MONSTER BEVERAGE CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Tabular Dollars in Thousands, Except Per Share Amounts) (Unaudited)

1. BASIS OF PRESENTATION

Reference is made to the Notes to Consolidated Financial Statements, in Monster Beverage Corporation and Subsidiaries (the “Company”) Annual Report on Form 10-K for the year ended December 31, 2019 for a summary of significant accounting policies utilized by the Company and its consolidated subsidiaries and other disclosures, which should be read in conjunction with this Quarterly Report on Form 10-Q (“Form 10-Q”).

The Company’s condensed consolidated financial statements included in this Form 10-Q have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) and Securities and Exchange Commission (“SEC”) rules and regulations applicable to interim financial reporting. They do not include all the information and footnote disclosures normally included in annual financial statements prepared in accordance with GAAP. The information set forth in these interim condensed consolidated financial statements for the three- and six-months ended June 30, 2020 and 2019, respectively, is unaudited and reflects all adjustments, which include only normal recurring adjustments and which in the opinion of management are necessary to make the interim condensed consolidated financial statements not misleading. Results of operations for periods covered by this report may not necessarily be indicative of results of operations for the full year.

The preparation of financial statements in conformity with GAAP necessarily requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from these estimates.

2. RECENT ACCOUNTING PRONOUNCEMENTS

Recently issued accounting pronouncements not yet adopted

In December 2019, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2019-12, “Simplifying the Accounting for Income Taxes”, as part of its simplification initiative to reduce the cost and complexity in accounting for income taxes. ASU No. 2019-12 removes certain exceptions related to the approach for intra-period tax allocation, the methodology for calculating income taxes in an interim period and the recognition of deferred tax liabilities for outside basis differences. ASU No. 2019-12 also amends other aspects of the guidance to help simplify and promote consistent application of GAAP. The guidance is effective for interim and annual periods beginning after December 15, 2020, with early adoption permitted. The Company is currently evaluating the impact of ASU No. 2019-12 on its financial position, results of operations and liquidity.

Recently adopted accounting pronouncements

In August 2018, the FASB issued ASU No. 2018-15, “Intangibles–Goodwill and Other–Internal–Use Software (Topic 350): Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That is a Service Contract.” ASU No. 2018-15 aligns the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract, with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software. ASU No. 2018-15 was effective for the Company on a prospective or retrospective basis beginning on January 1, 2020. The adoption of ASU No. 2018-15 did not have a material impact on the Company’s financial position, results of operations and liquidity.

In August 2018, the FASB issued ASU No. 2018-14, “Compensation–Retirement Benefits–Defined Benefit Plans–General (Topic 715): Disclosure Framework–Changes to the Disclosure Requirements for Defined Benefit Plans.” ASU No. 2018-14 removes certain disclosures that are not considered cost beneficial, clarifies certain required disclosures and requires certain additional disclosures. ASU No. 2018-14 is effective for the Company on a retrospective basis beginning in the year ending December 31, 2020. The adoption of ASU No. 2018-14 did not have a material impact on the Company’s financial position, results of operations and liquidity.

(Tabular Dollars in Thousands, Except Per Share Amounts) (Unaudited)

In August 2018, the FASB issued ASU No. 2018-13, “Fair Value Measurement (Topic 820): Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurement.” ASU No. 2018-13 removes certain disclosure requirements related to the fair value hierarchy, modifies existing disclosure requirements related to measurement uncertainty and adds new disclosure requirements. ASU No. 2018-13 disclosure requirements include disclosing the changes in unrealized gains and losses for the period included in other comprehensive income for recurring Level 3 fair value measurements held at the end of the reporting period and the range and weighted average of significant unobservable inputs used to develop Level 3 fair value measurements. ASU No. 2018-13 was effective for the Company beginning on January 1, 2020. Certain disclosures in the new guidance will need to be applied on a retrospective basis and others on a prospective basis. The adoption of ASU No. 2018-13 did not have a material impact on the Company’s financial position, results of operations and liquidity.

In January 2017, the FASB issued ASU No. 2017-04, “Intangibles and Other (Topic 350): Simplifying the Test for Goodwill Impairment”, which eliminates the requirement to calculate the implied fair value of goodwill, but rather requires an entity to record an impairment charge based on the excess of a reporting unit’s carrying value over its fair value. This amendment is effective for annual or interim goodwill impairment tests in fiscal years beginning after December 15, 2019. The adoption of ASU No. 2017-04 did not have a material impact on the Company’s financial position, results of operations and liquidity.

In June 2016, the FASB issued ASU No. 2016-13, “Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments.” The accounting standard changes the methodology for measuring credit losses on financial instruments and the timing when such losses are recorded. ASU No. 2016-13 was effective for fiscal years, and interim periods within those years, beginning after December 15, 2019. The adoption of ASU No. 2016-13 did not have a material impact on the Company’s disclosures, financial position, results of operations and liquidity.

3. REVENUE RECOGNITION

The Company has three operating and reportable segments: (i) Monster Energy® Drinks segment (“Monster Energy® Drinks”), which is primarily comprised of the Company’s Monster Energy® drinks and Reign Total Body Fuel® high performance energy drinks (ii) Strategic Brands segment (“Strategic Brands”), which is primarily comprised of the various energy drink brands acquired from The Coca-Cola Company (“TCCC”) in 2015 as well as the Company’s affordable energy brands, and (iii) Other segment (“Other”), which is comprised of certain products sold by American Fruits and Flavors, LLC, a wholly-owned subsidiary of the Company, to independent third-party customers (the “AFF Third-Party Products”).

The Company’s Monster Energy® Drinks segment generates net operating revenues by selling ready-to-drink packaged energy drinks primarily to bottlers and full service beverage bottlers/distributors (“bottlers/distributors”). In some cases, the Company sells directly to retail grocery and specialty chains, wholesalers, club stores, mass merchandisers, convenience chains, drug stores, foodservice customers, value stores, e-commerce retailers and the military.

The Company’s Strategic Brands segment primarily generates net operating revenues by selling “concentrates” and/or “beverage bases” to authorized bottling and canning operations. Such bottlers generally combine the concentrates and/or beverage bases with sweeteners, water and other ingredients to produce ready-to-drink packaged energy drinks. The ready-to-drink packaged energy drinks are then sold by such bottlers to other bottlers/distributors and to retail grocery and specialty chains, wholesalers, club stores, mass merchandisers, convenience chains, foodservice customers, drug stores, value stores, e-commerce retailers and the military. To a lesser extent, the Strategic Brands segment generates net operating revenues by selling certain ready-to-drink packaged energy drinks to bottlers/distributors.

