### 1. Organization and Basis of Presentation

The fiscal year for Cisco Systems, Inc. (the "Company," "Cisco," "we," "us," or "our") is the 52 or 53 weeks ending on the last Saturday in July. Fiscal 2021 is a 53-week fiscal year and fiscal 2020 was a 52-week fiscal year. The Consolidated Financial Statements include our accounts and those of our subsidiaries. All intercompany accounts and transactions have been eliminated. We conduct business globally and are primarily managed on a geographic basis in the following three geographic segments: the Americas; Europe, Middle East, and Africa (EMEA); and Asia Pacific, Japan, and China (APJC).

At our annual meeting of shareholders held on December 10, 2020, shareholders voted to approve changing our state of incorporation from California to Delaware. The reincorporation became effective January 25, 2021.

We have prepared the accompanying financial data as of May 1, 2021 and for the third quarter and first nine months of fiscal 2021 and 2020, without audit, pursuant to the rules and regulations of the U.S. Securities and Exchange Commission ("SEC"). Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles in the United States ("GAAP") have been condensed or omitted pursuant to such rules and regulations. The July 25, 2020 Consolidated Balance Sheet was derived from audited financial statements, but does not include all disclosures required by accounting principles generally accepted in the United States. However, we believe that the disclosures are adequate to make the information presented not misleading. These Consolidated Financial Statements should be read in conjunction with the Consolidated Financial Statements and the notes thereto included in our Annual Report on Form 10-K for the fiscal year ended July 25, 2020.

The preparation of financial statements and related disclosures in conformity with GAAP requires us to make judgments, assumptions, and estimates that affect the amounts reported in the Consolidated Financial Statements and accompanying notes. The inputs into certain of our judgments, assumptions, and estimates considered the economic implications of the COVID-19 pandemic on our critical and significant accounting estimates. The actual results that we experience may differ materially from our estimates. As the COVID-19 pandemic continues to develop, many of our estimates could require increased judgment and carry a higher degree of variability and volatility. As events continue to evolve our estimates may change materially in future periods.

In the opinion of management, all normal recurring adjustments necessary to present fairly the consolidated balance sheet as of May 1, 2021, the results of operations, the statements of comprehensive income (loss) and the statements of equity for the third quarter and first nine months of fiscal 2021 and 2020, and the statements of cash flows for the first nine months of fiscal 2021 and 2020, as applicable, have been made. The results of operations for the third quarter and first nine months of fiscal 2021 are not necessarily indicative of the operating results for the full fiscal year or any future periods.

Our consolidated financial statements include our accounts and entities consolidated under the variable interest and voting models. The noncontrolling interests attributed to these investments, if any, are presented as a separate component from our equity in the equity section of the Consolidated Balance Sheets. The share of earnings attributable to the noncontrolling interests are not presented separately in the Consolidated Statements of Operations as these amounts are not material for any of the fiscal periods presented.

Certain reclassifications have been made to the amounts in prior periods in order to conform to the current period's presentation. We have evaluated subsequent events through the date that the financial statements were issued.

### 2. Recent Accounting Pronouncements

### (a) New Accounting Updates Recently Adopted

<u>Credit Losses of Financial Instruments</u> In June 2016, the FASB issued an accounting standard update that requires measurement and recognition of expected credit losses for financial assets held based on historical experience, current conditions, and reasonable and supportable forecasts that affect the collectibility of the reported amount. We adopted this standard at the beginning of our first quarter of fiscal 2021, applied it at the beginning of the period of adoption and did not restate prior periods. The standard primarily impacts our financial assets measured at amortized cost and available-for-sale debt securities. The standard did not have a material impact on our consolidated financial statements upon adoption.

Our significant accounting policies have been updated as a result of adopting this standard are as follows:

Allowance for Accounts Receivable, Contract Assets and Financing Receivables We estimate our allowances for credit losses using relevant available information from internal and external sources, related to past events, current conditions and reasonable and supportable forecasts. Historical credit loss experience provides the basis for the estimation of expected credit losses. When assessing for credit losses, we determine collectibility by pooling our assets with similar characteristics.

The allowances for credit losses are each measured on a collective basis when similar risk characteristics exist. Our internal credit risk ratings are categorized as 1 through 10, with the lowest credit risk rating representing the highest quality. Our assets within each internal credit risk rating share similar risk characteristics and therefore are assessed as one portfolio segment for credit loss. Assets that do not share risk characteristics are evaluated on an individual basis. The allowances for credit losses are each measured by multiplying the exposure probability of default, the probability the asset will default within a given time frame, by the loss given default rate, the percentage of the asset not expected to be collected due to default, based on the pool of assets.

Probability of default rates are published quarterly by third-party credit agencies. Adjustments to our internal credit risk ratings may take into account including, but not limited to, various customer-specific factors, the potential sovereign risk of the geographic locations in which the customer is operating and macroeconomic conditions. These factors are updated regularly or when facts and circumstances indicate that an update is deemed necessary.

Available-for-Sale Debt Investments For our available-for-sale debt securities in an unrealized loss position, we determine whether a credit loss exists. In this assessment, we consider the extent to which the fair value is less than the amortized cost, any changes to the rating of the security by a rating agency, and adverse conditions specifically related to the security, among other factors. If factors indicate a credit loss exists, an allowance for credit loss is recorded to other income (loss), net, limited by the amount that the fair value is less than the amortized cost basis. The amount of fair value change relating to all other factors will be recognized in other comprehensive income (OCI).

### 3. Revenue

We enter into contracts with customers that can include various combinations of products and services which are generally distinct and accounted for as separate performance obligations. As a result, our contracts may contain multiple performance obligations. We determine whether arrangements are distinct based on whether the customer can benefit from the product or service on its own or together with other resources that are readily available and whether our commitment to transfer the product or service to the customer is separately identifiable from other obligations in the contract. We classify our hardware, perpetual software licenses, and software-as-a-service (SaaS) as distinct performance obligations. Term software licenses represent multiple obligations, which include software licenses and software maintenance. In transactions where we deliver hardware or software, we are typically the principal and we record revenue and costs of goods sold on a gross basis. We refer to our term software licenses, security software licenses, SaaS, and associated service arrangements as subscription offers.

We recognize revenue upon transfer of control of promised goods or services in a contract with a customer in an amount that reflects the consideration we expect to receive in exchange for those products or services. Transfer of control occurs once the customer has the contractual right to use the product, generally upon shipment or once title and risk of loss has transferred to the customer. Transfer of control can also occur over time for software maintenance and services as the customer receives the benefit over the contract term. Our hardware and perpetual software licenses are distinct performance obligations where revenue is recognized upfront upon transfer of control. Term software licenses include multiple performance obligations where the term licenses are recognized upfront upon transfer of control, with the associated software maintenance revenue recognized ratably over the contract term as services and software updates are provided. SaaS arrangements do not include the right for the customer to take possession of the software during the term, and therefore have one distinct performance obligation which is satisfied over time with revenue recognized ratably over the contract term as the customer consumes the services. On our product sales, we record consideration from shipping and handling on a gross basis within net product sales. We record our revenue net of any associated sales taxes.

An allowance for future sales returns is established based on historical trends in product return rates. The allowance for future sales returns as of May 1, 2021 and July 25, 2020 was \$61 million and \$79 million, respectively, and was recorded as a reduction of our accounts receivable and revenue.

### Significant Judgments

Revenue is allocated among these performance obligations in a manner that reflects the consideration that we expect to be entitled to for the promised goods or services based on standalone selling prices (SSP). SSP is estimated for each distinct performance obligation and judgment may be required in their determination. The best evidence of SSP is the observable price of a product or service when we sell the goods separately in similar circumstances and to similar customers. In instances where SSP is not directly observable, we determine SSP using information that may include market conditions and other observable inputs.

