.8	—
Uncertain tax positions—current year positions	0.8	1.7	1.4
U.S. tax on foreign income, net of allowable credits and deductions	0.7	3.9	—
Foreign-derived intangible income deduction	(1.9)	(1.0)	(2.0)
Change in valuation allowance	(6.0)	(136.6)	0.3
Other, net	—	0.1	—
Effective tax rate	4.8 %	(128.0)%	20.5 %

The components of deferred tax assets and liabilities consisted of the following (in millions):

	December 31,	
	2023	2024
Deferred tax assets:		
Loss carryforwards	\$ 1,232	\$ 462
Tax credit carryforwards	844	999
Accruals and reserves	113	122
Non-income tax accruals	78	84
Stock-based compensation	70	70
Operating lease liabilities	62	61
Intangible assets	158	140
Capitalized research and development costs	671	882
Other, net	55	62
Gross deferred tax assets	3,283	2,882
Valuation allowance	(364)	(395)
Total deferred tax assets	2,919	2,487
Deferred tax liabilities:		
Property and equipment basis differences	(18)	(20)
Operating lease assets	(18)	(25)
Other, net	(2)	(7)
Total deferred tax liabilities	(38)	(52)
Total net deferred tax assets	\$ 2,881	\$ 2,435

The Company regularly assesses the need for a valuation allowance against its deferred tax assets each quarter. In making that assessment, the Company considers both positive and negative evidence in the various jurisdictions in which it operates related to the likelihood of realization of the deferred tax assets to determine, based on the weight of available evidence, whether it is more likely than not that some or all of the deferred tax assets will not be realized. As of December 31, 2023, based on all available positive and negative evidence, having demonstrated sustained profitability which is objective and verifiable, and taking into account anticipated future earnings, the Company concluded that it is more likely than not that its U.S. federal and state deferred tax assets will be realizable, with the exception of California research and development credits, capital loss carryovers, and certain losses subject to the dual consolidated loss rules. The Company released \$2.9 billion of its valuation allowance during 2023. The Company continues to maintain a valuation allowance against its California research and development credit deferred tax assets due to the uncertainty regarding realizability of these deferred tax assets as they have not met the "more likely than not" realization criteria, particularly as the Company expects research and development tax credit generation to exceed its ability to use the credits in future years. The Company will continue to monitor the need for a valuation allowance against its deferred tax assets on a quarterly basis.

The Company's policy with respect to its undistributed foreign subsidiaries' earnings is to consider those earnings to be indefinitely reinvested. The Company has not provided for the tax effect, if any, of limited outside basis differences of its foreign subsidiaries. The determination of the future tax consequences of the remittance of these earnings is not practicable.

Airbnb, Inc.

Notes to Consolidated Financial Statements

As of December 31, 2023 and 2024, the Company had net operating loss carryforwards for federal income tax purposes of \$5.3 billion and \$1.8 billion, respectively. The Company's federal net operating loss carryforwards do not have an expiration date. As of December 31, 2023 and 2024, the Company had federal research and development tax credit carryforwards of \$720 million and \$554 million, respectively. The research and development tax credits will expire beginning in 2041 if not utilized. As of December 31, 2024, the Company had alternative minimum tax credit carryforwards of \$311 million, which do not have an expiration date and may be claimed against regular tax in future years.

As of December 31, 2023 and 2024, the Company had net operating loss carryforwards for state income tax purposes of \$4.6 billion and \$3.8 billion, respectively. Some of the Company's state net operating loss carryforwards will expire, if not utilized, beginning in 2027. As of December 31, 2023 and 2024, the Company had state research and development tax credit carryforwards of \$464 million and \$501 million, respectively. The research and development tax credits do not have an expiration date.

The Tax Reform Act of 1986 and similar California legislation impose substantial restrictions on the utilization of net operating losses and tax credit carryforwards in the event that there is a change in ownership as provided by Section 382 of the Internal Revenue Code and similar state provisions. Such a limitation could result in the expiration of the net operating loss carryforwards and tax credits before utilization, which could result in increased future tax liabilities.