The majority of the Company’s revenue is recognized when it satisfies a single performance obligation by transferring control of its products to a customer. Control is generally transferred when the Company’s products are either shipped or delivered based on the terms contained within the underlying contracts or agreements. Certain of the Company’s bottlers/distributors may also perform a separate function as a co-packer on the Company’s behalf. In such cases, control of the Company’s products passes to such bottlers/distributors when they notify the Company that they have taken possession or transferred the relevant portion of the Company’s finished goods. The Company’s general payment terms are short-term in duration. The Company does not have significant financing components or payment terms. The Company did not have any material unsatisfied performance obligations as of June 30, 2020 and December 31, 2019.

The Company excludes from revenues all taxes assessed by a governmental authority that are imposed on the sale of its products and collected from customers.

Distribution expenses to transport the Company's products, where applicable, and warehousing expense after manufacture are accounted for within operating expenses.

Promotional and other allowances (variable consideration) recorded as a reduction to net sales, primarily include consideration given to the Company's bottlers/distributors or retail customers including, but not limited to the following:

- discounts granted off list prices to support price promotions to end-consumers by retailers;
- reimbursements given to the Company's bottlers/distributors for agreed portions of their promotional spend with retailers, including slotting, shelf space allowances and other fees for both new and existing products;
- the Company's agreed share of fees given to bottlers/distributors and/or directly to retailers for advertising, in-store marketing and promotional activities;
- the Company's agreed share of slotting, shelf space allowances and other fees given directly to retailers, club stores and/or wholesalers;
- incentives given to the Company's bottlers/distributors and/or retailers for achieving or exceeding certain predetermined sales goals;
- discounted or free products;
- contractual fees given to the Company's bottlers/distributors related to sales made directly by the Company to certain customers that fall within the bottlers'/distributors' sales territories; and
- commissions paid to TCCC based on the Company's sales to certain wholly-owned subsidiaries of TCCC (the "TCCC Subsidiaries") and/or to certain companies accounted for under the equity method by TCCC (the "TCCC Related Parties").

The Company's promotional allowance programs with its bottlers/distributors and/or retailers are executed through separate agreements in the ordinary course of business. These agreements generally provide for one or more of the arrangements described above and are of varying durations, typically ranging from one week to one year. The Company's promotional and other allowances are calculated based on various programs with bottlers/distributors and retail customers, and accruals are established at the time of initial product sale for the Company's anticipated liabilities. These accruals are based on agreed upon terms as well as the Company's historical experience with similar programs and require management's judgment with respect to estimating consumer participation and/or bottler/distributor and retail customer performance levels. Differences between such estimated expenses and actual expenses for promotional and other allowance costs have historically been insignificant and are recognized in earnings in the period such differences are determined.

Amounts received pursuant to new and/or amended distribution agreements entered into with certain bottlers/distributors relating to the costs associated with terminating the Company's prior distributors, are accounted for as revenue ratably over the anticipated life of the respective distribution agreements, generally over 20 years.

The Company also enters into license agreements that generate revenues associated with third-party sales of non-beverage products bearing the Company's trademarks including, but not limited to, clothing, hats, t-shirts, jackets, helmets and automotive wheels.

Management believes that adequate provision has been made for cash discounts, returns and spoilage based on the Company's historical experience.

Contract Liabilities

Amounts received from certain bottlers/distributors at inception of their distribution contracts or at the inception of certain sales/marketing programs are accounted for as deferred revenue. As of June 30, 2020, the Company had \$317.8 million of deferred revenue, which is included in current and long-term deferred revenue in the Company's condensed consolidated balance sheet. As of December 31, 2019, the Company had \$331.7 million of deferred revenue, which is included in current and long-term deferred revenue in the Company's condensed consolidated balance sheet. During the three-months ended June 30, 2020 and 2019, \$10.5 million and \$10.6 million, respectively, of deferred revenue was recognized in net sales. See Note 11. During the six-months ended June 30, 2020 and 2019, \$21.1 million and \$24.8 million, respectively, of deferred revenue was recognized in net sales. See Note 11.

4. LEASES

The Company leases identified assets comprising real estate and equipment. Real estate leases consist primarily of office and warehouse space and equipment leases consist of vehicles and warehouse equipment. At the inception of a contract, the Company assesses whether the contract is, or contains, a lease. The Company's assessment is based on: (1) whether the contract involves the use of a distinct identified asset, (2) whether the Company obtains the right to substantially all the economic benefit from the use of the asset throughout the term, and (3) whether the Company has the right to direct the use of the asset. At inception of a lease, the Company allocates the consideration in the contract to each lease and non-lease component based on the component's relative stand-alone price to determine the lease payments. Lease and non-lease components are accounted for separately.

Leases are classified as either finance leases or operating leases based on criteria in Accounting Standards Codification ("ASC") 842. The Company's operating leases are comprised of real estate and warehouse equipment, and the Company's finance leases are comprised of vehicles.

Right-of-use ("ROU") assets and lease liabilities are recognized at the lease commencement date based on the present value of lease payments over the lease term. As the Company's leases generally do not provide an implicit rate, the Company uses its incremental borrowing rate based on the estimated rate of interest for collateralized borrowing over a similar term of the lease payments at the commencement date. ROU assets also include any lease payments made and exclude lease incentives. Lease terms include options to extend or terminate the lease when it is reasonably certain that the Company will exercise that option.

Certain of the Company's real estate leases contain variable lease payments, including payments based on an index or rate. Variable lease payments based on an index or rate are initially measured using the index or rate in effect at the lease commencement date. Additional payments based on the change in an index or rate, or payments based on a change in the Company's portion of real estate taxes and insurance, are recorded as a period expense when incurred.

Lease expense for operating leases, consisting of lease payments, is recognized on a straight-line basis over the lease term and is included in operating expenses in the condensed consolidated statement of income. Lease expense for finance leases consists of the amortization of the ROU asset on a straight-line basis over the asset's estimated useful life and is included in operating expenses in the condensed consolidated statement of income. Interest expense on finance leases is calculated using the amortized cost basis and is included in interest and other (expense) income, net in the condensed consolidated statement of income.