We apply judgment in determining the transaction price as we may be required to estimate variable consideration when determining the amount of revenue to recognize. Variable consideration includes potential contractual penalties and various rebate, cooperative marketing and other incentive programs that we offer to our distributors, channel partners and customers. When determining the amount of revenue to recognize, we estimate the expected usage of these programs, applying the expected value or most likely estimate and update the estimate at each reporting period as actual utilization becomes available. We also consider the customers' right of return in determining the transaction price, where applicable.

We assess certain software licenses, such as for security software, that contain critical updates or upgrades which customers can download throughout the contract term. Without these updates or upgrades, the functionality of the software would diminish over a relatively short time period. These updates or upgrades provide the customer the full functionality of the purchased security software licenses and are required to maintain the security license's utility as the risks and threats in the environment are rapidly changing. In these circumstances, the revenue from these software arrangements is recognized as a single performance obligation satisfied over the contract term.

### (a) Disaggregation of Revenue

We disaggregate our revenue into groups of similar products and services that depict the nature, amount, and timing of revenue and cash flows for our various offerings. The sales cycle, contractual obligations, customer requirements, and go-to-market strategies differ for each of our product categories, resulting in different economic risk profiles for each category. The following table presents this disaggregation of revenue (in millions):

	 Three Mor	 Nine Mor	nths	Ended	
	May 1, April 25, 2021 2020		May 1, 2021		April 25, 2020
Revenue:					
Infrastructure Platforms	\$ 6,832	\$ 6,447	\$ 19,564	\$	20,566
Applications	1,426	1,363	4,160		4,211
Security	876	778	2,559		2,343
Other Products	 6	9	15		27
Total Product	9,139	8,597	26,298		27,146
Services	3,664	3,386	10,394		10,001
Total	\$ 12,803	\$ 11,983	\$ 36,692	\$	37,147

Amounts may not sum due to rounding. We have made certain reclassifications to the product revenue amounts for prior period to conform to the current year presentation.

Infrastructure Platforms consist of our core networking technologies of switching, routing, wireless, and data center products that are designed to work together to deliver networking capabilities and transport and/or store data. These technologies consist of both hardware and software offerings, including software licenses and SaaS, that help our customers build networks, automate, orchestrate, integrate, and digitize data. We are shifting and expanding more of our business to software and subscriptions across our core networking portfolio. Our hardware and perpetual software in this category are distinct performance obligations where revenue is recognized upfront upon transfer of control. Term software licenses are multiple performance obligations where the term license is recognized upfront upon transfer of control with the associated software maintenance revenue recognized ratably over the contract term. SaaS arrangements in this category have one distinct performance obligation which is satisfied over time with revenue recognized ratably over the contract term.

Applications consists of offerings that utilize the core networking and data center platforms to provide their functions. The products consist primarily of software offerings, including software licenses and SaaS, as well as hardware. Our perpetual software and hardware in this category are distinct performance obligations where revenue is recognized upfront upon transfer of control. Term software licenses are multiple performance obligations where the term license is recognized upfront upon

transfer of control with the associated software maintenance revenue recognized ratably over the contract term. SaaS arrangements in this category have one distinct performance obligation which is satisfied over time with revenue recognized ratably over the contract term.

Security primarily includes our network security, cloud and email security, identity and access management, advanced threat protection, and unified threat management products. These products consist of both hardware and software offerings, including software licenses and SaaS. Updates and upgrades for the term software licenses are critical for our software to perform its intended commercial purpose because of the continuous need for our software to secure our customers' network environments against frequent threats. Therefore, security software licenses are generally represented by a single distinct performance obligation with revenue recognized ratably over the contract term. Our hardware and perpetual software in this category are distinct performance obligations where revenue is recognized upfront upon transfer of control. SaaS arrangements in this category have one distinct performance obligation which is satisfied over time with revenue recognized ratably over the contract term.

Other Products primarily includes our cloud and system management products. These products include both hardware and software licenses. Our offerings in this category are distinct performance obligations where revenue is recognized upfront upon transfer of control.

In addition to our product offerings, we provide a broad range of service and support options for our customers, including technical support services and advanced services. Technical support services represent the majority of these offerings which are distinct performance obligations that are satisfied over time with revenue recognized ratably over the contract term. Advanced services are distinct performance obligations that are satisfied over time with revenue recognized as services are delivered.

The sales arrangements as discussed above are typically made pursuant to customer purchase orders based on master purchase or partner agreements. Cash is received based on our standard payment terms which is typically 30 days. We provide financing arrangements to customers for all of our hardware, software and service offerings. Refer to Note 9 for additional information. For these arrangements, cash is typically received over time.

### (b) Contract Balances

Accounts receivable, net was \$4.4 billion as of May 1, 2021 compared to \$5.5 billion as of July 25, 2020, as reported on the Consolidated Balance Sheets.

Contract assets consist of unbilled receivables and are recorded when revenue is recognized in advance of scheduled billings to our customers. These amounts are primarily related to software and service arrangements where transfer of control has occurred but we have not yet invoiced. Our contract assets for these unbilled receivables, net of allowances, were \$1.3 billion and \$1.2 billion as of May 1, 2021 and July 25, 2020, respectively, and were included in other current assets and other assets.

Gross contract assets by our internal risk ratings are summarized as follows (in millions):

	May 1, 2021
1 to 4	\$ 379
5 to 6	840
7 and Higher	91
Total	\$ 1,310

Contract liabilities consist of deferred revenue. Deferred revenue was \$20.9 billion as of May 1, 2021 compared to \$20.4 billion as of July 25, 2020. We recognized approximately \$2.6 billion and \$9.5 billion of revenue during the third quarter and first nine months of fiscal 2021, respectively, that was included in the deferred revenue balance at July 25, 2020.

### (c) Capitalized Contract Acquisition Costs

We capitalize direct and incremental costs incurred to acquire contracts, primarily sales commissions, for which the associated revenue is expected to be recognized in future periods. We incur these costs in connection with both initial contracts and renewals. These costs are initially deferred and typically amortized over the term of the customer contract which corresponds to the period of benefit. Deferred sales commissions were \$893 million and \$732 million as of May 1, 2021 and July 25, 2020, respectively, and were included in other current assets and other assets. The amortization expense associated with these costs was \$134 million and \$386 million for the third quarter and first nine months of fiscal 2021, respectively, and \$118 million and \$356 million for the corresponding periods of fiscal 2020, respectively, and was included in sales and marketing expenses.

### 4. Acquisitions and Divestitures

We completed eight acquisitions during the first nine months of fiscal 2021. A summary of the allocation of the total purchase consideration is presented as follows (in millions):

	Purchase Consideration	Net Tangible Assets Acquired (Liabilities Assumed)	I	Purchased Intangible Assets	Goodwill
Acacia	\$ 4,983	\$ 447	\$	2,160	\$ 2,376
Others	1,739	(101)		567	1,273
Total	\$ 6,722	\$ 346	\$	2,727	\$ 3,649

On March 1, 2021, we completed our acquisition of Acacia Communications, Inc. ("Acacia"), a public fabless semiconductor company that develops, manufactures and sells high-speed coherent optical interconnect products that are designed to transform communications networks through improvements in performance, capacity and cost. Revenue from the Acacia acquisition has been included in our Infrastructure Platforms product category.

