

**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549
FORM 10-Q**

☒ QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For The Quarterly Period Ended **September 30, 2023**

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For The Transition Period from ____ to ____

Commission File Number	Registrants; Address and Telephone Number	States of Incorporation	I.R.S. Employer Identification Nos.
1-3525	AMERICAN ELECTRIC POWER CO INC.	New York	13-4922640
333-221643	AEP TEXAS INC.	Delaware	51-0007707
333-217143	AEP TRANSMISSION COMPANY, LLC	Delaware	46-1125168
1-3457	APPALACHIAN POWER COMPANY	Virginia	54-0124790
1-3570	INDIANA MICHIGAN POWER COMPANY	Indiana	35-0410455
1-6543	OHIO POWER COMPANY	Ohio	31-4271000
0-343	PUBLIC SERVICE COMPANY OF OKLAHOMA	Oklahoma	73-0410895
1-3146	SOUTHWESTERN ELECTRIC POWER COMPANY	Delaware	72-0323455
	1 Riverside Plaza, Columbus, Ohio 43215-2373		
	Telephone (614) 716-1000		

Securities registered pursuant to Section 12(b) of the Act:

Registrant	Title of each class	Trading Symbol	Name of Each Exchange on Which Registered
American Electric Power Company Inc.	Common Stock, \$6.50 par value	AEP	The NASDAQ Stock Market LLC

Indicate by check mark whether the registrants (1) have filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrants were required to file such reports), and (2) have been subject to such filing requirements for the past 90 days.

Yes ☒ No ☐

Indicate by check mark whether the registrants have submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrants were required to submit such files).

Yes ☒ No ☐

Indicate by check mark whether American Electric Power Company, Inc. is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large Accelerated filer ☒ Accelerated filer ☐ Non-accelerated filer ☐
Smaller reporting company ☐ Emerging growth company ☐

Indicate by check mark whether AEP Texas Inc., AEP Transmission Company, LLC, Appalachian Power Company, Indiana Michigan Power Company, Ohio Power Company, Public Service Company of Oklahoma and Southwestern Electric Power Company are large accelerated filers, accelerated filers, non-accelerated filers, smaller reporting companies, or emerging growth companies. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large Accelerated filer ☐ Accelerated filer ☐ Non-accelerated filer ☒
Smaller reporting company ☐ Emerging growth company ☐

If an emerging growth company, indicate by check mark if the registrants have elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

☐

Indicate by check mark whether the registrants are shell companies (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

AEP Texas Inc., AEP Transmission Company, LLC, Appalachian Power Company, Indiana Michigan Power Company, Ohio Power Company, Public Service Company of Oklahoma and Southwestern Electric Power Company meet the conditions set forth in General Instruction H(1)(a) and (b) of Form 10-Q and are therefore filing this Form 10-Q with the reduced disclosure format specified in General Instruction H(2) to Form 10-Q.

**Number of shares
of common stock
outstanding of the
Registrants as of
November 2, 2023**

American Electric Power Company, Inc.	525,875,633 (\$6.50 par value)
AEP Texas Inc.	100 (\$0.01 par value)
AEP Transmission Company, LLC (a)	NA
Appalachian Power Company	13,499,500 (no par value)
Indiana Michigan Power Company	1,400,000 (no par value)
Ohio Power Company	27,952,473 (no par value)
Public Service Company of Oklahoma	9,013,000 (\$15 par value)
Southwestern Electric Power Company	3,680 (\$18 par value)

- (a) 100% interest is held by AEP Transmission Holding Company, LLC, a wholly-owned subsidiary of American Electric Power Company, Inc.
- NA Not applicable.

This combined Form 10-Q is separately filed by American Electric Power Company, Inc., AEP Texas Inc., AEP Transmission Company, LLC, Appalachian Power Company, Indiana Michigan Power Company, Ohio Power Company, Public Service Company of Oklahoma and Southwestern Electric Power Company. Information contained herein relating to any individual registrant is filed by such registrant on its own behalf. Except for American Electric Power Company, Inc., each registrant makes no representation as to information relating to the other registrants.

GLOSSARY OF TERMS

When the following terms and abbreviations appear in the text of this report, they have the meanings indicated below.

Term	Meaning
AEGCo	AEP Generating Company, an AEP electric utility subsidiary.
AEP	American Electric Power Company, Inc., an investor-owned electric public utility holding company which includes American Electric Power Company, Inc. (Parent) and majority owned consolidated subsidiaries and consolidated affiliates.
AEP Credit	AEP Credit, Inc., a consolidated VIE of AEP which securitizes accounts receivable and accrued utility revenues for affiliated electric utility companies.
AEP Energy Supply LLC	A nonregulated holding company for AEP's competitive generation, wholesale and retail businesses, and a wholly-owned subsidiary of AEP.
AEP Renewables	A division of AEP Energy Supply LLC that develops and/or acquires large scale renewable projects that are backed with long-term contracts with creditworthy counterparties.
AEP System	American Electric Power System, an electric system, owned and operated by AEP subsidiaries.
AEP Texas	AEP Texas Inc., an AEP electric utility subsidiary.
AEP Transmission Holdco	AEP Transmission Holding Company, LLC, a wholly-owned subsidiary of AEP.
AEPEP	AEP Energy Partners, Inc., a subsidiary of AEP dedicated to wholesale marketing and trading, hedging activities, asset management and commercial and industrial sales in deregulated markets.
AEPSC	American Electric Power Service Corporation, an AEP service subsidiary providing management and professional services to AEP and its subsidiaries.
AEPTCo	AEP Transmission Company, LLC, a wholly-owned subsidiary of AEP Transmission Holdco, is an intermediate holding company that owns the State Transcos.
AEPTCo Parent	AEP Transmission Company, LLC, the holding company of the State Transcos within the AEPTCo consolidation.
AFUDC	Allowance for Equity Funds Used During Construction.
ALJ	Administrative Law Judge.
AOCI	Accumulated Other Comprehensive Income.
APCo	Appalachian Power Company, an AEP electric utility subsidiary.
Appalachian Consumer Rate Relief Funding	Appalachian Consumer Rate Relief Funding LLC, a wholly-owned subsidiary of APCo and a consolidated VIE formed for the purpose of issuing and servicing securitization bonds related to the under-recovered Expanded Net Energy Cost deferral balance.
Apple Blossom	Apple Blossom Wind Holdings LLC, a consolidated VIE of AEP, and tax equity partnership.
APSC	Arkansas Public Service Commission.
ARO	Asset Retirement Obligations.
ATM	At-the-Market.
Black Oak	Black Oak Getty Wind Holdings LLC, a consolidated VIE of AEP, and tax equity partnership.
CAA	Clean Air Act.
CCR	Coal Combustion Residual.
CO ₂	Carbon dioxide and other greenhouse gases.
CO ₂ e	Carbon dioxide equivalent.

Term	Meaning
Cook Plant	Donald C. Cook Nuclear Plant, a two-unit, 2,296 MW nuclear plant owned by I&M.
COVID-19	Coronavirus 2019, a highly infectious respiratory disease. In March 2020, the World Health Organization declared COVID-19 a worldwide pandemic.
CSAPR	Cross-State Air Pollution Rule.
CWIP	Construction Work in Progress.
DCC Fuel	DCC Fuel XIII, DCC Fuel XIV, DCC Fuel XV, DCC Fuel XVI, DCC Fuel XVII and DCC Fuel X consolidated VIEs formed for the purpose of acquiring, owning and leasing nuclear fuel to I&M.
DHLC	Dolet Hills Lignite Company, LLC, a wholly-owned lignite mining subsidiary of SWEPCo. DHLC is a non-consolidated VIE of SWEPCo.
DIR	Distribution Investment Rider.
Dry Lake	Dry Lake Solar Project, a consolidated VIE whose sole purpose is to own and operate a 100 MW solar generation facility in southern Nevada in which AEP owns a 75% interest.
EIS	Energy Insurance Services, Inc., a nonaffiliated captive insurance company and consolidated VIE of AEP.
ELG	Effluent Limitation Guidelines.
ENEC	Expanded Net Energy Cost.
Energy Supply	AEP Energy Supply LLC, a nonregulated holding company for AEP's competitive generation, wholesale and retail businesses, and a wholly-owned subsidiary of AEP.
Equity Units	AEP's Equity Units issued in August 2020.
ERCOT	Electric Reliability Council of Texas regional transmission organization.
ESP	Electric Security Plans, a PUCO requirement for electric utilities to adjust their rates by filing with the PUCO.
ETT	Electric Transmission Texas, LLC, an equity interest joint venture between AEP Transmission Holdco and Berkshire Hathaway Energy Company formed to own and operate electric transmission facilities in ERCOT.
Excess ADIT	Excess accumulated deferred income taxes.
FAC	Fuel Adjustment Clause.
FASB	Financial Accounting Standards Board.
Federal EPA	United States Environmental Protection Agency.
FERC	Federal Energy Regulatory Commission.
FGD	Flue Gas Desulfurization or scrubbers.
FIP	Federal Implementation Plan.
FTR	Financial Transmission Right, a financial instrument that entitles the holder to receive compensation for certain congestion-related transmission charges that arise when the power grid is congested resulting in differences in locational prices.
GAAP	Accounting Principles Generally Accepted in the United States of America.
I&M	Indiana Michigan Power Company, an AEP electric utility subsidiary.
IRA	On August 16, 2022 President Biden signed into law legislation commonly referred to as the "Inflation Reduction Act" (IRA).
IRS	Internal Revenue Service.
ITC	Investment Tax Credit.
IURC	Indiana Utility Regulatory Commission.
KGPCo	Kingsport Power Company, an AEP electric utility subsidiary.
KPCo	Kentucky Power Company, an AEP electric utility subsidiary.

Term	Meaning
KPSC	Kentucky Public Service Commission.
KTCO	AEP Kentucky Transmission Company, Inc., an affiliate of KPSCo and a wholly-owned subsidiary of AEP.
KWh	Kilowatt-hour.
LPSC	Louisiana Public Service Commission.
MATS	Mercury and Air Toxic Standards.
Maverick	Maverick, part of the North Central Wind Energy Facilities, consists of 287 MWs of wind generation in Oklahoma.
MISO	Midcontinent Independent System Operator.
Mitchell Plant	A two unit, 1,560 MW coal-fired power plant located in Moundsville, West Virginia. The plant is jointly owned by KPSCo and WPCo.
MMBtu	Million British Thermal Units.
MPSC	Michigan Public Service Commission.
MTM	Mark-to-Market.
MW	Megawatt.
MWh	Megawatt-hour.
NAAQS	National Ambient Air Quality Standards.
Nonutility Money Pool	Centralized funding mechanism AEP uses to meet the short-term cash requirements of certain nonutility subsidiaries.
NCWF	North Central Wind Energy Facilities, a joint PSO and SWEPCo project, which includes three Oklahoma wind facilities totaling approximately 1,484 MWs of wind generation.
NOLC	Net Operating Loss Carryforward.
NO _x	Nitrogen oxide.
OCC	Corporation Commission of the State of Oklahoma.
OHTCo	AEP Ohio Transmission Company, Inc., a wholly-owned AEPTCo transmission subsidiary.
OPCo	Ohio Power Company, an AEP electric utility subsidiary.
OPEB	Other Postretirement Benefits.
OTC	Over-the-counter.
OVEC	Ohio Valley Electric Corporation, which is 43.47% owned by AEP.
Parent	American Electric Power Company, Inc., the equity owner of AEP subsidiaries within the AEP consolidation.
PJM	Pennsylvania – New Jersey – Maryland regional transmission organization.
PM	Particulate Matter.
PPA	Purchase Power and Sale Agreement.
PSA	Purchase and Sale Agreement.
PSO	Public Service Company of Oklahoma, an AEP electric utility subsidiary.
PTC	Production Tax Credit.
PUCO	Public Utilities Commission of Ohio.
PUCT	Public Utility Commission of Texas.
Registrant Subsidiaries	AEP subsidiaries which are SEC registrants: AEP Texas, AEPTCo, APCo, I&M, OPCo, PSO and SWEPCo.
Registrants	SEC registrants: AEP, AEP Texas, AEPTCo, APCo, I&M, OPCo, PSO and SWEPCo.

Term	Meaning
Restoration Funding	AEP Texas Restoration Funding LLC, a wholly-owned subsidiary of AEP Texas and a consolidated VIE formed for the purpose of issuing and servicing securitization bonds related to storm restoration in Texas primarily caused by Hurricane Harvey.
Risk Management Contracts	Trading and non-trading derivatives, including those derivatives designated as cash flow and fair value hedges.
Rockport Plant	A generation plant, jointly owned by AEGCo and I&M, consisting of two 1,310 MW coal-fired generating units near Rockport, Indiana.
ROE	Return on Equity.
RPM	Reliability Pricing Model.
RTO	Regional Transmission Organization, responsible for moving electricity over large interstate areas.
Sabine	Sabine Mining Company, a lignite mining company that is a consolidated VIE for AEP and SWEPCo.
Santa Rita East	Santa Rita East Wind Holdings, LLC, a consolidated VIE whose sole purpose is to own and operate a 302 MW wind generation facility in west Texas in which AEP owns an 85% interest.
SEC	U.S. Securities and Exchange Commission.
SIP	State Implementation Plan.
SNF	Spent Nuclear Fuel.
SO ₂	Sulfur dioxide.
SPP	Southwest Power Pool regional transmission organization.
State Transcos	AEP TCo's seven wholly-owned, FERC regulated, transmission only electric utilities, which are geographically aligned with AEP's existing utility operating companies.
Sundance	Sundance, acquired in April 2021 as part of the North Central Wind Energy Facilities, consists of 199 MWs of wind generation in Oklahoma.
SWEPCo	Southwestern Electric Power Company, an AEP electric utility subsidiary.
Tax Reform	On December 22, 2017, President Trump signed into law legislation referred to as the "Tax Cuts and Jobs Act" (the TCJA). The TCJA includes significant changes to the Internal Revenue Code of 1986, including a reduction in the corporate federal income tax rate from 35% to 21% effective January 1, 2018.
Transition Funding	AEP Texas Central Transition Funding III LLC, a wholly-owned subsidiary of AEP Texas and consolidated VIE formed for the purpose of issuing and servicing securitization bonds related to Texas Restructuring Legislation.
Transource Energy	Transource Energy, LLC, a consolidated VIE formed for the purpose of investing in utilities which develop, acquire, construct, own and operate transmission facilities in accordance with FERC-approved rates.
Traverse	Traverse, part of the North Central Wind Energy Facilities, consists of 998 MWs of wind generation in Oklahoma.
Turk Plant	John W. Turk, Jr. Plant, a 650 MW coal-fired plant in Arkansas that is 73% owned by SWEPCo.
UPA	Unit Power Agreement.
Utility Money Pool	Centralized funding mechanism AEP uses to meet the short-term cash requirements of certain utility subsidiaries.
VIE	Variable Interest Entity.
Virginia SCC	Virginia State Corporation Commission.
WPCo	Wheeling Power Company, an AEP electric utility subsidiary.
WVPSC	Public Service Commission of West Virginia.

FORWARD-LOOKING INFORMATION

This report made by the Registrants contains forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934. Many forward-looking statements appear in “Part I – Item 2 Management’s Discussion and Analysis of Financial Condition and Results of Operations” of this quarterly report, but there are others throughout this document which may be identified by words such as “expect,” “anticipate,” “intend,” “plan,” “believe,” “will,” “should,” “could,” “would,” “project,” “continue” and similar expressions, and include statements reflecting future results or guidance and statements of outlook. These matters are subject to risks and uncertainties that could cause actual results to differ materially from those projected. Forward-looking statements in this document are presented as of the date of this document. Except to the extent required by applicable law, management undertakes no obligation to update or revise any forward-looking statement. Among the factors that could cause actual results to differ materially from those in the forward-looking statements are:

- Changes in economic conditions, electric market demand and demographic patterns in AEP service territories.
- The impact of pandemics and any associated disruption of AEP’s business operations due to impacts on economic or market conditions, costs of compliance with potential government regulations, electricity usage, supply chain issues, customers, service providers, vendors and suppliers.
- The economic impact of increased global trade tensions including the conflicts in Ukraine and the Middle East, and the adoption or expansion of economic sanctions or trade restrictions.
- Inflationary or deflationary interest rate trends.
- Volatility and disruptions in financial markets precipitated by any cause, including failure to make progress on federal budget or debt ceiling matters or instability in the banking industry; particularly developments affecting the availability or cost of capital to finance new capital projects and refinance existing debt.
- The availability and cost of funds to finance working capital and capital needs, particularly (i) if expected sources of capital, such as proceeds from the sale of assets, subsidiaries or tax credits, do not materialize or do not materialize at the level anticipated, and (ii) during periods when the time lag between incurring costs and recovery is long and the costs are material.
- Decreased demand for electricity.
- Weather conditions, including storms and drought conditions, and the ability to recover significant storm restoration costs.
- Limitations or restrictions on the amounts and types of insurance available to cover losses that might arise in connection with natural disasters or operations.
- The cost of fuel and its transportation, the creditworthiness and performance of fuel suppliers and transporters and the cost of storing and disposing of used fuel, including coal ash and SNF.
- The availability of fuel and necessary generation capacity and the performance of generation plants.
- The ability to recover fuel and other energy costs through regulated or competitive electric rates.
- The ability to transition from fossil generation and the ability to build or acquire renewable generation, transmission lines and facilities (including the ability to obtain any necessary regulatory approvals and permits) when needed at acceptable prices and terms, including favorable tax treatment, cost caps imposed by regulators and other operational commitments to regulatory commissions and customers for renewable generation projects, and to recover all related costs.
- New legislation, litigation or government regulation, including changes to tax laws and regulations, oversight of nuclear generation, energy commodity trading and new or heightened requirements for reduced emissions of sulfur, nitrogen, mercury, carbon, soot or PM and other substances that could impact the continued operation, cost recovery and/or profitability of generation plants and related assets.
- The impact of federal tax legislation on results of operations, financial condition, cash flows or credit ratings.
- The risks before, during and after generation of electricity associated with the fuels used or the byproducts and wastes of such fuels, including coal ash and SNF.
- Timing and resolution of pending and future rate cases, negotiations and other regulatory decisions, including rate or other recovery of new investments in generation, distribution and transmission service and environmental compliance.
- Resolution of litigation or regulatory proceedings or investigations.
- The ability to constrain operation and maintenance costs.

- Prices and demand for power generated and sold at wholesale.
- Changes in technology, particularly with respect to energy storage and new, developing, alternative or distributed sources of generation.
- The ability to recover through rates any remaining unrecovered investment in generation units that may be retired before the end of their previously projected useful lives.
- Volatility and changes in markets for coal and other energy-related commodities, particularly changes in the price of natural gas.
- The impact of changing expectations and demands of customers, regulators, investors and stakeholders, including heightened emphasis on environmental, social and governance concerns.
- Changes in utility regulation and the allocation of costs within RTOs including ERCOT, PJM and SPP.
- Changes in the creditworthiness of the counterparties with contractual arrangements, including participants in the energy trading market.
- Actions of rating agencies, including changes in the ratings of debt.
- The impact of volatility in the capital markets on the value of the investments held by the pension, OPEB, captive insurance entity and nuclear decommissioning trust and the impact of such volatility on future funding requirements.
- Accounting standards periodically issued by accounting standard-setting bodies.
- Other risks and unforeseen events, including wars and military conflicts, the effects of terrorism (including increased security costs), embargoes, wildfires, cyber-security threats and other catastrophic events.
- The ability to attract and retain the requisite work force and key personnel.

The forward-looking statements of the Registrants speak only as of the date of this report or as of the date they are made. The Registrants expressly disclaim any obligation to update any forward-looking information, except as required by law. For a more detailed discussion of these factors, see “Risk Factors” in Part I of the 2022 Annual Report and in Part II of this report.

The Registrants may use AEP’s website as a distribution channel for material company information. Financial and other important information regarding the Registrants is routinely posted on and accessible through AEP’s website at www.aep.com/investors/. In addition, you may automatically receive email alerts and other information about the Registrants when you enroll your email address by visiting the “Email Alerts” section at www.aep.com/investors/.

Company Website and Availability of SEC Filings

Our principal corporate website address is www.aep.com. Information on our website is not incorporated by reference herein and is not part of this Form 10-Q. We make available free of charge through our website our Annual Report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act as soon as reasonably practicable after such documents are electronically filed with, or furnished to, the SEC. The SEC maintains a website at www.sec.gov that contains reports, proxy and information statements and other information regarding AEP.

**AMERICAN ELECTRIC POWER COMPANY, INC. AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND
RESULTS OF OPERATIONS**

EXECUTIVE OVERVIEW

AEP Consolidated Earnings Attributable to Common Shareholders

Third Quarter of 2023 Compared to Third Quarter of 2022

Earnings Attributable to AEP Common Shareholders increased from \$684 million in 2022 to \$954 million in 2023 primarily due to:

- Favorable rate proceedings in AEP's various jurisdictions.
- Investment in transmission assets, which resulted in higher revenues and income.
- A loss related to the expected sale of the Kentucky Operations in 2022. The expected sale was terminated in April 2023.

These increases were partially offset by:

- A decrease in weather-related sales volumes.
- An increase in interest expense due to higher interest rates and debt balances.
- A gain on the sale of mineral rights in 2022.

Nine Months Ended September 30, 2023 Compared to Nine Months Ended September 30, 2022

Earnings Attributable to AEP Common Shareholders decreased from \$1,923 million in 2022 to \$1,872 million in 2023 primarily due to:

- A decrease in weather-related sales volumes.
- An increase in interest expense due to higher interest rates and debt balances.
- Unfavorable mark-to-market economic hedge activity driven by a decrease in commodity prices.
- A loss on the sale of the competitive contracted renewables portfolio in 2023.
- A gain on the sale of mineral rights in 2022.

These decreases were partially offset by:

- Favorable rate proceedings in AEP's various jurisdictions.
- Investment in transmission assets, which resulted in higher revenues and income.
- A loss related to the expected sale of the Kentucky Operations in 2022. The expected sale was terminated in April 2023.
- An impairment of AEP's equity investment in Flat Ridge 2 in 2022.

See "Results of Operations" section for additional information by operating segment.

Customer Demand

AEP's weather-normalized retail sales volumes for the third quarter of 2023 increased by 2.1% from the third quarter of 2022. Weather-normalized residential sales increased by 0.6% in the third quarter of 2023 from the third quarter of 2022. This increase was primarily due to an increase in the number of residential customers served. Weather-normalized commercial sales increased by 7.5% in the third quarter of 2023 compared to the third quarter of 2022. The increase in commercial sales was primarily due to new data center loads and economic development. AEP's third quarter 2023 industrial sales volumes decreased by 1.1% from the third quarter of 2022. The decrease in industrial sales was primarily due to declines in the non-Oil and Gas sectors.

AEP's weather-normalized retail sales volumes for the nine months ended September 30, 2023 increased by 2.3% compared to the nine months ended September 30, 2022. Weather-normalized residential sales decreased by 0.9% for the nine months ended September 30, 2023 compared to the nine months ended September 30, 2022. This decrease was primarily due to a reduction in usage per customer. Weather-normalized commercial sales increased by 7.7% for the nine months ended September 30, 2023 compared to the nine months ended September 30, 2022. The increase in commercial sales was primarily due to new data center loads and economic development. AEP's industrial sales volumes for the nine months ended September 30, 2023 increased by 1.3% compared to the nine months ended September 30, 2022. The increase in industrial sales was spread across many sectors.

Supply Chain Disruption and Inflation

The Registrants have experienced certain supply chain disruptions driven by several factors including the COVID-19 pandemic, international tensions including the ramifications of regional conflict, increased demand due to the economic recovery from the pandemic, inflation, labor shortages in certain trades and shortages in the availability of certain raw materials. These supply chain disruptions have not had a material impact on the Registrants net income, cash flows and financial condition, but have extended lead times for certain goods and services and have contributed to higher prices for fuel, materials, labor, equipment and other needed commodities. Management has implemented risk mitigation strategies in an attempt to mitigate the impacts of these supply chain disruptions.

AEP and its utilities finance its operations with commercial paper and other variable rate instruments. AEP generally uses short-term borrowings to fund working capital needs until long-term funding is arranged. Sources of long-term funding includes the issuance of long-term debt. These financing options to maintain adequate liquidity are subject to fluctuations in interest rates. The United States economy has experienced a significant level of inflation that has contributed to increased uncertainty in the outlook of near-term economic activity, including whether inflation will continue and at what rate. To the extent interest rates continue to increase, it could reduce future net income and cash flows and impact financial condition.

A prolonged continuation or a further increase in the severity of supply chain and inflationary disruptions could result in additional increases in the cost of certain goods, services and cost of capital and further extend lead times which could reduce future net income and cash flows and impact financial condition.

Disposition of the Competitive Contracted Renewables Portfolio

In February 2022, AEP management announced the initiation of a process to sell all or a portion of AEP Renewables' competitive contracted renewables portfolio (the portfolio) within the Generation & Marketing segment. In late January 2023, AEP received final bids from interested parties. In February 2023, AEP's Board of Directors approved management's plan to sell the portfolio and AEP signed an agreement with a nonaffiliated party. AEP recorded a pretax loss of \$112 million (\$88 million after-tax) in the first quarter of 2023 after reaching Held for Sale status and determining the carrying value of the portfolio exceeded the estimated fair value.

In August 2023, AEP completed the sale of the entire portfolio to the nonaffiliated party and received cash proceeds of approximately \$1.2 billion, net of taxes and transaction costs. See the "Disposition of the Competitive Contracted Renewables Portfolio" section of Note 6 for additional information.

Planned Sale of AEP Energy and AEP Onsite Partners

AEP management has continued a strategic evaluation of AEP's portfolio of businesses with a focus on core regulated utility operations, risk mitigation and simplification. As a result of these efforts, the following decisions have recently been made with respect to AEP Energy and AEP Onsite Partners.

AEP Energy

In October 2022, AEP initiated a strategic evaluation for its ownership in AEP Energy, a wholly-owned retail energy supplier that supplies electricity and/or natural gas on a price risk managed basis to residential, commercial and industrial customers. AEP Energy provides various energy solutions in Illinois, Pennsylvania, Delaware, Maryland, New Jersey, Ohio and Washington, D.C. AEP Energy had approximately 900,000 customer accounts as of September 30, 2023. In April 2023, AEP management completed the strategic evaluation of AEP Energy and initiated a sale process. The timing of the completion of the sales process is dependent upon a number of factors. AEP is currently targeting the sales process to be completed in the first half of 2024. Depending on the outcome of the sales process, it could reduce future net income and impact financial condition.

AEP Onsite Partners

In April 2023, AEP also made a decision to include AEP Onsite Partners in a sale process. AEP OnSite Partners targets opportunities in distributed solar, combined heat and power, energy storage, waste heat recovery, energy efficiency, peaking generation and other energy solutions. As of September 30, 2023, AEP OnSite Partners owned projects located in 22 states, including approximately 193 MWs of installed solar capacity and approximately 2 MWs of solar projects under construction. As of September 30, 2023, the net book value of these assets was \$353 million. The timing of the completion of the sales process is dependent upon a number of factors. AEP is currently targeting the sales process to be completed in the first half of 2024.

AEP Onsite Partners also owns a 50% interest in NM Renewable Development, LLC, (NMRD) totaling \$119 million accounted for as an equity method investment. The NMRD portfolio consists of 9 operating solar projects totaling 185 MWs and 6 projects totaling 440 MWs in development. Separate from the remainder of AEP Onsite Partners, AEP and the joint owner have agreed to initiate a joint sales process for their respective interests in NMRD. The timing of the completion of the sales process is dependent upon a number of factors. AEP is currently targeting the sales process to be completed in the fourth quarter of 2023 or early 2024.

If AEP is unable to recover the net book value or carrying value of these assets as part of the sale process, it could reduce future net income and impact financial condition.

Planned Sale and Strategic Evaluation of Certain Transmission Joint Ventures

In April 2023, AEP also initiated a strategic evaluation for its ownership in certain transmission joint ventures in the AEP Transmission HoldCo segment including Pioneer Transmission, LLC, Prairie Wind Transmission, LLC and Transource Energy. In July 2023, AEP made a decision to initiate a sales process for its investment in Pioneer Transmission, LLC and Prairie Wind Transmission, LLC. As of September 30, 2023, AEP's investment in Pioneer Transmission, LLC, and Prairie Wind Transmission, LLC was \$48 million and \$19 million, respectively.

As of September 30, 2023, the net book value of Transource Energy was \$286 million inclusive of \$39 million related to noncontrolling interest on AEP's balance sheet. Potential alternatives may include continued ownership or a sale. AEP management has not made a decision regarding the potential alternatives, but expects to complete the strategic evaluation by the end of 2023.

Federal Tax Legislation

In August 2022, President Biden signed H.R. 5376 into law, commonly known as the Inflation Reduction Act of 2022, or IRA.

In June 2023, the IRS issued temporary regulations related to the transfer of tax credits. In the third quarter of 2023, AEP, on behalf of PSO and SWEPCo, entered into a transferability agreement with a nonaffiliated party to sell PTCs resulting in cash proceeds of approximately \$80 million expected in the fourth quarter of 2023. AEP expects to continue to explore the ability to efficiently monetize its tax credits through third party transferability agreements. See Note 11 - Income Taxes for additional information.

Termination of Planned Disposition of KPCo and KTCO

In October 2021, AEP entered into a Stock Purchase Agreement (SPA) to sell KPCo and KTCO to Liberty Utilities Co., a subsidiary of Algonquin Power & Utilities Corp. (Liberty), for approximately a \$2.85 billion enterprise value. The SPA was subsequently amended in September 2022 to reduce the purchase price to approximately \$2.646 billion. The sale required approval from the KPSC and from the FERC under Section 203 of the Federal Power Act. The SPA contained certain termination rights if the closing of the sale did not occur by April 26, 2023.

In May 2022, the KPSC approved the sale of KPCo to Liberty subject to certain conditions contingent upon the closing of the sale. In December 2022, the FERC issued an order denying, without prejudice, authorization of the proposed sale stating the applicants failed to demonstrate the proposed transaction will not have an adverse effect on rates. In February 2023, a new filing for approval under Section 203 of the Federal Power Act was submitted. In March 2023, the KPSC and other intervenors made filings recommending the FERC reject AEP and Liberty's new Section 203 application seeking approval of the sale.

In April 2023, AEP, AEPTCo and Liberty entered into a Mutual Termination Agreement (Termination Agreement) terminating the SPA. The parties entered into the Termination Agreement as all of the conditions precedent to closing the sale could not be satisfied prior to April 26, 2023.

The impact of the Termination Agreement did not have a material impact on AEP's statements of income for the three and nine months ended September 30, 2023. Upon reverting to a held and used model in the first quarter of 2023, AEP was required to present its investment in the Kentucky Operations at the lower of fair value or historical carrying value which resulted in a \$335 million reduction recorded in Property, Plant and Equipment. The reduced investment in KPCo's assets is being amortized over the 30 year average useful life of the KPCo assets.

Regulatory Matters

AEP's public utility subsidiaries are involved in rate and regulatory proceedings at the FERC and their state commissions. Depending on the outcomes, these rate and regulatory proceedings can have a material impact on results of operations, cash flows and possibly financial condition. AEP is currently involved in the following key proceedings. See Note 4 - Rate Matters for additional information.

- **2012 Texas Base Rate Case** - In 2012, SWEPCo filed a request with the PUCT to increase annual base rates primarily due to the completion of the Turk Plant. In 2013, the PUCT issued an order affirming the prudence of the Turk Plant but determined that the Turk Plant's Texas jurisdictional capital cost cap established in a previous Certificate of Convenience and Necessity case also limited SWEPCo's recovery of AFUDC in addition to limits on its recovery of cash construction costs. Upon rehearing in 2014, the PUCT reversed its initial ruling and determined that AFUDC was excluded from the Turk Plant's Texas jurisdictional capital cost cap. In 2017, the Texas District Court upheld the PUCT's 2014 order and intervenors filed appeals with the Texas Third Court of Appeals. In August 2021, the Texas Third Court of Appeals reversed the Texas District Court judgment affirming the PUCT's order on AFUDC, concluding that the language of the PUCT's original 2008 order intended to include AFUDC in the Texas jurisdictional capital cost cap, and remanded the case to the PUCT for future proceedings. In

November 2021, SWEPCo and the PUCT submitted Petitions for Review with the Texas Supreme Court. In October 2022, the Texas Supreme Court denied the Petitions for Review submitted by SWEPCo and the PUCT. In December 2022, SWEPCo and the PUCT filed requests for rehearing with the Texas Supreme Court. In June 2023, the Texas Supreme Court denied SWEPCo's request for rehearing and the case was remanded to the PUCT for future proceedings. In October 2023, SWEPCo filed testimony with the PUCT in the remanded proceeding recommending no refund or disallowance.

Management does not believe a disallowance of capitalized Turk Plant costs or a revenue refund is probable as of September 30, 2023. However, if SWEPCo is ultimately unable to recover AFUDC in excess of the Texas jurisdictional capital cost cap, it would be expected to result in a pretax net disallowance ranging from \$80 million to \$90 million. In addition, if SWEPCo is ultimately unable to recover AFUDC in excess of the Texas jurisdictional cost cap, SWEPCo estimates it may be required to make customer refunds, including interest, ranging from \$0 to \$200 million related to revenues collected from February 2013 through September 2023 and such determination may reduce SWEPCo's future revenues by approximately \$15 million on an annual basis.

- *Litigation Related to Ohio House Bill 6 (HB 6)*- In July 2019, HB 6, which offered incentives for power-generating facilities with zero or reduced carbon emissions, was signed into law by the Ohio Governor. HB 6 terminated energy efficiency programs as of December 31, 2020, including OPCo's shared savings revenues of \$26 million annually and phased out renewable mandates after 2026. HB 6 also provided for continued recovery of existing renewable energy contracts on a bypassable basis through 2032 and included a provision for continued recovery of OVEC costs through 2030 which is allocated to all electric distribution utility customers in Ohio on a non-bypassable basis. OPCo's Inter-Company Power Agreement for OVEC terminates in June 2040. In July 2020, an investigation led by the U.S. Attorney's Office resulted in a federal grand jury indictment of the Speaker of the Ohio House of Representatives, Larry Householder, four other individuals, and Generation Now, an entity registered as a 501(c)(4) social welfare organization, in connection with an alleged racketeering conspiracy involving the adoption of HB 6. Certain defendants in that case had previously plead guilty and, in March 2023, a federal jury convicted Larry Householder and another individual of participating in the racketeering conspiracy. In 2021, four AEP shareholders filed derivative actions purporting to assert claims on behalf of AEP against certain AEP officers and directors. See "Litigation Related to Ohio House Bill 6" section of Litigation below for additional information.

In March 2021, the Governor of Ohio signed legislation that, among other things, repealed the payments to the nonaffiliated owner of Ohio's nuclear power plants that were previously authorized under HB 6. The new legislation, House Bill 128, went into effect in May 2021 and leaves unchanged other provisions of HB 6 regarding energy efficiency programs, recovery of renewable energy costs and recovery of OVEC costs. To the extent that the law changes or OPCo is unable to recover the costs of renewable energy contracts on a bypassable basis by the end of 2032, recover costs of OVEC after 2030 or incurs significant costs associated with the derivative actions, it could reduce future net income and cash flows and impact financial condition.

- *FERC 2021 PJM and SPP Transmission Formula Rate Challenge* In March 2023 and May 2023, certain joint customers submitted a complaint and a formal challenge at the FERC related to the 2022 Annual Update of the 2021 Transmission Formula Rates of the AEP transmission owning subsidiaries within PJM and SPP, respectively. These challenges primarily relate to stand-alone treatment of NOLCs in the transmission formula rates of the AEP transmission owning subsidiaries. AEPSC, on behalf of the AEP transmission owning subsidiaries within PJM and SPP, filed answers to the joint formal challenge and complaint with the FERC in the second quarter of 2023.

The Registrants transitioned to stand-alone treatment of NOLCs in its PJM and SPP transmission formula rates beginning with the 2022 projected transmission revenue requirements and 2021 true-up to actual transmission revenue requirements, and provided notice of this change in informational filings made with the FERC. Stand-alone treatment of NOLCs for transmission formula rates increased the annual revenue requirements for years 2023, 2022 and 2021 by \$60 million, \$69 million and \$78 million, respectively. Through the third quarter of 2023, the Registrants' financial statements reflect a provision for refund for certain NOLC revenues billed by PJM and SPP. If the Registrants are required to make refunds as a result of these challenges, it could reduce future net income and cash flows and impact financial condition.

The Registrants are also transitioning to stand-alone treatment of NOLCs in retail jurisdiction rate filings. As a result of retail jurisdiction base rate cases in Arkansas, Indiana, Louisiana, Oklahoma and Texas, inclusion of NOLCs in rates in those jurisdictions is contingent upon a supportive private letter ruling from the IRS. If the Registrants are successful in transitioning to stand-alone treatment of NOLCs, it could have a material, favorable impact on future net income.

- *Securitization Legislation* - In March 2023, Kentucky (Senate Bill 192) and West Virginia (House Bill 3308) both passed legislation that would allow the securitization of certain plant assets. Eligible costs to be securitized in Kentucky include certain retired generation costs with a minimum value of \$200 million as well as certain other regulatory assets, including deferred extraordinary storm costs, as long as the cumulative total requested for securitization is at least \$275 million. Eligible costs to be securitized in West Virginia include historical, and if deemed appropriate by the commission, projected costs relating to environmental control costs, expanded net energy costs, storm recovery costs and undepreciated generation utility plant balances.

In April 2023, APCo and WPCo submitted their 2023 annual ENEC filing with the WVPSC proposing two alternatives to increase ENE rates effective September 1, 2023. One of the alternatives included an option to securitize approximately \$1.9 billion of assets. In June 2023, KPCo filed a request with the KPSC requesting to finance, through the issuance of securitization bonds, approximately \$471 million of regulatory assets. See Note 4 - Rate Matters for additional information.

In April 2023, the Virginia General Assembly approved the Governor's proposed changes to House Bill 1777, modifying APCo's earnings review and base rate process, with a biennial earnings review replacing APCo's current triennial earnings review. APCo will submit its first biennial review filing in 2024 using only a 2023 test year. Also included in this approved legislation is the option for APCo to securitize deferred fuel costs.

- *Texas Legislation* - In May 2023, legislation (Senate Bill 1016) was passed in Texas allowing certain financially based employee incentive compensation to be recovered. As a result of this law change, in the second quarter of 2023 AEP Texas and SWEPco recognized a favorable impact to pretax income of approximately \$27 million and \$6 million, respectively.

Utility Rates and Rate Proceedings

The Registrants file rate cases with their regulatory commissions in order to establish fair and appropriate electric service rates to recover their costs and earn a fair return on their investments. The outcomes of these regulatory proceedings impact the Registrants' current and future results of operations, cash flows and financial position.

The following tables show the Registrants' completed and pending base rate case proceedings in 2023. See Note 4 - Rate Matters for additional information.