A reconciliation of the beginning and ending amount of the Company's total gross unrecognized tax benefits was as follows (in millions):

	Year Ended December 31,		
	2022	2023	2024
Balance at beginning of year	\$ 597	\$ 650	\$ 780
Gross increases related to prior year tax positions	7	52	1
Gross decreases related to prior year tax positions	(2)	(8)	(1)
Gross increases related to current year tax positions	60	103	106
Reductions due to settlements with taxing authorities	(7)	(12)	(14)
Reduction due to lapse in statute of limitations	(5)	(5)	(3)
Balance at end of year	\$ 650	\$ 780	\$ 869

The Company is in various stages of examination in connection with its ongoing tax audits globally, and it is difficult to determine when these examinations will be settled. The Company believes that an adequate provision has been recorded for any adjustments that may result from tax audits. However, the outcome of tax audits cannot be predicted with certainty. If any issues addressed in the Company's tax audits are resolved in a manner not consistent with management's expectations, the Company may be required to record an adjustment to the provision for (benefit from) income taxes in the period such resolution occurs. Changes in tax laws, regulations, administrative practices, principles, and interpretations may impact the Company's tax contingencies. The timing of the resolution of income tax examinations is highly uncertain, and the amounts ultimately paid, if any, upon resolution of the issues raised by the taxing authorities may differ from the amounts accrued. It is reasonably possible that within the next twelve months the Company may experience an increase or decrease in its unrecognized tax benefits as a result of additional assessments by various tax authorities, possibly reach resolution of income tax examinations in one or more jurisdictions, or lapses of the statute of limitations. However, an estimate of the range of the reasonably possible change in the next twelve months cannot be made.

As of December 31, 2024, \$740 million of unrecognized tax benefits represents the amount that would, if recognized, impact the Company's effective income tax rate. The Company's accrual for interest and penalties was \$90 million and \$100 million as of December 31, 2023 and 2024, respectively.

The Company's significant tax jurisdictions include the United States, California, and Ireland. The Company is currently under examination for income taxes by the Internal Revenue Service ("IRS") for the 2013, 2016, 2017, and 2018 tax years. The primary issue under examination in the 2013 audit is the valuation of the Company's international intellectual property which was sold to a subsidiary in 2013. In the year ended December 31, 2019, new information became available which required the Company to remeasure its reserve for unrecognized tax benefits. The Company recorded additional tax expense of \$196 million during the year ended December 31, 2019. In December 2020, the Company received a Notice of Proposed Adjustment ("NOPA") from the IRS which proposed an increase to the Company's U.S. taxable income that could result in additional income tax expense and cash liability of \$1.3 billion plus penalties and interest, which exceeds its current reserve recorded in its consolidated financial statements by more than \$1.0 billion. The Company disagrees with the proposed adjustment and continues to vigorously contest it. In February 2021, the Company submitted a protest to the IRS describing its disagreement with the proposed adjustment and requesting the case be transferred to the IRS Independent Office of Appeals ("IRS Appeals"). In December 2021, the Company received a rebuttal from the IRS with the same proposed adjustments that were in the NOPA. In January 2022, the Company entered into an administrative dispute process with IRS Appeals. An acceptable outcome was not reached with IRS Appeals, and in May 2024, the Company received a Statutory Notice of Deficiency ("Notice") from the IRS related to the aforementioned valuation of its international intellectual property. The Notice claims that the Company owes \$1.3 billion in tax, plus penalties and interest. The Company will continue to pursue all available remedies to resolve this dispute. In July 2024, the Company petitioned the U.S. Tax Court ("Tax Court") for redetermination, and if necessary, the Company will appeal the Tax Court's decision to the appropriate appellate court. The Company believes that adequate amounts have been reserved for any adjustments that may ultimately result from these examinations. If the IRS prevails in the assessment of additional tax due based on its position and such tax and related interest and penalties, if any, exceeds the Company's current reserves, such outcome could have a material adverse impact on the Company's financial position and results of operations, and any assessment of additional tax could require a significant cash payment and have a material adverse impact on the Company's consolidated statements of cash flow.