The Company's leases have remaining lease terms of less than one year to 14 years, some of which include options to extend the leases for up to five years, and some of which include options to terminate the leases within one year. The Company has elected not to recognize ROU assets and lease liabilities for short-term operating leases that have a term of 12 months or less.

VRDNs are floating rate municipal bonds with embedded put options that allow the bondholder to sell the security at par plus accrued interest. All of the put options are secured by a pledged liquidity source. While they are classified as marketable investment securities, the put option allows the VRDNs to be liquidated at par on a same day, or more generally, on a seven-day settlement basis.

6. FAIR VALUE OF CERTAIN FINANCIAL ASSETS AND LIABILITIES

ASC 820 provides a framework for measuring fair value and requires disclosures regarding fair value measurements. ASC 820 defines fair value as the price that would be received on the sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. ASC 820 also establishes a fair value hierarchy that requires an entity to maximize the use of observable inputs, where available. The three levels of inputs required by the standard that the Company uses to measure fair value are summarized below.

- **Level 1:** Quoted prices in active markets for identical assets or liabilities.
- **Level 2:** Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the related assets or liabilities.
- **Level 3:** Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

ASC 820 requires the use of observable market inputs (quoted market prices) when measuring fair value and requires a Level 1 quoted price to be used to measure fair value whenever possible.

All of the Company's short-term and long-term investments are classified within Level 1 or Level 2 of the fair value hierarchy. The Company's valuation of its Level 1 investments, which include money market funds, is based on quoted market prices in active markets for identical securities. The Company's valuation of its Level 2 investments, which include municipal securities, commercial paper, certificates of deposit, VRDNs, U.S. treasuries and U.S. government agency securities, is based on other observable inputs, specifically a market approach which utilizes valuation models, pricing systems, mathematical tools and other relevant information for the same or similar securities. The Company's valuation of its Level 2 foreign currency exchange contracts is based on quoted market prices of the same or similar instruments, adjusted for counterparty risk. There were no transfers between Level 1 and Level 2 measurements during the six-months ended June 30, 2020 or during the year-ended December 31, 2019, and there were no changes in the Company's valuation techniques.

7. DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

The Company is exposed to foreign currency exchange rate risks related primarily to its foreign business operations. During the six-months ended June 30, 2020 and the year-ended December 31, 2019, the Company entered into forward currency exchange contracts with financial institutions to create an economic hedge to specifically manage a portion of the foreign exchange risk exposure associated with certain consolidated subsidiaries' non-functional currency denominated assets and liabilities. All foreign currency exchange contracts of the Company that were outstanding as of June 30, 2020 have terms of one month or less. The Company does not enter into forward currency exchange contracts for speculation or trading purposes.

The Company has not designated its foreign currency exchange contracts as hedge transactions under ASC 815. Therefore, gains and losses on the Company's foreign currency exchange contracts are recognized in interest and other (expense) income, net, in the condensed consolidated statements of income, and are largely offset by the changes in the fair value of the underlying economically hedged item.

The notional amount and fair value of all outstanding foreign currency derivative instruments in the condensed consolidated balance sheets consist of the following at:

15. STOCK-BASED COMPENSATION

The Company has two stock-based compensation plans under which shares were available for grant at June 30, 2020: (i) the Monster Beverage Corporation 2020 Omnibus Incentive Plan (the "2020 Omnibus Incentive Plan"), which includes the Monster Beverage Corporation Deferred Compensation Plan as a sub plan thereunder, and (ii) the Monster Beverage Corporation 2017 Compensation Plan for Non-Employee Directors, which includes the Monster Beverage Corporation Deferred Compensation Plan for Non-Employee Directors as a sub plan thereunder. The 2020 Omnibus Incentive Plan was approved by the Board of Directors on April 14, 2020 and approved by the stockholders of the Company at the annual meeting of the Company's stockholders held on June 3, 2020 (the "Effective Date"). The 2020 Omnibus Incentive Plan replaced the Monster Beverage Corporation 2011 Omnibus Incentive Plan (the "2011 Omnibus Incentive Plan").

The 2020 Omnibus Incentive Plan provides for the granting of stock options, stock appreciation rights, restricted stock, restricted stock units, performance awards, and other share-based awards up to an aggregate of 46,169,367 shares of the Company's common stock, comprised of 32,000,000 new shares of common stock reserved under the 2020 Omnibus Incentive Plan and 14,169,367 shares of common stock that were available for grant under the 2011 Omnibus Incentive Plan as of December 31, 2019. Shares authorized under the 2020 Omnibus Incentive Plan are reduced by one (1) share for options or stock appreciation rights granted under the 2020 Omnibus Incentive Plan and for any grants after December 31, 2019 under the 2011 Omnibus Incentive Plan, and by 2.6 shares for each share granted or issued with respect to a Full Value Award under either the 2020 Omnibus Incentive Plan or for any shares granted after December 31, 2019 under the 2011 Omnibus Incentive Plan. A "Full Value Award" is an award other than an incentive stock option, a non-qualified stock option, or a stock appreciation right, which is settled by the issuance of shares. Options granted under the 2020 Omnibus Incentive Plan may be incentive stock options under Section 422 of the Internal Revenue Code, as amended, or non-qualified stock options.

Shares previously granted under the 2011 Omnibus Incentive Plan after December 31, 2019 and prior to the Effective Date of the 2020 Omnibus Incentive Plan reduced the number of shares available for grant under the 2020 Omnibus Incentive Plan. As of June 30, 2020, 1,401,750 shares of the Company's common stock have been granted, net of cancellations, and 44,173,226 shares (as adjusted for Full Value Awards) of the Company's common stock remain available for grant under the 2020 Omnibus Incentive Plan.

The Compensation Committee of the Board of Directors (the "Compensation Committee") has sole and exclusive authority to grant stock awards to all employees who are not new hires and to all new hires who are subject to Section 16 of the Exchange Act. Each of the Compensation Committee and the Executive Committee of the Board of Directors (the "Executive Committee") independently has the authority to grant stock awards to new hires and employees receiving a promotion who are not Section 16 employees. Awards granted by the Executive Committee are not subject to approval or ratification by the Board of Directors or the Compensation Committee. Options granted under the 2020 Omnibus Incentive Plan generally vest over a three- to five-year period from the grant date and are generally exercisable up to 10 years after the grant date. Restricted stock units and performance share units granted under the 2020 Omnibus Incentive Plan generally vest over a three- or five-year period from the grant date.