The total purchase consideration related to our acquisitions completed during the first nine months of fiscal 2021 consisted of cash consideration and vested share-based awards assumed. The total cash and cash equivalents acquired from these acquisitions was approximately \$315 million. Total transaction costs related to acquisition and divestiture activities were \$30 million and \$13 million for the first nine months of fiscal 2021 and 2020, respectively. These transaction costs were expensed as incurred in general and administrative expenses ("G&A") in the Consolidated Statements of Operations.

The goodwill generated from acquisitions completed during the first nine months of fiscal 2021 is primarily related to expected synergies. The goodwill is generally not deductible for income tax purposes.

The Consolidated Financial Statements include the operating results of each acquisition from the date of acquisition. Pro forma results of operations and the revenue and net income subsequent to the acquisition date for the acquisitions completed during the first nine months of fiscal 2021 have not been presented because the effects of the acquisitions, individually and in the aggregate, were not material to our financial results.

### 5. Goodwill and Purchased Intangible Assets

### (a) Goodwill

The following table presents the goodwill allocated to our reportable segments as of May 1, 2021 and during the first nine months of fiscal 2021 (in millions):

	Balance at July 25, 2020		Acquisitions & Divestitures	Foreign Currency Translation and Other			alance at May 1, 2021
Americas	\$	21,304	\$ 1,902	\$	157	\$	23,363
EMEA		8,040	869		59		8,968
APJC		4,462	863		34		5,359
Total	\$	33,806	\$ 3,634	\$	250	\$	37,690

### (b) Purchased Intangible Assets

The following table presents details of our intangible assets acquired through acquisitions completed during the first nine months of fiscal 2021 (in millions, except years):

			FINITE LIV	ES			INDEFINITE LIVES	
	TECHNOLOG	Ϋ́	CUSTOMER RELATIONSH		OTHER		IPR&D	TOTAL
	Weighted- Average Useful Life (in Years)	Amount	Weighted- Average Useful Life (in Years)	Amount	Weighted- Average Useful Life (in Years)	Amount	Amount	Amount
Acacia	4.0	\$ 1,290	4.0	\$ 490	3.1	\$ 35	\$ 345	\$ 2,160
Others	4.3	395	4.7	143	3.3	29	_	567
Total		\$ 1,685		\$ 633		\$ 64	\$ 345	\$ 2,727

The following tables present details of our purchased intangible assets (in millions):

May 1, 2021	Gross	Accumulated Amortization	Net
Purchased intangible assets with finite lives:			
Technology	\$ 3,594	\$ (1,348)	\$ 2,246
Customer relationships	1,364	(460)	904
Other	71	(10)	61
Total purchased intangible assets with finite lives	5,029	(1,818)	3,211
In-process research and development, with indefinite lives	505	_	505
Total	\$ 5,534	\$ (1,818)	\$ 3,716

July 25, 2020	Gross	Accumulated Amortization	Net
Purchased intangible assets with finite lives:			
Technology	\$ 3,298	\$ \$ (2,336)	\$ 962
Customer relationships	760	(365)	395
Other	20	(20)	6
Total purchased intangible assets with finite lives	4,084	(2,721)	1,363
In-process research and development, with indefinite lives	213	_	213
Total	\$ 4,297	\$ (2,721)	\$ 1,576
Total purchased intangible assets with finite lives In-process research and development, with indefinite lives	4,084	(2,721)	213

Purchased intangible assets include intangible assets acquired through acquisitions as well as through direct purchases or licenses.

The following table presents the amortization of purchased intangible assets, including impairment charges (in millions):

		Three Mo	onths Ended	Nine Months Ended			
		May 1, 2021	April 25, 2020 May 1, 2021		April 25, 2020		
Amortization of purchased intangible assets:	' <u></u>						
Cost of sales	\$	187	\$	163	\$ 513	\$ 494	
Operating expenses		61		34	136	108	
Total	\$	248	\$	197	\$ 649	\$ 602	

The estimated future amortization expense of purchased intangible assets with finite lives as of May 1, 2021 is as follows (in millions):

Fiscal Year	Amount
2021 (remaining three months)	\$ 288
2022	\$ 986
2023	\$ 829
2024	\$ 705
2025	\$ 355
Thereafter	\$ 48

### 6. Restructuring and Other Charges

We initiated a restructuring plan in the first quarter of fiscal 2021 (the "Fiscal 2021 Plan"), which includes a voluntary early retirement program, in order to realign the organization and enable further investment in key priority areas. The total pretax charges are estimated to be approximately \$900 million. In connection with the Fiscal 2021 Plan, we incurred charges of \$35 million and \$869 million for the third quarter and first nine months of fiscal 2021, respectively.

We initiated a restructuring plan in fiscal 2020 (the "Fiscal 2020 Plan") in order to realign the organization and enable further investment in key priority areas. The total pretax charges are estimated to be approximately \$300 million. In connection with the Fiscal 2020 Plan, we have incurred cumulative charges of \$264 million.

The aggregate pretax charges related to these plans are primarily cash-based and consist of severance and other one-time termination benefits, and other costs. We expect to substantially complete both plans in fiscal 2021.

The following tables summarize the activities related to the restructuring and other charges (in millions):

	FISCAL 2020 AND PRIOR PLANS					FISCAL 2021 PLAN				
	Employee Severance			Other		Employee Severance		Other		Total
Liability as of July 25, 2020	\$ 5	8	\$	14	\$	_	\$	_	\$	72

Liability as of April 25, 2020	\$	14	\$	3	\$	81	\$	_	\$ 98

### 7. Balance Sheet and Other Details

The following tables provide details of selected balance sheet and other items (in millions):

		May 1, 2021	July 25, 2020
Cash and cash equivalents	\$	7,350 \$	11,809
Restricted cash included in other current assets	· ·	6	_
Restricted cash included in other assets		3	3
Total cash, cash equivalents, and restricted cash	\$	7,359 \$	11,812
Inventories:			
Raw materials	\$	723 \$	456
Work in process		37	25
Finished goods:			
Deferred cost of sales		73	59
Manufactured finished goods		546	542
Total finished goods		619	601
Service-related spares		188	184
Demonstration systems		12	16
Total	\$	1,579 \$	1,282
Our provision for inventory was \$91 million and \$49 million for the first nine months of fiscal 2	2021 and 2020, respectively.		
Property and equipment, net:			
Gross property and equipment:			
Land, buildings, and building and leasehold improvements	\$	4,309 \$	4,252
Computer equipment and related software		867	875
Production, engineering, and other equipment		5,146	5,163
Operating lease assets		311	337
Furniture, fixtures and other		376	387
Total gross property and equipment		11,009	11,014
Less: accumulated depreciation and amortization		(8,642)	(8,561)
Total	\$	2,367 \$	2,453
Deferred revenue:			
Product	\$	8,698 \$	7,895
Service		12,191	12,551
Total	\$	20,889 \$	20,446
Reported as:			
Current	\$	11,492 \$	11,406
Noncurrent		9,397	9,040
Total	\$	20,889 \$	20,446
Remaining Performance Obligations:			
	\$	11,903 \$	11,261
Product	\$	11,705 ψ	
Product Service		16,235	17,093

Remaining Performance Obligations (RPO) are comprised of deferred revenue plus unbilled contract revenue. As of May 1, 2021, the aggregate amount of RPO was comprised of \$20.9 billion of deferred revenue and \$7.2 billion of unbilled contract revenue. We expect approximately 53% of this amount to be recognized as revenue over the next 12 months. As of July 25, 2020, the aggregate amount of RPO was comprised of \$20.4 billion of deferred revenue and \$7.9 billion of unbilled contract revenue. Unbilled contract revenue represents noncancelable contracts for which we have not invoiced, have an obligation to perform, and revenue has not yet been recognized in the financial statements.