The Company's 2008 to 2024 tax years remain subject to examination in the United States and California due to tax attributes and statutes of limitations, and its 2020 to 2024 tax years remain subject to examination in Ireland. There are other ongoing audits in various other

Airbnb, Inc.

Notes to Consolidated Financial Statements

jurisdictions that are immaterial to the Company's consolidated financial statements. The Company remains subject to possible examination in various other jurisdictions that are not expected to result in material tax adjustments.

On August 16, 2022, the Inflation Reduction Act was signed into law, with tax provisions primarily focused on implementing a 15% minimum tax (CAMT) on global adjusted financial statement income and a 1% excise tax on net share repurchases. The Inflation Reduction Act became effective beginning in fiscal year 2023 and did not have a material impact on the year ended December 31, 2023. The Company accrued \$95 million of CAMT liability during the year ended December 31, 2024, and may be subject to a material amount of CAMT in the next year but expect to fully utilize the corresponding tax credits generated from the CAMT in the subsequent following years.

Note 15. Net Income per Share

The following table sets forth the computation of basic and diluted net income per share attributable to common stockholders for the years indicated (in millions, except per share amounts):

	Year Ended December 31,		
	2022	2023	2024
Net income	\$ 1,893	\$ 4,792	\$ 2,648
Add: convertible notes interest expense, net of tax	4	3	4
Net income - diluted	\$ 1,897	\$ 4,795	\$ 2,652
Weighted-average shares in computing net income per share attributable to Class A and Class B common stockholders:			
Basic	637	637	632
Effect of dilutive securities	43	25	13
Diluted	680	662	645
Net income per share attributable to Class A and Class B common stockholders:			
Basic	\$ 2.97	\$ 7.52	\$ 4.19
Diluted	\$ 2.79	\$ 7.24	\$ 4.11

The rights, including the liquidation and dividend rights, of the holders of Class A and Class B common stock are identical, except with respect to voting and conversion. Each share of Class A common stock is entitled to one vote per share and each share of Class B common stock is entitled to 20 votes per share. Each share of Class B common stock is convertible into a share of Class A common stock voluntarily at any time by the holder, and automatically upon certain events. The Class A common stock has no conversion rights. As the liquidation and dividend rights are identical for Class A and Class B common stock, the undistributed earnings are allocated on a proportional basis and the resulting net income per share attributable to common stockholders will, therefore, be the same for both Class A and Class B common stock on an individual or combined basis.

There were no preferred dividends declared or accumulated for the years ended December 31, 2022, 2023 and 2024. As of each December 31, 2022, 2023 and 2024, RSUs to be settled in 9.6 million shares of Class A common stock were excluded from the table below because they are subject to market conditions that were not achieved as of such date. As of December 31, 2022 and 2023, 0.3 million shares of RSAs were excluded from the table below because they are subject to performance conditions that were not achieved as of such date. As of December 31, 2024, 0.2 million shares of RSAs were excluded from the table below because they were subject to performance conditions that were not achieved as of such date.

Additionally, the following securities were not included in the computation of diluted shares outstanding because the effect would be anti-dilutive (in millions):

	Year Ended December 31,		
	2022	2023	2024
Stock options	1	2	2
RSUs	9	5	7
Total	10	7	9

Note 16. Segment and Geographic Information

Segment Information

Operating segments are defined as components of an entity for which discrete financial information is available and is regularly reviewed by the Chief Operating Decision Maker ("CODM") in making decisions regarding resource allocation and performance assessment. The Company's CODM is its Chief Executive Officer. The Company has one operating segment and one reportable segment. The CODM

Airbnb, Inc.

