Item 2.05. Costs Associated with Exit or Disposal Activities

On December 2, 2024, Microchip Technology Incorporated (the “Company”) announced the closure of manufacturing operations at its Tempe, Arizona wafer fabrication facility (referred to as “Fab 2”). Fab 2 produces 8-inch wafers and supports various manufacturing process technologies and predominantly utilizes the Company’s 0.25 microns to 1.0 microns processes. Many of the process technologies that run in Fab 2 also run in the Company’s Oregon and Colorado factories, which both have ample clean room space for expansion. The Company plans to transition manufacturing of products as needed from Fab 2 to such other facilities. This action is being taken since inventory levels are high and the Company has ample capacity in place and the ability to expand capacity in the other facilities in the future. The Company expects to be able to shut down the manufacturing operations of Fab 2 in the September 2025 quarter at which time the Company expects that it will generate annual cash savings of approximately \$90 million. Due to the high inventory of the products which are manufactured in Fab 2, the Company does not expect to see savings from the shutdown until the start of the June 2026 quarter based on a first in-first-out basis. The Company expects that the Fab 2 closure will begin to help it moderate inventory levels beginning in the March 2025 quarter. This action is expected to affect approximately 500 employees. The Company anticipates near-term restructuring costs to be between \$3 million and \$8 million, and it is possible that the Company could incur other restructuring and shut-down costs in the future of up to an additional \$15 million. The estimates of the restructuring costs will be refined over time as more information becomes available. The Company may incur additional expenses in connection with these actions that are not currently contemplated. The charges that the Company expects to incur in connection with these actions are estimates and subject to a number of assumptions, and actual results may differ materially. The Company has not yet determined if any accelerated depreciation or impairment charges will be recorded.

Safe Harbor Statement

The statements in this Form 8-K relating to the shut-down of manufacturing operations of Fab 2 in the September 2025 quarter, expected annual cash savings, timing of the expected savings, impact on inventory levels, number of employees to be affected, the amount and timing of restructuring costs, the amount of other future restructuring and shut-down costs, and whether any accelerated depreciation or impairment charges will be recorded are forward-looking statements made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These statements involve risks and uncertainties that could cause our actual results to differ materially, including, but not limited to: any continued uncertainty, fluctuations or weakness in the U.S. and world economies (including China and Europe) due to changes in interest rates, high inflation, actions taken or which may be taken by the Biden administration or the U.S. Congress or by the incoming Trump administration and the incoming U.S. Congress, monetary policy, political, geopolitical, trade or other issues in the U.S. or internationally (including the military conflicts in Ukraine-Russia and the Middle East), further changes in demand or market acceptance of our products and the products of our customers and our ability to respond to any increases or decreases in market demand or customer requests to reschedule or cancel orders; the mix of inventory we hold, our ability to satisfy any short-term orders from our inventory and our ability to effectively manage our inventory levels; the impact that the CHIPS Act will have on increasing manufacturing capacity in our industry by providing incentives for us, our competitors and foundries to build new wafer manufacturing facilities or expand existing facilities; the amount and timing of any incentives we may receive under the CHIPS Act, the impact of current and future changes in U.S. corporate tax laws (including the Inflation Reduction Act of 2022 and the Tax Cuts and Jobs Act of 2017), foreign currency effects on our business; changes in utilization of our manufacturing capacity and our ability to effectively manage our production levels to meet any increases or decreases in market demand or any customer requests to reschedule or cancel orders; the impact of inflation on our business; competitive developments including pricing pressures; the level of orders that are received and can be shipped in a quarter; our ability to realize the expected benefits of our long-term supply assurance program; changes or fluctuations in customer order patterns and seasonality; our ability to effectively manage our supply of wafers from third party wafer foundries to meet any decreases or increases in our needs and the cost of such wafers, our ability to obtain additional capacity from our suppliers to increase production to meet any future increases in market demand; our ability to successfully integrate the operations

and employees, retain key employees and customers and otherwise realize the expected synergies and benefits of our acquisitions; the impact of any future significant acquisitions or strategic transactions we may make; the costs and outcome of any current or future litigation or other matters involving our acquisitions (including the acquired business, intellectual property, customers, or other issues); the costs and outcome of any current or future tax audit or investigation regarding our business or our acquired businesses; disruptions in our business or the businesses of our customers or suppliers due to natural disasters (including any floods in Thailand), terrorist activity, armed conflict, war, worldwide oil prices and supply, public health concerns or disruptions in the transportation system; and general economic, industry or political conditions in the United States or internationally.