Completed Base Rate Case Proceedings

Company	Jurisdiction	Approved Revenue Requirement Increase	Approved ROE	New Rates Effective
		(in millions)		
SWEPCo	Louisiana	\$ 21.0 (a)	9.5%	February 2023

(a) See "2020 Louisiana Base Rate Case" section of Note 4 in the 2022 Annual Report for additional information.

Pending Base Rate Case Proceedings

Company	Jurisdiction	Filing Date	Requested Revenue Requirement Increase	Requested ROE	Commission Staff/ Intervenor Range of Recommended ROE
			(in millions)		
PSO	Oklahoma	November 2022	\$ 173.0 (a)	10.4%	8.6%-9.5%
APCo	Virginia	March 2023	213.0	10.6%	9.5%
KPCo	Kentucky	June 2023	94.0	9.9%	9.3%-9.7%
I&M	Indiana	August 2023	116.0	10.5%	(b)
I&M	Michigan	September 2023	34.0	10.5%	(c)

(a) Requested revenue requirement increase, net of existing rider revenues and certain incremental renewable facility benefits expected to be provided to customers through riders. See "2022 Oklahoma Base Rate Case" section of Note 4 for additional information.

(b) Intervenor testimony is due in November 2023.

(c) Intervenor testimony is due in January 2024.

Deferred Fuel Costs

Increases in fuel and purchased power prices in excess of amounts included in fuel-related revenues has led to an increase in the under collection of fuel costs from customers in most jurisdictions in recent years. The table below illustrates the increase (decrease) in the deferred fuel regulatory assets by company and jurisdiction, excluding the impacts of the February 2021 severe winter weather event. See the “February 2021 Severe Winter Weather Impacts in SPP” section in Note 4 for additional information. If any of these deferred fuel costs are not recoverable, it could reduce future net income and cash flows and impact financial condition.

Company	Jurisdiction	Traditional FAC Recovery Reset	As of September 30, 2023	As of December 31, 2022	Increase/ (Decrease)
(in millions)					
APCo	Virginia (a)	Annually	\$ 286.9	\$ 407.9	\$ (121.0)
APCo	West Virginia	Annually	301.3	288.5	12.8
I&M	Indiana	Bi-Annually	—	38.1	(38.1)
I&M	Michigan	Annually	13.3	9.0	4.3
PSO	Oklahoma (b)	Annually	168.2	431.5	(263.3)
SWEPco	Arkansas	Annually	30.0	65.8	(35.8)
SWEPco	Texas (c)	Tri-Annually	134.7	191.4	(56.7)
KPCo	Kentucky	Monthly	6.3	23.2	(16.9)
WPCo	West Virginia	Annually	273.5	231.1	42.4
Total			\$ 1,214.2	\$ 1,686.5	\$ (472.3)

- (a) Includes \$146 million and \$223 million as of September 30, 2023 and December 31, 2022, respectively, of noncurrent deferred fuel classified as a Regulatory Asset on APCo’s balance sheets.
- (b) Includes \$0 and \$253 million as of September 30, 2023 and December 31, 2022, respectively, of noncurrent deferred fuel classified as a Regulatory Asset on PSO’s balance sheets.
- (c) Includes \$74 million and \$0 as of September 30, 2023 and December 31, 2022, respectively, of noncurrent deferred fuel classified as a Regulatory Asset on SWEPco’s balance sheets.

The AEP utility subsidiaries are working with various state commissions on the timing of recovering deferred fuel balances and the following are recent developments relating to the recovery of deferred fuel:

In April 2023, the WVPSC Staff submitted a prudence review prepared by an independent consultant retained by the WVPSC staff. Adoption of the consultant report’s findings by the WVPSC could result in a disallowance of up to \$285 million. Management disagrees with the conclusions and recommendations contained in the consultant’s report and a hearing was held with the WVPSC in September 2023. APCo and WPCo are awaiting a WVPSC order addressing: (a) the prudence review requested by the WVPSC regarding 2021 and 2022 ENEC under-recovery balances, (b) potential securitization of ENEC under-recovery balances, Amos and Mountaineer Plant property balances and deferred storm costs and (c) potential further adjustment to ENEC rates. An order is anticipated in the fourth quarter of 2023. In September 2023, APCo received an order from the WVPSC authorizing an \$89 million annual increase in ENEC rates for the Companies’ forecasted costs for the period September 2023 through August 2024. See “ENEC Filings” section of Note 4 for additional information.

In September 2023, APCo submitted its annual Virginia fuel factor filing with the Virginia SCC requesting to recover a projected October 31, 2023 Virginia fuel under-recovered balance of \$273 million over two years. Interim Virginia FAC rates were implemented in November 2023. An order from the Virginia SCC is expected in the first quarter of 2024.

In April 2023, the PUCT issued an order approving an interim fuel surcharge, effective February 2023, allowing SWEPco to recover \$83 million of non Sabine and Oxbow mine related fuel costs through June 2024. In September 2023, an unopposed settlement agreement was approved by the PUCT that allows SWEPco to recover \$81 million of Sabine and Oxbow mine related fuel costs through 2035. See “Dolet Hills Power Station

and Related Fuel Operations” and “Pirkey Plant and Related Fuel Operations” sections in Note 4 for additional information related to the recovery of fuel costs in SWEPCo’s Arkansas and Louisiana jurisdictions.

Renewable Generation

The growth of AEP’s regulated renewable generation portfolio reflects the company’s strategy to diversify generation resources to provide clean energy to customers that meet both their energy and capacity needs.

Significant Renewable Generation Placed Into Service

In 2023, AEP acquired and placed into service 159 MWs of owned renewable generation facilities totaling approximately \$154 million.

Significant Approved Renewable Generation Filings

AEP has received regulatory approvals from various state regulatory commissions to acquire approximately 2,811 MWs of owned renewable generation facilities, totaling approximately \$6.6 billion, in addition to 557 MWs of renewable purchase power agreements, as included in the following table:

Company	Generation Type	Expected Commercial Operation	Owned/PPA	Generating Capacity (in MWs)
APCo (a)	Solar	Q2 2024 through Q1 2026	PPA	204
APCo (a)	Wind	Q3 2025 through Q1 2026	Owned	347
I&M	Solar	Q4 2025	PPA	280
I&M (b)	Solar	Q2 2026	Owned	469
PSO	Solar	Q2 2025 through Q4 2025	Owned	443
PSO	Wind	Q1 2025 through Q2 2026	Owned	553
SWEPCo (c)	Solar	Q2 2025 through Q4 2025	Owned/PPA	273
SWEPCo (c)	Wind	Q4 2024 through Q4 2025	Owned	799
Total Approved Renewable Projects				3,368

- (a) In September 2023, the Virginia SCC issued an order approving a 143 MW owned project and 204 MWs of PPAs, approval from the WVPSC is pending.
- (b) Projects fully approved by the IURC and partially approved by the MPSC, final approval pending from the MPSC for 245 MW of owned solar.
- (c) Includes approvals by the APSC and LPSC for 999 MWs of owned projects. Additionally, the LPSC approved the flex-up option, allowing SWEPCo to recover the portion of the projects denied by the PUCT.

Significant Renewable Generation Requests for Proposal (RFP)

As part of AEP's transition to diversify the company's regulated generation resources and build its renewable generation portfolio, RFPs have been issued to identify potential renewable projects. The table below includes RFPs recently issued for owned generation and purchased power generation. These projects would be subject to regulatory approval.

Company	Issuance Date	Projected In-Service Dates	Generation Type	Generating Capacity (in MWs)
I&M	March 2023	Year End 2027	Wind (a)	800
I&M	March 2023	Year End 2027	Solar (a)(b)	850
APCo	April 2023	Year End 2026	Wind and/or Solar (c)(d)	800
KPCo	September 2023	Year end 2027	Wind and/or Solar (e)	1,300
Total Significant RFPs				3,750

- (a) RFP is an all-source solicitation seeking proposals for both owned projects and PPAs from various types of generation including 315 MWs of storage (a portion of which may derive from solar/storage hybrid projects) and 540 MWs of natural gas.
- (b) Includes consideration of up to 300 MWs of hybrid solar with up to 60 MWs of battery storage.
- (c) Includes RFP for up to 200 MWs of PPAs.
- (d) Includes an option for battery storage.
- (e) RFP is an all-source solicitation seeking proposals for PPAs for solar, wind, thermal resources and/or standalone storage for up to approximately 875 MWs of PJM-accredited summer capacity and approximately 1,300 MWs of PJM-accredited winter capacity.

Merchant Portion of Turk Plant

SWEP Co constructed the Turk Plant, a base load 600 MW (650 MW net maximum capacity) pulverized coal ultra-supercritical generating unit in Arkansas, which was placed in-service in December 2012 and is included in the Vertically Integrated Utilities segment. SWEP Co owns 73% (440 MWs/477 MWs) of the Turk Plant and operates the facility.

Approximately 20% of SWEP Co's portion of the Turk Plant output is currently not subject to cost-based rate recovery in Arkansas. This portion of the plant's output is being sold into the wholesale market. Approximately 80% of the Turk Plant investment is recovered under retail cost-based rate recovery in Texas, Louisiana and through SWEP Co's wholesale customers under FERC-approved rates. In November 2022, SWEP Co filed a Certificate of Public Convenience and Necessity with the APSC for approval to operate the Turk plant to serve Arkansas customers and recover the associated costs through a cost recovery rider. Cost-based recovery of the Turk Plant would aid SWEP Co's near-term capacity needs and support compliance with SPP's 2023 increased capacity planning reserve margin requirements. In April 2023, intervenors filed testimony recommending the APSC deny the Certificate of Public Convenience and Necessity on the basis that the Turk Plant is not the least cost alternative. In June 2023, SWEP Co filed rebuttal testimony with the APSC. In July 2023, additional intervenor testimony was filed with the APSC by the Attorney General of Arkansas and the APSC staff with recommendations consistent with the previously filed April 2023 intervenor testimony. A hearing was held in October 2023 and an order is expected in the fourth quarter of 2023. As of September 30, 2023, the net book value of the Turk Plant was \$1.4 billion, before cost of removal including CWIP and inventory. If SWEP Co cannot ultimately recover its investment and expenses related to the Arkansas retail portion of the Turk Plant, it could reduce future net income and cash flows and impact financial condition.

LITIGATION

In the ordinary course of business, AEP is involved in employment, commercial, environmental and regulatory litigation. Since it is difficult to predict the outcome of these proceedings, management cannot predict the eventual resolution, timing or amount of any loss, fine or penalty. Management assesses the probability of loss for each contingency and accrues a liability for cases that have a probable likelihood of loss if the loss can be estimated. Adverse results in these proceedings have the potential to reduce future net income and cash flows and impact financial condition. See Note 4 – Rate Matters and Note 5 – Commitments, Guarantees and Contingencies for additional information.

Litigation Related to Ohio House Bill 6 (HB 6)

In 2019, Ohio adopted and implemented HB 6 which benefits OPCo by authorizing rate recovery for certain costs including renewable energy contracts and OVEC's coal-fired generating units. OPCo engaged in lobbying efforts and provided testimony during the legislative process in connection with HB 6. In July 2020, an investigation led by the U.S. Attorney's Office resulted in a federal grand jury indictment of an Ohio legislator and associates in connection with an alleged racketeering conspiracy involving the adoption of HB 6. After AEP learned of the criminal allegations against the Ohio legislator and others relating to HB 6, AEP, with assistance from outside advisors, conducted a review of the circumstances surrounding the passage of the bill. Management does not believe that AEP was involved in any wrongful conduct in connection with the passage of HB 6.

In August 2020, an AEP shareholder filed a putative class action lawsuit in the U. S. District Court for the Southern District of Ohio against AEP and certain of its officers for alleged violations of securities laws. In December 2021, the district court issued an opinion and order dismissing the securities litigation complaint with prejudice, determining that the complaint failed to plead any actionable misrepresentations or omissions. The plaintiffs did not appeal the ruling.

In January 2021, an AEP shareholder filed a derivative action in the U.S. District Court for the Southern District of Ohio purporting to assert claims on behalf of AEP against certain AEP officers and directors. In February 2021, a second AEP shareholder filed a similar derivative action in the Court of Common Pleas of Franklin County, Ohio. In April 2021, a third AEP shareholder filed a similar derivative action in the U.S. District Court for the Southern District of Ohio and a fourth AEP shareholder filed a similar derivative action in the Supreme Court for the State of New York, Nassau County. These derivative complaints allege the officers and directors made misrepresentations and omissions similar to those alleged in the putative securities class action lawsuit filed against AEP. The derivative complaints together assert claims for: (a) breach of fiduciary duty, (b) waste of corporate assets, (c) unjust enrichment, (d) breach of duty for insider trading and (e) contribution for violations of sections 10(b) and 21D of the Securities Exchange Act of 1934; and seek monetary damages and changes to AEP's corporate governance and internal policies among other forms of relief. The court entered a scheduling order in the New York state court derivative action staying the case other than with respect to briefing the motion to dismiss. AEP filed substantive and forum-based motions to dismiss on April 29, 2022. On September 13, 2022, the New York state court granted the forum-based motion to dismiss with prejudice and the plaintiff subsequently filed a notice of appeal with the New York appellate court. On January 20, 2023, the New York plaintiff filed a motion to intervene in the pending Ohio federal court action and withdrew his appeal in New York. The two derivative actions pending in federal district court in Ohio have been consolidated and the plaintiffs in the consolidated action filed an amended complaint. AEP filed a motion to dismiss the amended complaint and subsequently filed a brief in opposition to the New York plaintiffs' motion to intervene in the consolidated action in Ohio. On March 20, 2023, the federal district court issued an order granting the motion to dismiss with prejudice and denying the New York plaintiffs' motion to intervene. On April 20, 2023, one of the plaintiffs filed a notice of appeal to the U.S. Court of Appeals for the Sixth Circuit of the Ohio federal district court order dismissing the consolidated action and denying the intervention. On June 15, 2022, the Ohio state court entered an order continuing the stays of that case until the final resolution of the consolidated derivative actions pending in Ohio federal district court. The defendants will continue to defend against the claims. Management is unable to determine a range of potential losses that is reasonably possible of occurring.

In March 2021, AEP received a litigation demand letter from counsel representing a purported AEP shareholder. The litigation demand letter was directed to the Board of Directors of AEP (AEP Board) and contained factual allegations involving HB 6 that were generally consistent with those in the derivative litigation filed in state and federal court. The shareholder that sent the letter has since withdrawn the litigation demand, which is now terminated and of no further effect. In April 2023, AEP received a litigation demand from counsel representing the purported AEP shareholder who filed the dismissed derivative action in New York state court and unsuccessfully tried to intervene in the consolidated derivative actions in Ohio federal court. The litigation demand letter is directed to the AEP Board and contains factual allegations involving HB 6 that are generally consistent with those in the derivative litigation filed in state and federal court. The letter demands, among other things, that the AEP Board undertake an independent investigation into alleged legal violations by certain current and former directors and officers, and that AEP commence a civil action for breaches of fiduciary duty and related claims against any individuals who allegedly harmed AEP. The AEP Board will act in response to the letter as appropriate. Management is unable to determine a range of potential losses that is reasonably possible of occurring.

In May 2021, AEP received a subpoena from the SEC's Division of Enforcement seeking various documents, including documents relating to the passage of HB 6 and documents relating to AEP's policies and financial processes and controls. In August 2022, AEP received a second subpoena from the SEC seeking various additional documents relating to its ongoing investigation. AEP is cooperating fully with the SEC's investigation, which has included taking testimony from certain individuals and inquiries regarding Empowering Ohio's Economy, Inc., which is a 501(c)(4) social welfare organization, and related disclosures. AEP and the SEC are engaged in discussions about a possible resolution of the SEC's investigation and potential claims under the securities laws, the outcome of which cannot be predicted and could subject AEP to civil penalties and other remedial measures. Management is unable to determine a range of potential losses that is reasonably possible of occurring, but management does not believe the results of this investigation or a possible resolution thereof will have a material impact on results of operations, cash flows or financial condition.

Claims for Indemnification Made by Owners of the Gavin Power Station

In November 2022, the Federal EPA issued a final decision denying Gavin Power LLC's requested extension to allow a CCR surface impoundment at the Gavin Power Station to continue to receive CCR and non-CCR waste streams after April 11, 2021 until May 4, 2023 (the Gavin Denial). As part of the Gavin Denial, the Federal EPA made several determinations related to the CCR Rule (see "Coal Combustion Residual (CCR) Rule" section below for additional information), including a determination that the closure of the 300 acre unlined fly ash reservoir (FAR) is noncompliant with the CCR Rule in multiple respects. The Gavin Power Station was formerly owned and operated by AEP and was sold to Gavin Power LLC and Lightstone Generation LLC in 2017. Pursuant to the PSA, AEP maintained responsibility to complete closure of the FAR in accordance with the closure plan approved by the Ohio EPA which was completed in July 2021. The PSA contains indemnification provisions, pursuant to which the owners of the Gavin Power Station have notified AEP they believe they are entitled to indemnification for any damages that may result from these claims, including any future enforcement or litigation resulting from the Federal EPA's determinations of noncompliance with various aspects of the CCR Rule as part of the Gavin Denial. The owners of the Gavin Power Station have also sought indemnification for landowner claims for property damage allegedly caused by modifications to the FAR. Management does not believe that the owners of the Gavin Power Station have any valid claim for indemnity or otherwise against AEP under the PSA. In addition, Gavin Power LLC, several AEP subsidiaries, and other parties have filed Petitions for Review of the Gavin Denial with the U.S. Court of Appeals for the District of Columbia Circuit. Management is unable to determine a range of potential losses that is reasonably possible of occurring.

Claims for Damages Related to Sabine Lignite Mining Agreement

In May 2023, North American Coal Corporation (NACC) and Sabine, a subsidiary of NACC, filed suit against SWEPCo in Texas state court for breach of the Lignite Mining Agreement (LMA) between Sabine and SWEPCo. NACC and Sabine assert that the terms of the LMA require SWEPCo to continue operating the Pirkey Plant and obtaining coal from the Sabine mine through 2035 and that SWEPCo has breached the agreement by closing the plant. In August 2023, a settlement agreement was reached and the suit was dismissed by the Texas state court. The settlement agreement did not have a material impact on SWEPCo's net income, cash flows or financial condition.

ENVIRONMENTAL ISSUES

AEP has a substantial capital investment program and incurs additional operational costs to comply with environmental control requirements. Additional investments and operational changes will be made in response to existing and anticipated requirements to reduce emissions from fossil generation and in response to rules governing the beneficial use and disposal of coal combustion by-products, clean water and renewal permits for certain water discharges.

AEP is engaged in litigation about environmental issues, was notified of potential responsibility for the clean-up of contaminated sites and incurred costs for disposal of SNF and future decommissioning of the nuclear units. Management is engaged in the development of possible future requirements including the items discussed below.

AEP will seek recovery of expenditures for pollution control technologies and associated costs from customers through rates in regulated jurisdictions. Environmental rules could result in accelerated depreciation, impairment of assets or regulatory disallowances. If AEP cannot recover the costs of environmental compliance, it would reduce future net income and cash flows and impact financial condition.

Environmental Controls Impact on the Generating Fleet

The rules and proposed environmental controls discussed below will have an impact on AEP System generating units. Management continues to evaluate the impact of these rules, project scope and technology available to achieve compliance. As of September 30, 2023, the AEP System owned generating capacity of approximately 23,300 MWs, of which approximately 10,700 MWs were coal-fired. Management continues to evaluate the economic feasibility of environmental investments on AEP's fossil generation fleet and to refine the cost estimates of complying with these rules and evaluate other impacts of the environmental proposals on fossil generation.

The cost estimates will change depending on the timing of implementation and whether the Federal EPA provides flexibility in finalizing proposed rules or revising certain existing requirements. The cost estimates will also change based on: (a) potential state rules that impose more stringent standards, (b) additional rulemaking activities in response to court decisions, (c) actual performance of the pollution control technologies installed, (d) changes in costs for new pollution controls, (e) new generating technology developments, (f) total MWs of capacity retired and replaced, including the type and amount of such replacement capacity, (g) compliance with the Federal EPA's revised coal combustion residual rules and (h) other factors.

Clean Air Act Requirements

The CAA establishes a comprehensive program to protect and improve the nation's air quality and control sources of air emissions. The states implement and administer many of these programs and could impose additional or more stringent requirements. The primary regulatory programs that continue to drive investments in AEP's existing generating units include: (a) periodic revisions to NAAQS and the development of SIPs to achieve more stringent standards, (b) implementation of the regional haze program by the states and the Federal EPA, (c) regulation of hazardous air pollutant emissions under MATS, (d) implementation and review of CSAPR and (e) the Federal EPA's regulation of greenhouse gas emissions from fossil generation under Section 111 of the CAA. Notable developments in significant CAA regulatory requirements affecting AEP's operations are discussed in the following sections.

National Ambient Air Quality Standards

The Federal EPA periodically reviews and revises the NAAQS for criteria pollutants under the CAA. Revisions tend to increase the stringency of the standards, which in turn may require AEP to make investments in pollution control equipment at existing generating units, or, since most units are already well controlled, to make changes in how units are dispatched and operated. In January 2023, the Federal EPA announced its proposed decision to strengthen the primary (health-based) annual PM_{2.5} standard. Management cannot currently predict if any changes to these standards are likely to be finalized or what such changes may be, but will continue to monitor this issue and any future rulemakings.

Regional Haze

The Federal EPA issued a Clean Air Visibility Rule (CAVR) in 2005, which could require power plants and other facilities to install best available retrofit technology to address regional haze in federal parks and other protected areas. CAVR is implemented by the states, through SIPs, or by the Federal EPA, through FIPs. In 2017, the Federal EPA revised the rules governing submission of SIPs to implement the visibility programs. Petitions for review of the final rule revisions have been filed in the U.S. Court of Appeals for the District of Columbia Circuit.

In Texas, the Federal EPA disapproved portions of the Texas regional haze SIP and finalized a FIP that allows participation in the CSAPR ozone season program to satisfy the NO_x regional haze obligations for electric generating units in Texas. Additionally, the Federal EPA finalized an intrastate SO₂ emissions trading program based on CSAPR allowance allocations. Legal challenges to these various rulemakings are pending in both the U.S. Court of Appeals for the Fifth Circuit and the U.S. Court of Appeals for the District of Columbia Circuit. Management cannot predict the outcome of that litigation, although management supports the intrastate trading program as a compliance alternative to source-specific controls and has intervened in the litigation in support of the Federal EPA.

Cross-State Air Pollution Rule

CSAPR is a regional trading program that the Federal EPA began implementing in 2015, which was designed to address interstate transport of emissions that contribute significantly to non-attainment and interfere with maintenance of the 1997 ozone NAAQS and the 1997 and 2006 PM NAAQS in downwind states. CSAPR relies on SO₂ and NO_x allowances and individual state budgets to compel further emission reductions from electric utility generating units. Interstate trading of allowances is allowed on a restricted basis. The Federal EPA has revised, or updated, the CSAPR trading programs several times since they were established.

In January 2021, the Federal EPA finalized a revised CSAPR, which substantially reduced the ozone season NO_x budgets for several states, including states where AEP operates, beginning in ozone season 2021. Management believes it can meet the requirements of the rule in the near term, and is evaluating its compliance options for later years, when the budgets are further reduced.

In addition, in February 2023, the Federal EPA Administrator finalized the disapproval of interstate transport SIPs submitted by 19 states addressing the 2015 Ozone NAAQS. Disapproval of the SIPs provides the Federal EPA with authority to impose a FIP for those states, replacing the SIPs that were disapproved. Petitions for review of the SIP disapprovals for several states have been filed in federal courts of appeals by states, utilities and other industry parties and the federal courts have stayed the disapprovals of SIPs submitted by twelve states, including Arkansas, Kentucky, Oklahoma, Texas and West Virginia. In March 2023, the Federal EPA finalized a FIP that further revises the ozone season NO_x budgets under the existing CSAPR program in states to which the FIP applies. The FIP went into effect in August 2023 and has also been challenged in the U.S. Court of Appeals for the D.C. Circuit and in several other federal circuits. In light of the various court stays of the SIP disapprovals, the Federal EPA has issued two interim final rules that adjust or stay certain requirements of the FIP consistent with the court orders, pending resolution of the litigation. Management continues to monitor the outcome of various SIP challenges and evaluate the impacts of the FIP and cannot predict the outcome of the litigation.

Climate Change, CO₂ Regulation and Energy Policy

In May 2023, the Federal EPA proposed greenhouse gas standards and guidelines for new and existing fossil-fuel fired sources. The proposal relies heavily on carbon capture and sequestration and natural gas co-firing as means to reduce CO₂ emissions from coal fired plants and hydrogen co-firing and carbon capture and sequestration to reduce CO₂ emissions from gas turbines. Management is evaluating the proposed rule.

While no federal regulatory requirements to reduce CO₂ emissions are in place, AEP has taken action to reduce and offset CO₂ emissions from its generating fleet. AEP expects CO₂ emissions from its operations to continue to decline due to the retirement of some of its coal-fired generation units, and actions taken to diversify the generation fleet and increase energy efficiency where there is regulatory support for such activities. The majority of the states where AEP has generating facilities passed legislation establishing renewable energy, alternative energy and/or energy efficiency requirements that can assist in reducing carbon emissions.

In October 2022, AEP announced new intermediate and long-term CO₂ emission reduction goals, based on the output of the company's integrated resource plans, which take into account economics, customer demand, grid reliability and resiliency, regulations and the company's current business strategy. AEP adjusted its near-term CO₂ emission reduction target from a 2000 baseline to a 2005 baseline, upgraded its 80% reduction by 2030 target to include full Scope 1 emissions and accelerated its net-zero goal by five years to 2045. AEP's total Scope 1 greenhouse gas (GHG) emissions in 2022 were approximately 52.5 million metric tons CO₂e, approximately a 65% reduction from AEP's 2005 Scope 1 GHG emissions (inclusive of emission reductions that result from plants that have been sold). AEP has made significant progress in reducing CO₂ emissions from its power generation fleet and expects its emissions to continue to decline. Technological advances, including energy storage, will determine how quickly AEP can achieve zero emissions while continuing to provide reliable, affordable power for customers.

Excessive costs to comply with future legislation or regulations have led to the announcement of early plant closures and could force AEP to close additional coal-fired generation facilities earlier than their estimated useful life. If AEP is unable to recover the costs of its investments, it would reduce future net income and cash flows and impact financial condition.

MATS Rule

In April 2023, the Federal EPA issued a proposed rule that would revise the MATS for power plants. The proposed rule includes a more stringent standard for emissions of filterable PM for coal-fired electric generating units, as well as a new mercury standard for lignite-fired electric generating units. The proposed rule also requires the installation and operation of continuous emissions monitors for PM. Management is evaluating the impacts of the rule as proposed and will continue to monitor the rulemaking.

CCR Rule

The Federal EPA's CCR rule regulates the disposal and beneficial re-use of CCR, including fly ash and bottom ash created from coal-fired generating units and FGD gypsum generated at some coal-fired plants. The rule applies to active and inactive CCR landfills and surface impoundments at facilities of active electric utility or independent power producers.

In 2020, the Federal EPA revised the CCR rule to include a requirement that unlined CCR storage ponds cease operations and initiate closure by April 11, 2021. The revised rule provides two options that allow facilities to extend the date by which they must cease receipt of coal ash and close the ponds.

The first option provides an extension to cease receipt of CCR no later than October 15, 2023 for most units, and October 15, 2024 for a narrow subset of units; however, the Federal EPA's grant of such an extension requires a satisfactory demonstration of the need for additional time to develop alternative ash disposal capacity and will be limited to the soonest timeframe technically feasible to cease receipt of CCR. Additionally, each request must undergo formal review, including public comments, and be approved by the Federal EPA. AEP filed applications for additional time to develop alternative disposal capacity at the following plants:

Company	Plant Name	Generating Capacity (in MWs)	Net Book Value (a) (in millions)	Projected Retirement Date
AEGCo	Rockport Plant	1,310	\$ 291.7	2028
APCo	Amos Plant	2,930	2,136.8	2040
APCo	Mountaineer Plant	1,320	963.9	2040
I&M	Rockport Plant	1,310	548.2 (b)	2028
KPCo	Mitchell Plant	780	557.0	2040
SWEPCo	Flint Creek Plant	258	256.6	2038
WPCo	Mitchell Plant	780	680.8	2040

(a) Net book value as of September 30, 2023, before cost of removal including CWIP and inventory.

(b) Amount includes a \$129 million regulatory asset related to the retired Tanners Creek Plant. The IURC and MPSC authorized recovery of the Tanners Creek Plant regulatory asset over the useful life of Rockport Plant, Unit 1 in 2015 and 2014, respectively.

In January 2022, the Federal EPA proposed to deny several extension requests filed by the other utilities based on allegations that those utilities are not in compliance with the CCR Rule (the January Actions). In November 2022, the Federal EPA finalized one of these denials (the November Denial). The Federal EPA's allegations of noncompliance rely on new interpretations of the CCR Rule requirements. The January Actions of the Federal EPA and the November Denial have been challenged in the U.S. Court of Appeals for the District of Columbia Circuit as unlawful rulemaking that revises the existing CCR Rule requirements without proper notice and without opportunity for comment. Management is unable to predict the outcome of that litigation.

In July 2022, the Federal EPA proposed conditional approval of the pending extension request for the Mountaineer Plant. The Federal EPA alleged that the Mountaineer Plant was not fully compliant with the CCR Rule. In December 2022, AEP withdrew the pending extension request for the Mountaineer Plant as work to construct new CCR disposal facilities was completed and the extension was no longer needed. In addition, AEP ceased receiving ash in the ponds subject to the extension requests, completed construction of new, CCR Rule compliant facilities at the plants listed in the table above and withdrew the applications for additional time to develop alternative disposal capacity.

Closure and post-closure estimated costs have been included in ARO in accordance with the requirements in the Federal EPA's final CCR rule. Additional ARO revisions will occur on a site-by-site basis if groundwater monitoring activities conclude that corrective actions are required to mitigate groundwater impacts. AEP may incur significant additional costs complying with the Federal EPA's CCR Rule, including costs to upgrade or close and replace surface impoundments and landfills used to manage CCR and to conduct any required remedial actions including removal of coal ash. If additional costs are incurred and AEP is unable to obtain cost recovery, it would reduce future net income and cash flows and impact financial condition. Management will continue to participate in rulemaking activities and make adjustments based on new federal and state requirements affecting its ash disposal units.

Under the second option for obtaining an extension of the April 11, 2021 deadline to cease operation of unlined impoundments, a generating facility may continue operating its existing impoundments without developing alternative CCR disposal, provided the facility commits to cease combustion of coal by a date certain. Under this option, a generating facility had until October 17, 2023 to cease coal-fired operations and to close CCR storage ponds 40 acres or less in size, or through October 17, 2028 for facilities with CCR storage ponds greater than 40 acres in size. Pursuant to this option, AEP informed the Federal EPA of its intent to retire the Pirkey Plant and cease using coal at the Welsh Plant. In March 2023, the Pirkey Plant was retired. The table below summarizes the net book value of Welsh Plant, Units 1 and 3 as of September 30, 2023.

<u>Company</u>	<u>Plant Name and Unit</u>	<u>Generating Capacity</u>	<u>Net Investment (a)</u>	<u>Accelerated Depreciation Regulatory Asset</u>	<u>Projected Retirement Date</u>
		<u>(in MWs)</u>	<u>(in millions)</u>		
SWEPCo	Welsh Plant, Units 1 and 3	1,053	\$ 368.8	\$ 115.5	2028 (b)(c)

(a) Net book value including CWIP excluding cost of removal and materials and supplies.

(b) In November 2020, management announced it will cease using coal at the Welsh Plant in 2028.

(c) Unit 1 is currently being recovered through 2027 in the Louisiana jurisdiction and through 2037 in the Arkansas and Texas jurisdictions. Unit 3 is currently being recovered through 2032 in the Louisiana jurisdiction and through 2042 in the Arkansas and Texas jurisdictions.

To date, the Federal EPA has not taken any action on the pending extension request for the Welsh Plant. Under the second option above, AEP may need to recover remaining depreciation and estimated closure costs associated with these plants over a shorter period. If AEP cannot ultimately recover the costs of environmental compliance and/or the remaining depreciation and estimated closure costs associated with these plants in a timely manner, it would reduce future net income and cash flows and impact financial condition.

In May 2023, the Federal EPA proposed revisions to the CCR Rule to expand the scope of the rule to include inactive impoundments at inactive facilities (“legacy CCR surface impoundments”) as well as to establish requirements for currently exempt solid waste management units that involve the direct placement of CCR on the land (“CCR management units”). The proposed rule, if finalized, could have a material adverse impact on net income, cash flows and financial condition if AEP cannot ultimately recover any additional costs of compliance.

Clean Water Act Regulations

The Federal EPA’s ELG rule for generating facilities establishes limits for FGD wastewater, fly ash and bottom ash transport water and flue gas mercury control wastewater, which are to be implemented through each facility’s wastewater discharge permit. A revision to the ELG rule, published in October 2020, established additional options for reusing and discharging small volumes of bottom ash transport water, provided an exception for retiring units and extended the compliance deadline to a date as soon as possible beginning one year after the rule was published but no later than December 2025. Management has assessed technology additions and retrofits to comply with the rule and the impacts of the Federal EPA’s actions on facilities’ wastewater discharge permitting for FGD wastewater and bottom ash transport water. For affected facilities that must install additional technologies to meet the ELG rule limits, permit modifications were filed in January 2021 that reflect the outcome of that assessment. AEP continues to work with state agencies to finalize permit terms and conditions. Other facilities opted to file Notices of Planned Participation (NOPP), pursuant to which the facilities are not required to install additional controls to meet ELG limits provided they make commitments to cease coal combustion by a date certain. In March 2023, the Federal EPA proposed further revisions to the ELG rule which, if finalized, would establish a zero discharge standard for FGD wastewater and bottom ash transport water, and more stringent discharge limits for combustion residual leachate. Management is evaluating the impacts of the proposed rule to operations. Management cannot predict whether the Federal EPA will actually finalize further revisions, but will continue to monitor this issue and will participate in further rulemaking activities as they arise.

In January 2023, the Federal EPA and the Department of the Army finalized a new rule revising the definition of “waters of the United States,” which became effective in March 2023. The new rule expands the scope of the definition, which means that permits may be necessary where none were previously required and issued permits may need to be reopened to impose additional obligations. A number of legal challenges in courts across the country have resulted in the rule being stayed in more than half of the states, including Arkansas, Indiana, Louisiana, Ohio, Oklahoma, Virginia and West Virginia. Management is evaluating what impacts the revised rule will have on operations.

In May 2023, the United States Supreme Court issued a decision that significantly narrowed the scope of “waters of the United States,” specifically which wetlands can be regulated as waters of the United States. In August 2023, the Federal EPA and the Department of the Army issued a final rule to amend the January 2023 revised definition of “waters of the United States” to conform to the Supreme Court’s decision, which rendered parts of the January 2023 rule invalid. The conforming rule became effective in September 2023 and applies in those states not subject to the court’s stay of the January 2023 rule.

Impact of Environmental Regulation on Coal-Fired Generation

Compliance with extensive environmental regulations requires significant capital investment in environmental monitoring, installation of pollution control equipment, emission fees, disposal, remediation and permits. Management continuously evaluates cost estimates of complying with these regulations which may result in a decision to retire coal-fired generating facilities earlier than their currently estimated useful lives.

The table below summarizes the net book value, as of September 30, 2023, of generating facilities retired or planned for early retirement in advance of the retirement date currently authorized for ratemaking purposes:

Company	Plant	Net Investment (a)	Accelerated Depreciation Regulatory Asset	Actual/Projected Retirement Date	Current Authorized Recovery Period	Annual Depreciation (b)
		(in millions)				
PSO	Northeastern Plant, Unit 3	\$ 112.5	\$ 159.5	2026	(c)	\$ 15.0
SWEPCo	Pirkey Plant	—	113.0	2023	(e)	—
SWEPCo	Welsh Plant, Units 1 and 3	368.8	115.5	2028 (f)	(g)	38.6

- (a) Net book value, including CWIP excluding cost of removal and materials and supplies.
- (b) These amounts represent the amount of annual depreciation that has been collected from customers over the prior 12-month period.
- (c) Northeastern Plant, Unit 3 is currently being recovered through 2040.
- (d) Represents Arkansas and Texas jurisdictional share.
- (e) As part of the 2021 Arkansas Base Rate Case, the APSC granted SWEPCo regulatory asset treatment. SWEPCo will request recovery including a weighted average cost of capital carrying charge through a future proceeding. The Texas share of the Pirkey Plant will be addressed in SWEPCo’s next base rate case. See the “Coal-Fired Generation Plants” section of Note 4 for additional information.
- (f) In November 2020, management announced it will cease using coal at the Welsh Plant in 2028. Management is evaluating a potential conversion to natural gas after 2028 for both units.
- (g) Welsh Plant, Unit 1 is being recovered through 2027 in the Louisiana jurisdiction and through 2037 in the Arkansas and Texas jurisdictions. Welsh Plant, Unit 3 is being recovered through 2032 in the Louisiana jurisdiction and through 2042 in the Arkansas and Texas jurisdictions.

Management is seeking or will seek regulatory recovery, as necessary, for any net book value remaining when the plants are retired. To the extent the net book value of these generation assets is not deemed recoverable, it could materially reduce future net income, cash flows and impact financial condition.

RESULTS OF OPERATIONS

SEGMENTS

AEP's primary business is the generation, transmission and distribution of electricity. Within its Vertically Integrated Utilities segment, AEP centrally dispatches generation assets and manages its overall utility operations on an integrated basis because of the substantial impact of cost-based rates and regulatory oversight. Intersegment sales and transfers are generally based on underlying contractual arrangements and agreements.

AEP's reportable segments and their related business activities are outlined below:

Vertically Integrated Utilities

- Generation, transmission and distribution of electricity for sale to retail and wholesale customers through assets owned and operated by AEGCo, APCo, I&M, KGPCo, KPCo, PSO, SWEPCo and WPCo.

Transmission and Distribution Utilities

- Transmission and distribution of electricity for sale to retail and wholesale customers through assets owned and operated by AEP Texas and OPCo.
- OPCo purchases energy and capacity to serve standard service offer customers and provides transmission and distribution services for all connected load.

AEP Transmission Holdco

- Development, construction and operation of transmission facilities through investments in AEPTCo. These investments have FERC-approved ROEs.
- Development, construction and operation of transmission facilities through investments in AEP's transmission-only joint ventures. These investments have PUCT-approved or FERC-approved ROEs.

Generation & Marketing

- Contracted energy management services.
- Marketing, risk management and retail activities in ERCOT, MISO, PJM and SPP.
- Competitive generation in PJM.

The remainder of AEP's activities are presented as Corporate and Other. While not considered a reportable segment, Corporate and Other primarily includes the purchasing of receivables from certain AEP utility subsidiaries, Parent's guarantee revenue received from affiliates, investment income, interest income and interest expense, and other nonallocated costs.