Stock Options

Under the Company's stock-based compensation plans, all stock options granted as of June 30, 2020 were granted at prices based on the fair value of the Company's common stock on the date of grant. The Company records compensation expense for stock options based on the estimated fair value of the options on the date of grant using the Black-Scholes-Merton option pricing formula with the assumptions included in the table below. The Company uses historical data to determine the exercise behavior, volatility and forfeiture rate of the options.

The following weighted-average assumptions were used to estimate the fair value of options granted during:

	Three-Months Ended June 30,		Six-Months Ended June 30,	
	2020*	2019*	2020	2019
Dividend yield	—	—	0.0 %	0.0 %
Expected volatility	—	—	30.5 %	30.2 %
Risk-free interest rate	—	—	0.7 %	2.4 %
Expected term	—	—	5.8 years	6.0 years

*No options were granted during the three-months ended June 30, 2020 and 2019.

Expected Volatility: The Company uses historical volatility as it provides a reasonable estimate of the expected volatility. Historical volatility is based on the most recent volatility of the stock price over a period of time equivalent to the expected term of the option.

Risk-Free Interest Rate: The risk-free interest rate is based on the U.S. treasury zero-coupon yield curve in effect at the time of grant for the expected term of the option.

Expected Term: The Company's expected term represents the weighted-average period that the Company's stock options are expected to be outstanding. The expected term is based on the expected time to post-vesting exercise of options by employees. The Company uses historical exercise patterns of previously granted options to derive employee behavioral patterns used to forecast expected exercise patterns.

The following table summarizes the Company's activities with respect to its stock option plans as follows:

Options	Number of Shares (in thousands)	Weighted- Average Exercise Price Per Share	Weighted- Average Remaining Contractual Term (In years)	Aggregate Intrinsic Value

Restricted Stock Units and Performance Share Units

The cost of stock-based compensation for restricted stock units and performance share units is measured based on the closing fair market value of the Company's common stock at the date of grant. In the event that the Company has the option and intent to settle a restricted stock unit or performance share unit in cash, the award is classified as a liability and revalued at each balance sheet date.

The following table summarizes the Company's activities with respect to non-vested restricted stock units and performance share units as follows:

	Number of Shares (in thousands)	Weighted Average Grant-Date Fair Value
Non-vested at January 1, 2020	825	\$ 57.62
Granted 01/01/20 - 03/31/20 ¹	392	\$ 62.39
Granted 04/01/20 - 06/30/20	17	\$ 71.72
Vested	(287)	\$ 55.65
Forfeited/cancelled	(1)	\$ 59.67
Non-vested at June 30, 2020	946	\$ 60.45

¹The grant activity for performance share units is recorded based on the target performance level earning 100% of target performance share units. The actual number of performance share units earned could range from 0% to 200% of target dependent on the pre-established performance goals.

The weighted-average grant-date fair value of restricted stock units granted during the three-months ended June 30, 2020 was \$71.72 per share. The weighted-average grant-date fair value of restricted stock units granted during the three-months ended June 30, 2019 was \$63.48 per share. The Company's Monster Energy® Drinks segment primarily generates net operating revenues by selling ready-to-drink packaged drinks primarily to bottlers/distributors. In some cases, the Company sells directly to retail grocery and specialty chains, wholesalers, club stores, mass merchandisers, convenience chains, drug stores, foodservice customers, value stores, e-commerce retailers and the military.

The Company's Strategic Brands segment primarily generates net operating revenues by selling "concentrates" and/or "beverage bases" to authorized bottling and canning operations. Such bottlers generally combine the concentrates and/or beverage bases with sweeteners, water and other ingredients to produce ready-to-drink packaged energy drinks. The ready-to-drink packaged energy drinks are then sold by such bottlers to other bottlers/distributors and to retail grocery and specialty chains, wholesalers, club stores, mass merchandisers, convenience chains, foodservice customers, drug stores, value stores, e-commerce retailers and the military. To a lesser extent, the Strategic Brands segment generates net operating revenues by selling certain ready-to-drink packaged energy drinks to bottlers/distributors.

Generally, the Monster Energy® Drinks segment generates higher per case net operating revenues, but lower per case gross profit margin percentages than the Strategic Brands segment.

Corporate and unallocated amounts that do not relate to a reportable segment have been allocated to "Corporate & Unallocated." No asset information, other than goodwill and other intangible assets, has been provided in the Company's reportable segments, as management does not measure or allocate such assets on a segment basis.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Our Business

When this report uses the words “the Company”, “we”, “us”, and “our”, these words refer to Monster Beverage Corporation and its subsidiaries, unless the context otherwise requires. Based in Corona, California, Monster Beverage Corporation is a holding company and conducts no operating business except through its consolidated subsidiaries. The Company’s subsidiaries primarily develop and market energy drinks.

The COVID– 19 Pandemic

The current COVID-19 pandemic has presented a substantial public health and economic challenge around the world and is affecting our employees, communities and business operations, as well as the global economy and financial markets. The human and economic consequences of the COVID-19 pandemic as well as the measures taken or that may be taken in the future by governments, and consequently businesses (including the Company and its suppliers, full service beverage bottlers/distributors (“bottlers/distributors”), co-packers and other service providers) and the public at large to limit the COVID-19 pandemic, has directly and indirectly impacted our business. The duration and severity of this impact will depend on future developments that are highly uncertain and cannot be accurately predicted, including new information that may emerge concerning the COVID-19 pandemic, the actions taken to limit its spread and the economic impact on local, regional, national and international markets. See the section entitled “Risk Factors” in Item 1A of this Quarterly Report.

We have been actively addressing the COVID-19 pandemic with a global task force team working to mitigate the potential impacts to our people and business.

Health and Safety of our Employees and Business Partners

From the beginning of the COVID-19 pandemic, our top priority has been the health, safety and well-being of our employees. Early in March 2020, we implemented global travel restrictions and work-from-home policies for employees who are able to work remotely. For those employees who are unable to work remotely, safety precautions have been instituted, which were developed and adopted in line with guidance from public health authorities and professional consultants. Currently, our offices have partially reopened in the U.S. and in certain countries, and generally, our field sales teams are working with our bottler/distributors and retailers subject to certain safety protocols. We are incredibly proud of the teamwork exhibited by our employees, co-packers and bottlers/distributors around the world who are ensuring the integrity of our supply chain.