### 8. Leases

### (a) Lessee Arrangements

The following table presents our operating lease balances (in millions):

	Balance Sheet Line Item	Ma	y 1, 2021	July 25, 2020		
Operating lease right-of-use assets	Other assets	\$	928	\$	921	
Operating lease liabilities	Other current liabilities	\$	335	\$	341	
Operating lease liabilities	Other long-term liabilities		671		661	
Total operating lease liabilities		\$	1,006	\$	1,002	

The components of our lease expenses were as follows (in millions):

		Three Mor	nths Ended			Nine Mon	ths Ende	d
	May	1, 2021	April 25, 2	2020	M	lay 1, 2021	April	25, 2020
Operating lease expense	\$	105	\$	101	\$	306	\$	315
Short-term lease expense		14		18		49		51
Variable lease expense		42		37		131		116
Total lease expense	\$	161	\$	156	\$	486	\$	482

Supplemental information related to our operating leases is as follows (in millions):

		Nine Months	Ended
	Ma	ıy 1, 2021	April 25, 2020
Cash paid for amounts included in the measurement of lease liabilities — operating cash flows	\$	306 \$	309
Right-of-use assets obtained in exchange for operating leases liabilities	\$	270 \$	120

The weighted-average lease term was 4.1 years and 4.0 years as of May 1, 2021 and July 25, 2020, respectively. The weighted-average discount rate was 0.9% and 1.5% as of May 1, 2021 and July 25, 2020, respectively.

The maturities of our operating leases (undiscounted) as of May 1, 2021 are as follows (in millions):

Fiscal Year	Amount
2021 (remaining three months)	\$ 95
2022	321
2023	245
2024	161
2025	96
Thereafter	107
Total lease payments	1,025
Less interest	(19)
Total	\$ 1,006

### (b) Lessor Arrangements

Our leases primarily represent sales-type leases with terms of four years on average. We provide leasing of our equipment and complementary third-party products primarily through our channel partners and distributors, for which the income arising from these leases is recognized through interest income. Interest income for the third quarter and first nine months of fiscal 2021 was \$19 million and \$59 million, respectively, and \$23 million and \$72 million for the corresponding periods of fiscal 2020, respectively, and was included in interest income in the Consolidated Statement of Operations. The net investment of our lease receivables is measured at the commencement date as the gross lease receivable, residual value less unearned income and allowance for credit loss. For additional information, see Note 9.

Future minimum lease payments on our lease receivables as of May 1, 2021 are summarized as follows (in millions):

Fiscal Year	Amount
2021 (remaining three months)	\$ 77
2022	727
2023	467
2024	272
2025	151
Thereafter	38
Total	 1,732
Less: Present value of lease payments	1,642
Unearned income	\$ 90

Actual cash collections may differ from the contractual maturities due to early customer buyouts, refinancings, or defaults.

We provide financing of certain equipment through operating leases, and the amounts are included in property and equipment in the Consolidated Balance Sheets. Amounts relating to equipment on operating lease assets held by us and the associated accumulated depreciation are summarized as follows (in millions):

	May 1, 2021	July 25, 2020
Operating lease assets	\$ 311	\$ 337
Accumulated depreciation	(187)	(198)
Operating lease assets, net	\$ 124	\$ 139

Our operating lease income for the third quarter and first nine months of fiscal 2021 was \$36 million and \$119 million, respectively, and \$49 million and \$143 million for the corresponding periods of fiscal 2020, respectively, and was included in product revenue in the Consolidated Statement of Operations.

Minimum future rentals on noncancelable operating leases as of May 1, 2021 are summarized as follows (in millions):

Fiscal Year	Amo	ount
2021 (remaining three months)	\$	23
2022		46
2023		23
2024		5
Total	\$	97

### 9. Financing Receivables

### (a) Financing Receivables

Financing receivables primarily consist of lease receivables, loan receivables, and financed service contracts. Lease receivables represent sales-type leases resulting from the sale of Cisco's and complementary third-party products and are typically collateralized by a security interest in the underlying assets. Lease receivables consist of arrangements with terms of four years on average. Loan receivables represent financing arrangements related to the sale of our hardware, software, and services, which may include additional funding for other costs associated with network installation and integration of our products and services. Loan receivables have terms of three years on average. Financed service contracts include financing receivables related to technical support and advanced services. Revenue related to the technical support services is typically deferred and included in deferred service revenue and is recognized ratably over the period during which the related services are to be performed, which typically ranges from one year to three years.

A summary of our financing receivables is presented as follows (in millions):

May 1, 2021	Lease Receivables	Loan Receivables	Financed Service Contracts	Total
Gross	\$ 1,732	\$ 5,638	\$ 2,461	\$ 9,831

Total	\$	227	\$	200	\$ 250	\$	677	\$ 10,103	\$ 10,780	\$	112	\$	112

Past due financing receivables are those that are 31 days or more past due according to their contractual payment terms. The data in the preceding tables is presented by contract, and the aging classification of each contract is based on the oldest outstanding receivable, and therefore past due amounts also include unbilled and current receivables within the same contract.

As of July 25, 2020, we had financing receivables of \$67 million, net of unbilled or current receivables, that were greater than 120 days plus past due but remained on accrual status as they are well secured and in the process of collection.

### (c) Allowance for Credit Loss Rollforward

The allowances for credit loss and the related financing receivables are summarized as follows (in millions):

Three months ended May 1, 2021	CREDIT LOSS ALLOWANCES							
		Lease Receivables		Loan Receivables		Financed Service Contracts		Total

Corporate debt securities		1,060	(6)	3	_	1,063		(6)	
U.S. agency mortgage-backed securities		265	(1)	_	_	265		(1)	
Total	\$	1,358	\$ (7)	\$ 3	\$ _	\$ 1,361	\$	(7)	

The following table summarizes the maturities of our available-for-sale debt investments as of May 1, 2021 (in millions):

	Am	ortized Cost	Fair Value
Within 1 year	\$	5,608	\$ 5,605
After 1 year through 5 years		6,296	6,428
After 5 years through 10 years		1,244	1,318
After 10 years		5	7
Mortgage-backed securities with no single maturity		2,788	2,810
Total	\$	15,941	\$ 16,168

Actual maturities may differ from the contractual maturities because borrowers may have the right to call or prepay certain obligations.

### (b) Summary of Equity Investments

Our net unrealized gains recognized during the reporting period on our marketable securities still held as of May 1, 2021 was \$3 million for each of the third quarter and first nine months of fiscal 2021. Our net adjustments to non-marketable equity securities measured using the measurement alternative was a net loss of \$3 million and a net gain of \$1 million for the third quarter and first nine months of fiscal 2021, respectively. These adjustments were net losses of \$4 million and \$1 million for the corresponding periods of fiscal 2020, respectively. We held equity interests in certain private equity funds of \$0.8 billion and \$0.7 billion as of May 1, 2021 and July 25, 2020, respectively, which are accounted for under the NAV practical expedient.

In the ordinary course of business, we have investments in privately held companies and provide financing to certain customers. These privately held companies and customers are evaluated for consolidation under the variable interest or voting interest entity models. We evaluate on an ongoing basis our investments in these privately held companies and our customer financings, and have determined that as of May 1, 2021, except as disclosed herein, there were no significant variable interest or voting interest entities required to be consolidated in our Consolidated Financial Statements.

The carrying value of our investments in privately held companies was \$1.4 billion and \$1.3 billion as of May 1, 2021 and July 25, 2020, respectively.