Notes to Consolidated Financial Statements

assesses financial performance and decides how to allocate resources based on consolidated net income. Segment assets are reported on the Company's consolidated balance sheets.

The following table sets forth the Company's significant segment expenses (in millions):

	Year Ended December 31,		
	2022	2023	2024
Revenue	\$ 8,399	\$ 9,917	\$ 11,102
Less:			
Merchant fees and chargebacks	1,195	1,369	1,508
Stock-based compensation expense	930	1,120	1,407
Salaries and benefits	1,359	1,558	1,686
Marketing	1,001	1,189	1,484
Professional and third-party services ⁽¹⁾	956	1,078	1,083
Non-income taxes	113	894	237
Other items ⁽²⁾	1,043	1,191	1,144
Total cost and expense	6,597	8,399	8,549
Income from operations	1,802	1,518	2,553
Interest income	186	721	818
Other income (expense), net	1	(137)	(40)
Income before income taxes	1,989	2,102	3,331
Provision for (benefit from) income taxes	96	(2,690)	683
Net income	\$ 1,893	\$ 4,792	\$ 2,648

(1) Professional and third-party services primarily include expenses related to customer support partners, consultants and third-party service providers, contingent workforce, legal, audit and tax.

(2) Other items primarily include expenses and costs related to data hosting services, insurance, customer relations, and software and equipment.

Geographic Information

The following table sets forth the breakdown of revenue by geography, determined based on the location of the Host's listing (in millions):

	Year Ended December 31,		
	2022	2023	2024
United States	\$ 3,890	\$ 4,290	\$ 4,640
International ⁽¹⁾	4,509	5,627	6,462
Total revenue	\$ 8,399	\$ 9,917	\$ 11,102

(1) No individual international country represented 10% or more of the Company's total revenue for years ended December 31, 2022, 2023, and 2024.

The following table sets forth the breakdown of long-lived assets based on geography (in millions):

	December 31,	
	2023	2024
United States	\$ 229	\$ 245
Ireland	32	30
Other international	18	16
Total long-lived assets	\$ 279	\$ 291

Long-lived assets as of December 31, 2023 and 2024 consisted of property and equipment and operating lease ROU assets. Long-lived assets attributed to the United States, Ireland, and other international geographies are based upon the country in which the asset is located.

Note 17. Restructuring

In 2022, as part of the Company's evaluation of its real estate needs and strategy, the Company recorded restructuring charges of \$89 million, which include \$81 million relating to an impairment of operating lease ROU assets, and \$8 million of related leasehold improvements. There were no restructuring charges recorded during 2023 or 2024.

Airbnb, Inc.

Schedule II—Valuation and Qualifying Account

The table below details the activity of the valuation allowance on deferred tax assets for the years ended December 31, 2022, 2023 and 2024 (in millions):

	Balance at Beginning of Year	Charged to Expenses	Credited to Expenses	Balance at End of Year
Valuation Allowance on Deferred Tax Assets				
Year Ended December 31, 2022	\$ 3,264	\$ —	\$ (98)	\$ 3,166
Year Ended December 31, 2023	\$ 3,166	\$ 95	\$ (2,897)	\$ 364
Year Ended December 31, 2024	\$ 364	\$ 31	\$ —	\$ 395

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our principal executive officer and principal financial officer, conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, as of the end of the period covered by this Annual Report on Form 10-K. Based on that evaluation, our principal executive officer and principal financial officer have concluded that our disclosure controls and procedures were effective as of December 31, 2024, the end of the period covered by this Annual Report on Form 10-K, to provide reasonable assurance that information required to be disclosed by us in reports that we file or submit under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in the SEC rules and forms and (ii) accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act). Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of consolidated financial statements for external purposes in accordance with generally accepted accounting principles.