Customer Demand

The COVID-19 pandemic had an adverse impact on our net and gross sales for the three- months ended June 30, 2020, due in part to certain of our bottlers/distributors reducing their inventory levels. However, we did see a sequential improvement in sales in the latter half of the quarter as certain countries and states began to gradually re-open.

Since mid-March 2020, we have seen a shift in consumer channel preferences and package configurations, including an increase in at-home consumption and a decrease in immediate consumption. Our sales in the second quarter of 2020 were initially adversely affected as a result of a decrease in foot traffic in the convenience and gas channel (which is our largest channel) but improved sequentially throughout the quarter. Our e-commerce, club store, mass merchandiser and grocery and related business continued to increase over the quarter, while our food service on-premise business, which is a small channel for the Company, remained challenged. The duration of these trends and the magnitude of such impacts on future periods cannot be precisely estimated at this time, as they are affected by a number of factors (many of which are outside our control).

A reduction in demand for our products or changes in consumer purchasing and consumption patterns, as well as continued economic uncertainty as a result of the COVID-19 pandemic, could adversely affect the financial conditions of retailers and consumers, resulting in reduced or canceled orders for our products, purchase returns and closings of retail or wholesale establishments or other locations in which our products are sold.

Our Distribution and Supply Chain

As of the date of this filing, we do not foresee a material impact on the ability of our co-packers to manufacture and our bottlers/distributors to distribute our products as a result of the COVID-19 pandemic. In addition, we are not experiencing raw material or finished product shortages in our supply chain. However, depending on the duration of any COVID-19 pandemic related issues, we may experience material disruptions in our supply chain as the pandemic continues.

Liquidity and Capital Resources

As of the date of this filing, we expect to maintain substantial liquidity as we manage through the current environment as described in the “Liquidity and Capital Resources” section below.

We have three operating and reportable segments, (i) Monster Energy® Drinks segment (“Monster Energy® Drinks”), which is primarily comprised of our Monster Energy® drinks and Reign Total Body Fuel® high performance energy drinks, (ii) Strategic Brands segment (“Strategic Brands”), which is comprised primarily of the various energy drink brands acquired from The Coca-Cola Company (“TCCC”) in 2015 as well as our affordable energy brands, and (iii) Other segment (“Other”), which is comprised of certain products sold by American Fruits and Flavors LLC, a wholly-owned subsidiary, to independent third-party customers (the “AFF Third-Party Products”).

During the three-months ended June 30, 2020, we continued to expand our existing energy drink portfolio by adding additional products to our portfolio in a number of countries and further developed our distribution markets. During the three-months ended June 30, 2020, we introduced the following new product:

- Fury® Gold Strike

In the normal course of business, we discontinue certain products and/or product lines. Those products or product lines discontinued in the three-months ended June 30, 2020, either individually or in aggregate, did not have a material adverse impact on our financial position, results of operations or liquidity.

Certain of our 2020 launches were negatively impacted by the COVID-19 pandemic and we did not achieve planned distribution levels for these launches, in part due to certain retailers postponing implementation of their new planned spring schematics, which included our innovation products. We are executing plans with our bottlers/distributors to reprioritize recent innovation launches to maximize their distribution, particularly in the convenience and gas channel.

Net sales for the three-months ended June 30, 2020 were \$1.09 billion. Net changes in foreign currency exchange rates had an unfavorable impact on net sales of approximately \$18.2 million for the three-months ended June 30, 2020.

The vast majority of our net sales are derived from our Monster Energy® Drinks segment. Net sales of our Monster Energy® Drinks segment were \$1.03 billion for the three-months ended June 30, 2020. Net sales of our Strategic Brands segment were \$59.6 million for the three-months ended June 30, 2020. Our Monster Energy® Drinks segment represented 93.9% and 92.3% of our net sales for the three-months ended June 30, 2020 and 2019, respectively. Our Strategic Brands segment represented 5.4% and 7.2% of our net sales for the three-months ended June 30, 2020 and 2019, respectively. Our Other segment represented 0.7% and 0.5% of our net sales for the three-months ended June 30, 2020 and 2019, respectively.

Our growth strategy includes expanding our international business. Net sales to customers outside the United States were \$328.3 million for the three-months ended June 30, 2020, a decrease of approximately \$15.0 million, or 4.4% lower than net sales to customers outside of the United States of \$343.3 million for the three-months ended June 30, 2019. Such sales were approximately 30% and 31% of net sales for the three-months ended June 30, 2020 and 2019, respectively. The COVID-19 pandemic had a material adverse impact on net sales to customers outside the U.S., primarily in EMEA, for the three-months ended June 30, 2020. In addition, to a lesser extent, the trading dispute between certain TCCC bottlers and a European buying group primarily in Western Europe resulted in the temporary delisting of certain TCCC and Company products, which had an adverse impact on net sales in EMEA for the three-months ended June 30, 2020.

Our customers are primarily bottlers/distributors, retail grocery and specialty chains, wholesalers, club stores, mass merchandisers, convenience chains, drug stores, foodservice customers and the military. Percentages of our gross sales to our various customer types for the three- and six-months ended June 30, 2020 and 2019 are reflected below. Such information includes sales made by us directly to the customer types concerned, which include our bottlers/distributors in the United States. Net sales for the Monster Energy® Drinks segment were \$1.03 billion for the three-months ended June 30, 2020, an increase of approximately \$8.6 million, or 0.8% higher than net sales of \$1.02 billion for the three-months ended June 30, 2019. The COVID-19 pandemic had an adverse impact on net sales of the Monster Energy® Drinks segment for the three-months ended June 30, 2020. Net changes in foreign currency exchange rates had an unfavorable impact on net sales for the Monster Energy® Drinks segment of approximately \$16.8 million for the three-months ended June 30, 2020.