The following discussion of AEP's results of operations by operating segment includes an analysis of Gross Margin, which is a non-GAAP financial measure. Gross Margin includes Total Revenues less the costs of Fuel and Other Consumables Used for Electric Generation, as well as Purchased Electricity for Resale, as presented in the Registrants' statements of income as applicable. Under the various state utility rate making processes, these expenses are generally reimbursable directly from and billed to customers. As a result, they do not typically impact Operating Income or Earnings Attributable to AEP Common Shareholders. Management believes that Gross Margin provides a useful measure for investors and other financial statement users to analyze AEP's financial performance in that it excludes the effect on Total Revenues caused by volatility in these expenses. Operating Income, which is presented in accordance with GAAP in AEP's statements of income, is the most directly comparable GAAP financial measure to the presentation of Gross Margin. AEP's definition of Gross Margin may not be directly comparable to similarly titled financial measures used by other companies.

The following tables present Earnings (Loss) Attributable to AEP Common Shareholders by segment:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2023	2022	2023	2022

(a) Includes Off-system Sales, municipalities and cooperatives, unit power and other wholesale customers.

Heating degree days and cooling degree days are metrics commonly used in the utility industry as a measure of the impact of weather on revenues. In general, degree day changes in the eastern region have a larger effect on revenues than changes in the western region due to the relative size of the two regions and the number of customers within each region.

Summary of Heating and Cooling Degree Days for Vertically Integrated Utilities

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2023	2022	2023	2022
	(in degree days)			
<u>Eastern Region</u>

Third Quarter of 2023 Compared to Third Quarter of 2022

The major components of the increase in Gross Margin, defined as revenues less the related direct cost of fuel, including consumption of chemicals and emissions allowances, and purchased electricity were as follows:

- **Retail Margins** increased \$52 million primarily due to the following:
 - A \$28 million increase in base rate and rider revenues at PSO. This increase was partially offset in other expense items below.
 - A \$23 million increase at SWEPCo due to a base rate revenue increase in Louisiana and rider increases in Texas and Louisiana. These increases were partially offset in other expense items below.
 - A \$20 million increase in weather-normalized retail margins primarily in the commercial and industrial classes.
 - A \$19 million increase at APCo due to rider revenues in Virginia and West Virginia. This increase was partially offset in other expense items below.

These increases were partially offset by:

- An \$18 million decrease at PSO and SWEPCo due to an increase in PTC benefits provided to customers. This increase in PTC benefits was offset in Income Tax Benefit below.
- A \$13 million decrease in weather-related usage primarily in the residential class.
- **Margins from Off-system Sales** decreased \$14 million primarily due to reduced Turk Plant merchant sales and Rockport Plant, Unit 2 merchant operations activity.
- **Transmission Revenues** decreased \$6 million primarily due to transmission formula rate true-up activity.

Expenses and Other and Income Tax Benefit changed between years as follows:

- **Asset Impairments and Other Related Charges** decreased \$25 million at APCo due to the prior year write-off of a regulatory asset in accordance with the August 2022 Virginia Supreme Court opinion related to the 2017-2019 Virginia Triennial Review.
- **Establishment of 2017-2019 Virginia Triennial Review Regulatory Asset** decreased \$37 million at APCo due to the establishment of a regulatory asset in 2022 based on an August 2022 Virginia Supreme Court opinion and resulting under-earning during the 2017-2019 Virginia Triennial Review.
- **Depreciation and Amortization** expenses decreased \$40 million primarily due to a \$46 million decrease at AEGCo and I&M due to the expiration of the Rockport Plant, Unit 2 lease in December 2022, partially offset by an increase in depreciation expense due to the acquisition of Rockport Plant, Unit 2 at the end of the lease.
- **Allowance for Equity Funds Used During Construction** increased \$9 million primarily due to higher AFUDC equity rates and CWIP.
- **Interest Expense** increased \$28 million primarily due to higher long-term debt balances and interest rates.
- **Income Tax Benefit** decreased \$9 million primarily due to the following:
 - A \$10 million decrease due to an increase in pretax book income.
 - A \$10 million increase in state income tax.
 - A \$3 million decrease in amortization of Excess ADIT. This decrease was partially offset in Retail Margins above.
 - A \$3 million decrease due to a lower cost of removal deduction.

These decreases were partially offset by:

- An \$18 million increase in PTCs. This increase was partially offset in Retail Margins above.

Nine Months Ended September 30, 2023 Compared to Nine Months Ended September 30, 2022

The major components of the increase in Gross Margin, defined as revenues less the related direct cost of fuel, including consumption of chemicals and emissions allowances, and purchased electricity were as follows:

- **Retail Margins** increased \$69 million primarily due to the following:
 - A \$58 million increase at SWEPCo primarily due to base rate revenue increases in Arkansas and Louisiana and rider increases in all retail jurisdictions. These increases were partially offset in other expense items below.
 - A \$54 million increase in weather-normalized margins primarily in the residential and commercial classes.
 - A \$47 million increase in base rate and rider revenues at PSO. This increase was partially offset in other expense items below.
 - A \$44 million increase at APCo due to rider revenues in Virginia and West Virginia. This increase was partially offset in other expense items below.
 - A \$40 million increase due to lower customer refunds related to Tax Reform. This increase was offset in Income Tax Benefit below.
- These increases were partially offset by:
- A \$151 million decrease in weather-related usage primarily in the residential class.
 - A \$26 million decrease at PSO and SWEPCo due to an increase in PTC benefits provided to customers. This increase in PTC benefits was offset in Income Tax Benefit below.
 - **Margins from Off-system Sales** increased \$33 million primarily due to Rockport Plant, Unit 2 merchant operations including PJM performance incentives related to winter storm Elliott in December 2022, partially offset by reduced Turk Plant merchant sales.
 - **Transmission Revenues** decreased \$12 million primarily due to transmission formula rate true-up activity.

- **Other Revenues** decreased \$8 million primarily due to the following:
 - A \$4 million decrease at APCo primarily due to pole attachment revenue.
 - A \$4 million decrease at I&M due to a reduction in the sale of allowances. This decrease was partially offset in Retail Margins above.

Expenses and Other and Income Tax Benefit changed between years as follows:

- **Other Operation and Maintenance** expenses increased \$98 million primarily due to the following:
 - A \$30 million increase in generation expenses primarily due to plant outages and maintenance at I&M.
 - A \$29 million increase in accounts receivable factoring expenses primarily due to increased interest rates.
 - A \$27 million increase in distribution storm expenses primarily due to major storms at APCo.
 - A \$21 million increase at APCo due to the amortization of a regulatory asset in accordance with the August 2022 Virginia Supreme Court opinion related to under-earnings during the 2017-2019 Triennial Review. This increase was offset in Retail Margins above.
 - A \$14 million increase at APCo due to gains from the sale of land in 2022.
 - An \$11 million increase in distribution expenses.
 These increases were partially offset by:
 - A \$43 million decrease in employee-related expenses.
- **Asset Impairments and Other Related Charges** decreased \$25 million at APCo due to the prior year write-off of a regulatory asset in accordance with the August 2022 Virginia Supreme Court opinion related to the 2017-2019 Virginia Triennial Review.
- **Establishment of 2017-2019 Virginia Triennial Review Regulatory Asset** decreased \$37 million at APCo due to the establishment of a regulatory asset in 2022 based on an August 2022 Virginia Supreme Court opinion and resulting under-earning during the 2017-2019 Virginia Triennial Review.
- **Depreciation and Amortization** expenses decreased \$114 million primarily due to a \$138 million decrease at AEGCo and I&M primarily due to the expiration of the Rockport Plant, Unit 2 lease in December 2022, partially offset by an increase in depreciation expense due to the acquisition of Rockport Plant, Unit 2 at the end of the lease.
- **Taxes Other Than Income Taxes** increased \$7 million primarily due to the following:
 - A \$16 million increase primarily due to property taxes at SWEPCo and PSO driven by the investment in the NCWF.
 - A \$6 million increase at APCo primarily due to an increase in Virginia state minimum taxes.
 These increases were partially offset by:
 - A \$14 million decrease at I&M primarily due to the repeal of the Indiana Utility Receipts Tax in July 2022. This decrease was partially offset in Retail Margins above.
- **Allowance for Equity Funds Used During Construction** increased \$10 million primarily due to higher AFUDC equity rates and CWIP.
- **Non-Service Cost Components of Net Periodic Benefit Cost** decreased \$13 million primarily due to additional loss amortization as the result of unfavorable asset returns during 2022, higher interest costs due to higher discount rates and the expiration of prior service credits from previous plan changes.
- **Interest Expense** increased \$88 million primarily due to higher long-term debt balances and interest rates.
- **Income Tax Benefit** decreased \$34 million primarily due to the following:
 - A \$38 million decrease in amortization of Excess ADIT. This decrease was partially offset in Retail Margins above.
 - A \$12 million increase in state income tax.
 - An \$11 million decrease due to unfavorable discrete adjustments.
 These decreases were partially offset by:
 - A \$27 million increase in PTC and ITC amortization. This increase was partially offset in Retail Margins above.

TRANSMISSION AND DISTRIBUTION UTILITIES

Summary of KWh Energy Sales for Transmission and Distribution Utilities

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2023	2022	2023	2022
(in millions of KWhs)				
Retail:				
Residential	8,442	8,033	20,618	21,599

2023 Earnings Attributable to AEP Common Shareholders	\$ 206.0	\$ 508.4

Third Quarter of 2023 Compared to Third Quarter of 2022

The major components of the change in Gross Margin, defined as revenues less the related direct cost of purchased electricity were as follows:

- **Retail Margins** increased \$99 million primarily due to the following:
 - A \$43 million increase in revenue from rate riders in Ohio. This increase was partially offset in Margins from Off-system Sales and other expense items below.
 - A \$24 million increase in weather-normalized revenues in all retail classes.
 - A \$23 million net increase in Basic Transmission Cost Rider revenues and recoverable PJM expenses. This increase was partially offset in Other Operation and Maintenance expenses below.
 - A \$7 million increase in revenue from rate riders in Texas. This increase was partially offset in other expense items below.
- **Margins from Off-system Sales** decreased \$6 million due to the following:
 - A \$32 million decrease in off-system sales at OVEC due to lower market prices and volume. This decrease was offset in Retail Margins above.

This decrease was partially offset by:

 - A \$26 million increase in deferrals of OVEC costs. This increase was offset in Retail Margins above.
- **Transmission Revenues** increased \$17 million primarily due to the following:
 - An \$8 million increase due to increased load in Texas.
 - A \$6 million increase in interim rates driven by increased transmission investments in Texas.

Expenses and Other and Income Tax Expense changed between years as follows:

- **Other Operation and Maintenance** expenses increased \$38 million primarily due to the following:
 - A \$20 million increase due to an energy assistance program for qualified Ohio customers. This increase was offset in Retail Margins above.
 - A \$19 million increase in transmission expenses primarily due to an increase in recoverable PJM expense. This increase was offset in Retail Margins above.
 - A \$7 million increase in distribution expenses primarily due to vegetation management in Ohio. This increase was offset in Retail Margins above.These increases were partially offset by:
 - A \$7 million decrease due to employee-related expenses in Texas.
- **Depreciation and Amortization** expenses increased \$19 million primarily due to the following:
 - A \$25 million increase in depreciation expense primarily due to an increase in depreciable base.This increase was partially offset by:
 - A \$9 million decrease in recoverable DIR expense in Ohio. This decrease was offset in Retail Margins above.
- **Interest Expense** increased \$8 million primarily due to higher long-term debt balances and interest rates in Texas.
- **Income Tax Expense** increased \$11 million primarily due to an increase in pretax book income.

Nine Months Ended September 30, 2023 Compared to Nine Months Ended September 30, 2022

The major components of the change in Gross Margin, defined as revenues less the related direct cost of purchased electricity were as follows:

- **Retail Margins** increased \$98 million primarily due to the following:
 - An \$86 million increase in revenue from rate riders in Ohio. This increase was partially offset in Margins from Off-system Sales and other expense items below.
 - A \$57 million net increase in Basic Transmission Cost Rider revenues and recoverable PJM expenses. This increase was partially offset in Other Operation and Maintenance expenses below.These increases were partially offset by:
 - A \$47 million decrease in weather-related usage due to a 27% decrease in heating degree days and a 28% decrease in cooling degree days in Ohio.
 - A \$9 million decrease in weather-normalized revenues primarily due to the residential class in Texas.
- **Margins from Off-system Sales** increased \$36 million due to the following:
 - A \$111 million increase in deferrals of OVEC costs. This increase was offset in Retail Margins above.This increase was partially offset by:
 - A \$75 million decrease in off-system sales at OVEC due to lower market prices and volume. This decrease was offset in Retail Margins above.
- **Transmission Revenues** increased \$50 million primarily due to the following:
 - A \$24 million increase in interim rates driven by increased transmission investments in Texas.
 - A \$22 million increase due to increased load in Texas.

Expenses and Other and Income Tax Expense changed between years as follows:

- **Other Operation and Maintenance** expenses increased \$100 million primarily due to the following:
 - A \$68 million increase due to an energy assistance program for qualified Ohio customers. This increase was offset in Retail Margins above.
 - A \$41 million increase in transmission expenses primarily due to:
 - A \$33 million increase in recoverable PJM expenses. This increase was offset in Retail Margins above.
 - An \$11 million increase in transmission formula rate true-up activity in Ohio.
 - A \$15 million increase in distribution expenses due to vegetation management in Ohio. This increase was offset in Retail Margins above.

- A \$14 million increase in distribution-related expenses in Texas.
These increases were partially offset by:
 - A \$30 million decrease due to legislation passed in Texas in May 2023 allowing employee financially based incentives to be recovered.
 - A \$24 million decrease in employee-related expenses.
 - A \$5 million decrease in transmission expenses in Texas. This decrease was offset in Retail Margins above.
- **Depreciation and Amortization** expenses increased \$17 million primarily due to the following:
 - A \$50 million increase in depreciation expense primarily due to an increase in depreciable base.
 - A \$5 million increase in recoverable smart grid depreciable expenses in Ohio. This increase was offset in Retail Margins above.
These increases were partially offset by:
 - A \$30 million decrease in recoverable DIR expense in Ohio. This decrease was offset in Retail Margins above.
 - An \$11 million decrease in recoverable advanced metering system depreciable expenses in Texas.
- **Taxes Other Than Income Taxes** increased \$14 million primarily due to higher property taxes driven by increased investments in Texas.
- **Allowance for Equity Funds Used During Construction** increased \$7 million due to a higher AFUDC base in Texas.
- **Interest Expense** increased \$28 million primarily due to:
 - A \$48 million increase primarily due to higher debt balances and interest rates.
This increase was partially offset by:
 - A \$16 million decrease due to an increase in AFUDC base.
- **Income Tax Expense** increased \$12 million primarily due to an increase in pretax book income.

AEP TRANSMISSION HOLDCO

Summary of Investment in Transmission Assets for AEP Transmission Holdco

	September 30,	
	2023	2022
	(in millions)	
Plant in Service	\$ 14,042.9	\$ 12,628.6
Construction Work in Progress	2,037.0	1,760.3

Total Transmission Property, Net	\$ 14,818.7	\$ 13,388.6

AEP Transmission Holdco Reconciliation of 2022 to 2023 Earnings Attributable to AEP Common Shareholders (in millions)

	Three Months Ended September 30,	Nine Months Ended September 30,
2022 Earnings Attributable to AEP Common Shareholders	\$ 170.5	\$ 485.4
Changes in Transmission Revenues:		
Transmission Revenues	45.8	169.7
Total Change in Transmission Revenues	45.8	169.7
Changes in Expenses and Other:		
Other Operation and Maintenance	7.2	4.5
Depreciation and Amortization	(12.4)	(35.2)
Taxes Other Than Income Taxes	(5.0)	(14.1)
Interest and Investment Income	1.4	5.9
Allowance for Equity Funds Used During Construction	2.4	11.0
Non-Service Cost Components of Net Periodic Pension Cost	0.2	0.8
Interest Expense	(9.2)	(29.5)
Total Change in Expenses and Other	(15.4)	(56.6)
Income Tax Expense	1.0	(16.8)
Equity Earnings of Unconsolidated Subsidiary	1.1	(0.5)
Net Income Attributable to Noncontrolling Interests	(0.1)	(0.4)
2023 Earnings Attributable to AEP Common Shareholders	\$ 202.9	\$ 580.8

Third Quarter of 2023 Compared to Third Quarter of 2022

The major component of the increase in transmission revenues, which consists of wholesale sales to affiliates and nonaffiliates, was as follows:

- **Transmission Revenues** increased \$46 million primarily due to continued investment in transmission assets.

Expenses and Other changed between years as follows:

- **Other Operation and Maintenance** expenses decreased \$7 million primarily due to the following:
 - A \$5 million decrease due to cancelled capital projects in 2022.
 - A \$3 million decrease in employee-related expenses.

- **Depreciation and Amortization** expenses increased \$12 million primarily due to a higher depreciable base.
- **Taxes Other Than Income Taxes** increased \$5 million primarily due to higher property taxes driven by increased transmission investment.
- **Interest Expense** increased \$9 million primarily due to higher long-term debt balances and interest rates.

Nine Months Ended September 30, 2023 Compared to Nine Months Ended September 30, 2022

The major components of the increase in transmission revenues, which consists of wholesale sales to affiliates and nonaffiliates, were as follows:

- **Transmission Revenues** increased \$170 million primarily due to the following:
 - A \$131 million increase due to continued investment in transmission assets.
 - A \$33 million increase due to affiliated transmission formula rate true-up activity. This increase was offset in Other Operation and Maintenance expenses across the other Registrant Subsidiaries.
 - A \$6 million increase due to nonaffiliated transmission formula rate true-up activity.

Expenses and Other and Income Tax Expense changed between years as follows:

- **Depreciation and Amortization** expenses increased \$35 million primarily due to a higher depreciable base.
- **Taxes Other Than Income Taxes** increased \$14 million primarily due to higher property taxes driven by increased transmission investment.
- **Interest and Investment Income** increased \$6 million primarily due to higher advances to affiliates and higher interest rates.
- **Allowance for Equity Funds Used During Construction** increased \$11 million primarily due to higher CWIP and AFUDC equity rates.
- **Interest Expense** increased \$30 million primarily due to higher long-term debt balances and interest rates.
- **Income Tax Expense** increased \$17 million primarily due to an increase in pretax book income.

GENERATION & MARKETING

Generation & Marketing Reconciliation of 2022 to 2023 Earnings (Loss) Attributable to AEP Common Shareholders (in millions)

	Three Months Ended September 30,	Nine Months Ended September 30,
2022 Earnings Attributable to AEP Common Shareholders	\$ 97.5	\$ 284.3
Changes in Gross Margin:		
Merchant Generation	12.5	7.9
Renewable Generation	(26.3)	(34.8)
Retail, Trading and Marketing	4.6	(344.3)
Total Change in Gross Margin	(9.2)	(371.2)
Changes in Expenses and Other:		
Other Operation and Maintenance	13.5	(59.2)
Loss on the Sale of the Competitive Contracted Renewables Portfolio	—	(112.0)
Gain on Sale of Mineral Rights	—	(116.3)
Depreciation and Amortization	14.8	34.1
Taxes Other Than Income Taxes	1.5	3.2
Interest and Investment Income	(1.0)	10.8
Non-Service Cost Components of Net Periodic Benefit Cost	1.5	4.3
Interest Expense	(2.0)	(38.5)
Total Change in Expenses and Other	28.3	(273.6)
Income Tax Benefit	11.1	102.0
Equity Earnings of Unconsolidated Subsidiaries	6.4	202.5
Net Loss Attributable to Noncontrolling Interests	(3.4)	(3.3)
2023 Earnings (Loss) Attributable to AEP Common Shareholders	\$ 130.7	\$ (59.3)

Third Quarter of 2023 Compared to Third Quarter of 2022

The major components of the decrease in Gross Margin, defined as revenues less the related direct cost of fuel, including consumption of chemicals and emissions allowances, purchased electricity and certain cost of service for retail operations were as follows:

- **Merchant Generation** increased \$13 million primarily due to higher hedge gains related to the Cardinal Plant.
- **Renewable Generation** decreased \$26 million primarily due to lower production in 2023 and the sale of the competitive contracted renewables portfolio in August 2023.

Expenses and Other, Income Tax Benefit and Equity Earnings of Unconsolidated Subsidiaries changed between years as follows:

- **Other Operation and Maintenance** expenses decreased \$14 million primarily due to:
 - A \$7 million decrease due to the sale of the competitive contracted renewables portfolio in August 2023.
 - A \$5 million decrease due to an increase in proceeds received for insurance policy settlements.

- **Depreciation and Amortization** decreased \$15 million primarily due to the ceasing of depreciation on the competitive contracted renewables portfolio as a result of held for sale classification and subsequent sale in 2023.
- **Income Tax Benefit** increased \$11 million primarily due to:
 - A \$30 million increase due to favorable discrete adjustments primarily related to the amortization of deferred ITCs from the sale of competitive contracted renewables portfolio.
 This increase was partially offset by:
 - An \$11 million decrease in PTCs.
 - A \$5 million decrease due to an increase in pretax book income.
 - A \$3 million increase in state taxes.
- **Equity Earnings of Unconsolidated Subsidiaries** increased \$6 million primarily due to the sale of competitive contracted renewables portfolio in August 2023.

Nine Months Ended September 30, 2023 Compared to Nine Months Ended September 30, 2022

The major components of the decrease in Gross Margin, defined as revenues less the related direct cost of fuel, including consumption of chemicals and emissions allowances, purchased electricity and certain cost of service for retail operations were as follows:

- **Merchant Generation** increased \$8 million primarily due to higher asset hedge gains.
- **Renewable Generation** decreased \$35 million primarily due to lower production in 2023 and the sale of competitive contracted renewables portfolio in August 2023.
- **Retail, Trading and Marketing** decreased \$344 million primarily due to a \$222 million unrealized loss on economic hedge activity in 2023 and a \$208 million unrealized gain on economic hedge activity in 2022 driven by changes in commodity prices.

Expenses and Other, Income Tax Benefit and Equity Earnings of Unconsolidated Subsidiaries changed between years as follows:

- **Other Operation and Maintenance** expenses increased \$59 million primarily due to a decrease in land sales and a prior year sale of renewable development projects.
- **Loss on the Sale of the Competitive Contracted Renewables Portfolio** increased \$112 million due to the pretax loss on the sale in 2023.
- **Gain on Sale of Mineral Rights** decreased \$116 million due to the prior year sale of mineral rights.
- **Depreciation and Amortization** expenses decreased \$34 million primarily due to the ceasing of depreciation on the competitive contracted renewables portfolio as a result of held for sale classification and subsequent sale in 2023.
- **Interest and Investment Income** increased \$11 million primarily due to higher interest rates on advances to affiliates.
- **Interest Expense** increased \$39 million due to higher interest rates in 2023.
- **Income Tax Benefit** increased \$102 million primarily due to:
 - A \$94 million increase due to a decrease in pretax book income.
 - A \$35 million increase due to favorable discrete adjustments primarily related to the amortization of deferred ITCs from the sale of competitive contracted renewables portfolio.
 These increases were partially offset by:
 - A \$26 million decrease in PTCs.
- **Equity Earnings of Unconsolidated Subsidiaries** increased \$203 million primarily due to the prior year impairment of AEP's investment in Flat Ridge 2 Wind LLC.

CORPORATE AND OTHER

Third Quarter of 2023 Compared to Third Quarter of 2022

Earnings Attributable to AEP Common Shareholders from Corporate and Other increased from a loss of \$227 million in 2022 to a loss of \$98 million in 2023 primarily due to:

- A \$195 million pretax loss in 2022 related to the termination of the sale of the Kentucky Operations.
- A \$21 million increase in interest income, primarily due to higher interest income from affiliates.
- An \$18 million decrease in corporate expenses.
- A \$17 million increase in business development income.
- A \$10 million increase at EIS, primarily due to higher returns on investments.

These increases in earnings were partially offset by:

- A \$73 million increase in Income Tax Expense primarily due to a \$42 million increase driven by increased pretax book income and a \$30 million increase due to less favorable consolidating tax adjustments.
- A \$72 million increase in interest expense due to higher interest rates and an increase in debt balances.

Nine Months Ended September 30, 2023 Compared to Nine Months Ended September 30, 2022

Earnings Attributable to AEP Common Shareholders from Corporate and Other increased from a loss of \$406 million in 2022 to a loss of \$210 million in 2023 primarily due to:

- A \$263 million pretax loss in 2022 related to the termination of the sale of the Kentucky Operations.
- A \$96 million increase in interest income, primarily due to higher interest income from affiliates.
- A \$54 million decrease in corporate expenses, primarily due to adjustments driven by the termination of the sale of Kentucky Operations.
- A \$42 million increase in factoring revenues from affiliates.
- A \$38 million increase at EIS, primarily due to higher returns on investments.

These increases in were partially offset by:

- A \$259 million increase in interest expense due to higher interest rates and an increase in debt balances.
- A \$52 million decrease in Income Tax Benefit primarily due to an increase in pretax book income.

AEP SYSTEM INCOME TAXES

Third Quarter of 2023 Compared to Third Quarter of 2022

Income Tax Expense increased \$80 million primarily due to:

- A \$75 million increase due to an increase in pretax book income.
- A \$23 million decrease in PTCs.
- A \$20 million increase in state taxes.

These increases in Income Tax Expense were partially offset by:

- A \$41 million decrease due to discrete adjustments in 2023 primarily related to the amortization of deferred ITCs from the sale of the competitive contracted renewables portfolio.

Nine Months Ended September 30, 2023 Compared to Nine Months Ended September 30, 2022

Income Tax Expense increased \$12 million primarily due to:

- A \$38 million decrease in amortization of Excess ADIT.
- A \$20 million decrease in PTCs.
- A \$20 million increase in state taxes.

These increases in Income Tax Expense were partially offset by:

- A \$51 million decrease due to discrete adjustments in 2023 primarily related to the amortization of deferred ITCs from the sale of the competitive contracted renewables portfolio and an outside basis adjustment related to the termination of the sale of the Kentucky Operations.
- A \$16 million decrease in flow-through depreciation.

FINANCIAL CONDITION

AEP measures financial condition by the strength of its balance sheet and the liquidity provided by its cash flows.

LIQUIDITY AND CAPITAL RESOURCES

Debt and Equity Capitalization

	September 30, 2023		December 31, 2022	
	(dollars in millions)			
Long-term Debt, including amounts due within one year	\$ 39,489.1	58.4 %	\$ 36,801.0	56.6 %
Short-term Debt	2,730.4	4.0	4,112.2	6.3
Total Debt	42,219.5	62.4	40,913.2	62.9
AEP Common Equity	25,309.7	37.5	23,893.4	36.7
Noncontrolling Interests	39.9	0.1	229.0	0.4
Total Debt and Equity Capitalization	\$ 67,569.1	100.0 %	\$ 65,035.6	100.0 %

AEP's ratio of debt-to-total capital decreased from 62.9% as of December 31, 2022 to 62.4% as of September 30, 2023 primarily due to the issuance of common equity in connection with the settlement of the forward equity purchase contracts related to the 2020 Equity Units in addition to the utilization of cash proceeds received from the sale of the competitive contracted renewables portfolio which were used to reduce Short-term Debt, partially offset by an increase in Long-term Debt to support distribution, transmission and renewable investment growth in addition to working capital needs.

Liquidity

Liquidity, or access to cash, is an important factor in determining AEP's financial stability. Management believes AEP has adequate liquidity. As of September 30, 2023, AEP had \$5 billion of revolving credit facilities to support its commercial paper program. Additional liquidity is available from cash from operations and a receivables securitization agreement. Management is committed to maintaining adequate liquidity. AEP generally uses short-term borrowings to fund working capital needs, property acquisitions and construction until long-term funding is arranged. Sources of long-term funding include issuance of long-term debt, long-term asset securitizations, leasing agreements, hybrid securities or common stock. AEP and its utilities finance its operations with commercial paper and other variable rate instruments that are subject to fluctuations in interest rates. To the extent that the interest rates continue to rise, it could reduce future net income and cash flows and impact financial condition. Market volatility and reduced liquidity in the financial markets could affect AEP's ability to raise capital on reasonable terms to fund capital needs, including construction costs and refinancing maturing indebtedness. AEP is also monitoring the current bank environment and any impacts thereof. AEP was not materially impacted by these conditions during the nine months ended September 30, 2023. AEP continues to address the cash flow implications of increased fuel and purchased power costs, see "Deferred Fuel Costs" section of Executive Overview for additional information.

Net Available Liquidity

AEP manages liquidity by maintaining adequate external financing commitments. As of September 30, 2023, available liquidity was approximately \$3.5 billion as illustrated in the table below:

	Amount	Maturity
	(in millions)	
Commercial Paper Backup:		
Revolving Credit Facility	\$ 4,000.0	March 2027
Revolving Credit Facility	1,000.0	March 2025
Cash and Cash Equivalents	353.3	
Total Liquidity Sources	5,353.3	
Less: AEP Commercial Paper Outstanding	1,826.5	
Net Available Liquidity	\$ 3,526.8	

AEP uses its commercial paper program to meet the short-term borrowing needs of its subsidiaries. The program funds a Utility Money Pool, which funds AEP's utility subsidiaries; a Nonutility Money Pool, which funds certain AEP nonutility subsidiaries; and the short-term debt requirements of subsidiaries that are not participating in either money pool for regulatory or operational reasons, as direct borrowers. The maximum amount of commercial paper outstanding during the first nine months of 2023 was \$3.2 billion. The weighted-average interest rate for AEP's commercial paper during 2023 was 5.31%.

Other Credit Facilities

An uncommitted facility gives the issuer of the facility the right to accept or decline each request made under the facility. AEP issues letters of credit on behalf of subsidiaries under six uncommitted facilities totaling \$450 million. The Registrants' maximum future payments for letters of credit issued under the uncommitted facilities as of September 30, 2023 was \$249 million with maturities ranging from October 2023 to September 2024.

Securitized Accounts Receivables

AEP Credit's receivables securitization agreement provides a commitment of \$900 million from bank conduits to purchase receivables. The agreement was amended in August 2023 to increase the commitment from \$750 million and expires in September 2025. As of September 30, 2023, the affiliated utility subsidiaries were in compliance with all requirements under the agreement.

Debt Covenants and Borrowing Limitations

AEP's credit agreements contain certain covenants and require it to maintain a percentage of debt-to-total capitalization at a level that does not exceed 67.5%. The method for calculating outstanding debt and capitalization is contractually-defined in AEP's credit agreements. Debt as defined in the revolving credit agreement excludes securitization bonds and debt of AEP Credit. As of September 30, 2023, this contractually-defined percentage was 59.4%. Non-performance under these covenants could result in an event of default under these credit agreements. In addition, the acceleration of AEP's payment obligations, or the obligations of certain of AEP's major subsidiaries, prior to maturity under any other agreement or instrument relating to debt outstanding in excess of \$50 million, would cause an event of default under these credit agreements. This condition also applies in a majority of AEP's non-exchange-traded commodity contracts and would similarly allow lenders and counterparties to declare the outstanding amounts payable. However, a default under AEP's non-exchange-traded commodity contracts would not cause an event of default under its credit agreements.

The revolving credit facilities do not permit the lenders to refuse a draw on any facility if a material adverse change occurs.

Utility Money Pool borrowings and external borrowings may not exceed amounts authorized by regulatory orders and AEP manages its borrowings to stay within those authorized limits.

ATM Program

AEP participates in an ATM offering program that allows AEP to issue, from time to time, up to an aggregate of \$1 billion of its common stock, including shares of common stock that may be sold pursuant to an equity forward sales agreement. There were no issuances under the ATM program for the nine months ended September 30, 2023. As of September 30, 2023, approximately \$511 million of equity is available for issuance under the ATM offering program. See Note 12 - Financing Activities for additional information.

Equity Units

In August 2020, AEP issued 17 million Equity Units initially in the form of corporate units, at a stated amount of \$50 per unit, for a total stated amount of \$850 million. Net proceeds from the issuance were approximately \$833 million. Each corporate unit represents a 1/20 undivided beneficial ownership interest in \$1,000 principal amount of AEP's 1.30% Junior Subordinated Notes due in 2025 and a forward equity purchase contract which settled after three years in August 2023. The proceeds were used to support AEP's overall capital expenditure plans.

In June 2023, AEP successfully remarketed the Junior Subordinated Notes on behalf of holders of the corporate units. AEP did not receive any proceeds from the remarketing which were used to purchase a portfolio of treasury securities that matured on August 14, 2023. On August 15, 2023, the proceeds from the treasury portfolio were used to settle the forward equity purchase contract with AEP. The interest rate on the Junior Subordinated Notes was reset to 5.699% with the maturity remaining in 2025. In August 2023, AEP issued 10,048,668 shares of AEP common stock and received proceeds totaling \$850 million under the settlement of the forward equity purchase contracts. AEP common stock held in treasury was used to settle the forward equity purchase contracts. The proceeds were used to pay down debt balances and support AEP's overall capital expenditure plans. See Note 12 - Financing Activities for additional information.

Dividend Policy and Restrictions

The Board of Directors declared a quarterly dividend of \$0.88 per share in October 2023. Future dividends may vary depending upon AEP's profit levels, operating cash flow levels and capital requirements, as well as financial and other business conditions existing at the time. Parent's income primarily derives from common stock equity in the earnings of its utility subsidiaries. Various financing arrangements and regulatory requirements may impose certain restrictions on the ability of the subsidiaries to transfer funds to Parent in the form of dividends. Management does not believe these restrictions will have any significant impact on its ability to access cash to meet the payment of dividends on its common stock. See "Dividend Restrictions" section of Note 12 for additional information.

Credit Ratings

AEP and its utility subsidiaries do not have any credit arrangements that would require material changes in payment schedules or terminations as a result of a credit downgrade, but its access to the commercial paper market may depend on its credit ratings. In addition, downgrades in AEP's credit ratings by one of the rating agencies could increase its borrowing costs. Counterparty concerns about the credit quality of AEP or its utility subsidiaries could subject AEP to additional collateral demands under adequate assurance clauses under its derivative and non-derivative energy contracts.

CASH FLOW

AEP relies primarily on cash flows from operations, debt issuances and its existing cash and cash equivalents to fund its liquidity and investing activities. AEP's investing and capital requirements are primarily capital expenditures, repaying of long-term debt and paying dividends to shareholders. AEP uses short-term debt, including commercial paper, as a bridge to long-term debt financing. The levels of borrowing may vary significantly due to the timing of long-term debt financings and the impact of fluctuations in cash flows.

	Nine Months Ended September 30,	
	2023	2022
	(in millions)	
Cash, Cash Equivalents and Restricted Cash at Beginning of Period	\$ 556.5	\$ 451.4
Net Cash Flows from Operating Activities	3,675.7	4,733.2
Net Cash Flows Used for Investing Activities	(4,643.5)	(5,822.5)
Net Cash Flows from Financing Activities	818.4	1,215.2
Net Increase (Decrease) in Cash and Cash Equivalents	(149.4)	125.9
Cash, Cash Equivalents and Restricted Cash at End of Period	\$ 407.1	\$ 577.3

Operating Activities

	Nine Months Ended September 30,	
	2023	2022
	(in millions)	
Net Income	\$ 1,874.8	\$ 1,922.2
Non-Cash Adjustments to Net Income (a)	2,469.5	2,661.1
Mark-to-Market of Risk Management Contracts	(82.8)	162.3
Property Taxes	486.1	459.9
Deferred Fuel Over/Under-Recovery, Net	542.8	(148.7)
Change in Other Noncurrent Assets	(396.8)	(6.0)
Change in Other Noncurrent Liabilities	(21.5)	324.0
Change in Certain Components of Working Capital	(1,196.4)	(641.6)
Net Cash Flows from Operating Activities	\$ 3,675.7	\$ 4,733.2

- (a) Non-Cash Adjustments to Net Income includes Depreciation and Amortization, Deferred Income Taxes, Loss on the Expected Sale of the Kentucky Operations, Loss on the Sale of the Competitive Contracted Renewables Portfolio, Asset Impairments and Other Related Charges, Impairment of Equity Method Investment, AFUDC, Gain on Sale of Mineral Rights and Establishment of 2017-2019 Virginia Triennial Review Regulatory Asset.

Net Cash Flows from Operating Activities decreased by \$1.1 billion primarily due to the following:

- A \$736 million decrease in cash from Changes in Other Noncurrent Assets and Liabilities. This decrease is primarily due to changes in regulatory assets and liabilities driven by timing differences between collections from and refunds to customers under rate rider mechanisms.
- A \$555 million decrease in cash from the Change in Certain Components of Working Capital. The decrease is primarily due to the timing of accounts payable and property tax payments, increases in fuel, material and supplies driven by coal inventory on hand as a result of the mild current year weather and a decrease in margin deposits held due to unfavorable current year pricing variances. These decreases were partially offset by the timing of accounts receivable collections.
- A \$245 million decrease primarily due to a reduction in collateral held associated with risk management contracts driven by the reduction in commodity prices.
- A \$239 million decrease in cash from Net Income, after non-cash adjustments. See Results of Operations for further detail.

These decreases in cash were partially offset by:

- A \$692 million increase in cash primarily due to the timing of fuel and purchase power revenues and expenses. See the “Deferred Fuel Costs” section of Executive Overview for additional information.

Investing Activities

	Nine Months Ended September 30,	
	2023	2022
	(in millions)	
Construction Expenditures	\$ (5,767.1)	\$ (4,748.5)
Acquisitions of Nuclear Fuel	(60.9)	(91.9)
Acquisitions of Renewable Energy Facilities	(154.0)	(1,207.3)
Proceeds from Sale of Assets	1,335.6	215.7
Other	2.9	9.5
Net Cash Flows Used for Investing Activities	\$ (4,643.5)	\$ (5,822.5)

Net Cash Flows Used for Investing Activities decreased by \$1.2 billion primarily due to the following:

- A \$1.1 billion decrease primarily due to the 2022 acquisition of Traverse, partially offset by the 2023 acquisition of the Rock Falls Wind Facility. See “Acquisitions” section of Note 6 for additional information.
- A \$1.1 billion increase in Proceeds from Sale of Assets, primarily due to the sale of the competitive contracted renewables portfolio in 2023, partially offset by the sale of mineral rights in 2022. See “Dispositions” section of Note 6 for additional information.

These decreases in cash used were partially offset by:

- A \$1 billion increase in Construction Expenditures, primarily due to increases in Vertically Integrated Utilities of \$489 million, Transmission and Distribution Utilities of \$394 million and AEP Transmission Holdco of \$180 million.

Financing Activities

	Nine Months Ended September 30,	
	2023	2022
	(in millions)	
Issuance of Common Stock	\$ 959.3	\$ 827.2
Issuance/Retirement of Debt, Net	1,282.7	1,837.6
Dividends Paid on Common Stock	(1,293.8)	(1,212.5)
Other	(129.8)	(237.1)
Net Cash Flows from Financing Activities	\$ 818.4	\$ 1,215.2

Net Cash Flows from Financing Activities decreased by \$397 million primarily due to the following:

- A \$1.5 billion decrease due to changes in short-term debt. See Note 12 - Financing Activities for additional information.

This decrease in cash was partially offset by:

- A \$589 million increase in issuances of long-term debt. See Note 12 - Financing Activities for additional information.
- A \$326 million decrease in retirements of long-term debt. See Note 12 - Financing Activities for additional information.
- A \$132 million increase in issuances of common stock primarily due to the current year settlement of the 2020 equity units partially offset by the prior year settlement of the 2019 equity units.