Our management, under the supervision of our principal executive officer and principal financial officer, conducted an evaluation of the effectiveness of our internal control over financial reporting as of December 31, 2024 based on the framework in *Internal Control-Integrated Framework* (2013), issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, management, including our principal executive officer and principal financial officer, concluded that our internal control over financial reporting was effective as of December 31, 2024.

The effectiveness of our internal control over financial reporting as of December 31, 2024 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm as stated in their report, which is included in Item 8 of this Annual Report on Form 10-K.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting, as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act, during the quarter ended December 31, 2024 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Limitations on Controls

Our disclosure controls and procedures and internal control over financial reporting are designed to provide reasonable assurance of achieving their desired objectives. Management does not expect, however, that our disclosure controls and procedures or our internal control over financial reporting will prevent or detect all error and fraud. Any control system, no matter how well designed and operated, is based upon certain assumptions and can provide only reasonable, not absolute, assurance that its objectives will be met. Further, no evaluation of controls can provide absolute assurance that misstatements due to error or fraud will not occur or that all control issues and instances of fraud, if any, within our Company have been detected.

Item 9B. Other Information

Rule 10b5-1 Trading Arrangements

During the three months ended December 31, 2024, none of our officers or directors adopted, modified or terminated a "Rule 10b5-1 trading arrangement" or "non-Rule 10b5-1 trading arrangement" as each term is defined in Item 408 of Regulation S-K.

Item 9C. Disclosure Regarding Foreign Jurisdictions that Prevent Inspections

Not applicable.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The information required by this Item is incorporated by reference to the Company's 2025 Proxy Statement (the "2025 Proxy Statement") to be filed with the SEC within 120 days after December 31, 2024 in connection with the solicitation of proxies for the Company's 2025 annual meeting of stockholders.

We have adopted a Code of Ethics that applies to our officers, directors and employees, which is available on our website (investors.airbnb.com) under "Governance." The Code of Ethics is intended to qualify as a "code of ethics" within the meaning of Section 406 of the Sarbanes-Oxley Act of 2002, as amended, and Item 406 of Regulation S-K. In addition, we intend to promptly disclose on our website (investors.airbnb.com) (1) the nature of any amendment to our Code of Ethics that applies to our directors or our principal executive officer, principal financial officer, principal accounting officer or controller or persons performing similar functions and (2) the nature of any waiver, including an implicit waiver, from a provision of our Code of Ethics that is granted to a director or one of these specified officers, the name of such person who is granted the waiver and the date of the waiver.

We have adopted insider trading policies and procedures governing the purchase, sale and other dispositions of our securities by directors, officers and employees that are designed to promote compliance with insider trading laws, rules and regulations, and applicable Nasdaq listing standards, as well as procedures designed to further the foregoing purposes. A copy of our insider trading policy is filed with this Annual Report on Form 10-K as Exhibit 19.1.

Item 11. Executive Compensation

The information required by this Item is incorporated by reference to the 2025 Proxy Statement.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required by this Item is incorporated by reference to the 2025 Proxy Statement.

Item 13. Certain Relationships and Related Transactions, and Director Independence

The information required by this Item is incorporated by reference to the 2025 Proxy Statement.

Item 14. Principal Accountant Fees and Services

The information required by this Item is incorporated by reference to the 2025 Proxy Statement.

PART IV

Item 15. Exhibits and Financial Statement Schedules

(a) Documents filed as part of this Annual Report on Form 10-K:

(1) Consolidated Financial Statements

Our consolidated financial statements are listed in the "Index to Consolidated Financial Statements and Schedule" under Part II, Item 8 of this Annual Report on Form 10-K.

(2) Financial Statement Schedules

All financial statement schedules have been omitted because they are not applicable, immaterial or the required information is shown in Part II, Item 8 of this Annual Report on Form 10-K.

(3) Exhibits

The documents listed in the Exhibit Index of this Annual Report on Form 10-K are incorporated by reference or are filed with this Annual Report on Form 10-K, in each case as indicated herein (numbered in accordance with Item 601 of Regulation S-K).