Net sales for the Strategic Brands segment were \$59.6 million for the three-months ended June 30, 2020, a decrease of approximately \$19.6 million, or 24.7% lower than net sales of \$79.1 million for the three-months ended June 30, 2019. The COVID-19 pandemic had a material adverse impact on net sales of the Strategic Brands segment for the three-months ended June 30, 2020. The COVID-19 pandemic's impact was more pronounced in the Strategic Brands segment, particularly in EMEA, as our larger revenue generating countries for this segment experienced extended lockdowns. Net changes in foreign currency exchange rates had an unfavorable impact on net sales for the Strategic Brands segment of approximately \$1.4 million for the three-months ended June 30, 2020.

Net sales for the Other segment were \$6.6 million for the three-months ended June 30, 2020, an increase of approximately \$0.9 million, or 14.7% higher than net sales of \$5.8 million for the three-months ended June 30, 2019.

The overall average net sales per case (excluding net sales of AFF Third-Party Products of \$6.6 million and \$5.8 million for the three-months ended June 30, 2020 and 2019, respectively, as these sales do not have unit case equivalents) increased to \$9.30 for the three-months ended June 30, 2020, which was 1.2% higher than the average net sales per case of \$9.18 for the three-months ended June 30, 2019. The increase in the average net sales per case was primarily the result of the decrease in net sales of the Strategic Brands segment, which has a lower net sales price per case than the Monster Energy® Drinks segment.

Gross Profit. Gross profit was \$659.5 million for the three-months ended June 30, 2020, a decrease of approximately \$1.8 million, or 0.3% lower than the gross profit of \$661.3 million for the three-months ended June 30, 2019. The decrease in gross profit dollars was primarily the result of the \$10.1 million decrease in net sales for the three-months ended June 30, 2020.

Gross profit as a percentage of net sales increased to 60.3% for the three-months ended June 30, 2020 from 59.9% for the three-months ended June 30, 2019. The increase for the three-months ended June 30, 2020 was primarily the result of product and geographical sales mix as well as reduced input costs.

Operating Expenses. Total operating expenses were \$252.2 million for the three-months ended June 30, 2020, a decrease of approximately \$30.1 million, or 10.7% lower than total operating expenses of \$282.3 million for the three-months ended June 30, 2019. The decrease in operating expenses was primarily due to decreased expenditures of \$19.8 million for sponsorship and endorsements and decreased expenditures of \$10.1 million for travel and entertainment, each largely as a consequence of the COVID-19 pandemic. The costs for certain postponed or rescheduled events have been, or may be, deferred to future periods. Due to the uncertainty surrounding the COVID-19 pandemic, we are unable to estimate in which future periods, if any, such deferred sponsorship and endorsement costs will be recognized. The decrease in operating expenses was partially offset by increased payroll expenses of \$8.4 million (of which \$0.4 million was related to an increase in stock-based compensation).

Operating Income. Operating income was \$407.3 million for the three-months ended June 30, 2020, an increase of approximately \$28.3 million, or 7.5% higher than operating income of \$379.0 million for the three-months ended June 30, 2019. Operating income for the Monster Energy® Drinks segment, exclusive of corporate and unallocated expenses, was \$453.4 million for the three-months ended June 30, 2020, an increase of approximately \$42.6 million, or 10.4% higher than operating income of \$410.8 million for the three-months ended June 30, 2019. The increase in operating income for the Monster Energy® Drinks segment was primarily the result of the \$29.3 million decrease in operating expenses for the three-months ended June 30, 2020.

Operating income for the Strategic Brands segment, exclusive of corporate and unallocated expenses, was \$37.7 million for the three-months ended June 30, 2020, a decrease of approximately \$12.4 million, or 24.7% lower than operating income of \$50.1 million for the three-months ended June 30, 2019. The decrease in operating income for the three-months ended June 30, 2020 was primarily the result of a decrease in net sales related to the COVID-19 pandemic.

Operating income for the Other segment, exclusive of corporate and unallocated expenses, was \$1.6 million for the three-months ended June 30, 2020, an increase of approximately \$0.5 million, or 45.3% higher than operating income of \$1.1 million for the three-months ended June 30, 2019.

Net sales for the Monster Energy® Drinks segment increased primarily due to increased worldwide sales by volume of our Monster Energy® brand energy drinks as a result of increased consumer demand as well as enhanced distribution and increased consumer demand for our Reign Total Body Fuel® high performance energy drinks. The COVID-19 pandemic had an adverse impact on net sales of the Monster Energy® Drinks segment for the six-months ended June 30, 2020. Net changes in foreign currency exchange rates had an unfavorable impact on net sales for the Monster Energy® Drinks segment of approximately \$26.7 million for the six-months ended June 30, 2020.

The costs for certain postponed or rescheduled events have been, or may be, deferred to future periods. Due to the uncertainty surrounding the COVID-19 pandemic, we are unable to estimate in what future periods, if any, such deferred sponsorship and endorsement costs will be recognized. The decrease in operating expenses was partially offset by increased payroll expenses of \$16.5 million (of which \$2.1 million was related to an increase in stock-based compensation), increased out-bound freight and warehouse costs of \$4.3 million, a \$4.0 million Strategic Brand trademark impairment charge and increased expenditures of \$4.2 million for premiums.

***Gross sales are used internally by management as an indicator of and to monitor operating performance, including sales performance of particular products, salesperson performance, product growth or declines and overall Company performance. The use of gross sales allows evaluation of sales performance before the effect of any promotional items, which can mask certain performance issues. We therefore believe that the presentation of gross sales provides a useful measure of our operating performance. The use of gross sales is not a measure that is recognized under GAAP and should not be considered as an alternative to net sales, which is determined in accordance with GAAP, and should not be used alone as an indicator of operating performance in place of net sales. Additionally, gross sales may not be comparable to similarly titled measures used by other companies, as gross sales has been defined by our internal reporting practices. In addition, gross sales may not be realized in the form of cash receipts as promotional payments and allowances may be deducted from payments received from certain customers.*

The following table reconciles the non-GAAP financial measure of gross sales with the most directly comparable GAAP financial measure of net sales:

(In thousands)	Three-Months Ended June 30,		Percentage Change 20 vs. 19	Six-Months Ended June 30,		Percentage Change 20 vs. 19