Of the total carrying value of our investments in privately held companies as of May 1, 2021, \$0.8 billion of such investments are considered to be in variable interest entities which are unconsolidated. As of May 1, 2021, we have total funding commitments of \$0.2 billion related to privately held investments, some of which may be based on the achievement of certain agreed-upon milestones, and some of which are required to be funded on demand. The carrying value of these investments and the additional funding commitments collectively represent our maximum exposure related to privately held investments.

### 11. Fair Value

Fair value is defined as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities required or permitted to be either recorded or disclosed at fair value, we consider the principal or most advantageous market in which we would transact, and we also consider assumptions that market participants would use when pricing the asset or liability.

### (a) Fair Value Hierarchy

The accounting guidance for fair value measurement requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard establishes a fair value hierarchy based on the level of independent, objective evidence surrounding the inputs used to measure fair value. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. The fair value hierarchy is as follows:

Level 1 applies to assets or liabilities for which there are quoted prices in active markets for identical assets or liabilities.

<u>Level 2</u> applies to assets or liabilities for which there are inputs other than quoted prices that are observable for the asset or liability, such as quoted prices for similar assets or liabilities in active markets; quoted prices for identical assets or liabilities in markets with insufficient volume or infrequent transactions (less active markets); or model-derived valuations in which significant inputs are observable or can be derived principally from, or corroborated by, observable market data.

Level 3 applies to assets or liabilities for which there are unobservable inputs to the valuation methodology that are significant to the measurement of the fair value of the assets or liabilities.

### (b) Assets and Liabilities Measured at Fair Value on a Recurring Basis

Assets and liabilities measured at fair value on a recurring basis were as follows (in millions):

		MAY 1, 2021 FAIR VALUE MEASUREMENTS							JULY 25, 2020 FAIR VALUE MEASUREMENTS							
	I	evel 1		Level 2		Level 3		Total Balance		Level 1		Level 2		Level 3	]	Total Balance
Assets:

Commercial paper		_		1,333		_		1,333		_		727		_		727
Certificates of deposit		_		440		_		440		_		176		_		176
Equity investments:																
Marketable equity securities		61		_		_		61		_		_		_		_
Assets:																
Derivative assets		_		134		6		140		_		190		1		191
Total	\$	4,759	\$	16,402	\$	6	\$	21,167	\$	10,024	\$	17,808	\$	1	\$	27,833
Liabilities:				<u> </u>												
Derivative liabilities	\$	_	\$	16	\$	_	\$	16	\$	_	\$	10	\$	_	\$	10
Total	\$	_	\$	16	\$	_	\$	16	\$	_	\$	10	\$	_	\$	10

Level 1 marketable securities are determined by using quoted prices in active markets for identical assets. Level 2 available-for-sale debt investments are priced using quoted market prices for similar instruments or nonbinding market prices that are corroborated by observable market data. We use inputs such as actual trade data, benchmark yields, broker/dealer quotes, and other similar data, which are obtained from quoted market prices, independent pricing vendors, or other sources, to determine the ultimate fair value of these assets and liabilities. We use such pricing data as the primary input to make our assessments and determinations as to the ultimate valuation of our investment portfolio and have not made, during the periods presented, any material adjustments to such inputs. We are ultimately responsible for the financial statements and underlying estimates. Our derivative instruments are primarily classified as Level 2, as they are not actively traded and are valued using pricing models that use observable market inputs. We did not have any transfers between Level 1 and Level 2 fair value measurements during the periods presented. Level 3 assets include certain derivative instruments, the values of which are determined based on discounted cash flow models using inputs that we could not corroborate with market data.

### (c) Assets Measured at Fair Value on a Nonrecurring Basis

The carrying value of our non-marketable equity securities recorded to fair value on a non-recurring basis is adjusted for observable transactions for identical or similar investments of the same issuer or impairment. These securities are classified as Level 3 in the fair value hierarchy because we estimate the value based on valuation methods using the observable transaction price at the transaction date and other unobservable inputs such as volatility, rights, and obligations of the securities we hold.

### (d) Other Fair Value Disclosures

The fair value of our short-term loan receivables and financed service contracts approximates their carrying value due to their short duration. The aggregate carrying value of our long-term loan receivables and financed service contracts as of May 1, 2021

and July 25, 2020 was \$4.1 billion and \$4.5 billion, respectively. The estimated fair value of our long-term loan receivables and financed service contracts approximates their carrying value. We use significant unobservable inputs in determining discounted cash flows to estimate the fair value of our long-term loan receivables and financed service contracts, and therefore they are categorized as Level 3.

As of May 1, 2021, the estimated fair value of our short-term debt approximates its carrying value due to the short maturities. As of May 1, 2021, the fair value of our senior notes was \$13.5 billion with a carrying amount of \$11.5 billion. This compares to a fair value of \$17.4 billion and a carrying amount of \$14.6 billion as of July 25, 2020. The fair value of the senior notes was determined based on observable market prices in a less active market and was categorized as Level 2 in the fair value hierarchy.

### 12. Borrowings

### (a) Short-Term Debt

The following table summarizes our short-term debt (in millions, except percentages):

	 May	1, 2021		25, 2020	
	 Amount	Effective Rate	Amount	Effective Rate	
Current portion of long-term debt	\$ 2,000	1.90 %	\$ 3,005	2.07 %	

We have a short-term debt financing program of up to \$10.0 billion through the issuance of commercial paper notes. We use the proceeds from the issuance of commercial paper notes for general corporate purposes. We had no commercial paper outstanding as of May 1, 2021 and July 25, 2020.

The effective rates for the short- and long-term debt include the interest on the notes, the accretion of the discount, the issuance costs, and, if applicable, adjustments related to hedging.

### (b) Long-Term Debt

The following table summarizes our long-term debt (in millions, except percentages):

		Ma	ay 1, 2021	July	July 25, 2020		
	Maturity Date	Amount	Effective Rate	Amount	Effective Rate

Total		11,500		14,500			
Unaccreted discount/issuance costs		(81)		(88)			
Hedge accounting fair value adjustments		113		171			
Total		\$ 11,532		\$ 14,583			
Reported as:							
Current portion of long-term debt		\$ 2,000		\$ 3,005			
Long-term debt		9,532		11,578			
Total		\$ 11,532		\$ 14,583			

We have entered into interest rate swaps in prior periods with an aggregate notional amount of \$2.0 billion designated as fair value hedges of certain of our fixed-rate senior notes. These swaps convert the fixed interest rates of the fixed-rate notes to floating interest rates based on the London InterBank Offered Rate ("LIBOR"). The gains and losses related to changes in the fair value of the interest rate swaps substantially offset changes in the fair value of the hedged portion of the underlying debt that are attributable to the changes in market interest rates. For additional information, see Note 13.

Interest is payable semiannually on each class of the senior fixed-rate notes. Each of the senior fixed-rate notes is redeemable by us at any time, subject to a make-whole premium. The senior notes rank at par with the commercial paper notes that may be issued in the future pursuant to our short-term debt financing program, as discussed above under "(a) Short-Term Debt." As of May 1, 2021, we were in compliance with all debt covenants.

As of May 1, 2021, future principal payments for long-term debt, including the current portion, are summarized as follows (in millions):

Fiscal Year	Amount
2021 (remaining three months)	\$ _
2022	2,500
2023	500
2024	1,750
2025	500
Thereafter	6,250
Total	\$ 11,500

### (c) Credit Facility

On May 13, 2021, we entered into a 5-year credit agreement with certain institutional lenders that provides for a \$3.0 billion unsecured revolving credit facility that is scheduled to expire on May 13, 2026. The credit agreement is structured as an amendment and restatement of our 364-day credit agreement, which would have terminated on May 14, 2021. As of May 1, 2021, we were in compliance with the required interest coverage ratio and the other covenants, and we had not borrowed any funds under the 364-day credit facility.