See the “Long-term Debt Subsequent Events” section of Note 12 for Long-term debt and other securities issued, retired and principal payments made after September 30, 2023 through November 2, 2023, the date that the third quarter 10-Q was filed.

BUDGETED CAPITAL EXPENDITURES

Management forecasts capital expenditures of \$7.1 billion in 2023. For the four year period, 2024 through 2027, management forecasts capital expenditures of \$32.9 billion. The expenditures are generally for transmission, generation, distribution, regulated renewables and required environmental investment to comply with the Federal EPA rules. Estimated capital expenditures are subject to periodic review and modification and may vary based on the ongoing effects of regulatory constraints, environmental regulations, business opportunities, market volatility, economic trends, supply chain issues, weather, legal reviews, inflation and the ability to access capital. Management expects to fund these capital expenditures through cash flows from operations, proceeds from the strategic sale of assets and financing activities. Generally, the Registrant Subsidiaries use cash or short-term borrowings under the money pool to fund these expenditures until long-term funding is arranged. For complete information of forecasted capital expenditures, see “Budgeted Capital Expenditures” section of “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in the 2022 Annual Report.

SIGNIFICANT CASH REQUIREMENTS

A summary of significant cash requirements is included in the 2022 Annual Report and has not changed significantly from year-end other than the debt issuances and retirements discussed in the “Cash Flow” section above.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES AND ACCOUNTING STANDARDS

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

See the “Critical Accounting Policies and Estimates” section of “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in the 2022 Annual Report for a discussion of the estimates and judgments required for regulatory accounting, revenue recognition, derivative instruments, the valuation of long-lived assets, the accounting for pension and other postretirement benefits and the impact of new accounting standards.

ACCOUNTING STANDARDS

See Note 2 - New Accounting Standards for information related to accounting standards. There are no new standards expected to have a material impact to the Registrants’ financial statements.

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market Risks

The Vertically Integrated Utilities segment is exposed to certain market risks as a major power producer and through transactions in power, coal, natural gas and marketing contracts. These risks include commodity price risks which may be subject to capacity risk, credit risk as well as interest rate risk. These risks represent the risk of loss that may impact this segment due to changes in the underlying market prices or rates.

The Transmission and Distribution Utilities segment is exposed to energy procurement risk and interest rate risk.

The Generation & Marketing segment conducts marketing, risk management and retail activities in ERCOT, PJM, SPP and MISO. This segment is exposed to certain market risks as a marketer of wholesale and retail electricity. These risks include commodity price risks which may be subject to capacity risk, credit risk as well as interest rate risk. These risks represent the risk of loss that may impact this segment due to changes in the underlying market prices or rates. In addition, the Generation & Marketing segment is also exposed to certain market risks as a power producer and through transactions in wholesale electricity, natural gas and marketing contracts.

Management employs risk management contracts including physical forward and financial forward purchase-and-sale contracts. Management engages in risk management of power, capacity, coal, natural gas and, to a lesser extent, heating oil, gasoline and other commodity contracts to manage the risk associated with the energy business. As a result, AEP is subject to price risk. The amount of risk taken is determined by the Commercial Operations, Energy Supply and Finance groups in accordance with established risk management policies as approved by the Finance Committee of the Board of Directors. AEPSC's market risk oversight staff independently monitors risk policies, procedures and risk levels and provides members of the Regulated Risk Committee and the Energy Supply Risk Committee (Competitive Risk Committee) various reports regarding compliance with policies, limits and procedures. The Regulated Risk Committee consists of AEPSC's Chief Financial Officer, Chief Commercial Officer, Executive Vice President Utilities, Senior Vice President of Regulated Commercial Operations, Senior Vice President of Treasury and Risk and Chief Risk Officer. The Competitive Risk Committee consists of AEPSC's Chief Financial Officer, Chief Commercial Officer, Senior Vice President of Treasury and Risk, Senior Vice President of Competitive Commercial Operations and Chief Risk Officer. When commercial activities exceed predetermined limits, positions are modified to reduce the risk to be within the limits unless specifically approved by the respective committee.

The following table summarizes the reasons for changes in total MTM value as compared to December 31, 2022:

MTM Risk Management Contract Net Assets (Liabilities)
Nine Months Ended September 30, 2023

	Vertically Integrated Utilities	Transmission and Distribution Utilities	Generation & Marketing	Total
	(in millions)			
Total MTM Risk Management Contract Net Assets (Liabilities) as of December 31, 2022	\$ 134.7	\$ (40.0)	\$ 360.5	\$ 455.2
(Gain)/Loss from Contracts Realized/Settled During the Period and Entered in a Prior Period	(136.6)	1.1	(150.6)	(286.1)
Fair Value of New Contracts at Inception When Entered During the Period (a)	—	—	1.5	1.5
Changes in Fair Value Due to Market Fluctuations During the Period (b)	2.1	—	(45.9)	(43.8)
Changes in Fair Value Allocated to Regulated Jurisdictions (c)	111.0	(11.9)	—	99.1
Total MTM Risk Management Contract Net Assets (Liabilities) as of September 30, 2023	<u>\$ 111.2</u>	<u>\$ (50.8)</u>	<u>\$ 165.5</u>	225.9
Commodity Cash Flow Hedge Contracts				127.8
Fair Value Hedge Contracts				(138.1)
Collateral Deposits				(92.6)
Total MTM Derivative Contract Net Assets as of September 30, 2023				<u>\$ 123.0</u>

- (a) Reflects fair value on primarily long-term structured contracts which are typically with customers that seek fixed pricing to limit their risk against fluctuating energy prices. The contract prices are valued against market curves associated with the delivery location and delivery term. A significant portion of the total volumetric position has been economically hedged.
- (b) Market fluctuations are attributable to various factors such as supply/demand, weather, etc.
- (c) Relates to the net gains (losses) of those contracts that are not reflected on the statements of income. These net gains (losses) are recorded as regulatory liabilities/assets or accounts payable on the balance sheet.

See Note 9 – Derivatives and Hedging and Note 10 – Fair Value Measurements for additional information related to risk management contracts. The following tables and discussion provide information on credit risk and market volatility risk.

Credit Risk

Credit risk is mitigated in wholesale marketing and trading activities by assessing the creditworthiness of potential counterparties before entering into transactions with them and continuing to evaluate their creditworthiness on an ongoing basis. Management uses credit agency ratings and current market-based qualitative and quantitative data as well as financial statements to assess the financial health of counterparties on an ongoing basis.

AEP has risk management contracts (includes non-derivative contracts) with numerous counterparties. Since open risk management contracts are valued based on changes in market prices of the related commodities, exposures change daily. As of September 30, 2023, credit exposure net of collateral to sub investment grade counterparties was approximately 5.25%, expressed in terms of net MTM assets, net receivables and the net open positions for contracts not subject to MTM (representing economic risk even though there may not be risk of accounting loss).

As of September 30, 2023, the following table approximates AEP's counterparty credit quality and exposure based on netting across commodities, instruments and legal entities where applicable:

Counterparty Credit Quality	Exposure Before Credit Collateral	Credit Collateral	Net Exposure	Number of Counterparties >10% of Net Exposure	Net Exposure of Counterparties >10%
(in millions, except number of counterparties)					
Investment Grade	\$ 411.1	\$ 83.6	\$ 327.5	2	\$ 123.3
Split Rating	20.6	—	20.6	1	20.6
No External Ratings:					
Internal Investment Grade	53.3	23.1	30.2	2	15.3
Internal Noninvestment Grade	46.7	25.7	21.0	1	17.5
Total as of September 30, 2023	<u>\$ 531.7</u>	<u>\$ 132.4</u>	<u>\$ 399.3</u>		

All exposure in the table above relates to AEPSC and AEPEP as AEPSC is agent for and transacts on behalf of certain AEP subsidiaries, including the Registrant Subsidiaries and AEPEP is agent for and transacts on behalf of other AEP subsidiaries.

In addition, AEP is exposed to credit risk related to participation in RTOs. For each of the RTOs in which AEP participates, this risk is generally determined based on the proportionate share of member gross activity over a specified period of time.

Value at Risk (VaR) Associated with Risk Management Contracts

Management uses a risk measurement model, which calculates VaR, to measure AEP's commodity price risk in the risk management portfolio. The VaR is based on the variance-covariance method using historical prices to estimate volatilities and correlations and assumes a 95% confidence level and a one-day holding period. Based on this VaR analysis, as of September 30, 2023, a near term typical change in commodity prices is not expected to materially impact net income, cash flows or financial condition.

Management calculates the VaR for both a trading and non-trading portfolio. The trading portfolio consists primarily of contracts related to energy trading and marketing activities. The non-trading portfolio consists primarily of economic hedges of generation and retail supply activities.

The following tables show the end, high, average and low market risk as measured by VaR for the periods indicated:

**VaR Model
Trading Portfolio**

Nine Months Ended September 30, 2023				Twelve Months Ended December 31, 2022			
End	High	Average	Low	End	High	Average	Low
(in millions)				(in millions)			
\$ 0.1	\$ 0.9	\$ 0.2	\$ 0.1	\$ 0.5	\$ 4.5	\$ 0.7	\$ 0.1

**VaR Model
Non-Trading Portfolio**

Nine Months Ended September 30, 2023				Twelve Months Ended December 31, 2022			
End	High	Average	Low	End	High	Average	Low
(in millions)				(in millions)			
\$ 13.1	\$ 32.7	\$ 16.4	\$ 6.1	\$ 17.7	\$ 76.9	\$ 24.7	\$ 6.7

Management back-tests VaR results against performance due to actual price movements. Based on the assumed 95% confidence interval, the performance due to actual price movements would be expected to exceed the VaR at least once every 20 trading days.

As the VaR calculation captures recent price movements, management also performs regular stress testing of the trading portfolio to understand AEP's exposure to extreme price movements. A historical-based method is employed whereby the current trading portfolio is subjected to actual, observed price movements from the last several years in order to ascertain which historical price movements translated into the largest potential MTM loss. Management then researches the underlying positions, price movements and market events that created the most significant exposure and reports the findings to the Risk Executive Committee, Regulated Risk Committee or Competitive Risk Committee as appropriate.

Interest Rate Risk

AEP is exposed to interest rate market fluctuations in the normal course of business operations. Prior to 2022, interest rates remained at low levels and the Federal Reserve maintained the federal funds target range at 0.0% to 0.25% for much of 2021. However, during 2022, the Federal Reserve approved several rate increases for a cumulative total of a 4.25% increase. In the first nine months of 2023, the Federal Reserve approved another four rate increases for a cumulative total of a 1.0% rate increase and further increases in interest rates may be authorized during 2023. AEP has outstanding short and long-term debt which is subject to variable rates. AEP manages interest rate risk by limiting variable-rate exposures to a percentage of total debt, by entering into interest rate derivative instruments and by monitoring the effects of market changes in interest rates. For the nine months ended September 30, 2023 and 2022, a 100 basis point change in the benchmark rate on AEP's variable rate debt would impact pretax interest expense annually by \$45 million and \$47 million, respectively.

MANAGEMENT'S NARRATIVE DISCUSSION AND ANALYSIS OF RESULTS OF OPERATIONS

RESULTS OF OPERATIONS

KWh Sales/Degree Days

	Summary of KWh Energy Sales			
	Three Months Ended September 30,		Nine Months Ended September 30,	
	2023	2022	2023	2022
	(in millions of KWhs)			
Retail:				
Residential	4,681	4,079	10,295	10,453
Commercial	4,021	3,243	10,208	8,482
Industrial	3,065	2,993	9,344	8,443
Miscellaneous	196	185	487	499
Total Retail	11,963	10,500	30,334	27,877

Heating degree days and cooling degree days are metrics commonly used in the utility industry as a measure of the impact of weather on revenues.

	Summary of Heating and Cooling Degree Days			
	Three Months Ended September 30,		Nine Months Ended September 30,	
	2023	2022	2023	2022
	(in degree days)			
Actual – Heating (a)	—	—	143	278
Normal – Heating (b)	—	—	197	193
Actual – Cooling (c)	1,719	1,478	2,945	2,701
Normal – Cooling (b)	1,387	1,382	2,454	2,433

- (a) Heating degree days are calculated on a 55 degree temperature base.
- (b) Normal Heating/Cooling represents the thirty-year average of degree days.
- (c) Cooling degree days are calculated on a 70 degree temperature base.

AEP Texas Inc. and Subsidiaries
Reconciliation of 2022 to 2023 Net Income
(in millions)

	Three Months Ended September 30,	Nine Months Ended September 30,
2022 Net Income	\$ 93.6	\$ 253.2
Changes in Revenues:		
Retail Revenues	32.7	(2.9)
Transmission Revenues	13.7	46.3
Other Revenues	(0.7)	(2.5)
Total Change in Revenues	45.7	40.9
Changes in Expenses and Other:		
Other Operation and Maintenance	7.1	30.8
Depreciation and Amortization	(7.9)	(8.8)
Taxes Other Than Income Taxes	(3.1)	(11.1)
Interest Income	(0.8)	(1.2)
Allowance for Equity Funds Used During Construction	2.6	6.2
Non-Service Cost Components of Net Periodic Benefit Cost	0.6	1.9
Interest Expense	(4.5)	(19.9)
Total Change in Expenses and Other	(6.0)	(2.1)
Income Tax Expense	(7.8)	(9.8)
2023 Net Income	\$ 125.5	\$ 282.2

Third Quarter of 2023 Compared to Third Quarter of 2022

The major components of the increase in revenues were as follows:

- **Retail Revenues** increased \$33 million primarily due to the following:
 - A \$15 million increase in weather-normalized revenues primarily in the residential and commercial classes.
 - A \$10 million increase in weather-related usage primarily due to a 16% increase in cooling degree days.
 - A \$7 million increase in revenue from rate riders. This increase was partially offset in other expense items below.
- **Transmission Revenues** increased \$14 million due to the following:
 - An \$8 million increase due to increased load.
 - A \$6 million increase in interim rates driven by increased transmission investments.

Expenses and Other and Income Tax Expense changed between years as follows:

- **Other Operation and Maintenance** expenses decreased \$7 million primarily due to employee-related expenses.
- **Depreciation and Amortization** expenses increased \$8 million primarily due to a higher depreciable base.
- **Interest Expense** increased \$5 million due to higher long term debt balances and interest rates.
- **Income Tax Expense** increased \$8 million primarily due to an increase in pretax book income.

Nine Months Ended September 30, 2023 Compared to Nine Months Ended September 30, 2022

The major components of the increase in revenues were as follows:

- **Retail Revenues** decreased \$3 million primarily due to the following:
 - A \$9 million decrease in weather-normalized revenues due to an unfavorable sales mix.This decrease was partially offset by:
 - A \$4 million increase in revenue from rate riders. This increase was partially offset in other expense items below.
- **Transmission Revenues** increased \$46 million due to the following:
 - A \$24 million increase in interim rates driven by increased transmission investment.
 - A \$22 million increase due to increased load.

Expenses and Other and Income Tax Expense changed between years as follows:

- **Other Operation and Maintenance** expenses decreased \$31 million primarily due to the following:
 - A \$30 million decrease due to legislation passed in Texas in May 2023 allowing employee financially based incentives to be recovered.
 - A \$12 million decrease in employee-related expenses.
 - A \$5 million decrease in transmission expenses. This decrease was offset in Retail Revenues above.

These decreases were partially offset by:

- A \$14 million increase in distribution-related expenses.
- **Depreciation and Amortization** expenses increased \$9 million due to the following:
 - A \$20 million increase due to a higher depreciable base.

This increase was partially offset by:

- An \$11 million decrease in recoverable advanced metering system depreciable expenses.
- **Taxes Other Than Income Taxes** increased \$11 million primarily due to higher property taxes driven by increased investment.
- **Allowance for Equity Funds Used During Construction** increased \$6 million due to a higher AFUDC base.
- **Interest Expense** increased \$20 million primarily due to the following:
 - A \$32 million increase due to higher debt balances and interest rates.This increase was partially offset by:
 - A \$10 million decrease due to an increase in AFUDC base.
- **Income Tax Expense** increased \$10 million primarily due to an increase in pretax book income.

RESULTS OF OPERATIONS

Summary of Investment in Transmission Assets for AEPTCo

	As of September 30,	
	2023	2022
	(in millions)	
Plant In Service	\$ 13,638.0	\$ 12,223.9
Construction Work in Progress	1,902.1	1,652.2
Accumulated Depreciation and Amortization	1,221.2	966.5
Total Transmission Property, Net	\$ 14,318.9	\$ 12,909.6

AEP Transmission Company, LLC and Subsidiaries
Reconciliation of 2022 to 2023 Net Income
(in millions)

	Three Months Ended September 30,	Nine Months Ended September 30,
2022 Net Income	\$ 152.7	\$ 426.6
Changes in Transmission Revenues:		
Transmission Revenues	44.2	165.9
Total Change in Transmission Revenues	44.2	165.9
Changes in Expenses and Other:		
Other Operation and Maintenance	7.0	4.6
Depreciation and Amortization	(12.2)	(35.0)
Taxes Other Than Income Taxes	(5.1)	(13.6)
Interest Income	0.9	4.7
Allowance for Equity Funds Used During Construction	2.4	11.0
Interest Expense	(8.9)	(27.8)
Total Change in Expenses and Other	(15.9)	(56.1)
Income Tax Expense	(1.8)	(18.8)
2023 Net Income	\$ 179.2	\$ 517.6

Third Quarter of 2023 Compared to Third Quarter of 2022

The major component of the increase in transmission revenues, which consists of wholesale sales to affiliates and nonaffiliates, was as follows:

- **Transmission Revenues** increased \$44 million primarily due to continued investment in transmission assets.

Expenses and Other changed between years as follows:

- **Other Operation and Maintenance** expenses decreased \$7 million primarily due to the following:
 - A \$5 million decrease due to cancelled capital projects in 2022.
 - A \$3 million decrease in employee-related expenses.

- **Depreciation and Amortization** expenses increased \$12 million primarily due to a higher depreciable base.
- **Taxes Other Than Income Taxes** increased \$5 million primarily due to higher property taxes driven by increased transmission investment.
- **Interest Expense** increased \$9 million due to higher long-term debt balances and interest rates.

Nine Months Ended September 30, 2023 Compared to Nine Months Ended September 30, 2022

The major components of the increase in transmission revenues, which consists of wholesale sales to affiliates and nonaffiliates, were as follows:

- **Transmission Revenues** increased \$166 million primarily due to the following:
 - A \$127 million increase due to continued investment in transmission assets.
 - A \$33 million increase due to affiliated transmission formula rate true-up activity. This increase was offset in Other Operation and Maintenance expenses across the other Registrant Subsidiaries.
 - A \$6 million increase due to nonaffiliated transmission formula rate true-up activity.

Expenses and Other and Income Tax Expense changed between years as follows:

- **Depreciation and Amortization** expenses increased \$35 million primarily due to a higher depreciable base.
- **Taxes Other Than Income Taxes** increased \$14 million primarily due to higher property taxes driven by increased transmission investment.
- **Allowance for Equity Funds Used During Construction** increased \$11 million primarily due to higher CWIP and AFUDC equity rates.
- **Interest Expense** increased \$28 million primarily due to higher long-term debt balances and interest rates.
- **Income Tax Expense** increased \$19 million primarily due to an increase in pretax book income.

APPALACHIAN POWER COMPANY AND SUBSIDIARIES

MANAGEMENT'S NARRATIVE DISCUSSION AND ANALYSIS OF RESULTS OF OPERATIONS

RESULTS OF OPERATIONS

KWh Sales/Degree Days

	Summary of KWh Energy Sales			
	Three Months Ended September 30,		Nine Months Ended September 30,	
	2023	2022	2023	2022
	(in millions of KWhs)			
Retail:				
Residential	2,481	2,553	7,527	8,308
Commercial	1,537	1,566	4,286	4,545
Industrial	2,229	2,211	6,473	6,655
Miscellaneous	205	206	595	624
Total Retail	6,452	6,536	18,881	20,132
Wholesale	691	644	1,694	1,269
Total KWhs	7,143	7,180	20,575	21,401

Heating degree days and cooling degree days are metrics commonly used in the utility industry as a measure of the impact of weather on revenues.

	Summary of Heating and Cooling Degree Days			
	Three Months Ended September 30,		Nine Months Ended September 30,	
	2023	2022	2023	2022
	(in degree days)			
Actual – Heating (a)	—	4	928	1,372
Normal – Heating (b)	2	2	1,410	1,410
Actual – Cooling (c)	873	876	1,106	1,299
Normal – Cooling (b)	837	832	1,222	1,210

- (a) Heating degree days are calculated on a 55 degree temperature base.
- (b) Normal Heating/Cooling represents the thirty-year average of degree days.
- (c) Cooling degree days are calculated on a 65 degree temperature base.

Income Tax Expense	(16.3)	(34.6)
2023 Net Income	\$ 91.9	\$ 247.3

Third Quarter of 2023 Compared to Third Quarter of 2022

The major components of the increase in Gross Margin, defined as revenues less the related direct cost of fuel, including consumption of chemicals and emissions allowances, and purchased electricity were as follows:

- **Retail Margins** increased \$47 million primarily due to the following:
 - A \$19 million increase due to rider revenues in Virginia and West Virginia. This increase was partially offset in other expense items below.
 - A \$12 million increase in deferred fuel primarily related to the timing of recoverable PJM expenses. This increase was offset in Other Operation and Maintenance expenses below.
 - An \$8 million increase due to lower customer refunds related to Tax Reform. This increase was offset in Income Tax Expense below.
 - A \$7 million increase due to a base rate increase in Virginia implemented in October 2022 following the Virginia Supreme Court remand. This increase was partially offset in Other Operations and Maintenance expenses below.
 - A \$4 million increase due to the prior year amortization of costs recovered through Virginia's environmental rate adjustment clause. This increase was offset in other expense items below.

Expenses and Other and Income Tax Expense changed between years as follows:

- **Other Operation and Maintenance** expenses increased \$11 million primarily due to the following:
 - A \$7 million increase due to the amortization of the regulatory asset in accordance with the August 2022 Virginia Supreme Court opinion related to under-earnings during the 2017-2019 Triennial Review. This increase was offset in Retail Margins above.
 - A \$7 million increase in transmission expenses primarily due to an increase in recoverable PJM expenses. This increase was partially offset in Retail Margins above.
 - A \$2 million increase in distribution expenses primarily due to storm restoration costs.
 - A \$2 million increase in renewable energy credits and compliance expenses associated with the Virginia Clean Economy Act. This increase was offset in Retail Margins above.These increases were partially offset by:
 - A \$9 million decrease due to an increase in proceeds received for insurance policy settlements.
- **Asset Impairments and Other Related Charges - Coal Fired Generation** decreased \$25 million due to the prior year write-off of a regulatory asset in accordance with the August 2022 Virginia Supreme Court opinion related to the 2017-2019 Triennial Review.
- **Establishment of 2017-2019 Virginia Triennial Review Regulatory Asset** decreased \$37 million due to the prior year establishment of a regulatory asset in accordance with the August 2022 Virginia Supreme Court opinion and resulting under-earning during the 2017-2019 Triennial Review.
- **Interest Expense** increased \$7 million primarily due to higher long-term debt balances and interest rates.
- **Income Tax Expense** increased \$16 million primarily due to the following:
 - A \$9 million increase in state taxes.
 - A \$3 million increase due to an increase in pretax book income.
 - A \$2 million increase due to a decrease in amortization of Excess ADIT.

Nine Months Ended September 30, 2023 Compared to Nine Months Ended September 30, 2022

The major components of the increase in Gross Margin, defined as revenues less the related direct cost of fuel, including consumption of chemicals and emissions allowances, and purchased electricity were as follows:

- **Retail Margins** increased \$80 million primarily due to the following:
 - A \$44 million increase due to rider revenues in Virginia and West Virginia. This increase was partially offset in other expense items below.
 - A \$25 million increase due to lower customer refunds related to Tax Reform. This increase was offset in Income Tax Expense below.
 - A \$24 million increase in deferred fuel primarily related to the timing of recoverable PJM expenses. This increase was partially offset in Other Operation and Maintenance expenses below.
 - A \$19 million increase due to a base rate increase in Virginia implemented in October 2022 following the Virginia Supreme Court remand. This increase was partially offset in Other Operation and Maintenance expenses below.
 - A \$13 million increase due to the prior year amortization of costs recovered through Virginia's environmental rate adjustment clause. This increase was offset in other expense items below.
 - An \$8 million increase in weather-normalized margins primarily driven by increases in the residential class.

These increases were partially offset by:

- A \$63 million decrease in weather-related usage primarily driven by a 32% decrease in heating degree days and a 15% decrease in cooling degree days.
- **Transmission Revenues** increased \$7 million primarily due to increased transmission investment.
- **Other Revenues** decreased \$5 million primarily due to pole attachment revenue.

Expenses and Other and Income Tax Expense changed between years as follows:

- **Other Operation and Maintenance** expenses increased \$64 million primarily due to the following:
 - A \$21 million increase due to the amortization of the regulatory asset in accordance with the August 2022 Virginia Supreme Court opinion related to under-earnings during the 2017-2019 Triennial Review. This increase was offset in Retail Margins above.
 - A \$17 million increase in distribution expenses primarily due to storm restoration costs.
 - A \$14 million increase due to gains from the sale of land in 2022.
 - A \$9 million increase in transmission expenses primarily due to the following:
 - A \$5 million increase in transmission formula rate true-up activity. This increase was partially offset in Retail Margins above.
 - A \$4 million increase in vegetation management expenses.
 - An \$8 million increase in accounts receivable factoring expenses as a result of increased interest rates.
 - A \$6 million increase in renewable energy credits and compliance expenses associated with the Virginia Clean Economy Act. This increase was offset in Retail Margins above.

These increases were partially offset by:

- An \$11 million decrease in employee-related expenses.
- A \$3 million decrease due to an increase in proceeds received for insurance policy settlements.
- **Asset Impairments and Other Related Charges - Coal Fired Generation** decreased \$25 million due to a prior year write-off of a regulatory asset in accordance with the August 2022 Virginia Supreme Court opinion related to the 2017-2019 Triennial Review.
- **Establishment of 2017-2019 Virginia Triennial Review Regulatory Asset** decreased \$37 million due to a prior year establishment of a regulatory asset in accordance with the August 2022 Virginia Supreme Court opinion and resulting under-earning during the 2017-2019 Triennial Review.
- **Depreciation and Amortization** expenses decreased \$6 million primarily due to the following:
 - A \$21 million decrease due to the implementation of updated Virginia depreciation rates in 2023.This decrease was partially offset by:
 - A \$16 million increase due to a higher depreciable base.
- **Taxes Other Than Income Taxes** expenses increased \$6 million due to an increase in Virginia state minimum taxes primarily due to an increased projected minimum tax liability.
- **Interest Expense** increased \$30 million primarily due to higher long-term debt balances and interest rates.
- **Income Tax Expense** increased \$35 million primarily due to the following:
 - A \$19 million decrease in amortization of Excess ADIT. This decrease was partially offset in Retail Margins above.
 - An \$11 million increase due to unfavorable discrete adjustments in 2023.
 - A \$10 million increase in state taxes.

These increases were partially offset by:

- A \$7 million decrease due to an increase in flow through depreciation expense.

MANAGEMENT'S NARRATIVE DISCUSSION AND ANALYSIS OF RESULTS OF OPERATIONS

RESULTS OF OPERATIONS

KWh Sales/Degree Days

Summary of KWh Energy Sales

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2023	2022	2023	2022
	(in millions of KWhs)			
Retail:				
Residential	1,421	1,532	3,998	4,320
Commercial	1,360	1,326	3,756	3,610
Industrial	1,876	1,926	5,501	5,638
Miscellaneous	12	12	39	39
Total Retail	4,669	4,796	13,294	13,607
Wholesale	1,246	1,707	4,210	4,892
Total KWhs	5,915	6,503	17,504	18,499

Heating degree days and cooling degree days are metrics commonly used in the utility industry as a measure of the impact of weather on revenues.

Summary of Heating and Cooling Degree Days

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2023	2022	2023	2022
	(in degree days)			
Actual – Heating (a)	—	17	1,914	2,525
Normal – Heating (b)	7	8	2,430	2,421
Actual – Cooling (c)	516	590	722	934
Normal – Cooling (b)	588	580	857	842

- (a) Heating degree days are calculated on a 55 degree temperature base.
- (b) Normal Heating/Cooling represents the thirty-year average of degree days.
- (c) Cooling degree days are calculated on a 65 degree temperature base.

Indiana Michigan Power Company and Subsidiaries
Reconciliation of 2022 to 2023 Net Income
(in millions)

	Three Months Ended September 30,	Nine Months Ended September 30,
2022 Net Income	\$ 94.1	\$ 250.8
Changes in Gross Margin:		
Retail Margins	5.4	55.6
Margins from Off-system Sales	(14.7)	8.9
Transmission Revenues	(1.3)	(13.9)
Other Revenues	3.7	6.5
Total Change in Gross Margin	(6.9)	57.1
Changes in Expenses and Other:		
Other Operation and Maintenance	(7.9)	(63.1)
Depreciation and Amortization	14.9	47.3
Taxes Other Than Income Taxes	0.1	13.8
Other Income	2.1	0.7
Non-Service Cost Components of Net Periodic Benefit Cost	1.4	4.6
Interest Expense	(1.8)	(9.5)
Total Change in Expenses and Other	8.8	(6.2)
Income Tax Expense	(3.0)	(31.1)
2023 Net Income	\$ 93.0	\$ 270.6

Third Quarter of 2023 Compared to Third Quarter of 2022

The major components of the decrease in Gross Margin, defined as revenues less the related direct cost of fuel, including consumption of chemicals and emissions allowances, and purchased electricity were as follows:

- **Retail Margins** increased \$5 million primarily due to the following:
 - A \$14 million increase in weather-normalized retail margins in the commercial and industrial classes.
 - An \$8 million increase due to rider revenues. This increase was partially offset in other expense items below.

These increases were partially offset by:

- A \$10 million decrease in deferred fuel primarily due to the timing of recoverable PJM expenses. This decrease was offset in other expense items below.
- A \$7 million decrease in weather-related usage primarily due to a 13% decrease in cooling degree days.
- **Margins from Off-system Sales** decreased \$15 million primarily due to Rockport Plant, Unit 2 merchant operations activity.

Expenses and Other changed between years as follows:

- **Other Operation and Maintenance** expenses increased \$8 million primarily due to the following:
 - A \$12 million increase in Demand Side Management expenses. This increase was offset in Retail Margins above.

This increase was partially offset by:

- A \$4 million decrease in employee-related expenses.

- **Depreciation and Amortization** expenses decreased \$15 million primarily due to the expiration of the Rockport Plant, Unit 2 lease in December 2022, partially offset by an increase in depreciation expense due to the acquisition of Rockport Plant, Unit 2 at the end of the lease.

Nine Months Ended September 30, 2023 Compared to Nine Months Ended September 30, 2022

The major components of the increase in Gross Margin, defined as revenues less the related direct cost of fuel, including consumption of chemicals and emissions allowances, and purchased electricity were as follows:

- **Retail Margins** increased \$56 million primarily due to the following:
 - A \$39 million increase in weather-normalized margins in all retail classes, partially offset by a decrease in the wholesale class.
 - A \$25 million increase due to a base rate revenue increase in Indiana and rider increases. This increase was partially offset in other expense items below.
 - A \$21 million increase due to a reduction in provision for refund, partially offset by lower wholesale true-ups.

These increases were partially offset by:

- A \$39 million decrease in weather-related usage primarily due to a 23% decrease in cooling degree days and a 24% decrease in heating degree days.
- **Margins from Off-system Sales** increased \$9 million primarily due to Rockport Plant, Unit 2 merchant operations activity and estimated PJM performance incentives for Rockport Plant, Unit 2 merchant operations related to winter storm Elliott in December 2022.
- **Transmission Revenues** decreased \$14 million primarily due to transmission formula rate true-up activity.
- **Other Revenues** increased \$7 million primarily due to an increase in barging revenues by River Transportation Division (RTD). This increase in barging revenues was partially offset in Other Operation and Maintenance expenses below.

Expenses and Other and Income Tax Expense changed between years as follows:

- **Other Operation and Maintenance** expenses increased \$63 million primarily due to the following:
 - A \$29 million increase in Demand Side Management expenses. This increase was offset in Retail Margins above.
 - A \$10 million increase in Non-Utility operation expenses due to an increase in RTD expenses and merchant operation expenses. The RTD expenses are offset in Other Revenues above.
 - A \$10 million increase in nuclear expenses at Cook Plant primarily due to refueling outage expenses.
 - A \$10 million increase in transmission expenses primarily due to a \$7 million increase in transmission formula rate true-up activity and a \$3 million increase in recoverable PJM expenses. The recoverable PJM expenses were offset in Gross Margin above.
 - A \$9 million increase due to a decreased Nuclear Electric Insurance Limited distribution in 2023.

These increases were partially offset by:

- An \$11 million decrease in employee-related expenses.
- **Depreciation and Amortization** expenses decreased \$47 million primarily due to the expiration of the Rockport Plant, Unit 2 lease in December 2022, partially offset by an increase in depreciation expense due to the acquisition of Rockport Plant, Unit 2 at the end of the lease and an increase in depreciable base.
- **Taxes Other Than Income Taxes** decreased \$14 million primarily due to the repeal of the Indiana Utility Receipts Tax in July 2022. This decrease was partially offset in Retail Margins above.
- **Interest Expense** increased \$10 million primarily due to higher long-term debt balances and interest rates.
- **Income Tax Expense** increased \$31 million primarily due to the following:
 - A \$17 million increase due to a decrease in amortization of Excess ADIT.
 - An \$11 million increase due to an increase in pretax book income.
 - A \$4 million increase due to an increase in state taxes.

(a) Represents energy delivered to distribution customers.

(b) Primarily Ohio's contractually obligated purchases of OVEC power sold to PJM.

Heating degree days and cooling degree days are metrics commonly used in the utility industry as a measure of the impact of weather on revenues.

	Summary of Heating and Cooling Degree Days			
	Three Months Ended September 30,		Nine Months Ended September 30,	
	2023	2022	2023	2022
	(in degree days)			
Actual – Heating (a)	—	8	1,521	2,078
Normal – Heating (b)	4	5	2,080	2,077
Actual – Cooling (c)	625	755	809	1,115
Normal – Cooling (b)	697	688	1,005	989

(a) Heating degree days are calculated on a 55 degree temperature base.

(b) Normal Heating/Cooling represents the thirty-year average of degree days.

(c) Cooling degree days are calculated on a 65 degree temperature base.

Ohio Power Company and Subsidiaries
Reconciliation of 2022 to 2023 Net Income
(in millions)

	Three Months Ended September 30,	Nine Months Ended September 30,
2022 Net Income	\$ 71.9	\$ 229.9
Changes in Gross Margin:		
Retail Margins	66.8	101.0
Margins from Off-system Sales	(5.5)	35.9
Transmission Revenues	2.9	4.0
Other Revenues	4.8	2.4
Total Change in Gross Margin	69.0	143.3
Changes in Expenses and Other:		
Other Operation and Maintenance	(44.0)	(128.9)
Depreciation and Amortization	(10.6)	(7.8)
Taxes Other Than Income Taxes	(1.5)	(3.0)
Other Income	(0.1)	(0.6)
Allowance for Equity Funds Used During Construction	1.7	1.0
Non-Service Cost Components of Net Periodic Benefit Cost	0.9	2.9
Interest Expense	(4.1)	(8.1)
Total Change in Expenses and Other	(57.7)	(144.5)
Income Tax Expense	(2.7)	(1.7)
Equity Earnings of Unconsolidated Subsidiaries	—	(0.8)
2023 Net Income	\$ 80.5	\$ 226.2

Third Quarter of 2023 Compared to Third Quarter of 2022

The major components of the increase in Gross Margin, defined as revenues less the related direct cost of purchased electricity were as follows:

- **Retail Margins** increased \$67 million primarily due to the following:
 - A \$43 million increase in revenue from rate riders. This increase was partially offset in Margins from Off-system Sales and other expense items below.
 - A \$23 million net increase in Basic Transmission Cost Rider revenues and recoverable PJM expenses. This increase was partially offset in Other Operation and Maintenance expenses below.
 - A \$9 million increase in weather-normalized margins primarily in the industrial and commercial classes.
- These increases were partially offset by:
 - A \$9 million decrease in weather-related usage due to a 17% decrease in cooling degree days.
- **Margins from Off-system Sales** decreased \$6 million due to the following:
 - A \$32 million decrease in Off-system sales at OVEC due to lower market prices and volume. This decrease was offset in Retail Margins above.

This decrease was partially offset by:

- A \$26 million increase in deferrals of OVEC costs. This increase was offset in Retail Margins above.

Expenses and Other changed between years as follows:

- **Other Operation and Maintenance** expenses increased \$44 million primarily due to the following:
 - A \$20 million increase related to an energy assistance program for qualified Ohio customers. This increase was offset in Retail Margins above.
 - A \$19 million increase in transmission expenses primarily due to an increase in recoverable PJM expense. This increase was offset in Retail Margins above.
 - A \$7 million increase in distribution expenses primarily related to vegetation management. This increase was offset in Retail Margins above.
- **Depreciation and Amortization** expenses increased \$11 million primarily due to the following:
 - A \$17 million increase in depreciation expense primarily due to an increase in depreciable base. This increase was partially offset by:
 - A \$9 million decrease in recoverable DIR expense. This decrease was offset in Retail Margins above.

Nine Months Ended September 30, 2023 Compared to Nine Months Ended September 30, 2022

The major components of the increase in Gross Margin, defined as revenues less the related direct cost of purchased electricity were as follows:

- **Retail Margins** increased \$101 million primarily due to the following:
 - An \$86 million increase in revenue from rate riders. This increase was partially offset in Margins from Off-system Sales and other expense items below.
 - A \$57 million net increase in Basic Transmission Cost Rider revenues and recoverable PJM expenses. This increase was partially offset in Other Operation and Maintenance expenses below.These increases were partially offset by:
 - A \$47 million decrease in weather-related usage due to a 27% decrease in heating degree days and a 28% decrease in cooling degree days.
- **Margins from Off-system Sales** increased \$36 million due to the following:
 - A \$111 million increase in deferrals of OVEC costs. This increase was offset in Retail Margins above.This increase was partially offset by:
 - A \$75 million decrease in Off-system sales at OVEC due to lower market prices and volume. This decrease was offset in Retail Margins above.

Expenses and Other changed between years as follows:

- **Other Operation and Maintenance** expenses increased \$129 million primarily due to the following:
 - A \$68 million increase related to an energy assistance program for qualified Ohio customers. This increase was offset in Retail Margins above.
 - A \$41 million increase in transmission expenses primarily due to:
 - A \$33 million increase in recoverable PJM expenses. This increase was offset in Retail Margins above.
 - An \$11 million increase in transmission formula rate true-up activity.
 - A \$15 million increase in distribution expenses related to vegetation management. This increase was offset in Retail Margins above.These increases were partially offset by:
 - A \$12 million decrease in employee-related expenses.
- **Depreciation and Amortization** expenses increased \$8 million primarily due to the following:
 - A \$30 million increase in depreciation expense primarily due to an increase in depreciable base.
 - A \$5 million increase in smart grid depreciable expenses. This increase was offset in Retail Margins above.These increases were partially offset by:
 - A \$30 million decrease in recoverable DIR expense. This decrease was offset in Retail Margins above.
- **Interest Expense** increased \$8 million primarily due to the following:
 - A \$16 million increase primarily due to higher debt balances and interest rates. This increase was partially offset by:
 - A \$6 million decrease due to an increase in AFUDC base.