****Although the expenditures described in this line item are determined in accordance with GAAP and meet GAAP requirements, the presentation thereof does not conform to GAAP presentation requirements. Additionally, our definition of promotional and other allowances may not be comparable to similar items presented by other companies. Promotional and other allowances primarily include consideration given to our bottlers/distributors or retail customers including, but not limited to the following: (i) discounts granted off list prices to support price promotions to end-consumers by retailers; (ii) reimbursements given to our bottlers/distributors for agreed portions of their promotional spend with retailers, including slotting, shelf space allowances and other fees for both new and existing products; (iii) our agreed share of fees given to bottlers/distributors and/or directly to retailers for advertising, in-store marketing and promotional activities; (iv) our agreed share of slotting, shelf space allowances and other fees given directly to retailers, club stores and/or wholesalers; (v) incentives given to our bottlers/distributors and/or retailers for achieving or exceeding certain predetermined sales goals; (vi) discounted or free products; (vii) contractual fees given to our bottlers/distributors related to sales made by us direct to certain customers that fall within the bottlers'/distributors' sales territories; and (viii) certain commissions paid based on sales to our bottlers/distributors. The presentation of promotional and other allowances facilitates an evaluation of their impact on the determination of net sales and the spending levels incurred or correlated with such sales. Promotional and other allowances constitute a material portion of our marketing activities. Our promotional allowance programs with our numerous bottlers/distributors and/or retailers are executed through separate agreements in the ordinary course of business. These agreements generally provide for one or more of the arrangements described above and are of varying durations, ranging from one week to one year. The primary drivers of our promotional and other allowance activities for the three-months ended June 30, 2020 and 2019 were (i) to increase sales volume and trial, (ii) to address market conditions, and (iii) to secure shelf and display space at retail.*

Sales

The table below discloses selected quarterly data regarding sales for the three- and six-months ended June 30, 2020 and 2019, respectively. Data from any one or more quarters or periods is not necessarily indicative of annual results or continuing trends.

Sales of beverages are expressed in unit case volume. A “unit case” means a unit of measurement equal to 192 U.S. fluid ounces of finished beverage (24 eight-ounce servings). Unit case volume means the number of unit cases (or unit case equivalents) of finished products or concentrates as if converted into finished products sold by us.

Our quarterly results of operations reflect seasonal trends that are primarily the result of increased demand in the warmer months of the year. It has been our experience that beverage sales tend to be lower during the first and fourth quarters of each calendar year. However, our experience with our energy drink products suggests they may be less seasonal than the seasonality of traditional beverages. In addition, our continued growth internationally may further reduce the impact of seasonality on our business. Quarterly fluctuations may also be affected by other factors including the introduction of new products, the opening of new markets where temperature fluctuations are more pronounced, the addition of new bottlers/distributors, changes in the sales mix of our products and changes in advertising and promotional expenses. The COVID-19 pandemic may also have an impact on consumer behavior and change the seasonal fluctuation of our business.

Liquidity and Capital Resources

Cash and cash equivalents, short-term and long-term investments. We believe that cash available from operations, including our cash resources and access to credit, will be sufficient for our working capital needs, including purchase commitments for raw materials and inventory, increases in accounts receivable, payments of tax liabilities, expansion and development needs, purchases of capital assets, purchases of equipment, purchases of real property and purchases of shares of our common stock, through at least the next 12 months. Our sources and uses of cash were not materially impacted by the COVID-19 pandemic in the six-months ended June 30, 2020 and, to date, we have not identified any material liquidity deficiencies as a result of the COVID-19 pandemic. Based on the information currently available to us, we do not expect the impact of the COVID-19 pandemic to have a material impact on our liquidity. We will continue to monitor and assess the impact the COVID-19 pandemic may have on our business, financial condition and/or operating results.

At June 30, 2020, we had \$921.3 million in cash and cash equivalents, \$250.8 million in short-term investments and \$2.1 million in long-term investments. We have historically invested these amounts in U.S. treasuries, U.S. government agency securities, municipal securities, commercial paper, certificates of deposit, variable rate demand notes and money market funds meeting certain criteria. At this time, we no longer invest these amounts in municipal securities. We maintain our investments for cash management purposes and not for purposes of speculation. Our risk management policies emphasize credit quality (primarily based on short-term ratings by nationally recognized statistical organizations) in selecting and maintaining our investments. We regularly assess market risk of our investments and believe our current policies and investment practices adequately limit those risks. However, certain of these investments are subject to general credit, liquidity, market and interest rate risks. These market risks associated with our investment portfolio may have an adverse effect on our future results of operations, liquidity and financial condition.

Based on our current plans, at this time we estimate that capital expenditures (exclusive of common stock repurchases) are likely to be less than \$150.0 million through June 30, 2021. However, future business opportunities may cause a change in this estimate.

Cash flows provided by operating activities. Cash provided by operating activities was \$440.5 million for the six-months ended June 30, 2020, as compared with cash provided by operating activities of \$454.8 million for the six-months ended June 30, 2019.

For the six-months ended June 30, 2020, cash provided by operating activities was primarily attributable to net income earned of \$590.2 million and adjustments for certain non-cash expenses, consisting of \$33.0 million of stock-based compensation, \$32.1 million of depreciation and amortization and \$4.0 million of intangible asset impairment. For the six-months ended June 30, 2020, cash provided by operating activities also increased due to a \$31.7 million increase in accrued liabilities, a \$14.2 million decrease in inventories, an \$8.3 million increase in income tax payable, a \$7.2 million decrease in prepaid income taxes and a \$3.1 million increase in accrued promotional allowance. PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The information required by this Item is incorporated herein by reference to the Notes to Condensed Consolidated Financial Statements - Note 12. Commitments and Contingencies: Legal Proceedings in Part I, Item 1, of this Quarterly Report on Form 10-Q.

ITEM 1A. RISK FACTORS

In addition to the other information set forth in this Quarterly Report on Form 10-Q, including Management's Discussion and Analysis of Financial Condition and Results of Operations and the condensed consolidated financial statements and related notes, you should carefully consider the risks discussed in "Part I, Item 1A – Risk Factors" in our Form 10-K, as updated and supplemented in "Part II, Item 1A – Risk Factors" in our Quarterly Report on Form 10-Q for the quarter ended March 31, 2020 and as further updated and supplemented below. If any of these risks actually occur or continue to occur, our business, reputation, financial condition and/or operating results could be materially adversely affected. The risk factors summarized below are not the only risks we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial may also materially adversely affect our business, reputation, financial condition and/or operating results.

The COVID-19 pandemic has had, and we expect will continue to have, certain negative impacts on our business and operations, and such impacts may have a material adverse effect on our business and results of operations.