Any advances under the 5-year credit agreement will accrue interest at rates that are equal to, based on certain conditions, either (a) with respect to loans in U.S. dollars, (i) LIBOR or (ii) the Base Rate (to be defined as the highest of (x) the Bank of America prime rate, (y) the Federal Funds rate plus 0.50% and (z) a daily rate equal to one-month LIBOR plus 1.0%), (b) with respect to loans in Euros, EURIBOR, (c) with respect to loans in Yen, TIBOR and (d) with respect to loans in Pounds Sterling, SONIA plus a credit spread adjustment, plus a margin that is based on our senior debt credit ratings as published by Standard & Poor's Financial Services, LLC and Moody's Investors Service, Inc., provided that in no event will the interest rate be less than 0.0%. We will pay a quarterly commitment fee during the term of the 5-year credit agreement which may vary depending on our senior debt credit ratings. In addition, the 5-year credit agreement incorporates certain sustainability-linked metrics. Specifically, our applicable interest rate and commitment fee are subject to upward or downward adjustments if we achieve, or fail to achieve, certain specified targets based on two key performance indicator metrics: (i) social impact and (ii) foam reduction. We may also, upon the agreement of either the then-existing lenders or additional lenders not currently parties to the agreement, increase the commitments under the credit facility by up to an additional \$2.0 billion and, at our option, extend the maturity of the facility for an additional year up to two times. The credit agreement requires that we comply with certain covenants, including that we maintain an interest coverage ratio as defined in the agreement.

### 13. Derivative Instruments

### (a) Summary of Derivative Instruments

We use derivative instruments primarily to manage exposures to foreign currency exchange rate, interest rate, and equity price risks. Our primary objective in holding derivatives is to reduce the volatility of earnings and cash flows associated with changes in foreign currency exchange rates, interest rates, and equity prices. Our derivatives expose us to credit risk to the extent that the counterparties may be unable to meet the terms of the agreement. We do, however, seek to mitigate such risks by limiting our counterparties to major financial institutions and requiring collateral in certain cases. In addition, the potential risk of loss with any one counterparty resulting from this type of credit risk is monitored. Management does not expect material losses as a result of defaults by counterparties.

The fair values of our derivative instruments and the line items on the Consolidated Balance Sheets to which they were recorded are summarized as follows (in millions):

	DERIVATIVE ASSETS			DERIVATIVE LIABILITIES						
	Balance Sheet Line Item		1ay 1, 2021	July 25, 2020	July 25, 2020 Balance Sheet Line Item		Лау 1, 2021	July 20	y 25, 020

The notional amounts of our outstanding derivatives are summarized as follows (in millions):

	May 1, 2021	July 25, 2020
Foreign currency derivatives	\$ 4,054	\$ 4,315
Interest rate derivatives	2,000	2,500
Total return swaps—deferred compensation	 739	580
Total	\$ 6,793	\$ 7,395

### (b) Offsetting of Derivative Instruments

We present our derivative instruments at gross fair values in the Consolidated Balance Sheets. However, our master netting and other similar arrangements with the respective counterparties allow for net settlement under certain conditions, which are designed to reduce credit risk by permitting net settlement with the same counterparty. As of May 1, 2021 and July 25, 2020, the potential effects of these rights of set-off associated with the derivative contracts would be a reduction to both derivative assets and derivative liabilities of \$16 million and \$10 million, respectively.

To further limit credit risk, we also enter into collateral security arrangements related to certain derivative instruments whereby cash is posted as collateral between the counterparties based on the fair market value of the derivative instrument. Under these collateral security arrangements, the net cash collateral received as of May 1, 2021 and July 25, 2020 was \$115 million and \$173 million, respectively. Including the effects of collateral, this results in a net derivative asset of \$8 million as of each of May 1, 2021 and July 25, 2020.

### (c) Foreign Currency Exchange Risk

We conduct business globally in numerous currencies. Therefore, we are exposed to adverse movements in foreign currency exchange rates. To limit the exposure related to foreign currency changes, we enter into foreign currency contracts. We do not enter into such contracts for speculative purposes.

We hedge forecasted foreign currency transactions related to certain revenues, operating expenses and service cost of sales with currency options and forward contracts. These currency options and forward contracts, designated as cash flow hedges, generally have maturities of less than 24 months. The derivative instrument's gain or loss is initially reported as a component of accumulated other comprehensive income ("AOCI") and subsequently reclassified into earnings when the hedged exposure affects earnings. During the periods presented, we did not discontinue any cash flow hedges for which it was probable that a forecasted transaction would not occur.

We enter into foreign exchange forward and option contracts to reduce the short-term effects of foreign currency fluctuations on assets and liabilities such as foreign currency receivables, including long-term customer financings and payables. These derivatives are not designated as hedging instruments. Cains and losses on the contracts are included in other income (loss), net, and substantially offset foreign exchange gains and losses from the remeasurement of intercompany balances, other current assets, or liabilities denominated in currencies other than the functional currency of the reporting entity.

We hedge certain net investments in our foreign operations with forward contracts to reduce the effects of foreign currency fluctuations on our net investment in those foreign subsidiaries. These derivative instruments generally have maturities of up to six months.

### (d) Interest Rate Risk

Interest Rate Derivatives Designated as Fair Value Hedges, Long-Term Debt We hold interest rate swaps designated as fair value hedges related to fixed-rate senior notes that are due in fiscal 2022 through 2025. Under these interest rate swaps, we receive fixed-rate interest payments and make interest payments based on LIBOR plus a fixed number of basis points. The effect of such swaps is to convert the fixed interest rates of the senior fixed-rate notes to floating interest rates based on LIBOR. The gains and losses related to changes in the fair value of the interest rate swaps are included in interest expense and substantially offset changes in the fair value of the hedged portion of the underlying debt that are attributable to the changes in market interest rates.

### (e) Equity Price Risk

We hold marketable equity securities in our portfolio that are subject to price risk. To diversify our overall portfolio, we also hold equity derivatives that are not designated as accounting hedges. The change in the fair value of each of these investment types are included in other income (loss), net.

We are also exposed to variability in compensation charges related to certain deferred compensation obligations to employees. Although not designated as accounting hedges, we utilize derivatives such as total return swaps to economically hedge this exposure and offset the related compensation expense.

### 14. Commitments and Contingencies

### (a) Purchase Commitments with Contract Manufacturers and Suppliers

We purchase components from a variety of suppliers and use several contract manufacturers to provide manufacturing services for our products. During the normal course of business, in order to manage manufacturing lead times and help ensure adequate component supply, we enter into agreements with contract manufacturers and suppliers that either allow them to procure inventory based upon criteria as defined by us or establish the parameters defining our requirements. A significant portion of our reported purchase commitments arising from these agreements consists of firm, noncancelable, and unconditional commitments. Certain of these purchase commitments with contract manufacturers and suppliers relate to arrangements to secure long-term supply and pricing for certain product components for multi-year periods. In certain instances, these agreements allow us the option to cancel, reschedule, and adjust our requirements based on our business needs prior to firm orders being placed.