Interest Expense	(3.1)	(14.9)
Total Change in Expenses and Other	11.5	(13.6)
Income Tax Benefit	9.5	15.9
2023 Net Income	\$ 139.4	\$ 188.1

(a) Includes firm wholesale sales to municipals and cooperatives.

Third Quarter of 2023 Compared to Third Quarter of 2022

The major components of the increase in Gross Margin, defined as revenues less the related direct cost of fuel, including consumption of chemicals and emissions allowances, and purchased electricity were as follows:

- **Retail Margins** increased \$10 million primarily due to the following:
 - A \$28 million increase in base rate and rider revenues. This increase was partially offset in other expense items below.
This increase was partially offset by:
 - A \$10 million decrease due to an increase in PTC benefits provided to customers. This decrease was offset in Income Tax Benefit below.
 - An \$8 million decrease in weather-related usage primarily due to a 7% decrease in cooling degree days.

Expenses and Other and Income Tax Benefit changed between years as follows:

- **Other Operation and Maintenance** expenses decreased \$18 million primarily due to the following:
 - A \$9 million decrease in transmission expenses primarily due to a \$5 million decrease in recoverable SPP transmission expense and \$4 million decrease in transmission formula rate true-up activity. The decrease in recoverable SPP transmission expense was offset in Retail Margins above.
 - A \$5 million decrease in distribution expenses primarily related to vegetation management.
 - A \$5 million decrease in employee-related expenses.

- **Income Tax Benefit** increased \$10 million primarily due to a \$13 million increase in PTCs, partially offset by a \$5 million decrease due to an increase in pretax book income. The increase in PTCs was partially offset in Retail Margins above.

Nine Months Ended September 30, 2023 Compared to Nine Months Ended September 30, 2022

The major components of the increase in Gross Margin, defined as revenues less the related direct cost of fuel, including consumption of chemicals and emissions allowances, and purchased electricity were as follows:

- **Retail Margins** increased \$27 million primarily due to the following:
 - A \$47 million increase in base rate and rider revenues. This increase was partially offset in other expense items below.
 - An \$11 million increase in fuel revenue due to increased carrying charges on fuel under-recovered balances.
 These increases were partially offset by:
 - A \$19 million decrease in weather-related usage primarily due to an 11% decrease in cooling degree days and a 22% decrease in heating degree days.
 - A \$14 million decrease due to an increase in PTC benefits provided to customers. This decrease was offset in Income Tax Benefit below.

Expenses and Other and Income Tax Benefit changed between years as follows:

- **Other Operation and Maintenance** expenses decreased \$23 million primarily due to the following:
 - A \$14 million decrease in transmission expenses due to a \$21 million decrease in recoverable SPP transmission expense and \$4 million decrease in transmission formula rate true-up activity, offset by an \$11 million increase due to a change in rider recovery. The decrease in recoverable SPP transmission expense was offset in Retail Margins above.
 - An \$8 million decrease in employee-related expenses.
 - A \$6 million decrease due to the capitalization of previously expensed renewable generation pre-construction charges.
- **Depreciation and Amortization** expenses increased \$15 million primarily due to a higher depreciable base.
- **Taxes Other Than Income Taxes** increased \$6 million primarily due to increased property taxes driven by the investment in the NCWF and a new infrastructure fee implemented by the City of Tulsa in March 2022. This increase was partially offset in Retail Margins above.
- **Interest Expense** increased \$15 million primarily due to higher long-term debt balances and higher interest rates.
- **Income Tax Benefit** increased \$16 million primarily due to a \$19 million increase in PTCs, partially offset by a \$3 million decrease due to an increase in pretax book income. The increase in PTCs was partially offset in Retail Margins above.

SOUTHWESTERN ELECTRIC POWER COMPANY CONSOLIDATED

MANAGEMENT'S NARRATIVE DISCUSSION AND ANALYSIS OF RESULTS OF OPERATIONS

RESULTS OF OPERATIONS

KWh Sales/Degree Days

	Summary of KWh Energy Sales			
	Three Months Ended September 30,		Nine Months Ended September 30,	
	2023	2022	2023	2022
	(in millions of KWhs)			
Retail:				
Residential	2,180	2,019	4,902	5,157
Commercial	1,689	1,631	4,269	4,385
Industrial	1,313	1,367	3,876	3,876
Miscellaneous	17	17	53	55
Total Retail	5,199	5,034	13,100	13,473
Wholesale	1,668	1,744	4,226	5,312
Total KWhs	6,867	6,778	17,326	18,785

Heating degree days and cooling degree days are metrics commonly used in the utility industry as a measure of the impact of weather on revenues.

	Summary of Heating and Cooling Degree Days			
	Three Months Ended September 30,		Nine Months Ended September 30,	
	2023	2022	2023	2022
	(in degree days)			
Actual – Heating (a)	—	—	413	704
Normal – Heating (b)	—	—	730	726
Actual – Cooling (c)	1,715	1,627	2,673	2,642
Normal – Cooling (b)	1,435	1,420	2,223	2,195

- (a) Heating degree days are calculated on a 55 degree temperature base.
- (b) Normal Heating/Cooling represents the thirty-year average of degree days.
- (c) Cooling degree days are calculated on a 65 degree temperature base.

Reconciliation of 2022 to 2023
Earnings Attributable to SWEP Co Common Shareholder
(in millions)

	Three Months Ended September 30,	Nine Months Ended September 30,
2022 Earnings Attributable to Common Shareholder	\$ 139.4	\$ 260.2
Changes in Gross Margin:		
Retail Margins (a)	24.2	23.0
Margins from Off-system Sales	(8.2)	(10.5)
Transmission Revenues	(1.9)	3.1
Other Revenues	(1.3)	(1.5)
Total Change in Gross Margin	12.8	14.1
Changes in Expenses and Other:		
Other Operation and Maintenance	11.7	14.1
Depreciation and Amortization	(4.8)	(15.0)
Taxes Other Than Income Taxes	(2.0)	(9.5)
Interest Income	1.4	0.9
Allowance for Equity Funds Used During Construction	3.3	3.9
Non-Service Cost Components of Net Periodic Benefit Cost	0.2	0.8
Interest Expense	(6.9)	(5.2)
Total Change in Expenses and Other	2.9	(10.0)
Income Tax Benefit	3.9	14.7
Net Income Attributable to Noncontrolling Interest	(1.5)	0.1
2023 Earnings Attributable to Common Shareholder	\$ 157.5	\$ 279.1

(a) Includes firm wholesale sales to municipals and cooperatives.

Third Quarter of 2023 Compared to Third Quarter of 2022

The major components of the increase in Gross Margin, defined as revenues less the related direct cost of fuel, including consumption of chemicals and emissions allowances, and purchased electricity were as follows:

- **Retail Margins** increased \$24 million primarily due to the following:
 - A \$23 million increase due to a base rate revenue increase in Louisiana and rider increases in Texas and Louisiana retail jurisdictions. These increases were partially offset in other expense items below.
 - A \$5 million increase in weather-related usage primarily due to a 5% increase in cooling degree days.
These increases were partially offset by:
 - An \$8 million decrease due to an increase in PTC benefits provided to customers. This decrease was offset in Income Tax Benefit.
- **Margins from Off-System Sales** decreased \$8 million primarily due to reduced Turk Plant merchant sales.

Expenses and Other changed between years as follows:

- **Other Operation and Maintenance** expenses decreased \$12 million primarily due to the following:
 - A \$9 million decrease in transmission expenses primarily due to a \$4 million decrease in recoverable SPP transmission expenses and a \$4 million decrease in transmission formula rate true-up activity. The decrease in SPP transmission expenses was offset in Retail Margins above.

- **Depreciation and Amortization** increased \$5 million primarily due to an increase in amortization of regulatory assets. This increase was offset in Retail Margins above.
- **Interest Expense** increased \$7 million primarily due to the amortization of carrying charges on storm-related regulatory assets. This increase was offset in Retail Margins above.

Nine Months Ended September 30, 2023 Compared to Nine Months Ended September 30, 2022

The major components of the increase in Gross Margin, defined as revenues less the related direct cost of fuel, including consumption of chemicals and emissions allowances, and purchased electricity were as follows:

- **Retail Margins** increased \$23 million primarily due to the following:
 - A \$58 million increase primarily due to base rate revenue increases in Arkansas and Louisiana and rider increases in all retail jurisdictions. These increases were partially offset in other expense items below.

This increase was partially offset by:

- A \$14 million decrease in weather-related usage primarily due to a 41% decrease in heating degree days.
- A \$12 million decrease due to an increase in PTC benefits provided to customers. This decrease was offset in Income Tax Benefit below.
- An \$11 million decrease in weather-normalized margins primarily in the residential and wholesale classes, partially offset by an increase in the industrial class.
- **Margins from Off-system Sales** decreased \$11 million primarily due to reduced Turk Plant merchant sales.

Expenses and Other and Income Tax Benefit changed between years as follows:

- **Other Operation and Maintenance** expenses decreased \$14 million primarily due to the following:
 - A \$10 million decrease due to the capitalization of previously expensed renewable generation pre-construction charges.
 - A \$7 million decrease due to legislation passed in Texas in May 2023 allowing employee financially based incentives to be recovered.
 - A \$7 million decrease in transmission expenses primarily due to a change in rider recovery.
 These decreases were partially offset by:
 - An \$8 million increase in accounts receivable factoring expenses primarily due to increased interest rates.
- **Depreciation and Amortization** expenses increased \$15 million primarily due to an increase in amortization of regulatory assets. This increase was offset in Retail Margins above.
- **Taxes Other Than Income Taxes** increased \$10 million primarily due to increased property taxes driven by the investment in the NCWF.
- **Interest Expense** increased \$5 million primarily due to higher long-term debt balances and interest rates.
- **Income Tax Benefit** increased \$15 million primarily due to the following:
 - A \$12 million increase in PTCs. This increase was offset in Retail Margins above.
 - A \$4 million increase due to a decrease in state tax expense.

INDEX OF CONDENSED NOTES TO CONDENSED FINANCIAL STATEMENTS OF REGISTRANTS

The condensed notes to condensed financial statements are a combined presentation for the Registrants. The following list indicates Registrants to which the notes apply. Specific disclosures within each note apply to all Registrants unless indicated otherwise:

Note	Registrant	Page Number
Significant Accounting Matters	AEP, AEP Texas, AEPTCo, APCo, I&M, OPCo, PSO, SWEPCo	115
New Accounting Standards	AEP, AEP Texas, AEPTCo, APCo, I&M, OPCo, PSO, SWEPCo	117
Comprehensive Income	AEP	118
Rate Matters	AEP, AEP Texas, AEPTCo, APCo, I&M, OPCo, PSO, SWEPCo	120
Commitments, Guarantees and Contingencies	AEP, AEP Texas, AEPTCo, APCo, I&M, OPCo, PSO, SWEPCo	137
Acquisitions, Dispositions and Impairments	AEP, AEPTCo, PSO, SWEPCo	142
Benefit Plans	AEP, AEP Texas, APCo, I&M, OPCo, PSO, SWEPCo	144
Business Segments	AEP, AEP Texas, AEPTCo, APCo, I&M, OPCo, PSO, SWEPCo	146
Derivatives and Hedging	AEP, AEP Texas, APCo, I&M, OPCo, PSO, SWEPCo	150
Fair Value Measurements	AEP, AEP Texas, AEPTCo, APCo, I&M, OPCo, PSO, SWEPCo	165
Income Taxes	AEP, AEP Texas, AEPTCo, APCo, I&M, OPCo, PSO, SWEPCo	179
Financing Activities	AEP, AEP Texas, AEPTCo, APCo, I&M, OPCo, PSO, SWEPCo	182
Variable Interest Entities	AEP	190
Property, Plant and Equipment	AEP, SWEPCo	193
Revenue from Contracts with Customers	AEP, AEP Texas, AEPTCo, APCo, I&M, OPCo, PSO, SWEPCo	194

1. SIGNIFICANT ACCOUNTING MATTERS

The disclosures in this note apply to all Registrants unless indicated otherwise.

General

The unaudited condensed financial statements and footnotes were prepared in accordance with GAAP for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X of the SEC. Accordingly, they do not include all of the information and footnotes required by GAAP for complete annual financial statements.

In the opinion of management, the unaudited condensed interim financial statements reflect all normal and recurring accruals and adjustments necessary for a fair statement of the net income, financial position and cash flows for the interim periods for each Registrant. Net income for the three and nine months ended September 30, 2023 is not necessarily indicative of results that may be expected for the year ending December 31, 2023. The condensed financial statements are unaudited and should be read in conjunction with the audited 2022 financial statements and notes thereto, which are included in the Registrants' Annual Reports on Form 10-K as filed with the SEC on February 23, 2023.

Earnings Per Share (EPS) (Applies to AEP)

Basic EPS is calculated by dividing net earnings available to common shareholders by the weighted-average number of common shares outstanding during the period. Diluted EPS is calculated by adjusting the weighted-average outstanding common shares, assuming conversion of all potentially dilutive stock awards.

The following table presents AEP's basic and diluted EPS calculations included on the statements of income:

	Three Months Ended September 30,			
	2023		2022	
	(in millions, except per share data)			
	\$/share		\$/share	
Earnings Attributable to AEP Common Shareholders	\$	953.7	\$	683.7
Weighted-Average Number of Basic AEP Common Shares Outstanding	520.5	\$ 1.83	513.7	\$ 1.33
Weighted-Average Dilutive Effect of Stock-Based Awards	0.9	—	1.6	—
Weighted-Average Number of Diluted AEP Common Shares Outstanding	521.4	\$ 1.83	515.3	\$ 1.33

	Nine Months Ended September 30, 2023				2022			
	(in millions, except per share data)							
	\$ /share				\$ /share			
Earnings Attributable to AEP Common Shareholders	\$	1,871.9			\$	1,922.9		
Weighted-Average Number of Basic AEP Common Shares Outstanding		516.5	\$	3.62		511.2	\$	3.76
Weighted-Average Dilutive Effect of Stock-Based Awards		1.3		—		1.5		(0.01)
Weighted-Average Number of Diluted AEP Common Shares Outstanding		517.8	\$	3.62		512.7	\$	3.75

There were no antidilutive shares outstanding as of September 30, 2023 and 2022, respectively.

Restricted Cash (Applies to AEP, AEP Texas and APCo)

Restricted Cash primarily includes funds held by trustees for the payment of securitization bonds.

Reconciliation of Cash, Cash Equivalents and Restricted Cash

The following tables provide a reconciliation of Cash, Cash Equivalents and Restricted Cash reported within the balance sheets that sum to the total of the same amounts shown on the statements of cash flows:

	September 30, 2023		
	AEP	AEP Texas	APCo
	(in millions)		
Cash and Cash Equivalents	\$ 353.3	\$ 0.1	\$ 4.5
Restricted Cash	53.8	46.9	6.9
Total Cash, Cash Equivalents and Restricted Cash	\$ 407.1	\$ 47.0	\$ 11.4

	December 31, 2022		
	AEP	AEP Texas	APCo
	(in millions)		
Cash and Cash Equivalents	\$ 509.4	\$ 0.1	\$ 7.5
Restricted Cash	47.1	32.7	14.4
Total Cash, Cash Equivalents and Restricted Cash	\$ 556.5	\$ 32.8	\$ 21.9

Supplementary Cash Flow Information (Applies to AEP)

Cash Flow Information	Nine Months Ended September 30,	
	2023	2022
	(in millions)	
Cash Paid for:		
Interest, Net of Capitalized Amounts	\$ 1,148.7	\$ 856.8
Income Taxes	26.7	104.1
Noncash Investing and Financing Activities:		
Acquisitions Under Finance Leases	38.5	22.3
Construction Expenditures Included in Current Liabilities as of September 30,	975.0	985.8
Acquisition of Nuclear Fuel Included in Current Liabilities as of September 30,	9.5	8.5
Noncash Increase in Noncurrent Assets from the Sale of the Competitive Contracted Renewables Portfolio	74.7	—

2. NEW ACCOUNTING STANDARDS

The disclosures in this note apply to all Registrants unless indicated otherwise.

During the FASB's standard-setting process and upon issuance of final standards, management reviews the new accounting literature to determine its relevance, if any, to the Registrants' business. There are no new standards expected to have a material impact on the Registrants' financial statements.

3. COMPREHENSIVE INCOME

The disclosures in this note apply to AEP only. The impact of AOCI is not material to the financial statements of the Registrant Subsidiaries.

Presentation of Comprehensive Income

The following tables provide AEP's components of changes in AOCI and details of reclassifications from AOCI. The amortization of pension and OPEB AOCI components are included in the computation of net periodic pension and OPEB costs. See Note 7 - Benefit Plans for additional information.

Three Months Ended September 30, 2023	Cash Flow Hedges		Pension and OPEB	Total
	Commodity	Interest Rate		
	(in millions)

(a) Amounts reclassified to the referenced line item on the statements of income.

4. RATE MATTERS

The disclosures in this note apply to all Registrants unless indicated otherwise.

As discussed in the 2022 Annual Report, the Registrants are involved in rate and regulatory proceedings at the FERC and their state commissions. The Rate Matters note within the 2022 Annual Report should be read in conjunction with this report to gain a complete understanding of material rate matters still pending that could impact net income, cash flows and possibly financial condition. The following discusses ratemaking developments in 2023 and updates the 2022 Annual Report.

Coal-Fired Generation Plants (Applies to AEP, PSO and SWEPCo)

Compliance with extensive environmental regulations requires significant capital investment in environmental monitoring, installation of pollution control equipment, emission fees, disposal costs and permits. Management continuously evaluates cost estimates of complying with these regulations which has resulted in, and in the future may result in, a decision to retire coal-fired generating facilities earlier than their currently estimated useful lives.

Management is seeking or will seek regulatory recovery, as necessary, for any net book value remaining when the plants are retired. To the extent the net book value of these generation assets is not deemed recoverable, it could reduce future net income and cash flows and impact financial condition.

Regulated Generating Units that have been Retired

SWEPCo

In December 2021, the Dolet Hills Power Station was retired. As part of the 2020 Texas Base Rate Case, the PUCT authorized recovery of SWEPCo's Texas jurisdictional share of the Dolet Hills Power Station through 2046, but denied SWEPCo the ability to earn a return on this investment resulting in a disallowance of \$12 million in 2021. As part of the 2021 Arkansas Base Rate Case, the APSC authorized recovery of SWEPCo's Arkansas jurisdictional share of the Dolet Hills Power Station through 2027, but denied SWEPCo the ability to earn a return on this investment resulting in a disallowance of \$2 million in the second quarter of 2022. Also, the APSC did not rule on the prudence of the early retirement of the Dolet Hills Power Station, which will be addressed in a future proceeding. As part of the 2020 Louisiana Base Rate Case, the LPSC authorized the recovery of SWEPCo's Louisiana share of the Dolet Hills Power Station, through a separate rider, through 2032, but did not rule on the prudence of the early retirement of the plant, which is being addressed in a separate proceeding. See "2020 Texas Base Rate Case" and "2020 Louisiana Base Rate Case" sections below for additional information.

In March 2023, the Pirkey Plant was retired. As part of the 2020 Louisiana Base Rate Case, the LPSC authorized the recovery of SWEPCo's Louisiana jurisdictional share of the Pirkey Plant, through a separate rider, through 2032. As part of the 2021 Arkansas Base Rate Case, the APSC granted SWEPCo regulatory asset treatment. SWEPCo will request recovery including a weighted average cost of capital carrying charge through a future proceeding. In July 2023, Texas ALJs issued a proposal for decision that concluded the decision to retire the Pirkey Plant was prudent. In September 2023, the PUCT rejected the ALJs proposal for decision concluding the retirement of the Pirkey Plant was prudent. In the open meeting, the commissioners expressed their concerns that the analysis in support of SWEPCo's decision to retire the Pirkey Plant was not robust enough and that SWEPCo should have re-evaluated the decision following Winter Storm Uri. The treatment of the cost of recovery of the Pirkey Plant is expected to be addressed in a future rate case. As of September 30, 2023, the Texas jurisdictional share of the net book value of the Pirkey Plant was \$66 million. To the extent any portion of the Texas jurisdictional share of the net book value of the Pirkey Plant is not recoverable, it could reduce future net income and cash flows and impact financial condition.

Regulated Generating Units to be Retired

PSO

In 2014, PSO received final approval from the Federal EPA to close Northeastern Plant, Unit 3, in 2026. The plant was originally scheduled to close in 2040. As a result of the early retirement date, PSO revised the useful life of Northeastern Plant, Unit 3, to the projected retirement date of 2026 and the incremental depreciation is being deferred as a regulatory asset. As part of the 2021 Oklahoma Base Rate Case, PSO will continue to recover Northeastern Plant, Unit 3 through 2040.

SWEPCo

In November 2020, management announced that it will cease using coal at the Welsh Plant in 2028. As a result of the announcement, SWEPCo began recording a regulatory asset for accelerated depreciation.

The table below summarizes the net book value including CWIP, before cost of removal and materials and supplies, as of September 30, 2023, of generating facilities planned for early retirement:

Plant	Net Book Value	Accelerated Depreciation Regulatory Asset	Cost of Removal Regulatory Liability	Projected Retirement Date	Current Authorized Recovery Period	Annual Depreciation (a)
	(dollars in millions)					
Northeastern Plant, Unit 3	\$ 112.5	\$ 159.5	\$ 20.4	(b) 2026	(c)	\$ 15.0
Welsh Plant, Units 1 and 3	368.8	115.5	58.0	(d) 2028 (e)	(f)	38.6

- (a) Represents the amount of annual depreciation that has been collected from customers over the prior 12-month period.
(b) Includes Northeastern Plant, Unit 4, which was retired in 2016. Removal of Northeastern Plant, Unit 4, will be performed with the removal of Northeastern Plant, Unit 3, after retirement.
(c) Northeastern Plant, Unit 3 is currently being recovered through 2040.
(d) Includes Welsh Plant, Unit 2, which was retired in 2016. Removal of Welsh Plant, Unit 2, will be performed with the removal of Welsh Plant, Units 1 and 3, after retirement.
(e) Represents projected retirement date of coal assets, units are being evaluated for conversion to natural gas after 2028.
(f) Unit 1 is being recovered through 2027 in the Louisiana jurisdiction and through 2037 in the Arkansas and Texas jurisdictions. Unit 3 is being recovered through 2032 in the Louisiana jurisdiction and through 2042 in the Arkansas and Texas jurisdictions.

Dolet Hills Power Station and Related Fuel Operations (Applies to AEP and SWEPCo)

In December 2021, the Dolet Hills Power Station was retired. While in operation, DHLC provided 100% of the fuel supply to Dolet Hills Power Station.

The remaining book value of Dolet Hills Power Station non-fuel related assets are recoverable by SWEPCo through rate riders. As of September 30, 2023, SWEPCo's share of the net investment in the Dolet Hills Power Station was \$05 million, including materials and supplies, net of cost of removal collected in rates.

Fuel costs incurred by the Dolet Hills Power Station are recoverable by SWEPCo through active fuel clauses and are subject to prudence determinations by the various commissions. After closure of the DHLC mining operations and the Dolet Hills Power Station, additional reclamation and other land-related costs incurred by DHLC and Oxbow will continue to be billed to SWEPCo and included in existing fuel clauses. As of September 30, 2023, SWEPCo had a net under-recovered fuel balance of \$1 million, inclusive of costs related to the Dolet Hills Power Station billed by DHLC, but excluding impacts of the February 2021 severe winter weather event.

In March 2021, the LPSC issued an order allowing SWEPCo to recover up to \$20 million of fuel costs in 2021 and defer approximately \$35 million of additional costs with a recovery period to be determined at a later date. In August 2022, the LPSC staff filed testimony recommending fuel disallowances of \$72 million, including denial of recovery of the \$35 million deferral, with refunds to customers over five years. In September 2022, SWEPCo filed rebuttal testimony addressing the LPSC staff recommendations and a hearing was held in May 2023.

In March 2021, the APSC approved fuel rates that provide recovery of \$0 million for the Arkansas share of the 2021 Dolet Hills Power Station fuel costs over five years through the existing fuel clause.

In June 2023, an unopposed settlement agreement was filed with the PUCT that would provide recovery of \$8 million of Oxbow mine related costs through 2035. In September 2023, the PUCT approved the settlement agreement.

If any of these costs are not recoverable, it could reduce future net income and cash flows and impact financial condition.

Pirkey Plant and Related Fuel Operations (Applies to AEP and SWEPCo)

In March 2023, the Pirkey Plant was retired. SWEPCo is recovering, or will seek recovery of, the remaining net book value of Pirkey Plant non-fuel costs. As of September 30, 2023, SWEPCo's share of the net investment in the Pirkey Plant was \$80 million, including materials and supplies, net of cost of removal. See the "Regulated Generating Units that have been Retired" section above for additional information. Fuel costs are recovered through active fuel clauses and are subject to prudence determinations by the various commissions. As of March 31, 2023, SWEPCo fuel deliveries, including billings of all fixed costs, from Sabine ceased. Additionally, as of September 30, 2023, SWEPCo had a net under-recovered fuel balance of \$91 million, inclusive of costs related to the Pirkey Plant billed by Sabine, but excluding impacts of the February 2021 severe winter weather event. Remaining operational, reclamation and other land-related costs incurred by Sabine will be billed to SWEPCo and included in existing fuel clauses.

In June 2023, an unopposed settlement agreement was filed with the PUCT that would provide recovery of \$3 million of Sabine related fuel costs through 2035. In September 2023, the PUCT approved the settlement agreement.

In July 2023, the LPSC ordered that a separate proceeding be established to review the prudence of the decision to retire the Pirkey Plant, including the costs included in fuel for years starting in 2019 and after.

If any of these costs are not recoverable, it could reduce future net income and cash flows and impact financial condition.

Regulatory Assets Pending Final Regulatory Approval (Applies to all Registrants except AEPTCo)

	AEP	
	September 30, 2023	December 31, 2022
Noncurrent Regulatory Assets	(in millions)	
<u>Regulatory Assets Currently Earning a Return</u>		
Welsh Plant, Units 1 and 3 Accelerated Depreciation	\$ 115.5	\$ 85.6

Asset Retirement Obligation - Louisiana	—	11.8
Other Regulatory Assets Pending Final Regulatory Approval	14.8	16.0
Total Regulatory Assets Pending Final Regulatory Approval	\$ 446.5	\$ 547.3

- (a) Includes \$37 million and \$37 million of unrecovered winter storm fuel costs recorded as a current regulatory asset as of September 30, 2023 and December 31, 2022, respectively. See the “February 2021 Severe Winter Weather Impacts in SPP” section below for additional information.
- (b) In April 2023, the LPSC issued an order approving the prudence and future recovery of the Louisiana storm-related regulatory assets. See “2021 Louisiana Storm Cost Filing” section below for additional information.
- (c) In June 2023, additional storms in the Louisiana and Texas service territories caused power outages and extensive damage resulting in the deferral of \$29 million and \$24 million, respectively. Recovery of these storm costs will be addressed in a future request.

If these costs are ultimately determined not to be recoverable, it could reduce future net income and cash flows and impact financial condition.

AEP Texas Rate Matters (Applies to AEP and AEP Texas)

AEP Texas Interim Transmission and Distribution Rates

Through September 30, 2023, AEP Texas' cumulative revenues from interim base rate increases that are subject to review is approximately \$884 million. A base rate review could result in a refund to customers if AEP Texas incurs a disallowance of the transmission or distribution investment on which an interim increase was based. Management is unable to determine a range of potential losses, if any, that are reasonably possible of occurring. A revenue decrease, including a refund of interim transmission and distribution rates, could reduce future net income and cash flows and impact financial condition. AEP Texas is required to file for a comprehensive rate review no later than April 5, 2024.

APCo and WPCo Rate Matters (Applies to AEP and APCo)

2020-2022 Virginia Triennial Review

In March 2023, APCo submitted its 2020-2022 Virginia triennial review filing and base rate case with the Virginia SCC as required by state law. APCo requested a \$213 million annual increase in Virginia base rates based upon a proposed 10.6% return on common equity. The requested annual increase includes \$47 million related to vegetation management and a \$35 million increase in depreciation expense. The requested increase in depreciation expense reflects, among other things, the impacts of incremental investments made since APCo's last depreciation study using property balances as of December 31, 2022. Effective January 1, 2023 and in accordance with past Virginia SCC directives, APCo implemented updated Virginia depreciation rates. APCo's proposed revenue requirement also includes the recovery of certain costs incurred that partially contributed to APCo's calculated earnings shortfall for the 2020-2022 triennial period. For triennial review periods in which a Virginia utility earns below its authorized ROE band, the utility may file to recover expenses incurred, up to the bottom of the authorized ROE band, related to certain categories of costs, including system restoration costs for severe weather events.

In August 2023, APCo, Virginia Staff and intervening parties reached a settlement agreement that included the following: (a) a \$27 million annual increase in Virginia base rates, (b) a 9.5% ROE, (c) updated depreciation rates that reflect a 2040 Amos Plant retirement date, (d) approval of a \$50 million regulatory asset, including tax gross-up, to be recovered over three years starting in 2024 related to major storm expenses incurred during the 2020-2022 triennial period when APCo under-earned in Virginia, (e) approval of the revenue requirement impact of net operating loss carryforward related to income taxes and approval of deferral authority for corporate alternative minimum taxes incurred and (f) approval of the revenue requirement impact of an increase in vegetation management costs with certain costs subject to over-/under-recovery accounting.

In September 2023, the hearing examiner issued a report recommending approval of the settlement agreement described above, as filed. The Virginia SCC is expected to issue an order in the fourth quarter of 2023. If any costs included in APCo's 2020-2022 Virginia triennial review are not approved for recovery, it could reduce future net income and cash flows and impact financial condition.

ENEC (Expanded Net Energy Cost) Filings

In April 2021, APCo and WPCo (the Companies) requested a combined \$3 million annual increase in ENEC rates based on a cumulative \$5 million ENEC under-recovery as of February 28, 2021 and an \$8 million increase in projected ENEC costs for the period September 2021 through August 2022. In September 2021, the WVPSC issued an order approving a \$ million overall increase in ENEC rates, including an approval for recovery of the Companies' cumulative \$55 million ENEC under-recovery balance and a \$8 million reduction in projected costs for the period September 2021 through August 2022. Subsequently, the Companies submitted a request for reconsideration of this order, identifying flaws in the WVPSC's calculation of forecasted future year fuel expense and purchased power costs.

In March 2022, the WVPSC issued an order granting the Companies' request for reconsideration, in part, and approving \$1 million in projected costs for the period September 2021 through August 2022. The order also reopened the 2021 ENEC case to require the Companies to explain the significant growth in the reported under-recovery of ENEC costs and to provide various other information including revised projected costs for the period March 2022 through August 2022. Also, in March 2022, the Companies filed testimony providing the information requested in the WVPSC's order and requested a \$155 million annual increase in ENEC rates effective May 1, 2022. In May 2022, the WVPSC issued an order approving a \$3 million overall increase to ENEC rates to recover projected annual ENEC costs. However, the WVPSC stated that actual and projected ENEC costs are still subject to a prudence review.

In April 2022, the Companies submitted their 2022 annual ENEC filing with the WVPSC requesting a \$97 million annual increase in ENEC revenues, inclusive of the previously requested \$155 million increase, effective September 1, 2022.

In September 2022, following an agreed upon delay in the proceedings of the Companies' 2022 ENEC case, certain intervenors submitted testimony recommending disallowances of at least \$83 million to the Companies' historical period ENEC under-recovery balance along with proposals to either securitize the Companies' remaining ENEC balance or defer recovery of this balance beyond the traditional one-year period. West Virginia staff recommended a \$13 million increase in ENEC rates pending the outcome of the ENEC prudence review. In February 2023, the WVPSC issued an order stating that the commission will not grant additional rate increases for fuel costs until the WVPSC staff completes its prudence review.

In April 2023, the Companies submitted their 2023 annual ENEC filing with the WVPSC, proposing two alternatives to increase ENEC rates effective September 1, 2023. The first alternative is a \$293 million annual increase in ENEC rates comprised of an \$9 million increase for current year ENEC expense and a \$200 million annual increase for the recovery of the Companies' February 28, 2023 ENEC under-recovery balances over three years, including debt and equity carrying costs. The second alternative is an \$89 million annual increase in ENEC rates with the Companies securitizing approximately \$1.9 billion of assets, including: (a) \$553 million relating to ENEC under-recoveries as of February 28, 2023, (b) \$8 million relating to major storm expense deferrals and (c) \$1.2 billion relating to APCo's West Virginia jurisdictional book values of the Amos and Mountaineer Plants and forecasted CCR and ELG investments at these generating facilities. The Companies continue to reflect ENEC under-recovery balances as current on their balance sheets since management cannot assert whether the WVPSC will approve recovery of ENEC under-recovery balances over a time frame different from the traditional one-year period.

Additionally, in April 2023, the Staff submitted the prudence review prepared by an independent consultant retained by the WVPSC staff of the Companies' operation of the Amos, Mountaineer and Mitchell coal plants that Staff was directed to conduct by the WVPSC in May 2022 (Consultant's Report). The Consultant's Report states the opinion of the consultant that the Companies acted imprudently by not taking steps to achieve a 69% capacity factor at their coal-fired plants and recommends applying a disallowance factor of 52.9% to the Companies' cumulative, September 30, 2022 ENEC under-recovery balance of approximately \$30 million. The Consultant's Report further states the consultant's opinion that this disallowance factor could also be utilized in future ENEC filings. Adoption of the Consultant's Report's findings by the WVPSC could result in a disallowance of up to \$285 million. The Companies disagree with the conclusions and recommendations contained in the Consultant's Report and a hearing was held with the WVPSC in September 2023.

In August 2023, the Staff and intervenors submitted testimony recommending, among other items: (a) disallowances of up to \$262 million of historical ENEC under-recovery balances based on alleged lack of prudence, (b) carrying charges on under-recovered balances ranging from 2% to 4% and (c) the recovery of February 28, 2023 ENEC under-recoveries over a period of time ranging from three to five years. In addition, certain intervenors recommended the rejection of the Companies' proposed securitization and one intervenor recommended that, no later than January 1, 2024, the Companies dispatch their coal fleet at the lower of actual purchase costs or replacement pricing through at least 2026 and that the Companies share 75% of any off-system sales revenues with customers.

In September 2023, the WVPSC issued an order on the 2023 ENEC filing approving an \$89 million annual increase in ENEC surcharge rates for the Companies' forecasted costs for the period September 2023 through August 2024. An order from the WVPSC on the 2021 and 2022 ENEC cases is expected in the fourth quarter of 2023.

In October 2023, intervening parties submitted reply briefs. One intervening party amended their recommended disallowance to include the Companies' full \$553 million ENEC under-recovery as of February 28, 2023. The other intervening parties' recommended disallowances remained consistent with testimony submitted in August 2023.

If any deferred ENEC costs are not recoverable, it could reduce future net income and cash flows and impact financial condition.

ETT Rate Matters (Applies to AEP)

ETT Interim Transmission Rates

AEP has a 50% equity ownership interest in ETT. Predominantly all of ETT's revenues are based on interim rate changes that can be filed twice annually and are subject to review and possible true-up in the next base rate proceeding. Through September 30, 2023, AEP's share of ETT's cumulative revenues that are subject to review is approximately \$1.6 billion. A base rate review could produce a refund to customers if ETT incurs a disallowance of the transmission investment on which an interim increase was based. A revenue decrease, including a refund of interim transmission rates, could reduce future net income and cash flows and impact financial condition. Management is unable to determine a range of potential losses, if any, that are reasonably possible of occurring. ETT is required to file for a comprehensive rate review no later than February 1, 2025, during which the \$1.6 billion of cumulative revenues above will be subject to review.

I&M Rate Matters (Applies to AEP and I&M)

Michigan Power Supply Cost Recovery (PSCR)

In April 2023, I&M received intervenor testimony in I&M's 2021 PSCR Reconciliation for the 12-month period ending December 31, 2021 recommending disallowances of purchased power costs of \$18 million associated with the OVEC Inter-Company Power Agreement (ICPA) and the UPA with AEGCo that were alleged to be above market in applying the MPSC's Code of Conduct rules. Michigan staff submitted testimony in I&M's 2021 PSCR Reconciliation with no recommended disallowances for PSCR costs incurred, including those associated with the OVEC ICPA and the AEGCo UPA. Michigan staff also recommended several options to address I&M's shortfall in achieving Michigan's annual one percent energy waste reduction savings level, resulting in potential future disallowed costs of up to approximately \$14 million. In June 2023, Michigan staff submitted rebuttal testimony to update their calculation of the 2021 market proxy price resulting in a recommended disallowance of approximately \$1 million related to the OVEC ICPA. An MPSC order on I&M's 2021 PSCR Reconciliation is expected in the fourth quarter of 2023. If any PSCR costs are not recoverable, it could reduce future net income and cash flows and impact financial condition.

2023 Indiana Base Rate Case

In August 2023, I&M filed a request with the IURC for a \$16 million annual increase in Indiana base rates based upon a 2024 forecasted test year, a proposed 10.5% ROE and a proposed capital structure of 48.8% debt and 51.2% common equity. I&M proposed that the annual increase in base rates be implemented in two steps, with the first increase effective in mid-2024, following an IURC order, and the second increase effective in January 2025. The proposed annual increase includes a \$41 million increase related to depreciation expense, driven by increased depreciation rates and increased capital investments, and a \$15 million increase related to storm expenses. I&M's Indiana base case filing requests recovery of certain historical period regulatory asset balances and proposes deferral accounting for certain future investments and tax related issues, including corporate alternative minimum tax expense and PTCs related to the Cook Plant. Intervenor testimony is due November 2023 and a hearing is scheduled for January 2024. If any costs included in this filing are not approved for recovery, it could reduce future net income and cash flows and impact financial condition.

2023 Michigan Base Rate Case

In September 2023, I&M filed a request with the MPSC for a \$4 million annual increase in Michigan base rates based upon a 2024 forecasted test year, a proposed 10.5% ROE and a capital structure of 49.4% debt and 50.6% common equity. The proposed annual increase includes an \$11 million annual increase in depreciation expense driven by increased capital investment. I&M's Michigan base case filing requests recovery of certain historical period regulatory asset balances and proposes deferral accounting for certain future investments and tax related issues, including corporate alternative minimum tax expense and PTCs related to the Cook Plant. Intervenor testimony is due January 2024 and a hearing is scheduled for February 2024. If any costs included in this filing are not approved for recovery, it could reduce future net income and cash flows and impact financial condition.