The current COVID-19 pandemic has presented and continues to present a substantial public health and economic challenge around the world and is affecting our employees, communities and business operations, as well as the global economy and financial markets. The human and economic consequences of the COVID-19 pandemic as well as the measures taken or that may be taken in the future by governments, businesses (including the Company and our suppliers, bottlers/distributors, co-packers and other service providers) and the public at large to limit the COVID-19 pandemic, have and will directly and indirectly impact our business and results of operations, including, without limitation, the following:

- We have experienced decreases in sales of our products in many of our markets around the world that have been affected by the COVID-19 pandemic. While some of the restrictions imposed as a result of the initial COVID-19 outbreak have been lifted or eased in many jurisdictions as the rates of COVID-19 infections have decreased or stabilized, resurgence of the COVID-19 pandemic in some markets has slowed or reversed the reopening process. If the COVID-19 pandemic and related unfavorable economic conditions continue to intensify, the negative impact on our sales, including our new product innovation launches, could be prolonged and may become more severe. While we experienced increased sales through e-commerce retailers and an increased demand for multi-packs in the 2020 second quarter, such increases did not fully offset the decreased sales we experienced in the early part of the 2020 second quarter in other channels, such as the convenience and gas channel (which is our largest channel) and food-service on-premise. If we are unable to successfully capitalize on the increased demand through e-commerce retailers, our ability to gain or maintain our share of sales in the marketplace may be adversely impacted.
- Deteriorating economic conditions and continued financial uncertainties in many of our major markets due to the COVID-19 pandemic, such as increased and prolonged unemployment, decreases in per capita income and the level of disposable income, declines in consumer confidence, or economic slowdowns or recessions, could affect consumer purchasing power and consumers' ability to purchase our products, thereby reducing demand for our products. In addition, public concern among consumers regarding the risk of contracting COVID-19 may also reduce demand for our products.
- The closures of, and continued restrictions on, on-premise retailers and other establishments that sell our products as a result of the COVID-19 pandemic have adversely impacted and may continue to adversely impact our sales and results of operations.
- Our advertising, marketing, promotional, sponsorship and endorsement activities have been, and will continue to be, disrupted by reduced opportunities for such activities due to measures taken to limit the spread of the COVID-19 pandemic and the cancellations of sporting events, concerts and other events may result in decreased demand for our products. Our product sampling programs, which are part of our strategy to develop brand awareness, have been, and will continue to be, disrupted by the COVID-19 pandemic. If we are unable to successfully adapt to the changing landscape of advertising, marketing, promotional, sponsorship and endorsement opportunities created by the COVID-19 pandemic, our sales, market share, volume growth and overall financial results could be negatively affected.

- Our innovation activities, including our ability to introduce new products in certain markets, have been delayed and/or adversely impacted by the COVID-19 pandemic. If such innovation activities are disrupted and we continue to delay the launch of new products and/or we are unable to secure sufficient distribution levels for such new products, our business and results of operations could be adversely affected.
- Some of our suppliers, bottlers/distributors and co-packers may experience plant closures, production slowdowns and disruptions in operations as a result of the impact of the COVID-19 pandemic. This could result in a disruption to our operations.
- We may experience delays in the sourcing of certain raw materials as a result of shipping delays due to, among other things, additional safety requirements imposed by port authorities, closures of or congestion at ports, reduced availability of commercial transportation, border restrictions and capacity constraints.
- We rely on relationships with third parties for cloud data storage and other information technology services for certain functions or for services in support of our operations. These third parties are subject to risks and uncertainties related to the COVID-19 pandemic, which may interfere with their ability to fulfill their respective commitments and responsibilities to us in a timely manner and in accordance with the agreed-upon terms.
- As a result of the COVID-19 pandemic, including related governmental measures, restrictions, directives and guidance, we have required most of our office-based employees to work remotely. We may experience reductions in productivity and disruptions to our business routines while our remote work policy remains in place. If our employees working remotely do not maintain appropriate measures to mitigate potential risks to our technology and operations from information technology-related disruptions, we may face cybersecurity threats. Employees of our third-party service providers who are working remotely, with whom we may share data, are subject to similar cybersecurity risks.
- Governmental authorities at the U.S. federal, state and/or municipal level and in certain foreign jurisdictions may increase or impose new income taxes, indirect taxes or other taxes or revise interpretations of existing tax rules and regulations as a means of financing the costs of stimulus or may take other measures to protect populations and economies from the impact of the COVID-19 pandemic. Increases in direct and indirect tax rates could affect our net income, and increases in consumer taxes could affect our products' affordability and reduce our sales.
- We may be required to record significant impairment charges with respect to goodwill or intangible assets whose fair values may be negatively affected by the effects of the COVID-19 pandemic.
- The continued financial impact of the COVID-19 pandemic may cause one or more of the financial institutions we do business with to fail or default in their obligations to us or to become insolvent or file for bankruptcy, which could cause us to incur significant losses and negatively impact our results of operations and financial condition.
- Actions we have taken or may take, or decisions we have made or may make, as a consequence of the COVID-19 pandemic may result in negative publicity and the Company becoming a party to litigation claims and/or legal proceedings, which could consume significant financial and managerial resources, result in decreased demand for our products and injury to our reputation.
- The resumption of normal business operations after the disruptions caused by the COVID-19 pandemic may be delayed or constrained by its lingering effects on our suppliers, bottlers/distributors, co-packers, contractors, business partners and/or other service providers.

Any of the negative impacts of the COVID-19 pandemic, including those described above, alone or in combination with others, may have a material adverse effect on our business, reputation, operating results and/or financial condition. Any of these negative impacts, alone or in combination with others, could exacerbate many of the risk factors discussed in “Part I, Item 1A – Risk Factors” in our Form 10-K and “Part II, Item 1A – Risk Factors” in our Quarterly Report on Form 10-Q for the quarter ended March 31, 2020, any of which could materially affect our business, reputation, operating results and/or financial condition. The full extent to which the COVID-19 pandemic will negatively affect our business, reputation, operating results and/or financial condition will depend on future developments that are highly uncertain and cannot be predicted, including the scope and duration of the COVID-19 pandemic, the duration of various shelter-in-place orders and reopening plans across the globe, and actions taken, or that may be taken in the future, by governmental authorities and other third parties in response to the COVID-19 pandemic.