The following table summarizes our purchase commitments with contract manufacturers and suppliers (in millions):

Commitments by Period	May 1, 2021		July 25, 2020
Less than 1 year	\$ 6,4	61 \$	3,994
1 to 3 years	1,6	15	412
3 to 5 years	1,7	33	_
Total	\$ 9,5	09 \$	4,406

We record a liability for firm, noncancelable, and unconditional purchase commitments for quantities in excess of our future demand forecasts consistent with the valuation of our excess and obsolete inventory. As of May 1, 2021 and July 25, 2020, the liability for these purchase commitments was \$129 million and \$141 million, respectively, and was included in other current liabilities. The provision for the liability related to purchase commitments with contract manufacturers and suppliers was \$35 million and \$131 million for the first nine months of fiscal 2021 and 2020, respectively.

### (b) Other Commitments

In connection with our acquisitions, we have agreed to pay certain additional amounts contingent upon the achievement of certain agreed-upon technology, development, product, or other milestones or upon the continued employment with Cisco of certain employees of the acquired entities.

The following table summarizes the compensation expense related to acquisitions (in millions):

	Three Months Ended			Nine Months Ended			
	May 1, 2021 April 25, 2020			May 1, 2021	April 25, 20	pril 25, 2020	
Compensation expense related to acquisitions	\$	66	\$ 61	\$	182	<u> </u>	172

As of May 1, 2021, we estimated that future cash compensation expense of up to \$616 million may be required to be recognized pursuant to the applicable business combination agreements.

We also have certain funding commitments, primarily related to our non-marketable equity and other investments, some of which are based on the achievement of certain agreed-upon milestones, and some of which are required to be funded on demand. The funding commitments were \$0.2 billion and \$0.3 billion as of May 1, 2021 and July 25, 2020, respectively.

### (c) Product Warranties

The following table summarizes the activity related to the product warranty liability (in millions):

Nine Months Ended			
	May 1, 2021	A	pril 25, 2020
\$	331	\$	342
	382		423
	1		(5)
	(373)		(436)
\$	341	\$	324
	\$	May 1, 2021, \$ 331 382 1 (373)	May 1, A 2021  \$ 331 \$ 382 1 (373)

We accrue for warranty costs as part of our cost of sales based on associated material product costs, labor costs for technical support staff, and associated overhead. Our products are generally covered by a warranty for periods ranging from 90 days to five years, and for some products we provide a limited lifetime warranty.

### (d) Financing and Other Guarantees

In the ordinary course of business, we provide financing guarantees for various third-party financing arrangements extended to channel partners and end-user customers. Payments under these financing guarantee arrangements were not material for the periods presented.

Channel Partner Financing Guarantees We facilitate arrangements for third-party financing extended to channel partners, consisting of revolving short-term financing, with payment terms generally ranging from 60 to 90 days. During fiscal 2020, we expanded the payment terms on certain of our channel partner financing programs by 30 days in response to the COVID-19 pandemic. These financing arrangements facilitate the working capital requirements of the channel partners, and, in some cases, we guarantee a portion of these arrangements. The volume of channel partner financing was \$6.6 billion and \$6.3 billion for the third quarter of fiscal 2021 and 2020, respectively, and was \$19.5 billion and \$20.5 billion for the first nine months of fiscal 2021 and 2020, respectively. The balance of the channel partner financing subject to guarantees was \$1.3 billion and \$1.1 billion as of May 1, 2021 and July 25, 2020, respectively.

<u>End-User Financing Guarantees</u> We also provide financing guarantees for third-party financing arrangements extended to end-user customers related to leases and loans, which typically have terms of up to three years. The volume of financing provided by third parties for leases and loans as to which we had provided guarantees was \$1 million and \$2 million for the third quarter of fiscal 2021 and 2020, respectively, and was \$8 million for each of the first nine months of fiscal 2021 and 2020.

<u>Financing Guarantee Summary</u> The aggregate amounts of financing guarantees outstanding at May 1, 2021 and July 25, 2020, representing the total maximum potential future payments under financing arrangements with third parties along with the related deferred revenue, are summarized in the following table (in millions):

	May 20		July 25, 2020
Maximum potential future payments relating to financing guarantees:			
Channel partner	\$	165 \$	198
End user		6	9
Total	\$	171 \$	207
Deferred revenue associated with financing guarantees:			
Channel partner	\$	(16) \$	(19)
End user		(6)	(9)
Total	\$	(22) \$	(28)
Total	\$	149 \$	179

### (e) Indemnifications

In the normal course of business, we have indemnification obligations to other parties, including customers, lessors, and parties to other transactions with us, with respect to certain matters. We have agreed to indemnify against losses arising from a breach of representations or covenants or out of intellectual property infringement or other claims made against certain parties. These agreements may limit the time or circumstances within which an indemnification claim can be made and the amount of the claim.

It is not possible to determine the maximum potential amount for claims made under the indemnification obligations discussed in this section (e) due to uncertainties in the litigation process, coordination with and contributions by other parties and the defendants in these cases, and the unique facts and circumstances involved in each particular case and agreement. We are unable to reasonably estimate the ultimate outcome of the cases discussed below in this section (e), but we do not believe that any potential indemnity liability would be material, and historically, indemnity payments made by us have not had a material effect on our operating results, financial position, or cash flows.

Charter Communications, Inc. ("Charter"), which acquired Time Warner Cable ("TWC") in May 2016, sought indemnification from us for a final judgment obtained by Sprint Communications Company, L.P. ("Sprint") against TWC in federal court in Kansas. Following a trial on March 3, 2017, the jury found that TWC willfully infringed five patents and awarded Sprint \$140 million in damages, as well as pre- and post-judgment interest of approximately \$10 million. After the judgment was affirmed on appeal, Charter reported that it paid the judgment in full. We resolved Charter's indemnity claim effective February 4, 2021 for an amount that does not have a material effect on our financial position.

We have been asked to indemnify certain of our service provider customers that have been subject to patent infringement claims asserted by ChanBond, LLC ("ChanBond") in federal court in Delaware on September 21, 2015. ChanBond alleges that 13 service provider defendants, including among others, Comcast Corporation, Charter Communications, Inc. ("Charter"), Time Warner Cable, Inc. (subsequently acquired by Charter), Cox Communications, Inc. ("Cox"), and Cablevision Systems Corporation (subsequently acquired by Altice USA, Inc.), infringe three patents by providing high speed cable internet services to their customers utilizing cable modems and cable modem termination systems, consistent with the DOCSIS 3.0 standard, provided by us and other manufacturers generally used in combination with each other. ChanBond seeks monetary damages and injunctive relief against the service provider customers, although two of the asserted patents expire on June 19, 2021, and the third expires on September 17, 2021. The Court has set ChanBond's case against Cox for trial on May 20, 2021. The other cases against the remaining service provider defendants have not yet been set for trial. We believe that the service provider defendants have strong non-infringement, invalidity and other defenses and that ChanBond will not be able to meet its burden required for injunctive relief.

Verizon Communications Inc. has requested that we indemnify it and seven of its subsidiaries (collectively, "Verizon") for a subset of the patent infringement claims asserted by Huawei Technologies Co. Ltd. ("Huawei") in lawsuits filed against Verizon on February 5, 2020, in the United States District Court for the Eastern District of Texas ("E.D. Tex") and the United States District Court for the Western District of Texas ("W.D. Tex"). In the E.D. Tex case, Huawei alleges infringement of four patents required to operate the G709 standard adopted by the Telecommunication Standardization Sector of the International Telecommunications Union by using products supplied by us. Huawei seeks monetary damages. The E.D. Tex court has set a trial date for July 9, 2021. In the W.D. Tex case, Huawei alleges infringement of four patents, two patents involving Cisco

Webex and Cisco video endpoints that allow content sharing in a video conference, and two patents involving Cisco routers that support Ethernet Flow Point functionality and/or specific network convergence functionalities. Huawei seeks monetary damages and injunctive relief in the W.D. Tex case. The W.D. Tex court has set a trial date for October 4, 2021. We believe that Verizon has strong defenses in the cases and that Huawei will not be able to meet its burden required for injunctive relief in the W.D. Tex case.