KPCo Rate Matters (Applies to AEP)

Fuel Adjustment Clause (FAC) Purchased Power Limitation

In May 2023, KPCo filed an application seeking authority to defer, for future recovery, approximately \$12 million of December 2022 purchased power costs not recoverable through its FAC. This requested deferral accounting authority would have enabled KPCo to pursue securitization of these costs. In June 2023, the KPSC denied KPCo's request for deferral accounting authority. In July 2023, KPCo appealed this decision to the Kentucky state appellate court.

Also in June 2023, following its order denying KPCo's request for deferral accounting authority, the KPSC issued an order directing KPCo to show cause why it should not be subject to Kentucky statutory remedies, including fines and penalties, for failure to provide adequate service in its service territory. The KPSC's show cause order did not make any determination regarding the adequacy of KPCo's service. In July 2023, KPCo filed a response to the show cause order demonstrating that it has provided adequate service. A hearing is scheduled for the first quarter of 2024.

KPCo is requesting a prudency determination and recovery mechanism for these costs in its 2023 base rate. Unless and until KPCo is granted a recovery mechanism for these purchased power costs from the KPSC it will impact cash flows and financial condition. Additionally, if any fines or penalties are levied against KPCo relating to the show cause order, it could reduce net income and cash flows and impact financial condition.

2023 Kentucky Base Rate and Securitization Case

In June 2023, KPCo filed a request with the KPSC for a \$4 million net annual increase in base rates based upon a proposed 9.9% ROE with the increase to be implemented no earlier than January 2024. The filing proposes no changes in depreciation rates and an annual level of storm restoration expense in base rates of approximately \$1 million. KPCo also proposed to discontinue tracking of PJM transmission costs through a rider, and to instead collect an annual level of costs through base rates. In addition, KPCo has proposed a rider to recover certain distribution reliability investments and related incremental operation and maintenance expenses. KPCo also requested a prudency determination and recovery mechanism for approximately \$16 million of purchased power costs not recoverable through its FAC since its last base case.

In conjunction with its June 2023 filing, KPCo further requested to finance, through the issuance of securitization bonds, approximately \$71 million of regulatory assets recorded as of June 2023 including: (a) \$289 million of plant retirement costs, (b) \$79 million of deferred storm costs related to 2020, 2021, 2022 and 2023 major storms, (c) \$52 million of deferred purchased power expenses and (d) \$51 million of under-recovered purchased power rider costs. Plant retirement costs and deferred purchased power expenses have been deemed prudent in prior KPSC decisions. KPCo has requested a prudency determination in this proceeding for the deferred storm costs and under-recovered purchase power rider costs since the last base case. Consistent with Kentucky statutory requirements, the present value of the return on accumulated deferred income tax benefits related to plant retirement costs and deferred purchase power expenses were proposed to reduce the amount authorized to be financed through securitization.

In October 2023, various intervenors filed testimony recommending an annual base rate increase of \$63 million based on ROEs ranging from 9.3% to 9.7%. Intervenors supported KPCo's securitization request, but proposed to include certain tax benefits as a reduction to the base rate revenue requirement. Intervenors also supported KPCo's proposal to discontinue tracking of PJM transmission costs through a rider, and to instead collect an annual level of costs through base rates. Other differences between KPCo's requested annual base rate increase and the intervenors' recommendations are primarily due to: (a) proposals to remove certain employee-related expenses from the revenue requirement, (b) opposition to various matters related to accumulated deferred income taxes, including opposition to KPCo's inclusion of its deferred tax asset associated with net operating loss on a stand-alone tax basis in rate base and a recommendation that KPCo not be permitted to recover a tax-related regulatory asset of approximately \$33 million, (c) opposition to recovery of approximately \$16 million of purchased power costs not recoverable through its FAC since its last base case and (d) a recommendation that KPCo not earn a return on \$42 million of prepaid pension and OPEB assets. In addition, intervenors expressed opposition to KPCo's proposed rider to recover certain distribution reliability investments and related incremental operation and maintenance expenses. KPCo is scheduled to file rebuttal testimony in November 2023. If any of these costs are not recoverable, it could reduce future net income and cash flows and impact financial condition.

OPCo Rate Matters (Applies to AEP and OPCo)

OVEC Cost Recovery Audits

In December 2021, as part of OVEC cost recovery audits pending before the PUCO, intervenors filed positions claiming that costs incurred by OPCo during the 2018-2019 audit period were imprudent and should be disallowed. In May 2022, intervenors filed for rehearing on the 2016-2017 OVEC cost recovery audit period claiming the PUCO's April 2022 order to adopt the findings of the audit report were unjust, unlawful and unreasonable for multiple reasons, including the position that OPCo recovered imprudently incurred costs. In June 2022, the PUCO granted rehearing on the 2016-2017 audit period for purposes of further consideration.

In May 2023, as part of the OVEC cost recovery audits pending before the PUCO, intervenors filed positions claiming that costs incurred by OPCo during the 2020 audit period were imprudent and should be disallowed. A hearing is scheduled for the fourth quarter of 2023.

Management disagrees with these claims and is unable to predict the impact of these disputes. If any costs are disallowed or refunds are ordered, it could reduce future net income and cash flows and impact financial condition. See "OVEC" section of Note 17 in the 2022 Annual Report for additional information on AEP and OPCo's investment in OVEC.

Ohio ESP Filings

In January 2023, OPCo filed an application with the PUCO to approve an ESP that included proposed rate adjustments, proposed new riders and the continuation and modification of certain existing riders, including the DIR, effective June 2024 through May 2030. The proposal includes a return on common equity of 10.65% on capital costs for certain riders. In June 2023, intervenors filed testimony opposing OPCo's plan for various new riders and modifications to existing riders, including the DIR. In September 2023, OPCo and certain intervenors filed a settlement agreement with the PUCO addressing the ESP application. The settlement included a four year term from June 2024 through May 2028, an ROE of 9.7% and continuation of a number of riders including the DIR subject to revenue caps. An order from the PUCO is expected in the first quarter of 2024. If OPCo is ultimately not permitted to fully collect its ESP rates, it could reduce future net income and cash flows and impact financial condition.

PSO Rate Matters (Applies to AEP and PSO)

2022 Oklahoma Base Rate Case

In November 2022, PSO filed a request with the OCC for a \$73 million annual increase in rates based upon a 10.4% ROE with a capital structure of 45.4% debt and 54.6% common equity, net of existing rider revenues and certain incremental renewable facility benefits expected to be provided to customers through riders. The requested annual revenue increase included a \$47 million annual depreciation expense increase related to the accelerated depreciation recovery of the Northeastern Plant, Unit 3 through 2026, and a \$16 million annual amortization expense increase to recover intangible plant over a 5-year useful life instead of a 10-year useful life. PSO's request also included recovery of the 154 MW Rock Falls Wind Facility through base rates to aid PSO's near-term capacity needs and support compliance with SPP's 2023 increased capacity planning reserve margin requirements. In November 2022, PSO entered into an agreement to acquire the Rock Falls Wind Facility. In February 2023, the FERC approved PSO's acquisition of the Rock Falls Wind Facility under Section 203 of the Federal Power Act. PSO closed on the acquisition and placed the Rock Falls Wind Facility in-service on March 31, 2023. In addition, PSO requested an annual formula based rate tariff, with an initial one-year pilot term. In the event the requested formula based rate tariff was denied, PSO requested an expanded rider to recover certain distribution investments and related expenses as well as an expanded transmission cost recovery rider.

In March 2023, OCC staff and various intervenors filed testimony supporting net annual revenue changes ranging from a \$2 million net decrease to a \$49 million net increase based upon ROEs ranging from 8.6% to 9.5%. The difference between PSO's request and OCC staff and intervenor testimony is primarily due to: (a) rejection of PSO's request to accelerate the recovery of Northeastern Plant, Unit 3 from its original retirement date of 2040 to its projected retirement date of 2026, (b) rejection of PSO's request to recover intangible plant over a 5-year useful life instead of a 10-year useful life, (c) recommended disallowance of approximately \$9 million in certain distribution plant investments, (d) opposition to inclusion of the Rock Falls Wind Facility revenue requirement in customer rates before PSO's next base rate case, (e) opposition to PSO's inclusion of its deferred tax asset associated with net operating loss on a stand-alone tax basis in rate base and (f) lower recommended ROEs and recommendations to use certain hypothetical capital structures. Parties also recommended that the OCC reject PSO's requested formula based rate, and alternate requests for expanded distribution investment and transmission cost recovery riders.

In May 2023, PSO, OCC staff and certain intervenors filed a contested joint stipulation and settlement agreement with the OCC that includes an annual revenue increase of \$50 million, based upon a 9.5% ROE with a capital structure of 45.4% debt and 54.6% common equity, net of existing rider revenues and certain incremental renewable facility benefits expected to be provided to customers through riders. The net annual increase includes recovery of the 154 MW Rock Falls Wind Facility through base rates. Northeastern Plant, Unit 3 will continue to be recovered through 2040 and intangible plant will continue to be recovered over a 10-year useful life. The agreement also provides for certain rider-related items, including: (a) revision to PSO's Fuel Clause Adjustment Rider to reflect factor updates to occur on a semi-annual basis, (b) approval to defer a weighted average cost of capital carrying charge on PSO's deferred tax asset associated with net operating loss on a stand-alone tax basis to a regulatory asset and, contingent upon receipt of a supportive private letter ruling from the IRS, approval to collect the deferral through a rider over a 20-month period and (c) approval to implement an expanded rider to recover certain distribution investments for a three-year term, up to a \$6 million annual revenue requirement.

In May 2023, a hearing on the merits of the contested joint stipulation and settlement agreement was held at the OCC and PSO implemented an interim annual base rate increase, subject to refund, based upon the contested joint stipulation and settlement agreement. In July 2023, an ALJ report was filed and included recommendations generally consistent with the intervenor testimony. The ALJ report is not binding on the OCC. Through September 30, 2023, PSO's cumulative revenue from the interim annual base rate increase, subject to refund, is approximately \$80 million. A final order is expected in the fourth quarter of 2023. If the OCC modifies the contested joint stipulation and settlement agreement and PSO is required to refund any of the \$80 million of revenue recorded subject to refund or any costs are not recoverable, it could reduce future net income and cash flows and impact financial condition.

SWEP Co Rate Matters (Applies to AEP and SWEP Co)

2012 Texas Base Rate Case

In 2012, SWEP Co filed a request with the PUCT to increase annual base rates primarily due to the completion of the Turk Plant. In 2013, the PUCT issued an order affirming the prudence of the Turk Plant but determined that the Turk Plant's Texas jurisdictional capital cost cap established in a previous Certificate of Convenience and Necessity case also limited SWEP Co's recovery of AFUDC in addition to limits on its recovery of cash construction costs.

Upon rehearing in 2014, the PUCT reversed its initial ruling and determined that AFUDC was excluded from the Turk Plant's Texas jurisdictional capital cost cap. As a result, SWEP Co reversed \$14 million of a previously recorded regulatory disallowance in 2013. In 2017, the Texas District Court upheld the PUCT's 2014 order and intervenors filed appeals with the Texas Third Court of Appeals.

In August 2021, the Texas Third Court of Appeals reversed the Texas District Court judgment affirming the PUCT's order on AFUDC, concluding that the language of the PUCT's original 2008 order intended to include AFUDC in the Texas jurisdictional capital cost cap, and remanded the case to the PUCT for future proceedings. In November 2021, SWEP Co and the PUCT submitted Petitions for Review with the Texas Supreme Court. In October 2022, the Texas Supreme Court denied the Petitions for Review submitted by SWEP Co and the PUCT. In December 2022, SWEP Co and the PUCT filed requests for rehearing with the Texas Supreme Court. In June 2023, the Texas Supreme Court denied SWEP Co's request for rehearing and the case was remanded to the PUCT for future proceedings. In October 2023, SWEP Co filed testimony with the PUCT in the remanded proceeding recommending no refund or disallowance.

Management does not believe a disallowance of capitalized Turk Plant costs or a revenue refund is probable as of September 30, 2023. However, if SWEP Co is ultimately unable to recover AFUDC in excess of the Texas jurisdictional capital cost cap, it would be expected to result in a pretax net disallowance ranging from \$80 million to \$90 million. In addition, if SWEP Co is ultimately unable to recover AFUDC in excess of the Texas jurisdictional cost cap, SWEP Co estimates it may be required to make customer refunds, including interest, ranging from \$0 to \$200 million related to revenues collected from February 2013 through September 2023 and such determination may reduce SWEP Co's future revenues by approximately \$15 million on an annual basis.

2016 Texas Base Rate Case

In 2016, SWEP Co filed a request with the PUCT for a net increase in Texas annual revenues of \$69 million based upon a 10% ROE. In January 2018, the PUCT issued a final order approving a net increase in Texas annual revenues of \$50 million based upon a ROE of 9.6%, effective May 2017. The final order also included: (a) approval to recover the Texas jurisdictional share of environmental investments placed in-service, as of June 30, 2016, at various plants, including Welsh Plant, Units 1 and 3, (b) approval of recovery of, but no return on, the Texas jurisdictional share of the net book value of Welsh Plant, Unit 2, (c) approval of \$2 million in additional vegetation management expenses and (d) the rejection of SWEP Co's proposed transmission cost recovery mechanism.

As a result of the final order, in 2017 SWEP Co: (a) recorded an impairment charge of \$9 million, which included \$7 million associated with the lack of return on Welsh Plant, Unit 2 and \$12 million related to other disallowed plant investments, (b) recognized \$32 million of additional revenues, for the period of May 2017 through December 2017, that was surcharged to customers in 2018 and (c) recognized an additional \$7 million of expenses consisting primarily of depreciation expense and vegetation management expense, offset by the deferral of rate case expense. SWEP Co implemented new rates in February 2018 billings. The \$32 million of additional 2017 revenues was collected during 2018. In March 2018, the PUCT clarified and corrected portions of the final order, without changing the overall decision or amounts of the rate change. The order has been appealed by various intervenors related to limiting SWEP Co's recovery of AFUDC on Turk Plant and recovery of Welsh Plant, Unit 2. If certain parts of the PUCT order are overturned, it could reduce future net income and cash flows and impact financial condition.

2020 Texas Base Rate Case

In October 2020, SWEP Co filed a request with the PUCT for a \$85 million annual increase in Texas base rates based upon a proposed 10.35% ROE. The request would move transmission and distribution interim revenues recovered through riders into base rates. Eliminating these riders would result in a net annual requested base rate increase of \$90 million primarily due to increased investments. SWEP Co subsequently filed a request with the PUCT lowering the requested annual increase in Texas base rates to \$100 million which would result in an \$85 million net annual base rate increase after moving the proposed riders to rate base.

In January 2022, the PUCT issued a final order approving an annual revenue increase of \$9 million based upon a 9.25% ROE. The order also includes: (a) rates implemented retroactively back to March 18, 2021, (b) \$5 million of the proposed increase related to vegetation management, (c) \$2 million annually to establish a storm catastrophe reserve and (d) the creation of a rider to recover the Dolet Hills Power Station as if it were in rate base until its retirement at the end of 2021 and starting in 2022 the remaining net book value to be recovered as a regulatory asset through 2046. As a result of the final order, SWEP Co recorded a disallowance of \$2 million in 2021 associated with the lack of return on the Dolet Hills Power Station. In February 2022, SWEP Co filed a motion for rehearing with the PUCT challenging several errors in the order, which include challenges of the approved ROE, the denial of a reasonable return or carrying costs on the Dolet Hills Power Station and the calculation of the Texas jurisdictional share of the storm catastrophe reserve. In April 2022, the PUCT denied the motion for rehearing. In May 2022, SWEP Co filed a petition for review with the Texas District Court seeking a judicial review of the several errors challenged in the PUCT's final order.

2020 Louisiana Base Rate Case

In December 2020, SWEP Co filed a request with the LPSC for a \$4 million annual increase in Louisiana base rates based upon a proposed 10.35% ROE. SWEP Co's requested annual increase includes accelerated depreciation related to the Dolet Hills Power Station, Pirkey Power Plant and Welsh Plant, all of which were or are expected to be retired early. SWEP Co also included recovery of Welsh Plant, Unit 2 over the blended useful life of Welsh Plant, Units 1 and 3. SWEP Co subsequently revised the requested annual increase to \$5 million to reflect removing hurricane storm restoration costs from the base case filing, to modify the proposed recovery of the Dolet Hills Power Station and revisions to various proposed amortizations. The hurricane costs have been requested in a separate storm filing. See "2021 Louisiana Storm Cost Filing" below for more information.

In January 2023, the LPSC approved a settlement which provides for an annual revenue increase of \$27 million based upon a 9.5% ROE and includes: (a) a \$21 million increase in base rates effective February 2023, (b) a \$14 million rider to recover costs of the Dolet Hills Power Station and Pirkey Plant including a return, (c) an \$8 million reduction in fuel rates, (d) adoption of a 3-year formula rate term subject to an earnings band and (e) the recovery of certain incremental SPP charges net of associated revenue and the Louisiana jurisdictional share of the return on and of projected transmission capital investment outside of the earnings band. The settlement agreement did not rule on the prudence of the early retirement of the Dolet Hills Power Station, which is being addressed in a separate proceeding.

The primary differences between SWEP Co's requested annual rate increase and the agreed upon settlement increase are primarily due to: (a) a reduction in the requested ROE, (b) recovery of the Dolet Hills Power Station and Pirkey Plant over ten years in a separate rider mechanism as opposed to base rates with accelerated depreciation rates, (c) maintaining existing depreciation rates for Welsh Plant, Units 1 and 3 and (d) the severing of SWEP Co's proposed adjustment to include a stand-alone NOLC deferred tax asset in rate base.

In January 2023, a hearing was held related to the inclusion of a stand-alone NOLC deferred tax asset in rate base. In September 2023, an order was received from the LPSC directing SWEP Co to seek a private letter ruling from the IRS to address the matter.

2021 Louisiana Storm Cost Filing

In 2020, Hurricanes Laura and Delta caused power outages and extensive damage to the SWEPCo service territories, primarily impacting the Louisiana jurisdiction. Following both hurricanes, the LPSC issued orders allowing Louisiana utilities, including SWEPCo, to establish regulatory assets to track and defer expenses associated with these storms. In February 2021, severe winter weather impacted the Louisiana jurisdiction and in March 2021, the LPSC approved the deferral of incremental storm restoration expenses related to the winter storm. In March 2023, SWEPCo and the LPSC staff filed a joint stipulation and settlement agreement with the LPSC which confirmed the prudence of \$50 million of deferred incremental storm restoration expenses. The agreement also authorized an interim carrying charge at a rate of 3.125% until the recovery mechanism is determined in phase two of this proceeding. In April 2023, the LPSC issued an order approving the stipulation and settlement agreement. In July 2023, SWEPCo submitted additional information in phase two of this proceeding to obtain a financing order and prudence review of capital investment.

February 2021 Severe Winter Weather Impacts in SPP

In February 2021, severe winter weather had a significant impact in SPP, resulting in significantly increased market prices for natural gas power plants to meet reliability needs for the SPP electric system. For the time period of February 9, 2021, to February 20, 2021, SWEPCo's natural gas expenses and purchases of electricity still to be recovered from customers are shown in the table below:

Jurisdiction	September 30, 2023	December 31, 2022	Approved Recovery Period	Approved Carrying Charge
(in millions)				
Arkansas	\$ 59.4	\$ 74.9	6 years	(a)
Louisiana	101.4	121.7	(b)	(b)
Texas	108.6	132.4	5 years	1.65%
Total	\$ 269.4	\$ 329.0		

- (a) SWEPCo is permitted to record carrying costs on the unrecovered balance of fuel costs at a weighted-cost of capital approved by the APSC. The APSC will conduct an audit of these costs in 2024. SWEPCo's direct testimony in support of the costs is due in December 2023.
- (b) In March 2021, the LPSC approved a special order granting a temporary modification to the FAC and shortly after SWEPCo began recovery of its Louisiana jurisdictional share of these fuel costs based on a five-year recovery period inclusive of an interim carrying charge equal to the prime rate. The special order states the fuel and purchased power costs incurred will be subject to a future LPSC audit.

If SWEPCo is unable to recover any of the costs relating to the extraordinary fuel and purchases of electricity, or obtain authorization of a reasonable carrying charge on these costs, it could reduce future net income and cash flows and impact financial condition.

FERC Rate Matters

FERC 2019 SPP Transmission Formula Rate Challenge (Applies to AEP, AEPTCo, PSO and SWEPCo)

In May 2021, certain joint customers submitted a formal challenge at the FERC related to the 2020 Annual Update of the 2019 SPP Transmission Formula Rates of the AEP transmission owning subsidiaries within SPP. In March 2022, the FERC issued an order on the formal challenge which ruled in favor of the joint customers on several issues. Management has determined that the result of the order had an immaterial impact to the financial statements of AEP, AEPTCo, PSO and SWEPCo. In November 2022, certain joint customers appealed the FERC decision to the U.S. Court of Appeals for the District of Columbia Circuit.

Independence Energy Connection Project (Applies to AEP)

In 2016, PJM approved the Independence Energy Connection Project (IEC) and included it in its Regional Transmission Expansion Plan to alleviate congestion. Transource Energy has an ownership interest in the IEC, which is located in Maryland and Pennsylvania. In June 2020, the Maryland Public Service Commission approved a Certificate of Public Convenience and Necessity to construct the portion of the IEC in Maryland. In May 2021, the Pennsylvania Public Utility Commission (PAPUC) denied the IEC certificate for siting and construction of the portion in Pennsylvania. Transource Energy appealed the PAPUC ruling in Pennsylvania state court and challenged the ruling before the United States District Court for the Middle District of Pennsylvania. In May 2022, the Pennsylvania state court issued an order affirming the PAPUC decision. The PAPUC decision remains subject to the jurisdiction and review of the United States District Court for the Middle District of Pennsylvania, which had stayed review of the PAPUC decision until the Pennsylvania state court had ordered. The procedural schedule for this case states that a decision by the United States District Court for the Middle District of Pennsylvania will not be reached until the second half of 2023.

In September 2021, PJM notified Transource Energy that the IEC was suspended to allow for the regulatory and related appeals process to proceed in an orderly manner without breaching milestone dates in the project agreement. At that time, PJM stated that the IEC has not been cancelled and remains necessary to alleviate congestion. PJM continues to evaluate reliability and market efficiency in the area. As of September 30, 2023, AEP's share of IEC capital expenditures was approximately \$92 million, located in Total Property, Plant and Equipment - Net on AEP's balance sheets. The FERC has previously granted abandonment benefits for this project, allowing the full recovery of prudently incurred costs if the project is cancelled for reasons outside the control of Transource Energy. If any of the IEC costs are not recoverable, it could reduce future net income and cash flows and impact financial condition.

FERC RTO Incentive Complaint (Applies to AEP, AEPTCo and OPCo)

In February 2022, the OCC filed a complaint against AEPSC, American Transmission Systems, Inc. and Duke Energy Ohio, alleging the 50 basis point RTO incentive included in Ohio Transmission Owners' respective transmission formula rates is not just and reasonable and therefore should be eliminated on the basis that RTO participation is not voluntary, but rather is required by Ohio law. In March 2022, AEPSC filed a motion to dismiss the OCC's February 2022 complaint with the FERC on the basis of certain deficiencies, including that the complaint fails to request relief that can be granted under FERC regulations because AEPSC is not a public utility nor does it have a transmission rate on file with the FERC. In December 2022, the FERC issued an order removing the 50 basis point RTO incentive from OPCo and OHTCo transmission formula rates effective the date of the February 2022 complaint filing and directed OPCo and OHTCo to provide refunds, with interest, within sixty days of the date of its order. In January 2023, both AEPSC and the OCC filed requests for rehearing with the FERC. In February 2023, in compliance with the FERC's December 2022 order, AEPSC submitted a filing to the FERC to update OPCo and OHTCo 2023 transmission formula rates to exclude the 50 basis point RTO incentive and provide refunds with interest. In April 2023, the FERC approved the updated transmission formula rates for OPCo and OHTCo and issued an Order on Rehearing affirming its December 2022 decision. Management expects the December 2022 FERC order to reduce AEP's pretax income by approximately \$20 million on an annual basis. This decision has been appealed to the U.S. Court of Appeals for the Sixth Circuit.

Request to Update AEGCo Depreciation Rates (Applies to AEP and I&M)

In October 2022, AEP, on behalf of AEGCo, submitted proposed revisions to AEGCo's depreciation rates for its 50% ownership interest in Rockport Plant, Unit 1 and Unit 2, reflected in the UPA between AEGCo and I&M. The proposed depreciation rates for these assets reflect an estimated 2028 retirement date for the Rockport Plant. AEGCo's previous FERC-approved depreciation rates for Rockport Plant, Unit 1 were based upon a December 31, 2028 estimated retirement date while AEGCo's previous FERC-approved depreciation rates for Rockport Plant, Unit 2 leasehold improvements were based upon a December 31, 2022 estimated retirement date in conjunction with the termination of the Rockport Plant, Unit 2 lease.

In December 2022, the FERC issued an order approving the proposed AEGCo Rockport depreciation rates effective January 1, 2023, subject to further review and a potential refund. The FERC established a separate proceeding to review: (a) AEGCo's acquisition value for the Rockport Plant, Unit 2 base generating asset (original cost and accumulated depreciation), (b) the appropriateness of including future capital additions as stated components in proposed depreciation rates, in light of the UPA's formula rate mechanism, (c) the appropriateness of applying two different depreciation rates to a single asset common to both units and (d) the accounting and regulatory treatment of Rockport Plant, Unit 2 costs of removal and related AROs. In August 2023, AEGCo reached a settlement agreement with the FERC Trial Staff that resolves all issues set for hearing. In September 2023, the settlement agreement was certified to the FERC. An order from the FERC on this settlement agreement is expected in the fourth quarter of 2023. If the FERC finalizes the settlement agreement as proposed, management anticipates the results of the order will not have a material impact on financial condition, results of operations or cash flows.

FERC 2021 PJM and SPP Transmission Formula Rate Challenge (Applies to AEP, AEPTCo, APCo, I&M, PSO and SWEPCo)

In March 2023 and May 2023, certain joint customers submitted a complaint and a formal challenge at the FERC related to the 2022 Annual Update of the 2021 Transmission Formula Rates of the AEP transmission owning subsidiaries within PJM and SPP, respectively. These challenges primarily relate to stand-alone treatment of NOLCs in the transmission formula rates of the AEP transmission owning subsidiaries. AEPSC, on behalf of the AEP transmission owning subsidiaries within PJM and SPP, filed answers to the joint formal challenge and complaint with the FERC in the second quarter of 2023.

The Registrants transitioned to stand-alone treatment of NOLCs in its PJM and SPP transmission formula rates beginning with the 2022 projected transmission revenue requirements and 2021 true-up to actual transmission revenue requirements, and provided notice of this change in informational filings made with the FERC. Stand-alone treatment of the NOLCs for transmission formula rates increased the annual revenue requirements for years 2023, 2022 and 2021 by \$60 million, \$69 million and \$78 million, respectively. Through the third quarter of 2023, the Registrants' financial statements reflect a provision for refund for certain NOLC revenues billed by PJM and SPP. If the Registrants are required to make refunds as a result of these challenges, it could reduce future net income and cash flows and impact financial condition.

5. COMMITMENTS, GUARANTEES AND CONTINGENCIES

The disclosures in this note apply to all Registrants unless indicated otherwise.

The Registrants are subject to certain claims and legal actions arising in the ordinary course of business. In addition, the Registrants' business activities are subject to extensive governmental regulation related to public health and the environment. The ultimate outcome of such pending or potential litigation against the Registrants cannot be predicted. Management accrues contingent liabilities only when management concludes that it is both probable that a liability has been incurred at the date of the financial statements and the amount of loss can be reasonably estimated. When management determines that it is not probable, but rather reasonably possible that a liability has been incurred at the date of the financial statements, management discloses such contingencies and the possible loss or range of loss if such estimate can be made. Any estimated range is based on currently available information and involves elements of judgment and significant uncertainties. Any estimated range of possible loss may not represent the maximum possible loss exposure. Circumstances change over time and actual results may vary significantly from estimates.

For current proceedings not specifically discussed below, management does not anticipate that the liabilities, if any, arising from such proceedings would have a material effect on the financial statements. The Commitments, Guarantees and Contingencies note within the 2022 Annual Report should be read in conjunction with this report.

GUARANTEES

Liabilities for guarantees are recorded in accordance with the accounting guidance for "Guarantees." There is no collateral held in relation to any guarantees. In the event any guarantee is drawn, there is no recourse to third-parties unless specified below.

Letters of Credit (Applies to AEP, AEP Texas, APCo and I&M)

Standby letters of credit are entered into with third-parties. These letters of credit are issued in the ordinary course of business and cover items such as natural gas and electricity risk management contracts, construction contracts, insurance programs, security deposits and debt service reserves.

AEP has \$4 billion and \$1 billion revolving credit facilities due in March 2027 and 2025, respectively, under which up to \$1.2 billion may be issued as letters of credit on behalf of subsidiaries. As of September 30, 2023, no letters of credit were issued under the revolving credit facility.

An uncommitted facility gives the issuer of the facility the right to accept or decline each request made under the facility. AEP issues letters of credit on behalf of subsidiaries under six uncommitted facilities totaling \$450 million. The Registrants' maximum future payments for letters of credit issued under the uncommitted facilities as of September 30, 2023 were as follows:

Company	Amount (in millions)	Maturity
AEP	\$ 249.1	October 2023 to September 2024
AEP Texas	1.8	July 2024
APCo	6.3	September 2024
I&M	2.9	September 2024

Indemnifications and Other Guarantees

Contracts

The Registrants enter into certain types of contracts which require indemnifications. Typically these contracts include, but are not limited to, sale agreements, lease agreements, purchase agreements and financing agreements. Generally, these agreements may include, but are not limited to, indemnifications around certain tax, contractual and environmental matters. With respect to sale agreements, exposure generally does not exceed the sale price. As of September 30, 2023, there were no material liabilities recorded for any indemnifications.

AEPSC conducts power purchase-and-sale activity on behalf of APCo, I&M, KPCo and WPCo, who are jointly and severally liable for activity conducted on their behalf. AEPSC also conducts power purchase-and-sale activity on behalf of PSO and SWEPCo, who are jointly and severally liable for activity conducted on their behalf.

Master Lease Agreements (Applies to all Registrants except AEPTCo)

The Registrants lease certain equipment under master lease agreements. Under the lease agreements, the lessor is guaranteed a residual value up to a stated percentage of the equipment cost at the end of the lease term. If the actual fair value of the leased equipment is below the guaranteed residual value at the end of the lease term, the Registrants are committed to pay the difference between the actual fair value and the residual value guarantee. Historically, at the end of the lease term the fair value has been in excess of the amount guaranteed. As of September 30, 2023, the maximum potential loss by the Registrants for these lease agreements assuming the fair value of the equipment is zero at the end of the lease term was as follows:

Company	Maximum Potential Loss (in millions)
AEP	\$ 44.8
AEP Texas	10.9
APCo	5.6
I&M	4.2
OPCo	6.9
PSO	4.7
SWEPCo	5.3

ENVIRONMENTAL CONTINGENCIES (Applies to all Registrants except AEPTCo)

The Comprehensive Environmental Response Compensation and Liability Act (Superfund) and State Remediation

By-products from the generation of electricity include materials such as ash, slag, sludge, low-level radioactive waste and SNF. Coal combustion by-products, which constitute the overwhelming percentage of these materials, are typically treated and deposited in captive disposal facilities or are beneficially utilized. In addition, the generation plants and transmission and distribution facilities have used asbestos, polychlorinated biphenyls and other hazardous and non-hazardous materials. The Registrants currently incur costs to dispose of these substances safely. For remediation processes not specifically discussed, management does not anticipate that the liabilities, if any, arising from such remediation processes would have a material effect on the financial statements.

NUCLEAR CONTINGENCIES (Applies to AEP and I&M)

I&M owns and operates the Cook Plant under licenses granted by the Nuclear Regulatory Commission. I&M has a significant future financial commitment to dispose of SNF and to safely decommission and decontaminate the plant. The licenses to operate the two nuclear units at the Cook Plant expire in 2034 and 2037. The operation of a nuclear facility also involves special risks, potential liabilities and specific regulatory and safety requirements. By agreement, I&M is partially liable, together with all other electric utility companies that own nuclear generation units, for a nuclear power plant incident at any nuclear plant in the U.S. Should a nuclear incident occur at any nuclear power plant in the U.S., the resultant liability could be substantial.

OPERATIONAL CONTINGENCIES

Litigation Related to Ohio House Bill 6 (HB 6)

In 2019, Ohio adopted and implemented HB 6 which benefits OPCo by authorizing rate recovery for certain costs including renewable energy contracts and OVEC's coal-fired generating units. OPCo engaged in lobbying efforts and provided testimony during the legislative process in connection with HB 6. In July 2020, an investigation led by the U.S. Attorney's Office resulted in a federal grand jury indictment of an Ohio legislator and associates in connection with an alleged racketeering conspiracy involving the adoption of HB 6. After AEP learned of the criminal allegations against the Ohio legislator and others relating to HB 6, AEP, with assistance from outside advisors, conducted a review of the circumstances surrounding the passage of the bill. Management does not believe that AEP was involved in any wrongful conduct in connection with the passage of HB 6.

In August 2020, an AEP shareholder filed a putative class action lawsuit in the U. S. District Court for the Southern District of Ohio against AEP and certain of its officers for alleged violations of securities laws. In December 2021, the district court issued an opinion and order dismissing the securities litigation complaint with prejudice, determining that the complaint failed to plead any actionable misrepresentations or omissions. The plaintiffs did not appeal the ruling.

In January 2021, an AEP shareholder filed a derivative action in the U.S. District Court for the Southern District of Ohio purporting to assert claims on behalf of AEP against certain AEP officers and directors. In February 2021, a second AEP shareholder filed a similar derivative action in the Court of Common Pleas of Franklin County, Ohio. In April 2021, a third AEP shareholder filed a similar derivative action in the U.S. District Court for the Southern District of Ohio and a fourth AEP shareholder filed a similar derivative action in the Supreme Court for the State of New York, Nassau County. These derivative complaints allege the officers and directors made misrepresentations and omissions similar to those alleged in the putative securities class action lawsuit filed against AEP. The derivative complaints together assert claims for: (a) breach of fiduciary duty, (b) waste of corporate assets, (c) unjust enrichment, (d) breach of duty for insider trading and (e) contribution for violations of sections 10(b) and 21D of the Securities Exchange Act of 1934; and seek monetary damages and changes to AEP's corporate governance and internal policies among other forms of relief. The court entered a scheduling order in the New York state court derivative action staying the case other than with respect to briefing the motion to dismiss. AEP filed substantive and forum-based motions to dismiss on April 29, 2022. On September 13, 2022, the New York state

court granted the forum-based motion to dismiss with prejudice and the plaintiff subsequently filed a notice of appeal with the New York appellate court. On January 20, 2023, the New York plaintiff filed a motion to intervene in the pending Ohio federal court action and withdrew his appeal in New York. The two derivative actions pending in federal district court in Ohio have been consolidated and the plaintiffs in the consolidated action filed an amended complaint. AEP filed a motion to dismiss the amended complaint and subsequently filed a brief in opposition to the New York plaintiffs' motion to intervene in the consolidated action in Ohio. On March 20, 2023, the federal district court issued an order granting the motion to dismiss with prejudice and denying the New York plaintiffs' motion to intervene. On April 20, 2023, one of the plaintiffs filed a notice of appeal to the U.S. Court of Appeals for the Sixth Circuit of the Ohio federal district court order dismissing the consolidated action and denying the intervention. On June 15, 2022, the Ohio state court entered an order continuing the stays of that case until the final resolution of the consolidated derivative actions pending in Ohio federal district court. The defendants will continue to defend against the claims. Management is unable to determine a range of potential losses that is reasonably possible of occurring.

In March 2021, AEP received a litigation demand letter from counsel representing a purported AEP shareholder. The litigation demand letter was directed to the Board of Directors of AEP (AEP Board) and contained factual allegations involving HB 6 that were generally consistent with those in the derivative litigation filed in state and federal court. The shareholder that sent the letter has since withdrawn the litigation demand, which is now terminated and of no further effect. In April 2023, AEP received a litigation demand from counsel representing the purported AEP shareholder who filed the dismissed derivative action in New York state court and unsuccessfully tried to intervene in the consolidated derivative actions in Ohio federal court. The litigation demand letter is directed to the AEP Board and contains factual allegations involving HB 6 that are generally consistent with those in the derivative litigation filed in state and federal court. The letter demands, among other things, that the AEP Board undertake an independent investigation into alleged legal violations by certain current and former directors and officers, and that AEP commence a civil action for breaches of fiduciary duty and related claims against any individuals who allegedly harmed AEP. The AEP Board will act in response to the letter as appropriate. Management is unable to determine a range of potential losses that is reasonably possible of occurring.

In May 2021, AEP received a subpoena from the SEC's Division of Enforcement seeking various documents, including documents relating to the passage of HB 6 and documents relating to AEP's policies and financial processes and controls. In August 2022, AEP received a second subpoena from the SEC seeking various additional documents relating to its ongoing investigation. AEP is cooperating fully with the SEC's investigation, which has included taking testimony from certain individuals and inquiries regarding Empowering Ohio's Economy, Inc., which is a 501(c)(4) social welfare organization, and related disclosures. AEP and the SEC are engaged in discussions about a possible resolution of the SEC's investigation and potential claims under the securities laws, the outcome of which cannot be predicted and could subject AEP to civil penalties and other remedial measures. Management is unable to determine a range of potential losses that is reasonably possible of occurring, but management does not believe the results of this investigation or a possible resolution thereof will have a material impact on results of operations, cash flows or financial condition.

Claims for Indemnification Made by Owners of the Gavin Power Station

In November 2022, the Federal EPA issued a final decision denying Gavin Power LLC's requested extension to allow a CCR surface impoundment at the Gavin Power Station to continue to receive CCR and non-CCR waste streams after April 11, 2021 until May 4, 2023 (the Gavin Denial). As part of the Gavin Denial, the Federal EPA made several determinations related to the CCR Rule (see "Environmental Issues - CCR Rule" section of Management's Discussion and Analysis of Financial Condition and Results of Operations for additional information), including a determination that the closure of the 300 acre unlined fly ash reservoir (FAR) is noncompliant with the CCR Rule in multiple respects. The Gavin Power Station was formerly owned and operated by AEP and was sold to Gavin Power LLC and Lightstone Generation LLC in 2017. Pursuant to the PSA, AEP maintained responsibility to complete closure of the FAR in accordance with the closure plan approved by the Ohio EPA which was completed in July 2021. The PSA contains indemnification provisions, pursuant to which the owners of the Gavin Power Station have notified AEP they believe they are entitled to indemnification for any damages that may result from these claims, including any future enforcement or litigation resulting from the Federal EPA's determinations of noncompliance with various aspects of the CCR Rule as part of the Gavin Denial. The owners of the Gavin Power Station have also sought indemnification for landowner claims for property damage.

allegedly caused by modifications to the FAR. Management does not believe that the owners of the Gavin Power Station have any valid claim for indemnity or otherwise against AEP under the PSA. In addition, Gavin Power LLC, several AEP subsidiaries, and other parties have filed Petitions for Review of the Gavin Denial with the U.S. Court of Appeals for the District of Columbia Circuit. Management is unable to determine a range of potential losses that is reasonably possible of occurring.

Claims for Damages Related to Sabine Lignite Mining Agreement

In May 2023, North American Coal Corporation (NACC) and Sabine, a subsidiary of NACC, filed suit against SWEPCo in Texas state court for breach of the Lignite Mining Agreement (LMA) between Sabine and SWEPCo. NACC and Sabine assert that the terms of the LMA require SWEPCo to continue operating the Pirkey Plant and obtaining coal from the Sabine mine through 2035 and that SWEPCo has breached the agreement by closing the plant. In August 2023, a settlement agreement was reached and the suit was dismissed by the Texas state court. The settlement agreement did not have a material impact on SWEPCo's net income, cash flows or financial condition.

6. ACQUISITIONS, DISPOSITIONS AND IMPAIRMENTS

The disclosures in this note apply to AEP unless indicated otherwise.

ACQUISITIONS

North Central Wind Energy Facilities (Vertically Integrated Utilities Segment) (Applies to AEP, PSO and SWEPCo)

In 2020, PSO and SWEPCo received regulatory approvals to acquire the NCWF, comprised of three Oklahoma wind facilities totaling 484 MWs, on a fixed cost turn-key basis. PSO and SWEPCo own undivided interests of 45.5% and 54.5% of the NCWF, respectively. In total, the three wind facilities cost approximately \$2 billion and consist of Traverse (998 MW), Maverick (287 MW) and Sundance (199 MW). Output from the NCWF serves retail load in PSO's Oklahoma service territory and both retail and FERC wholesale load in SWEPCo's service territories in Arkansas and Louisiana. The Oklahoma and Louisiana portions of the NCWF revenue requirement, net of PTC benefit, are recoverable through authorized riders until the amounts are reflected in base rates. Recovery of the Arkansas portion of the NCWF revenue requirement through base rates was approved by the APSC in May 2022. The NCWF are subject to various regulatory performance requirements. If these performance requirements are not met, PSO and SWEPCo would recognize a regulatory liability to refund retail customers.

In March 2022, PSO and SWEPCo acquired respective undivided ownership interests in the entity that owned Traverse during its development and construction for \$1.2 billion, the third of the three NCWF acquisitions. Immediately following the acquisition, PSO and SWEPCo liquidated the entity and simultaneously distributed the Traverse assets in proportion to their undivided ownership interests. Traverse was placed in-service in March 2022. PSO and SWEPCo apply the joint plant accounting model to account for their respective undivided interests in the assets, liabilities, revenues and expenses of the NCWF projects.

Rock Falls Wind Facility (Vertically Integrated Utilities Segment) (Applies to AEP and PSO)

In November 2022, PSO entered into an agreement to acquire the Rock Falls Wind Facility. In February 2023, the FERC approved PSO's acquisition of the Rock Falls Wind Facility under Section 203 of the Federal Power Act. In March 2023, PSO acquired an ownership interest in the entity that owned Rock Falls during its development and construction for \$146 million. In accordance with the guidance for "Business Combinations," AEP management determined that the acquisition of the Rock Falls Wind Facility represents an asset acquisition. The current and noncurrent Obligations Under Operating Leases related to Rock Falls were not material as of September 30, 2023. See the "2022 Oklahoma Base Rate Case" section of Note 4 for additional information.

DISPOSITIONS

Termination of Planned Disposition of KPCo and KTCo (Vertically Integrated Utilities and AEP Transmission Holdco Segments) (Applies to AEP and AEPTCo)

In October 2021, AEP entered into a Stock Purchase Agreement (SPA) to sell KPCo and KTCo to Liberty Utilities Co., a subsidiary of Algonquin Power & Utilities Corp. (Liberty), for approximately a \$2.85 billion enterprise value. The SPA was subsequently amended in September 2022 to reduce the purchase price to approximately \$2.646 billion. The sale required approval from the KPSC and from the FERC under Section 203 of the Federal Power Act. The SPA contained certain termination rights if the closing of the sale did not occur by April 26, 2023.

In May 2022, the KPSC approved the sale of KPCo to Liberty subject to certain conditions contingent upon the closing of the sale. In December 2022, the FERC issued an order denying, without prejudice, authorization of the proposed sale stating the applicants failed to demonstrate the proposed transaction will not have an adverse effect on rates. In February 2023, a new filing for approval under Section 203 of the Federal Power Act was submitted. In March 2023, the KPSC and other intervenors made filings recommending the FERC reject AEP and Liberty's new Section 203 application seeking approval of the sale.

In April 2023, AEP, AEPTCo and Liberty entered into a Mutual Termination Agreement (Termination Agreement) terminating the SPA. The parties entered into the Termination Agreement as all of the conditions precedent to closing the sale could not be satisfied prior to April 26, 2023.

The impact of the Termination Agreement did not have a material impact on AEP's statements of income for the three and nine months ended September 30, 2023. Upon reverting to a held and used model in the first quarter of 2023, AEP was required to present its investment in the Kentucky Operations at the lower of fair value or historical carrying value which resulted in a \$335 million reduction recorded in Property, Plant and Equipment. The reduced investment in KPCo's assets is being amortized over the 30-year average useful life of the KPCo assets.

Disposition of the Competitive Contracted Renewables Portfolio (Generation & Marketing Segment)
(Applies to AEP)

In February 2022, AEP management announced the initiation of a process to sell all or a portion of AEP Renewables' competitive contracted renewables portfolio (the portfolio) within the Generation & Marketing segment. In late January 2023, AEP received final bids from interested parties. In February 2023, AEP's Board of Directors approved management's plan to sell the portfolio and AEP signed an agreement with a nonaffiliated party. AEP recorded a pretax loss of \$112 million (\$88 million after-tax) in the first quarter of 2023 after reaching Held for Sale status and determining the carrying value of the portfolio exceeded the estimated fair value.

In August 2023, AEP completed the sale of the entire portfolio to the nonaffiliated party and received cash proceeds of approximately \$1.2 billion, net of taxes and transaction costs.

Disposition of Mineral Rights (Generation & Marketing Segment) (Applies to AEP)

In June 2022, AEP closed on the sale of certain mineral rights to a nonaffiliated third-party and received \$120 million of proceeds. The sale resulted in a pretax gain of \$116 million in the second quarter of 2022.

IMPAIRMENTS

Flat Ridge 2 Wind LLC (Generation & Marketing Segment) (Applies to AEP)

In 2019, AEP acquired a 50% ownership interest in five non-consolidated joint ventures, including Flat Ridge 2 Wind LLC (Flat Ridge 2), and two tax equity partnerships. The five non-consolidated joint ventures are jointly owned and operated by BP Wind Energy. Flat Ridge 2 sells electricity to three counterparties through long-term PPAs.

Regarding AEP's investment in Flat Ridge 2, In June 2022, as a result of Flat Ridge 2's deteriorating financial performance, sale negotiations and AEP's ongoing evaluation and ultimate decision to exit the investment in the near term, AEP determined a decline in the fair value of AEP's investment in Flat Ridge 2 was other than temporary. In accordance with the accounting guidance for "Investments - Equity Method and Joint Ventures", in the second quarter of 2022 AEP recorded a pretax other than temporary impairment charge of \$186 million which is presented in Equity Earnings (Losses) of Unconsolidated Subsidiaries on AEP's Statement of Income. AEP's determination of fair value utilized the accounting guidance for Fair Value Measurement market approach to valuation and was based on negotiations to sell the investment to a non-affiliate. In the third quarter of 2022, AEP recorded an additional \$2 million pretax other than temporary impairment charge which is presented in Equity Earnings (Losses) of Unconsolidated Subsidiaries on AEP's Statement of Income. In September 2022, AEP signed a Purchase and Sale Agreement with a nonaffiliate for AEP's interest in Flat Ridge 2. The transaction closed in the fourth quarter of 2022 and had an immaterial impact on the financial statements at closing.

7. BENEFIT PLANS

The disclosures in this note apply to all Registrants except AEPTCo.

AEP sponsors a qualified pension plan and two unfunded nonqualified pension plans. Substantially all AEP employees are covered by the qualified plan or both the qualified and a nonqualified pension plan. AEP also sponsors OPEB plans to provide health and life insurance benefits for retired employees.

8. BUSINESS SEGMENTS

The disclosures in this note apply to all Registrants unless indicated otherwise.

AEP's Reportable Segments

AEP's primary business is the generation, transmission and distribution of electricity. Within its Vertically Integrated Utilities segment, AEP centrally dispatches generation assets and manages its overall utility operations on an integrated basis because of the substantial impact of cost-based rates and regulatory oversight. Intersegment sales and transfers are generally based on underlying contractual arrangements and agreements.

AEP's reportable segments and their related business activities are outlined below:

Vertically Integrated Utilities

- Generation, transmission and distribution of electricity for sale to retail and wholesale customers through assets owned and operated by AEGCo, APCo, I&M, KGPCo, KPCo, PSO, SWEPCo and WPCo.

Transmission and Distribution Utilities

- Transmission and distribution of electricity for sale to retail and wholesale customers through assets owned and operated by AEP Texas and OPCo.
- OPCo purchases energy and capacity to serve standard service offer customers and provides transmission and distribution services for all connected load.

AEP Transmission Holdco

- Development, construction and operation of transmission facilities through investments in AEPTCo. These investments have FERC-approved ROEs.
- Development, construction and operation of transmission facilities through investments in AEP's transmission-only joint ventures. These investments have PUCT-approved or FERC-approved ROEs.

Generation & Marketing

- Contracted energy management services.
- Marketing, risk management and retail activities in ERCOT, MISO, PJM and SPP.
- Competitive generation in PJM.

The remainder of AEP's activities are presented as Corporate and Other. While not considered a reportable segment, Corporate and Other primarily includes the purchasing of receivables from certain AEP utility subsidiaries, Parent's guarantee revenue received from affiliates, investment income, interest income and interest expense, and other nonallocated costs.

The tables below represent AEP's reportable segment income statement information for the three and nine months ended September 30, 2023 and 2022 and reportable segment balance sheet information as of September 30, 2023 and December 31, 2022.

	September 30, 2023							
	Vertically Integrated Utilities	Transmission and Distribution Utilities	AEP Transmission Holdco	Generation & Marketing	Corporate and Other (a)		Reconciling Adjustments	Consolidated
	(in millions)							
Total Assets	\$ 50,940.3	\$ 24,327.9	\$ 16,155.0	\$ 2,517.0	\$ 4,567.2 (b)		\$ (3,381.8) (c)	\$ 95,125.6
	December 31, 2022							
	Vertically Integrated Utilities	Transmission and Distribution Utilities	AEP Transmission Holdco	Generation & Marketing	Corporate and Other (a)		Reconciling Adjustments	Consolidated
	(in millions)							
Total Assets	\$ 49,761.8	\$ 22,920.2	\$ 15,215.8	\$ 4,520.1	\$ 6,768.4 (b)		\$ (5,783.0) (c)	\$ 93,403.3

- (a) Corporate and Other primarily includes the purchasing of receivables from certain AEP utility subsidiaries. This segment also includes Parent's guarantee revenue received from affiliates, investment income, interest income, interest expense and other nonallocated costs.
- (b) Includes elimination of AEP Parent's investments in wholly-owned subsidiary companies.
- (c) Reconciling Adjustments for Total Assets primarily include elimination of intercompany advances to affiliates and intercompany accounts receivable.

Registrant Subsidiaries' Reportable Segments (Applies to all Registrant Subsidiaries except AEPTCo)

The Registrant Subsidiaries each have one reportable segment, an integrated electricity generation, transmission and distribution business for APCo, I&M, PSO and SWEPco, and an integrated electricity transmission and distribution business for AEP Texas and OPCo. Other activities are insignificant. The Registrant Subsidiaries' operations are managed on an integrated basis because of the substantial impact of cost-based rates and regulatory oversight on the business process, cost structures and operating results.

AEPTCo's Reportable Segments

AEPTCo Parent is the holding company of seven FERC-regulated transmission-only electric utilities. The seven State Transcos have been identified as operating segments of AEPTCo under the accounting guidance for "Segment Reporting." The State Transcos business consists of developing, constructing and operating transmission facilities at the request of the RTOs in which they operate and in replacing and upgrading facilities, assets and components of the existing AEP transmission system as needed to maintain reliability standards and provide service to AEP's wholesale and retail customers. The State Transcos are regulated for rate-making purposes exclusively by the FERC and earn revenues through tariff rates charged for the use of their electric transmission systems.

AEPTCo's Chief Operating Decision Maker makes operating decisions, allocates resources to and assesses performance based on these operating segments. The State Transcos operating segments all have similar economic characteristics and meet all of the criteria under the accounting guidance for "Segment Reporting" to be aggregated into one operating segment. As a result, AEPTCo has one reportable segment. The remainder of AEPTCo's activity is presented in AEPTCo Parent. While not considered a reportable segment, AEPTCo Parent represents the activity of the holding company which primarily relates to debt financing activity and general corporate activities.

The tables below present AEPTCo's reportable segment income statement information for the three and nine months ended September 30, 2023 and 2022 and reportable segment balance sheet information as of September 30, 2023 and December 31, 2022.

9. DERIVATIVES AND HEDGING

The disclosures in this note apply to all Registrants unless indicated otherwise. For the periods presented, AEPTCo did not have any derivative and hedging activity.

OBJECTIVES FOR UTILIZATION OF DERIVATIVE INSTRUMENTS

AEPS is agent for and transacts on behalf of certain AEP subsidiaries, including the Registrant Subsidiaries. AEPEP is agent for and transacts on behalf of other AEP subsidiaries.

The Registrants are exposed to certain market risks as major power producers and participants in the electricity, capacity, natural gas, coal and emission allowance markets. These risks include commodity price risks which may be subject to capacity risk, interest rate risk and credit risk. These risks represent the risk of loss that may impact the Registrants due to changes in the underlying market prices or rates. Management utilizes derivative instruments to manage these risks.

STRATEGIES FOR UTILIZATION OF DERIVATIVE INSTRUMENTS TO ACHIEVE OBJECTIVES

Risk Management Strategies

The strategy surrounding the use of derivative instruments primarily focuses on managing risk exposures, future cash flows and creating value utilizing both economic and formal hedging strategies. The risk management strategies also include the use of derivative instruments for trading purposes which focus on seizing market opportunities to create value driven by expected changes in the market prices of the commodities. To accomplish these objectives, the Registrants primarily employ risk management contracts including physical and financial forward purchase-and-sale contracts and, to a lesser extent, OTC swaps and options. Not all risk management contracts meet the definition of a derivative under the accounting guidance for "Derivatives and Hedging." Derivative risk management contracts elected normal under the normal purchases and normal sales scope exception are not subject to the requirements of this accounting guidance.

The Registrants utilize power, capacity, coal, natural gas, interest rate and, to a lesser extent, heating oil, gasoline and other commodity contracts to manage the risk associated with the energy business. The Registrants utilize interest rate derivative contracts in order to manage the interest rate exposure associated with the commodity portfolio. For disclosure purposes, such risks are grouped as "Commodity," as these risks are related to energy risk management activities. The Registrants also utilize derivative contracts to manage interest rate risk associated with debt financing. For disclosure purposes, these risks are grouped as "Interest Rate." The amount of risk taken is determined by the Commercial Operations, Energy Supply and Finance groups in accordance with established risk management policies as approved by the Finance Committee of the Board of Directors.

The following tables represent the gross notional volume of the Registrants' outstanding derivative contracts:

Notional Volume of Derivative Instruments

Fair Value Hedging Strategies (Applies to AEP)

Parent enters into interest rate derivative transactions as part of an overall strategy to manage the mix of fixed-rate and floating-rate debt. Certain interest rate derivative transactions effectively modify exposure to interest rate risk by converting a portion of fixed-rate debt to a floating-rate. Provided specific criteria are met, these interest rate derivatives may be designated as fair value hedges.

Cash Flow Hedging Strategies

The Registrants utilize cash flow hedges on certain derivative transactions for the purchase and sale of power ("Commodity") in order to manage the variable price risk related to forecasted purchases and sales. Management monitors the potential impacts of commodity price changes and, where appropriate, enters into derivative transactions to protect profit margins for a portion of future electricity sales and purchases. The Registrants do not hedge all commodity price risk.

The Registrants utilize a variety of interest rate derivative transactions in order to manage interest rate risk exposure. The Registrants also utilize interest rate derivative contracts to manage interest rate exposure related to future borrowings of fixed-rate debt. The Registrants do not hedge all interest rate exposure.

ACCOUNTING FOR DERIVATIVE INSTRUMENTS AND THE IMPACT ON THE FINANCIAL STATEMENTS

The accounting guidance for “Derivatives and Hedging” requires recognition of all qualifying derivative instruments as either assets or liabilities on the balance sheets at fair value. The fair values of derivative instruments accounted for using MTM accounting or hedge accounting are based on exchange prices and broker quotes. If a quoted market price is not available, the estimate of fair value is based on the best information available including valuation models that estimate future energy prices based on existing market and broker quotes and other assumptions. In order to determine the relevant fair values of the derivative instruments, the Registrants apply valuation adjustments for discounting, liquidity and credit quality.

Credit risk is the risk that a counterparty will fail to perform on the contract or fail to pay amounts due. Liquidity risk represents the risk that imperfections in the market will cause the price to vary from estimated fair value based upon prevailing market supply and demand conditions. Since energy markets are imperfect and volatile, there are inherent risks related to the underlying assumptions in models used to fair value risk management contracts. Unforeseen events may cause reasonable price curves to differ from actual price curves throughout a contract’s term and at the time a contract settles. Consequently, there could be significant adverse or favorable effects on future net income and cash flows if market prices are not consistent with management’s estimates of current market consensus for forward prices in the current period. This is particularly true for longer term contracts. Cash flows may vary based on market conditions, margin requirements and the timing of settlement of risk management contracts.

According to the accounting guidance for “Derivatives and Hedging,” the Registrants reflect the fair values of derivative instruments subject to netting agreements with the same counterparty net of related cash collateral. For certain risk management contracts, the Registrants are required to post or receive cash collateral based on third-party contractual agreements and risk profiles. AEP netted cash collateral received from third-parties against short-term and long-term risk management assets in the amounts of \$93 million and \$481 million as of September 30, 2023 and December 31, 2022, respectively. There was no cash collateral received from third-parties netted against short-term and long-term risk management assets for the Registrant Subsidiaries as of September 30, 2023 and December 31, 2022. The amount of cash collateral paid to third-parties netted against short-term and long-term risk management liabilities was immaterial for the Registrants as of September 30, 2023 and December 31, 2022.

The following tables represent the gross fair value of the Registrants' derivative activity on the balance sheets. Unless shown as a separate line on the balance sheets due to materiality, Current Risk Management Assets are included in Prepayments and Other Current Assets, Long-term Risk Management Assets are included in Deferred Charges and Other Noncurrent Assets, Current Risk Management Liabilities are included in Other Current Liabilities and Long-term Risk Management Liabilities are included in Deferred Credits and Other Noncurrent Liabilities on the balance sheets.

(a) Represents realized and unrealized gains and losses subject to regulatory accounting treatment recorded as either current or noncurrent on the balance sheets.

Certain qualifying derivative instruments have been designated as normal purchase or normal sale contracts, as provided in the accounting guidance for “Derivatives and Hedging.” Derivative contracts that have been designated as normal purchases or normal sales under that accounting guidance are not subject to MTM accounting treatment and are recognized on the statements of income on an accrual basis.

The accounting for the changes in the fair value of a derivative instrument depends on whether it qualifies for and has been designated as part of a hedging relationship and further, on the type of hedging relationship. Depending on the exposure, management designates a hedging instrument as a fair value hedge or a cash flow hedge.

For contracts that have not been designated as part of a hedging relationship, the accounting for changes in fair value depends on whether the derivative instrument is held for trading purposes. Unrealized and realized gains and losses on derivative instruments held for trading purposes are included in revenues on a net basis on the statements of income. Unrealized and realized gains and losses on derivative instruments not held for trading purposes are included in revenues or expenses on the statements of income depending on the relevant facts and circumstances. Certain derivatives that economically hedge future commodity risk are recorded in the same line item on the statements of income as that of the associated risk being hedged. However, unrealized and some realized gains and losses in regulated jurisdictions for both trading and non-trading derivative instruments are recorded as regulatory assets (for losses) or regulatory liabilities (for gains) in accordance with the accounting guidance for “Regulated Operations.”

Accounting for Fair Value Hedging Strategies (Applies to AEP)

For fair value hedges (i.e. hedging the exposure to changes in the fair value of an asset, liability or an identified portion thereof attributable to a particular risk), the gain or loss on the derivative instrument as well as the offsetting gain or loss on the hedged item associated with the hedged risk impacts net income during the period of change.

AEP records realized and unrealized gains or losses on interest rate swaps that are designated and qualify for fair value hedge accounting treatment and any offsetting changes in the fair value of the debt being hedged in Interest Expense on the statements of income.

The following table shows the impacts recognized on the balance sheets related to the hedged items in fair value hedging relationships:

	Carrying Amount of the Hedged Liabilities		Cumulative Amount of Fair Value Hedging Adjustment Included in the Carrying Amount of the Hedged Liabilities	
	September 30, 2023	December 31, 2022	September 30, 2023	December 31, 2022
	(in millions)			
Long-term Debt (a) (b)	\$ (840.1)	\$ (855.5)	\$ 106.1	\$ 89.7

(a) Amounts included on the Balance Sheet within Noncurrent Liabilities line item Long-term Debt.

(b) Amounts include \$(32) million and \$(38) million as of September 30, 2023 and December 31, 2022, respectively, for the fair value hedge adjustment of hedged debt obligations for which hedge accounting has been discontinued.

The pretax effects of fair value hedge accounting on income were as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2023	2022	2023	2022
	(in millions)			
Gain (Loss) on Interest Rate Contracts:				
Fair Value Hedging Instruments (a)	\$ (13.4)	\$ (36.0)	\$ (10.7)	\$ (98.4)
Fair Value Portion of Long-term Debt (a)	13.4	36.0	10.7	98.4

(a) Gain (Loss) is included in Interest Expense on the statements of income.

Accounting for Cash Flow Hedging Strategies (Applies to AEP, AEP Texas, APCo, I&M, PSO and SWEPCo)

For cash flow hedges (i.e. hedging the exposure to variability in expected future cash flows that is attributable to a particular risk), the Registrants initially report the gain or loss on the derivative instrument as a component of Accumulated Other Comprehensive Income (Loss) on the balance sheets until the period the hedged item affects net income.

Realized gains and losses on derivative contracts for the purchase and sale of power designated as cash flow hedges are included in Total Revenues or Purchased Electricity, Fuel and Other Consumables Used for Electric Generation on the statements of income or in Regulatory Assets or Regulatory Liabilities on the balance sheets, depending on the specific nature of the risk being hedged. During the three and nine months ended September 30, 2023 and 2022, AEP applied cash flow hedging to outstanding power derivatives and the Registrant Subsidiaries did not.

The Registrants reclassify gains and losses on interest rate derivative hedges related to debt financings from Accumulated Other Comprehensive Income (Loss) on the balance sheets into Interest Expense on the statements of income in those periods in which hedged interest payments occur. During the three months ended September 30, 2023, the Registrants did not apply cash flow hedging to outstanding interest rate derivatives. During the nine months ended September 30, 2023, AEP, AEP Texas, I&M, PSO and SWEPCo applied cash flow hedging to outstanding interest rate derivatives and the other Registrant Subsidiaries did not. During the three and nine months ended September 30, 2022, AEP applied cash flow hedging to outstanding interest rate derivatives and the Registrant Subsidiaries did not.

For details on effective cash flow hedges included in Accumulated Other Comprehensive Income (Loss) on the balance sheets and the reasons for changes in cash flow hedges, see Note 3 - Comprehensive Income.

Cash flow hedges included in Accumulated Other Comprehensive Income (Loss) on the balance sheets were:

Impact of Cash Flow Hedges on AEP's Balance Sheets

	September 30, 2023		December 31, 2022	
	Commodity	Interest Rate	Commodity	Interest Rate
	(in millions)			
AOCI Gain Net of Tax	\$ 100.6	\$ 4.7	\$ 223.5	\$ 0.3
Portion Expected to be Reclassified to Net Income During the Next Twelve Months	36.1	4.3	119.9	0.3

As of September 30, 2023 the maximum length of time that AEP is hedging its exposure to variability in future cash flows related to forecasted transactions is 90 months.

Impact of Cash Flow Hedges on the Registrant Subsidiaries' Balance Sheets

Company	September 30, 2023		December 31, 2022	
	Interest Rate			
	AOCI Gain (Loss) Net of Tax	Expected to be Reclassified to Net Income During the Next Twelve Months	AOCI Gain (Loss) Net of Tax	Expected to be Reclassified to Net Income During the Next Twelve Months
		(in millions)		
AEP Texas	\$ 2.8	\$ 0.3	\$ (0.3)	\$ (0.2)
APCo	6.1	0.8	6.7	0.8
I&M	(5.6)	(0.4)	(5.1)	(0.6)
PSO	(0.2)	—	1.3	0.1
SWEPCo	1.4	0.3	1.1	0.2

The actual amounts reclassified from Accumulated Other Comprehensive Income (Loss) to Net Income can differ from the estimate above due to market price changes.

Credit Risk

Management mitigates credit risk in wholesale marketing and trading activities by assessing the creditworthiness of potential counterparties before entering into transactions with them and continuing to evaluate their creditworthiness on an ongoing basis. Management uses credit agency ratings and current market-based qualitative and quantitative data as well as financial statements to assess the financial health of counterparties on an ongoing basis.

Master agreements are typically used to facilitate the netting of cash flows associated with a single counterparty and may include collateral requirements. Collateral requirements in the form of cash, letters of credit and parental/affiliate guarantees may be obtained as security from counterparties in order to mitigate credit risk. Some master agreements include margining, which requires a counterparty to post cash or letters of credit in the event exposure exceeds the established threshold. The threshold represents an unsecured credit limit which may be supported by a parental/affiliate guaranty, as determined in accordance with AEP's credit policy. In addition, master agreements allow for termination and liquidation of all positions in the event of a default including a failure or inability to post collateral when required.

Credit-Risk-Related Contingent Features

Credit Downgrade Triggers (Applies to AEP, APCo, I&M, PSO and SWEPCo)

A limited number of derivative contracts include collateral triggering events, which include a requirement to maintain certain credit ratings. On an ongoing basis, AEP's risk management organization assesses the appropriateness of these collateral triggering events in contracts. The Registrants have not experienced a downgrade below a specified credit rating threshold that would require the posting of additional collateral. AEP had derivative contracts with collateral triggering events in a net liability position with a total exposure of \$0 and \$2 million as of September 30, 2023 and December 31, 2022, respectively. The Registrant Subsidiaries had no derivative contracts with collateral triggering events in a net liability position as of September 30, 2023 and December 31, 2022.

Cross-Acceleration Triggers

Certain interest rate derivative contracts contain cross-acceleration provisions that, if triggered, would permit the counterparty to declare a default and require settlement of the outstanding payable. These cross-acceleration provisions could be triggered if there was a non-performance event by the Registrants under any of their outstanding debt of at least \$50 million and the lender on that debt has accelerated the entire repayment obligation. On an ongoing basis, AEP's risk management organization assesses the appropriateness of these cross-acceleration provisions in contracts. AEP had derivative contracts with cross-acceleration provisions in a net liability position of \$138 million and \$127 million as of September 30, 2023 and December 31, 2022, respectively. There was no cash collateral posted as of September 30, 2023 and December 31, 2022. If a cross-acceleration provision would have been triggered, settlement at fair value would have been required. The Registrant Subsidiaries had no derivative contracts with cross-acceleration provisions outstanding as of September 30, 2023 and December 31, 2022.

Cross-Default Triggers (Applies to AEP, APCo, I&M, PSO and SWEPCo)

In addition, a majority of non-exchange traded commodity contracts contain cross-default provisions that, if triggered, would permit the counterparty to declare a default and require settlement of the outstanding payable. These cross-default provisions could be triggered if there was a non-performance event by Parent or the obligor under outstanding debt or a third-party obligation that is \$50 million or greater. On an ongoing basis, AEP's risk management organization assesses the appropriateness of these cross-default provisions in the contracts. AEP had derivative contracts subject to cross-default provisions in a net liability position of \$165 million and \$217 million as of September 30, 2023 and December 31, 2022, respectively, after considering contractual netting arrangements. There was no cash collateral posted as of September 30, 2023 and December 31, 2022. If a cross-default provision would have been triggered, settlement at fair value would have been required. The Registrant Subsidiaries' derivative contracts with cross-default provisions outstanding as of September 30, 2023 and December 31, 2022 were not material.

10. FAIR VALUE MEASUREMENTS

The disclosures in this note apply to all Registrants except AEPTCo unless indicated otherwise.

Fair Value Hierarchy and Valuation Techniques

The accounting guidance for “Fair Value Measurements and Disclosures” establishes a fair value hierarchy that prioritizes the inputs used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurement) and the lowest priority to unobservable inputs (Level 3 measurement). Where observable inputs are available for substantially the full term of the asset or liability, the instrument is categorized in Level 2. When quoted market prices are not available, pricing may be completed using comparable securities, dealer values, operating data and general market conditions to determine fair value. Valuation models utilize various inputs such as commodity, interest rate and, to a lesser degree, volatility and credit that include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in inactive markets, market corroborated inputs (i.e. inputs derived principally from, or correlated to, observable market data) and other observable inputs for the asset or liability.

For commercial activities, exchange-traded derivatives, namely futures contracts, are generally fair valued based on unadjusted quoted prices in active markets and are classified as Level 1. Level 2 inputs primarily consist of OTC broker quotes in moderately active or less active markets, as well as exchange-traded derivatives where there is insufficient market liquidity to warrant inclusion in Level 1. Management verifies price curves using these broker quotes and classifies these fair values within Level 2 when substantially all of the fair value can be corroborated. Management typically obtains multiple broker quotes, which are nonbinding in nature but are based on recent trades in the marketplace. When multiple broker quotes are obtained, the quoted bid and ask prices are averaged. In certain circumstances, a broker quote may be discarded if it is a clear outlier. Management uses a historical correlation analysis between the broker quoted location and the illiquid locations. If the points are highly correlated, these locations are included within Level 2 as well. Certain OTC and bilaterally executed derivative instruments are executed in less active markets with a lower availability of pricing information. Illiquid transactions, complex structured transactions, FTRs and counterparty credit risk may require nonmarket-based inputs. Some of these inputs may be internally developed or extrapolated and utilized to estimate fair value. When such inputs have a significant impact on the measurement of fair value, the instrument is categorized as Level 3. The main driver of contracts being classified as Level 3 is the inability to substantiate energy price curves in the market. A portion of the Level 3 instruments have been economically hedged which limits potential earnings volatility.

AEP utilizes its trustee’s external pricing service to estimate the fair value of the underlying investments held in the nuclear trusts. AEP’s investment managers review and validate the prices utilized by the trustee to determine fair value. AEP’s management performs its own valuation testing to verify the fair values of the securities. AEP receives audit reports of the trustee’s operating controls and valuation processes.

Assets in the nuclear trusts, cash and cash equivalents, other temporary investments restricted cash for securitized funding are classified using the following methods. Equities are classified as Level 1 holdings if they are actively traded on exchanges. Items classified as Level 1 are investments in money market funds, fixed income and equity mutual funds and equity securities. They are valued based on observable inputs, primarily unadjusted quoted prices in active markets for identical assets. Items classified as Level 2 are primarily investments in individual fixed income securities. Fixed income securities generally do not trade on exchanges and do not have an official closing price but their valuation inputs are based on observable market data. Pricing vendors calculate bond valuations using financial models and matrices. The models use observable inputs including yields on benchmark securities, quotes by securities brokers, rating agency actions, discounts or premiums on securities compared to par prices, changes in yields for U.S. Treasury securities, corporate actions by bond issuers, prepayment schedules and histories, economic events and, for certain securities, adjustments to yields to reflect changes in the rate of inflation. Other securities with model-derived valuation inputs that are observable are also classified as Level 2 investments. Investments with unobservable valuation inputs are classified as Level 3 investments.

Fair Value Measurements of Long-term Debt (Applies to all Registrants)

The fair values of Long-term Debt are based on quoted market prices, without credit enhancements, for the same or similar issues and the current interest rates offered for instruments with similar maturities classified as Level 2 measurement inputs. These instruments are not marked-to-market. The estimates presented are not necessarily indicative of the amounts that could be realized in a current market exchange. The fair value of AEP's Equity Units (Level 1) are valued based on publicly traded securities issued by AEP.

The book values and fair values of Long-term Debt are summarized in the following table:

Company	September 30, 2023		December 31, 2022	
	Book Value	Fair Value	Book Value	Fair Value
(in millions)				
AEP (a)	\$ 39,489.1	\$ 33,559.8	\$ 36,801.0	\$ 32,915.9
AEP Texas	5,926.7	4,963.8	5,657.8	5,045.8
AEPTCo	5,473.7	4,270.8	4,782.8	3,940.5
APCo	5,587.3	4,901.4	5,410.5	5,079.2
I&M	3,443.6	2,920.6	3,260.8	2,929.0
OPCo	3,366.2	2,645.2	2,970.3	2,516.6
PSO	2,384.2	1,942.5	1,912.8	1,635.8
SWEPCo	3,646.2	2,944.8	3,391.6	2,870.9

- (a) The fair value amounts include debt related to AEP's Equity Units and had a fair value of \$0 and \$877 million as of September 30, 2023 and December 31, 2022, respectively. See "Equity Units" section of Note 12 for additional information.

Fair Value Measurements of Other Temporary Investments and Restricted Cash (Applies to AEP)

Other Temporary Investments include marketable securities that management intends to hold for less than one year and investments by AEP's protected cell of EIS.

The following is a summary of Other Temporary Investments and Restricted Cash:

	September 30, 2023			
Other Temporary Investments and Restricted Cash	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
	(in millions)			
Restricted Cash (a)	\$ 53.8	\$ —	\$ —	\$ 53.8
Other Cash Deposits	13.4	—	—	13.4
Fixed Income Securities – Mutual Funds (b)	170.4	—	(10.4)	160.0
Equity Securities – Mutual Funds	15.0	22.6	—	37.6
Total Other Temporary Investments and Restricted Cash	\$ 252.6	\$ 22.6	\$ (10.4)	\$ 264.8

Other Temporary Investments and Restricted Cash	December 31, 2022			
	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
	(in millions)			
Restricted Cash (a)	\$ 47.1	\$ —	\$ —	\$ 47.1
Other Cash Deposits	9.0	—	—	9.0
Fixed Income Securities – Mutual Funds (b)	152.4	—	(8.3)	144.1
Equity Securities – Mutual Funds	15.1	19.4	—	34.5
Total Other Temporary Investments and Restricted Cash	\$ 223.6	\$ 19.4	\$ (8.3)	\$ 234.7

(a) Primarily represents amounts held for the repayment of debt.

(b) Primarily short and intermediate maturities which may be sold and do not contain maturity dates.

The following table provides the activity for fixed income and equity securities within Other Temporary Investments:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2023	2022	2023	2022
	(in millions)			
Proceeds from Investment Sales	\$ 0.8	\$ —	\$ 0.8	\$ 15.0
Purchases of Investments	14.6	11.8	16.9	13.4
Gross Realized Gains on Investment Sales	0.3	—	0.3	3.6
Gross Realized Losses on Investment Sales	—	—	—	0.5

Fair Value Measurements of Trust Assets for Decommissioning and SNF Disposal (Applies to AEP and I&M)

Nuclear decommissioning and SNF trust funds represent funds that regulatory commissions allow I&M to collect through rates to fund future decommissioning and SNF disposal liabilities. By rules or orders, the IURC, the MPSC and the FERC established investment limitations and general risk management guidelines. In general, limitations include:

- Acceptable investments (rated investment grade or above when purchased).
- Maximum percentage invested in a specific type of investment.
- Prohibition of investment in obligations of AEP, I&M or their affiliates.
- Withdrawals permitted only for payment of decommissioning costs and trust expenses.

I&M maintains trust funds for each regulatory jurisdiction. Regulatory approval is required to withdraw decommissioning funds. These funds are managed by an external investment manager that must comply with the guidelines and rules of the applicable regulatory authorities. The trust assets are invested to optimize the net of tax earnings of the trust giving consideration to liquidity, risk, diversification and other prudent investment objectives.

I&M records securities held in these trust funds in Spent Nuclear Fuel and Decommissioning Trusts on its balance sheets. I&M records these securities at fair value. I&M classifies debt securities in the trust funds as available-for-sale due to their long-term purpose.

Other-than-temporary impairments for investments in debt securities are considered realized losses as a result of securities being managed by an external investment management firm. The external investment management firm makes specific investment decisions regarding the debt and equity investments held in these trusts and generally intends to sell debt securities in an unrealized loss position as part of a tax optimization strategy. Impairments

reduce the cost basis of the securities which will affect any future unrealized gain or realized gain or loss due to the adjusted cost of investment. I&M records unrealized gains, unrealized losses and other-than-temporary impairments from securities in these trust funds as adjustments to the regulatory liability account for the nuclear decommissioning trust funds and to regulatory assets or liabilities for the SNF disposal trust funds in accordance with their treatment in rates. Consequently, changes in fair value of trust assets do not affect earnings or AOCI.

The following is a summary of nuclear trust fund investments:

	September 30, 2023				December 31, 2022			
	Fair Value	Gross Unrealized Gains	Gross Unrealized Losses	Other-Than-Temporary Impairments	Fair Value	Gross Unrealized Gains	Gross Unrealized Losses	Other-Than-Temporary Impairments
	(in millions)							
Cash and Cash Equivalents	\$ 20.5	\$ —	\$ —	\$ —	\$ 21.2	\$ —	\$ —	\$ —
Fixed Income Securities:								
United States Government	1,204.7	0.6	(30.8)	(38.5)	1,123.8	11.8	(14.9)	(18.8)
Corporate Debt	136.8	0.4	(12.4)	(5.3)	61.6	0.7	(7.7)	(9.6)
State and Local Government	3.2	—	—	—	3.3	0.1	—	(0.1)
Subtotal Fixed Income Securities	1,344.7	1.0	(43.2)	(43.8)	1,188.7	12.6	(22.6)	(28.5)
Equity Securities - Domestic	2,174.5	1,620.5	(1.9)	—	2,131.3	1,483.7	(6.4)	—
Spent Nuclear Fuel and Decommissioning Trusts	<u>\$ 3,539.7</u>	<u>\$ 1,621.5</u>	<u>\$ (45.1)</u>	<u>\$ (43.8)</u>	<u>\$ 3,341.2</u>	<u>\$ 1,496.3</u>	<u>\$ (29.0)</u>	<u>\$ (28.5)</u>

The following table provides the securities activity within the decommissioning and SNF trusts:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2023	2022	2023	2022
	(in millions)			
Proceeds from Investment Sales	\$ 933.0	\$ 588.5	\$ 2,139.3	\$ 1,818.4
Purchases of Investments	949.5	601.6	2,182.8	1,854.8
Gross Realized Gains on Investment Sales	36.8	24.6	91.6	41.3
Gross Realized Losses on Investment Sales	7.7	8.4	20.0	33.5

The base cost of fixed income securities was \$1.4 billion and \$1.2 billion as of September 30, 2023 and December 31, 2022, respectively. The base cost of equity securities was \$556 million and \$654 million as of September 30, 2023 and December 31, 2022, respectively.

The fair value of fixed income securities held in the nuclear trust funds, summarized by contractual maturities, as of September 30, 2023 was as follows:

Fair Value of Fixed Income Securities	
(in millions)	
Within 1 year	\$ 393.6
After 1 year through 5 years	504.4
After 5 years through 10 years	188.6
After 10 years	258.1
Total	<u>\$ 1,344.7</u>

Fair Value Measurements of Financial Assets and Liabilities

The following tables set forth, by level within the fair value hierarchy, the Registrants' financial assets and liabilities that were accounted for at fair value on a recurring basis. As required by the accounting guidance for "Fair Value Measurements and Disclosures," financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. Management's assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the valuation of fair value assets and liabilities and their placement within the fair value hierarchy levels. There have not been any significant changes in management's valuation techniques.

- (a) Amounts in “Other” column primarily represent cash deposits in bank accounts with financial institutions or third-parties. Level 1 and Level 2 amounts primarily represent investments in money market funds.
- (b) Amounts represent publicly traded equity securities and equity-based mutual funds.
- (c) Amounts in “Other” column primarily represent counterparty netting of risk management and hedging contracts and associated cash collateral under the accounting guidance for “Derivatives and Hedging.”
- (d) The September 30, 2023 maturities of the net fair value of risk management contracts prior to cash collateral, assets/(liabilities), were as follows: Level 1 matures \$(4) million in 2023 and \$(9) million in periods 2024-2026; Level 2 matures \$64 million in periods 2024-2026, \$10 million in periods 2027-2028 and \$1 million in periods 2029-2033; Level 3 matures \$37 million in 2023, \$118 million in periods 2024-2026, \$18 million in periods 2027-2028 and \$(9) million in periods 2029-2033. Risk management commodity contracts are substantially comprised of power contracts.
- (e) Amounts in “Other” column primarily represent accrued interest receivables from financial institutions. Level 1 amounts primarily represent investments in money market funds.
- (f) The December 31, 2022 maturities of the net fair value of risk management contracts prior to cash collateral, assets/(liabilities), were as follows: Level 1 matures \$(7) million in 2023; Level 2 matures \$182 million in 2023, \$134 million in periods 2024-2026, \$10 million in periods 2027-2028 and \$1 million in periods 2029-2033; Level 3 matures \$128 million in 2023, \$6 million in periods 2024-2026, \$6 million in periods 2027-2028 and \$(5) million in periods 2029-2033. Risk management commodity contracts are substantially comprised of power contracts.
- (g) Substantially comprised of power contracts for the Registrant Subsidiaries.

The following tables set forth a reconciliation of changes in the fair value of net trading derivatives classified as Level 3 in the fair value hierarchy:

Three Months Ended September 30, 2023	AEP	APCo	I&M	OPCo	PSO	SWEPCo
	(in millions)

(a) Included in revenues on the statements of income.

(b) Represents the change in fair value between the beginning of the reporting period and the settlement of the risk management commodity contract.

(c) Included in cash flow hedges on the statements of comprehensive income.

(d) Represents existing assets or liabilities that were previously categorized as Level 2.

(e) Transfers are recognized based on their value at the beginning of the reporting period that the transfer occurred.

(f) Relates to the net gains (losses) of those contracts that are not reflected on the statements of income. These changes in fair value are recorded as regulatory liabilities for net gains and as regulatory assets for net losses or accounts payable.

The following tables quantify the significant unobservable inputs used in developing the fair value of Level 3 positions:

**Significant Unobservable Inputs
September 30, 2023**

Company	Type of Input	Fair Value		Valuation Technique	Significant Unobservable Input	Input/Range		
		Assets	Liabilities			Low	High	Weighted Average (c)
		(in millions)						
AEP	Energy Contracts	\$ 224.3	\$ 147.7	Discounted Cash Flow	Forward Market Price (a)	\$ 5.98	\$ 137.52	\$ 45.43

SWEPCo	FTRs	17.4	0.7	Discounted Cash Flow	Forward Market Price (a)	(17.92)	2.04	(4.42)

December 31, 2022

Company	Type of Input	Fair Value		Valuation Technique	Significant Unobservable Input (a)	Input/Range		
		Assets	Liabilities			Low	High	Weighted Average (c)
		(in millions)						
AEP	Energy Contracts	\$ 204.0	\$ 167.4	Discounted Cash Flow	Forward Market Price	\$ 2.91	\$ 187.34	\$ 49.14
AEP	FTRs	137.1	13.3	Discounted Cash Flow	Forward Market Price	(36.45)	20.72	1.18
APCo	FTRs	69.4	0.3	Discounted Cash Flow	Forward Market Price	(2.82)	18.88	3.89
I&M	FTRs	5.3	0.7	Discounted Cash Flow	Forward Market Price	0.16	18.79	1.23
OPCo	Energy Contracts	—	40.0	Discounted Cash Flow	Forward Market Price	2.91	187.34	48.76
PSO	FTRs	24.0	0.3	Discounted Cash Flow	Forward Market Price	(36.45)	3.40	(7.55)
SWEPCo	FTRs	14.6	0.4	Discounted Cash Flow	Forward Market Price	(36.45)	3.40	(7.55)

- (a) Represents market prices in dollars per MWh.
(b) Represents market prices in dollars per MMBtu.
(c) The weighted average is the product of the forward market price of the underlying commodity and volume weighted by term.

The following table provides the measurement uncertainty of fair value measurements to increases (decreases) in significant unobservable inputs related to Energy Contracts and FTRs for the Registrants as of September 30, 2023 and December 31, 2022:

Significant Unobservable Input	Position	Change in Input	Impact on Fair Value Measurement
Forward Market Price	Buy	Increase (Decrease)	Higher (Lower)
Forward Market Price	Sell	Increase (Decrease)	Lower (Higher)

11. INCOME TAXES

The disclosures in this note apply to all Registrants unless indicated otherwise.

Effective Tax Rates (ETR)

The Registrants' interim ETR reflect the estimated annual ETR for 2023 and 2022, adjusted for tax expense associated with certain discrete items.

The Registrants include the amortization of Excess ADIT not subject to normalization requirements in the annual estimated ETR when regulatory proceedings instruct the Registrants to provide the benefits of Tax Reform to customers over multiple interim periods. Certain regulatory proceedings instruct the Registrants to provide the benefits of Tax Reform to customers in a single period (e.g. by applying the Excess ADIT not subject to normalization requirements against an existing regulatory asset balance) and in these circumstances, the Registrants recognize the tax benefit discretely in the period recorded. The annual amount of Excess ADIT approved by the Registrant's regulatory commissions may not impact the ETR ratably during each interim period due to the variability of pretax book income between interim periods and the application of an annual estimated ETR.

The ETR for each of the Registrants are included in the following tables:

	Three Months Ended September 30, 2023

Federal and State Income Tax Audit Status

The statute of limitations for the IRS to examine AEP and subsidiaries originally filed federal return has expired for tax years 2016 and earlier. AEP has agreed to extend the statute of limitations on the 2017-2019 tax returns to October 31, 2024, to allow time for the current IRS audit to be completed including a refund claim approval by the Congressional Joint Committee on Taxation. The statute of limitations for the 2020 return is set to naturally expire in October 2024 as well.

The current IRS audit and associated refund claim evolved from a net operating loss carryback to 2015 that originated in the 2017 return. AEP has received and agreed to immaterial IRS proposed adjustments on the 2017 tax return. The exam is nearly complete, and AEP is currently working with the IRS to submit the refund claim to the Congressional Joint Committee on Taxation for resolution and final approval.

AEP and subsidiaries file income tax returns in various state and local jurisdictions. These taxing authorities routinely examine the tax returns, and AEP and subsidiaries are currently under examination in several state and local jurisdictions. Generally, the statutes of limitations have expired for tax years prior to 2017. In addition, management is monitoring and continues to evaluate the potential impact of federal legislation and corresponding state conformity.

Federal Legislation

In August 2022, President Biden signed H.R. 5376 into law, commonly known as the Inflation Reduction Act of 2022, or IRA. Most notably this budget reconciliation legislation creates a 15% minimum tax on adjusted financial statement income (Corporate Alternative Minimum Tax or CAMT), extends and increases the value of PTCs and ITCs, adds a nuclear and clean hydrogen PTC, an energy storage ITC and allows the sale or transfer of tax credits to third parties for cash. As further significant guidance from Treasury and the IRS is expected on the tax provisions in the IRA, AEP will continue to monitor any issued guidance and evaluate the impact on future net income, cash flows and financial condition.

In December 2022, the IRS released Notice 2023-7, which provided initial CAMT guidance that AEP can begin to rely on in 2023. Notably, the interim guidance in Notice 2023-7 confirmed the CAMT depreciation adjustment includes tax depreciation that is capitalized to inventory under §263A and recovered as part of cost of goods sold, providing significant relief to AEP's potential CAMT exposure. In September 2023, the IRS released Notice 2023-64, which clarifies and supplements items in Notice 2023-7 and stated that additional guidance in the form of proposed regulations is expected. AEP will continue to monitor and assess any additional guidance.

AEP and subsidiaries expect to be applicable corporations for purposes of the CAMT beginning in 2023. CAMT cash taxes are expected to be partially offset by regulatory recovery, the utilization of tax credits and additionally the cash inflow generated by the sale of tax credits. The sale of tax credits are presented in the operating section of the statements of cash flows consistent with the presentation of cash taxes paid. AEP presents the loss on sale of tax credits through income tax expense.

In June 2023, the IRS issued temporary regulations related to the transfer of tax credits. In the third quarter of 2023, AEP, on behalf of PSO and SWEPCo, entered into a transferability agreement with a nonaffiliated party to sell PTCs resulting in cash proceeds of approximately \$0 million expected in the fourth quarter of 2023. AEP expects to continue to explore the ability to efficiently monetize its tax credits through third party transferability agreements.

12. FINANCING ACTIVITIES

The disclosures in this note apply to all Registrants, unless indicated otherwise.

Common Stock (Applies to AEP)

At-the-Market (ATM) Program

In 2020, AEP filed a prospectus supplement and executed an Equity Distribution Agreement, pursuant to which AEP may sell, from time to time, up to an aggregate of \$1 billion of its common stock through an ATM offering program, including an equity forward sales component. The compensation paid to the selling agents by AEP may be up to 2% of the gross offering proceeds of the shares. There were no issuances under the ATM program for the nine months ended September 30, 2023.

Long-term Debt Outstanding (Applies to AEP)

The following table details long-term debt outstanding, net of issuance costs and premiums or discounts:

Type of Debt	September 30, 2023		December 31, 2022	
	(in millions)			
Senior Unsecured Notes	\$	32,881.6	\$	30,174.8
Pollution Control Bonds		1,771.0		1,770.2
Notes Payable		141.5		269.7
Securitization Bonds		407.0		487.8
Spent Nuclear Fuel Obligation (a)		296.3		285.6
Junior Subordinated Notes (b)		2,386.6		2,381.3
Other Long-term Debt		1,605.1		1,431.6
Total Long-term Debt Outstanding		39,489.1		36,801.0
Long-term Debt Due Within One Year		2,773.6		2,486.4
Long-term Debt	\$	36,715.5	\$	34,314.6

(a) Pursuant to the Nuclear Waste Policy Act of 1982, I&M, a nuclear licensee, has an obligation to the United States Department of Energy for SNF disposal. The obligation includes a one-time fee for nuclear fuel consumed prior to April 7, 1983. Trust fund assets related to this obligation were \$345 million and \$330 million as of September 30, 2023 and December 31, 2022, respectively, and are included in Spent Nuclear Fuel and Decommissioning Trusts on the balance sheets.

(b) See "Equity Units" section below for additional information.

Long-term Debt Activity

Long-term debt and other securities issued, retired and principal payments made during the first nine months of 2023 are shown in the following tables:

Company	Type of Debt	Principal Amount (a)	Interest Rate	Due Date
Issuances:		(in millions)	(%)	
AEP	Senior Unsecured Notes	\$ 850.0	5.63	2033
AEPTCo	Senior Unsecured Notes	700.0	5.40	2053
AEP Texas	Pollution Control Bonds	60.0	4.25	2030
AEP Texas	Senior Unsecured Notes	450.0	5.40	2033

SWEPCo	Notes Payable	30.9	4.58	2032
SWEPCo	Other Long-Term Debt	38.2	4.68	2028
<i>Non-Registrant:</i>				
KPCo	Pollution Control Bonds	65.0	2.35	2023
Transource Energy	Senior Unsecured Notes	2.6	2.75	2050
Total Retirements and Principal Payments		<u>\$ 1,353.3</u>		

Long-term Debt Subsequent Event

In October 2023, I&M retired \$4 million of Notes Payable related to DCC Fuel.

In October 2023, Transource Energy issued \$3.5 million of variable rate Other Long-term Debt due in 2025.

In November 2023, AEP retired \$450 million of Senior Unsecured Notes.

Equity Units (Applies to AEP)

2020 Equity Units

In August 2020, AEP issued 17 million Equity Units initially in the form of corporate units, at a stated amount of \$50 per unit, for a total stated amount of \$850 million. Net proceeds from the issuance were approximately \$833 million. The proceeds were used to support AEP's overall capital expenditure plans.

Each corporate unit represents a 1/20 undivided beneficial ownership interest in \$1,000 principal amount of AEP's 1.30% Junior Subordinated Notes due in 2025 and a forward equity purchase contract which settled after three years in August 2023. In June 2023, AEP successfully remarketed the Junior Subordinated Notes on behalf of holders of the corporate units. AEP did not receive any proceeds from the remarketing which were used to purchase a portfolio of treasury securities that matured on August 14, 2023. On August 15, 2023, the proceeds from the treasury portfolio were used to settle the forward equity purchase contract with AEP. The interest rate on the Junior Subordinated Notes was reset to 5.699% with the maturity remaining in 2025. In August 2023, AEP issued 10,048,668 shares of AEP common stock and received proceeds totaling \$850 million under the settlement of the forward equity purchase contract. AEP common stock held in treasury was used to settle the forward equity purchase contract. The proceeds were used to pay down debt balances and support AEP's overall capital expenditure plans.

Debt Covenants (Applies to AEP and AEPTCo)

Covenants in AEPTCo's note purchase agreements and indenture limit the amount of contractually-defined priority debt (which includes a further sub-limit of \$50 million of secured debt) to 10% of consolidated tangible net assets. AEPTCo's contractually-defined priority debt was 0.9% of consolidated tangible net assets as of September 30, 2023. The method for calculating the consolidated tangible net assets is contractually-defined in the note purchase agreements.

Dividend Restrictions

Utility Subsidiaries' Restrictions

Parent depends on its utility subsidiaries to pay dividends to shareholders. AEP utility subsidiaries pay dividends to Parent provided funds are legally available. Various financing arrangements and regulatory requirements may impose certain restrictions on the ability of the subsidiaries to transfer funds to Parent in the form of dividends.

All of the dividends declared by AEP's utility subsidiaries that provide transmission or local distribution services are subject to a Federal Power Act requirement that prohibits the payment of dividends out of capital accounts in certain circumstances; payment of dividends is generally allowed out of retained earnings. The Federal Power Act also creates a reserve on earnings attributable to hydroelectric generation plants. Because of their ownership of such plants, this reserve applies to APCo and I&M.

Certain AEP subsidiaries have credit agreements that contain covenants that limit their debt to capitalization ratio to 67.5%. The method for calculating outstanding debt and capitalization is contractually-defined in the credit agreements.

The Federal Power Act restriction does not limit the ability of the AEP subsidiaries to pay dividends out of retained earnings.

Parent Restrictions (Applies to AEP)

The holders of AEP's common stock are entitled to receive the dividends declared by the Board of Directors provided funds are legally available for such dividends. Parent's income primarily derives from common stock equity in the earnings of its utility subsidiaries.

Pursuant to the leverage restrictions in credit agreements, AEP must maintain a percentage of debt to total capitalization at a level that does not exceed 67.5%. The method for calculating outstanding debt and capitalization is contractually-defined in the credit agreements.

Corporate Borrowing Program - AEP System (Applies to all Registrant Subsidiaries)

The AEP System uses a corporate borrowing program to meet the short-term borrowing needs of AEP's subsidiaries. The corporate borrowing program includes a Utility Money Pool, which funds AEP's utility subsidiaries; a Nonutility Money Pool, which funds certain AEP nonutility subsidiaries; and direct borrowing from AEP. The AEP System Utility Money Pool operates in accordance with the terms and conditions of its agreement filed with the FERC. The amounts of outstanding loans to (borrowings from) the Utility Money Pool as of September 30, 2023 and December 31, 2022 are included in Advances to Affiliates and Advances from Affiliates, respectively, on the Registrant Subsidiaries' balance sheets. The Utility Money Pool participants' activity and corresponding authorized borrowing limits for the nine months ended September 30, 2023 are described in the following table:

Company	Maximum Borrowings from the Utility Money Pool	Maximum Loans to the Utility Money Pool	Average Borrowings from the Utility Money Pool	Average Loans to the Utility Money Pool	Net Loans to (Borrowings from) the Utility Money Pool as of September 30, 2023	Authorized Short-term Borrowing Limit
(in millions)						
AEP Texas	\$ 477.5	\$ 42.0	\$ 250.4	\$ 42.0	\$ 42.0	\$ 500.0
AEPTCo	471.3	309.4	134.3	76.0	7.2	820.0 (a)
APCo	388.6	19.8	280.8	19.0	(183.2)	500.0
I&M	475.3	112.2	126.0	49.3	21.2	500.0
OPCo	485.7	64.7	207.1	40.2	(113.3)	500.0
PSO	375.0	121.5	106.3	53.9	9.2	400.0
SWEPCo	401.6 (b)	25.8	165.3	16.5	(48.9)	400.0

(a) Amount represents the combined authorized short-term borrowing limit the State Transcos have from FERC or state regulatory commissions.

(b) SWEPCo's maximum borrowings from the Utility Money Pool exceeded the authorized short-term borrowing limit by \$1.6 million on March 15, 2023. On March 16, 2023, SWEPCo's borrowings from the Utility Money Pool were reduced below the \$400 million authorized limit and borrowings have continued to remain below the authorized limit.

The activity in the above table does not include short-term lending activity of certain AEP nonutility subsidiaries. AEP Texas' wholly-owned subsidiary, AEP Texas North Generation Company, LLC and SWEPCo's wholly-owned subsidiary, Mutual Energy SWEPCo, LLC participate in the Nonutility Money Pool. The amounts of outstanding loans to the Nonutility Money Pool as of September 30, 2023 and December 31, 2022 are included in Advances to Affiliates on the subsidiaries' balance sheets. The Nonutility Money Pool participants' activity for the nine months ended September 30, 2023 is described in the following table:

Company	Maximum Loans to the Nonutility Money Pool	Average Loans to the Nonutility Money Pool	Loans to the Nonutility Money Pool as of September 30, 2023
(in millions)			
AEP Texas	\$ 7.0	\$ 6.9	\$ 7.0
SWEPCo	2.7	2.3	2.7

AEP has a direct financing relationship with AEPTCo to meet its short-term borrowing needs. The amounts of borrowings from AEP as of September 30, 2023 and December 31, 2022 are included in Advances from Affiliates on AEPTCo's balance sheets. AEPTCo's direct borrowing and lending activity with AEP and corresponding authorized borrowing limit for the nine months ended September 30, 2023 are described in the following table:

Maximum Borrowings from AEP	Maximum Loans to AEP	Average Borrowings from AEP	Average Loans to AEP	Borrowings from AEP as of September 30, 2023	Loans to AEP as of September 30, 2023	Authorized Short-term Borrowing Limit
(in millions)						
\$ 37.9	\$ 158.1	\$ 3.0	\$ 67.5	\$ 33.4	\$ —	\$ 50.0 (a)

(a) Amount represents the combined authorized short-term borrowing limit the State Transcos have from FERC or state regulatory commissions.

The maximum and minimum interest rates for funds either borrowed from or loaned to the Utility Money Pool are summarized in the following table:

	Nine Months Ended September 30,	
	2023	2022
Maximum Interest Rate	5.81 %	3.39 %
Minimum Interest Rate	4.66 %	0.10 %

The average interest rates for funds borrowed from and loaned to the Utility Money Pool are summarized for all Registrant Subsidiaries in the following table:

Company	Average Interest Rate for Funds Borrowed from the Utility Money Pool for Nine Months Ended September 30,		Average Interest Rate for Funds Loaned to the Utility Money Pool for Nine Months Ended September 30,	
	2023	2022	2023	2022
AEP Texas	5.44 %	0.90 %	5.70 %	1.82 %
AEPTCo	5.29 %	1.03 %	5.52 %	2.14 %
APCo	5.47 %	1.39 %	5.47 %	2.13 %
I&M	5.13 %	1.38 %	5.54 %	1.46 %
OPCo	5.37 %	1.81 %	5.60 %	1.22 %
PSO	5.48 %	1.70 %	5.24 %	0.75 %
SWEPCo	5.25 %	1.67 %	5.72 %	0.55 %

Maximum, minimum and average interest rates for funds loaned to the Nonutility Money Pool are summarized in the following table:

Company	Nine Months Ended September 30, 2023			Nine Months Ended September 30, 2022		
	Maximum Interest Rate for Funds Loaned to the Nonutility Money Pool	Minimum Interest Rate for Funds Loaned to the Nonutility Money Pool	Average Interest Rate for Funds Loaned to the Nonutility Money Pool	Maximum Interest Rate for Funds Loaned to the Nonutility Money Pool	Minimum Interest Rate for Funds Loaned to the Nonutility Money Pool	Average Interest Rate for Funds Loaned to the Nonutility Money Pool
AEP Texas	5.81 %	4.66 %	5.47 %	3.39 %	0.46 %	1.51 %
SWEPCo	5.81 %	4.66 %	5.49 %	3.39 %	0.46 %	1.52 %

AEP TCo's maximum, minimum and average interest rates for funds either borrowed from or loaned to AEP are summarized in the following table:

Nine Months Ended September 30,	Maximum Interest Rate for Funds Borrowed from AEP	Minimum Interest Rate for Funds Borrowed from AEP	Maximum Interest Rate for Funds Loaned to AEP	Minimum Interest Rate for Funds Loaned to AEP	Average Interest Rate for Funds Borrowed from AEP	Average Interest Rate for Funds Loaned to AEP
2023	5.81 %	4.53 %	5.81 %	4.53 %	5.43 %	5.46 %
2022	3.39 %	0.46 %	3.37 %	0.46 %	1.56 %	1.38 %

Short-term Debt (Applies to AEP and SWEPCo)

Outstanding short-term debt was as follows:

Company	Type of Debt	September 30, 2023		December 31, 2022	
		Outstanding Amount	Interest Rate (a)	Outstanding Amount	Interest Rate (a)
(dollars in millions)					
AEP	Securitized Debt for Receivables (b)	\$ 900.0	5.60%	\$ 750.0	4.67%
AEP	Commercial Paper	1,826.5	5.64%	2,862.2	4.80%
AEP	Term Loan	—	—%	150.0	5.17%
AEP	Term Loan	—	—%	125.0	5.17%
AEP	Term Loan	—	—%	100.0	5.23%
AEP	Term Loan	—	—%	125.0	4.87%
SWEPCo	Notes Payable	3.9	7.67%	—	—%
	Total Short-term Debt	\$ 2,730.4		\$ 4,112.2	

(a) Weighted-average rate as of September 30, 2023 and December 31, 2022, respectively.

(b) Amount of securitized debt for receivables as accounted for under the "Transfers and Servicing" accounting guidance.

Credit Facilities

For a discussion of credit facilities, see "Letters of Credit" section of Note 5.

Securitized Accounts Receivables – AEP Credit (Applies to AEP)

AEP Credit has a receivables securitization agreement with bank conduits. Under the securitization agreement, AEP Credit receives financing from the bank conduits for the interest in the receivables AEP Credit acquires from affiliated utility subsidiaries. These securitized transactions allow AEP Credit to repay its outstanding debt obligations, continue to purchase the operating companies' receivables and accelerate AEP Credit's cash collections.

AEP Credit's receivables securitization agreement provides a commitment of \$900 million from bank conduits to purchase receivables. The agreement was amended in August 2023 to increase the commitment from \$750 million and expires in September 2025. As of September 30, 2023, the affiliated utility subsidiaries were in compliance with all requirements under the agreement.

Accounts receivable information for AEP Credit was as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2023	2022	2023	2022
	(dollars in millions)			
Effective Interest Rates on Securitization of Accounts Receivable	5.55 %	2.25 %	5.23 %	1.16 %
Net Uncollectible Accounts Receivable Written-Off	\$ 8.8	\$ 9.5	\$ 22.9	\$ 23.1

	September 30, 2023	December 31, 2022
	(in millions)	
Accounts Receivable Retained Interest and Pledged as Collateral Less Uncollectible Accounts	\$ 1,257.0	\$ 1,167.7
Short-term— Securitized Debt of Receivables	900.0	750.0
Delinquent Securitized Accounts Receivable	59.5	44.2
Bad Debt Reserves Related to Securitization	42.2	39.7
Unbilled Receivables Related to Securitization	301.8	360.9

AEP Credit's delinquent customer accounts receivable represent accounts greater than 30 days past due.

Securitized Accounts Receivables – AEP Credit (Applies to all Registrant Subsidiaries except AEP Texas and AEPTCo)

Under this sale of receivables arrangement, the Registrant Subsidiaries sell, without recourse, certain of their customer accounts receivable and accrued unbilled revenue balances to AEP Credit and are charged a fee based on AEP Credit's financing costs, administrative costs and uncollectible accounts experience for each Registrant Subsidiary's receivables. APCo does not have regulatory authority to sell its West Virginia accounts receivable. KPCo ceased selling accounts receivable to AEP Credit in the first quarter of 2022, based on the expected sale to Liberty. As a result, in the first quarter of 2022, KPCo recorded an allowance for uncollectible accounts on its balance sheet for those receivables no longer sold to AEP Credit. In the third quarter of 2023, KPCo resumed selling accounts receivable to AEP Credit, due to the termination of the sale to Liberty, and the balance in KPCo's allowance for uncollectible accounts was transferred to AEP Credit. The costs of customer accounts receivable sold are reported in Other Operation expense on the Registrant Subsidiaries' statements of income. The Registrant Subsidiaries manage and service their customer accounts receivable, which are sold to AEP Credit. AEP Credit securitizes the eligible receivables for the operating companies and retains the remainder.

The amount of accounts receivable and accrued unbilled revenues under the sale of receivables agreements were:

Company	September 30, 2023	December 31, 2022
	(in millions)	
APCo	\$ 170.5	\$ 194.4
I&M	176.2	166.9
OPCo	479.3	478.6
PSO	211.5	155.5
SWEPCo	210.2	194.0

The fees paid to AEP Credit for customer accounts receivable sold were:

Company	Three Months Ended September 30,		Nine Months Ended September 30,	
	2023	2022	2023	2022
	(in millions)			
APCo	\$ 4.1	\$ 2.8	\$ 13.3	\$ 5.6
I&M	4.4	2.8	12.2	6.5
OPCo	7.4	7.3	22.3	22.2
PSO	4.6	2.4	11.3	4.6
SWEPCo	5.2	3.2	13.9	6.0

The proceeds on the sale of receivables to AEP Credit were:

Company	Three Months Ended September 30,		Nine Months Ended September 30,	
	2023	2022	2023	2022
	(in millions)			
APCo	\$ 451.6	\$ 360.4	\$ 1,372.7	\$ 1,114.9
I&M	553.3	558.5	1,575.9	1,574.3
OPCo	850.3	874.1	2,518.6	2,284.0
PSO	633.8	588.5	1,510.3	1,380.4
SWEPCo	558.4	593.6	1,456.5	1,425.3

13. VARIABLE INTEREST ENTITIES

The disclosures in this note apply to AEP unless indicated otherwise.

The accounting guidance for “Variable Interest Entities” is a consolidation model that considers if a company has a variable interest in a VIE. A VIE is a legal entity that possesses any of the following conditions: the entity’s equity at risk is not sufficient to permit the legal entity to finance its activities without additional subordinated financial support, equity owners are unable to direct the activities that most significantly impact the legal entity’s economic performance (or they possess disproportionate voting rights in relation to the economic interest in the legal entity), or the equity owners lack the obligation to absorb the legal entity’s expected losses or the right to receive the legal entity’s expected residual returns. Entities are required to consolidate a VIE when it is determined that they have a controlling financial interest in a VIE and therefore, are the primary beneficiary of that VIE, as defined by the accounting guidance for “Variable Interest Entities.” In determining whether AEP is the primary beneficiary of a VIE, management considers whether AEP has the power to direct the most significant activities of the VIE and is obligated to absorb losses or receive the expected residual returns that are significant to the VIE.

AEP holds ownership interests in businesses with varying ownership structures. AEP has not provided material financial or other support that was not previously contractually required to any of its consolidated VIEs. If an entity is determined not to be a VIE, or if the entity is determined to be a VIE and AEP is not deemed to be the primary beneficiary, the entity is accounted for under the equity method of accounting.

Consolidated Variable Interests Entities

The Annual Report on Form 10-K for the year ended December 31, 2022 includes a detailed discussion of the Registrants’ consolidated VIEs.

The balances below represent the assets and liabilities of consolidated VIEs. These balances include intercompany transactions that are eliminated upon consolidation.

Significant Variable Interests in Non-Consolidated VIEs and Significant Equity Method Investments

The Annual Report on Form 10-K for the year ended December 31, 2022 includes a detailed discussion of significant variable interests in non-consolidated VIEs and other significant equity method investments. As of September 30, 2023, AEP no longer owns a significant equity method investment in four joint ventures through AEP Wind Holdings, LLC due to the sale of the Competitive Contracted Renewables Portfolio. See the “Disposition of the Competitive Contracted Renewables Portfolio” section of Note 6 for additional information.

14. PROPERTY, PLANT AND EQUIPMENT

The disclosure in this note applies to AEP and SWEPCo.

Asset Retirement Obligations

The Registrants record ARO in accordance with the accounting guidance for “Asset Retirement and Environmental Obligations” for legal obligations for asbestos removal and for the retirement of certain ash disposal facilities, wind farms, solar farms and certain coal mining facilities. The table below summarizes significant changes to the Registrants ARO recorded in 2023 and should be read in conjunction with the Property, Plant and Equipment note within the 2022 Annual Report.

The following is a reconciliation of the aggregate carrying amounts of ARO for AEP and SWEPCo:

Company	ARO as of December 31, 2022	Accretion Expense	Liabilities Incurred	Liabilities Settled	Revisions in Cash Flow Estimates	ARO as of September 30, 2023
(in millions)						
AEP (a)(b)(c)(d)(e)(f)	\$ 2,944.9	\$ 86.0	\$ 12.9	\$ (98.1)	\$ 13.8	\$ 2,959.5
SWEPCo (a)(c)(d)(e)	282.2	10.0	7.1	(37.9)	0.4	261.8

- (a) Includes ARO related to ash disposal facilities.
- (b) Includes ARO related to nuclear decommissioning costs for the Cook Plant of \$.05 billion and \$2 billion as of September 30, 2023 and December 31, 2022, respectively.
- (c) Includes ARO related to Sabine and DHLIC.
- (d) Includes ARO related to asbestos removal.
- (e) In 2023, SWEPCo settled \$5 million of costs related to closure/reclamation work performed due to the recent retirements of the Pirkey Plant and Dolet Hills Power Station. See “Coal-Fired Generation Plants” section of Note 4 for additional information.
- (f) In August 2023, AEP completed the sale of its competitive contracted renewables portfolio to a nonaffiliated party and settled ARO liabilities of \$31 million. See “Disposition of the Competitive Contracted Renewables Portfolio” section of Note 6 for additional information.

15. REVENUE FROM CONTRACTS WITH CUSTOMERS

The disclosures in this note apply to all Registrants, unless indicated otherwise.

Disaggregated Revenues from Contracts with Customers

The tables below represent AEP's reportable segment revenues from contracts with customers, net of respective provisions for refund, by type of revenue:

Total Revenues	\$ 1,404.4	\$ 1,183.3	\$ 2,569.8	\$ 1,971.6	\$ 2,674.2	\$ 1,438.7	\$ 1,748.9

(a) Amounts include affiliated and nonaffiliated revenues.

(b) Amounts include affiliated and nonaffiliated revenues. The affiliated revenue for APCo was \$122 million primarily relating to the PPA with KGPCo.

(c) Amounts include affiliated and nonaffiliated revenues. The affiliated revenue for AEPTCo was \$992 million. The remaining affiliated amounts were immaterial.

(d) Amounts include affiliated and nonaffiliated revenues. The affiliated revenue for I&M was \$44 million primarily relating to barging urea transloading and other transportation services. The remaining affiliated amounts were immaterial.

(e) Alternative revenue programs in certain jurisdictions include regulatory mechanisms that periodically adjust for over/under collection of related revenues.

Fixed Performance Obligations (Applies to AEP, APCo and I&M)

The following table represents the Registrants' remaining fixed performance obligations satisfied over time as of September 30, 2023. Fixed performance obligations primarily include electricity sales for fixed amounts of energy and stand ready services into PJM's RPM market. The Registrants elected to apply the exemption to not disclose the value of unsatisfied performance obligations for contracts with an original expected term of one year or less. Due to the annual establishment of revenue requirements, transmission revenues are excluded from the table below. The Registrant Subsidiaries amounts shown in the table below include affiliated and nonaffiliated revenues.

Company	2023	2024-2025	2026-2027	After 2027	Total
	(in millions)				
AEP	\$ 22.6	\$ 166.2	\$ 141.2	\$ 35.0	\$ 365.0
APCo	4.0	32.2	26.6	11.6	74.4
I&M	1.1	8.8	8.8	4.5	23.2

Contract Assets and Liabilities

Contract assets are recognized when the Registrants have a right to consideration that is conditional upon the occurrence of an event other than the passage of time, such as future performance under a contract. The Registrants did not have material contract assets as of September 30, 2023 and December 31, 2022.

When the Registrants receive consideration, or such consideration is unconditionally due from a customer prior to transferring goods or services to the customer under the terms of a sales contract, they recognize a contract liability on the balance sheets in the amount of that consideration. Revenue for such consideration is subsequently recognized in the period or periods in which the remaining performance obligations in the contract are satisfied. The Registrants' contract liabilities typically arise from services provided under joint use agreements for utility poles. The Registrants did not have material contract liabilities as of September 30, 2023 and December 31, 2022.

Accounts Receivable from Contracts with Customers

Accounts receivable from contracts with customers are presented on the Registrant Subsidiaries' balance sheets within the Accounts Receivable - Customers line item. The Registrant Subsidiaries' balances for receivables from contracts that are not recognized in accordance with the accounting guidance for "Revenue from Contracts with Customers" included in Accounts Receivable - Customers were not material as of September 30, 2023 and December 31, 2022. See "Securitized Accounts Receivable - AEP Credit" section of Note 12 for additional information.

The following table represents the amount of affiliated accounts receivable from contracts with customers included in Accounts Receivable - Affiliated Companies on the Registrant Subsidiaries' balance sheets:

Company	September 30, 2023	December 31, 2022
	(in millions)	
AEP Texas	\$ 0.1	\$ 0.1
AEPTCo	122.5	113.8
APCo	69.3	64.5
I&M	50.1	75.3
OPCo	67.3	49.9
PSO	13.8	18.8
SWEPCo	23.7	19.1

CONTROLS AND PROCEDURES

During the third quarter of 2023, management, including the principal executive officer and principal financial officer of each of the Registrants, evaluated the Registrants' disclosure controls and procedures. Disclosure controls and procedures are defined as controls and other procedures of the Registrants that are designed to ensure that information required to be disclosed by the Registrants in the reports that they file or submit under the Exchange Act are recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by the Registrants in the reports that they file or submit under the Exchange Act is accumulated and communicated to the Registrants' management, including the principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure. As of September 30, 2023, these officers concluded that the disclosure controls and procedures in place are effective and provide reasonable assurance that the disclosure controls and procedures accomplished their objectives.

There was no change in the Registrants' internal control over financial reporting (as such term is defined in Rule 13a-15(f) and 15d-15(f) under the Exchange Act) during the third quarter of 2023 that materially affected, or is reasonably likely to materially affect, the Registrants' internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

For a discussion of material legal proceedings, see “Commitments, Guarantees and Contingencies,” of Note 5 incorporated herein by reference.

Item 1A. Risk Factors

The Annual Report on Form 10-K for the year ended December 31, 2022 includes a detailed discussion of risk factors. As of September 30, 2023, the risk factors appearing in AEP’s 2022 Annual Report are supplemented and updated as follows:

Our financial position may be adversely impacted if announced dispositions do not occur as planned or if assets under strategic evaluation lose value. (Applies to AEP)

In October 2022, AEP initiated a strategic evaluation for its ownership in AEP Energy. In April 2023, management completed the strategic evaluation of AEP Energy and initiated a sale process. In April 2023, AEP also made a decision to include AEP Onsite Partners in the sale process. AEP Onsite Partners also owns a 50% interest in NM Renewable Development, LLC, (NMRD). Separate from the remainder of AEP Onsite Partners, AEP and the joint owner have agreed to initiate a joint sales process for their respective interests in NMRD.

In July 2023, AEP made a decision to initiate a sales process for its investment in Pioneer Transmission, LLC and Prairie Wind Transmission, LLC.

Any planned sale of assets and investments, including subsidiaries, may not occur for any number of reasons beyond our control, including regulatory approval on terms that are acceptable. Depending on the outcome of these potential sales, it could reduce future net income and impact financial condition.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None

Item 3. Defaults Upon Senior Securities

None

Item 4. Mine Safety Disclosures

The Federal Mine Safety and Health Act of 1977 (Mine Act) imposes stringent health and safety standards on various mining operations. The Mine Act and its related regulations affect numerous aspects of mining operations, including training of mine personnel, mining procedures, equipment used in mine emergency procedures, mine plans and other matters. SWEPCo, through its ownership of DHLC, a wholly-owned lignite mining subsidiary of SWEPCo, is subject to the provisions of the Mine Act.

The Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) requires companies that operate mines to include in their periodic reports filed with the SEC, certain mine safety information covered by the Mine Act. Exhibit 95 “Mine Safety Disclosure Exhibit” contains the notices of violation and proposed assessments received by DHLC under the Mine Act for the quarter ended September 30, 2023.

Item 5. Other Information

During the three months ended September 30, 2023, none of the Company’s directors or officers (as defined in Rule 16a-1(f) of the Securities Exchange Act of 1934) adopted, terminated or modified a Rule 10b5-1 trading arrangement or non-Rule 10b5-1 trading arrangement (as such terms are defined in Item 408 of Regulation S-K of the Securities Act of 1933).

Item 6. Exhibits

The documents designated with an (*) below have previously been filed on behalf of the Registrants shown and are incorporated herein by reference to the documents indicated and made a part hereof.