In addition, we have entered into indemnification agreements with our officers and directors, and our Amended and Restated Bylaws contain similar indemnification obligations to our agents.

### (f) Legal Proceedings

Brazilian authorities have investigated our Brazilian subsidiary and certain of its former employees, as well as a Brazilian importer of our products, and its affiliates and employees, relating to alleged evasion of import taxes and alleged improper transactions involving the subsidiary and the importer. Brazilian tax authorities have assessed claims against our Brazilian subsidiary based on a theory of joint liability with the Brazilian importer for import taxes, interest, and penalties. In addition to claims asserted by the Brazilian federal tax authorities in prior fiscal years, tax authorities from the Brazilian state of Sao Paulo have asserted similar claims on the same legal basis in prior fiscal years. The asserted claims by Brazilian federal tax authorities are for calendar years 2003 through 2007, and the asserted claims by the tax authorities from the state of Sao Paulo are for calendar years 2005 through 2007. The total asserted claims by Brazilian state and federal tax authorities aggregate to \$149 million for the alleged evasion of import and other taxes, \$735 million for interest, and \$368 million for various penalties, all determined using an exchange rate as of May 1, 2021.

We have completed a thorough review of the matters and believe the asserted claims against our Brazilian subsidiary are without merit, and we are defending the claims vigorously. While we believe there is no legal basis for the alleged liability, due to the complexities and uncertainty surrounding the judicial process in Brazil and the nature of the claims asserting joint liability with the importer, we are unable to determine the likelihood of an unfavorable outcome against our Brazilian subsidiary and are unable to reasonably estimate a range of loss, if any. We do not expect a final judicial determination for several years.

China We are investigating allegations of a self-enrichment scheme involving now-former employees in China. Some of those employees are also alleged to have made or directed payments from the funds they received to various third parties, including employees of state-owned enterprises. We voluntarily disclosed this investigation to the Department of Justice ("DOJ") and Securities and Exchange Commission ("SEC"). We take such allegations very seriously and we are providing results of our investigation to the DOJ and SEC. While the outcome of our investigation is currently not determinable, we do not expect that it will have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

SRI International On September 4, 2013, SRI International, Inc. ("SRI") asserted patent infringement claims against us in the U.S. District Court for the District of Delaware ("D. Del."), accusing our products and services in the area of network intrusion detection of infringing two patents. SRI sought monetary damages of at least a reasonable royalty and enhanced damages. On May 12, 2016, a jury returned a verdict finding willful infringement. The jury awarded SRI damages of \$24 million. On May 25, 2017, the district court awarded SRI enhanced damages and attorneys' fees, entered judgment in the new amount of \$57 million, and ordered an ongoing royalty of 3.5% through the expiration of the patents in 2018. We appealed to the United States Court of Appeals for the Federal Circuit ("Federal Circuit") on various grounds, and after various proceedings, on July 12, 2019, the Federal Circuit vacated the enhanced damages award; vacated and remanded in part the willful infringement finding; vacated and remanded the attorneys' fees award for further proceedings; and affirmed the district court's other findings. On April 1, 2020, the district court issued a final judgment on the remanded issues, finding no evidence of willful infringement and reinstating the \$8 million award of attorneys' fees. SRI appealed the judgment of no willful infringement to the Federal Circuit on April 3, 2020, and Cisco filed a cross-appeal on the attorneys' fees award on April 9, 2020. Cisco has paid SRI \$28 million, representing the portion of the judgment that the Federal Circuit previously affirmed, plus interest and royalties on post-verdict sales. While the remaining proceedings may result in an additional loss, we do not expect it to be material.

Centripetal On February 13, 2018, Centripetal Networks, Inc. ("Centripetal") asserted patent infringement claims against us in the U.S. District Court for the Eastern District of Virginia, alleging that several Cisco products and services (including Cisco's Catalyst switches, ASR and ISR series routers, ASAs with FirePOWER services, and Stealthwatch products) infringe eleven Centripetal patents. Cisco thereafter petitioned the Patent Trial and Appeal Board ("PTAB") of the United States Patent and Trademark Office ("PTO") to review the validity of nine of the asserted patents. The PTAB instituted inter partes review proceedings ("IPR Proceedings") on six asserted patents and certain claims of another asserted patent. The PTAB has issued Final Written Decisions for seven patents in the instituted IPR Proceedings, and all claims of five patents have been found unpatentable and several of the claims of the other two patents have been found unpatentable. Centripetal appealed the PTAB's findings of unpatentability as to

three of the patents on March 10, 2021, and affirmed the PTAB's findings of unpatentability as to the remaining four patents on May 11, 2021.

From May 6, 2020 to June 25, 2020, the district court conducted a bench trial by videoconference on the claims in the five patents not subject to the IPR Proceedings. On October 5, 2020, the district court issued a judgment finding validity and willful infringement of four of the asserted patents and non-infringement of the fifth patent. The district court awarded Centripetal \$1.9 billion, comprised of \$756 million in damages, \$1.1 billion in enhanced damages for willful infringement, and prejudgment interest in the amount of \$14 million. The district court declined to issue an injunction but, instead, awarded Centripetal a running royalty against revenue from the products found to infringe for an initial three-year term at a rate of 10%, with a minimum annual royalty of \$168 million and a maximum annual royalty of \$300 million, and for a second three-year term at a rate of 5%, with a minimum annual royalty of \$84 million and a maximum annual royalty of \$150 million. We believe that the district court's findings of validity, infringement, and willful infringement, its award of damages, including enhanced damages, and its award of an ongoing royalty are not supported by either the law or the evidence presented at trial. We have appealed the district court's judgment as to the four patents found valid and infringed to the Federal Circuit, and we believe that any relief ultimately awarded would not be material. On October 28, 2020, by agreement of the parties, the district court stayed execution of the judgment until after resolution of any appeal in the matter and waived the requirement of any bond or security; accordingly, no money is currently due under the judgment.

On April 29, 2020 and April 30, 2020, Centripetal submitted complaints in the District Court of Dusseldorf in Germany against Cisco Systems GmbH and Cisco Systems, Inc., asserting three European patents seeking both injunctive relief and damages. Two of the three European patents are counterparts to two U.S. patents Centripetal asserted against us in the U.S. district court proceedings, one of which has been invalidated by the PTAB. We believe we have strong defenses. Due to uncertainty surrounding patent litigation processes in the U.S. and Europe, however, we are unable to reasonably estimate the ultimate outcome of the cases at this time.

Finjan On January 6, 2017, Finjan, Inc. ("Finjan") asserted patent infringement claims against us in the U.S. District Court for the Northern District of California, originally seeking injunctive relief and damages, including enhanced damages for allegations of willful infringement. Finjan alleged that Cisco's AMP and ThreatGrid products and the URL rewrite feature of Cisco's ESA Outbreak Filter product infringe five patents. On May 24, 2021, we resolved all claims for an amount that does not have a material effect on our financial position.

Ramot On June 12, 2019, Ramot at Tel Aviv University Ltd. ("Ramot") asserted patent infringement claims against us in E.D. Tex, seeking damages, including enhanced damages for allegations of willful infringement, and a running royalty on future sales. Ramot alleges that certain Cisco optical transceiver modules and line cards infringe three patents. As of November 27, 2020, the PTO preliminarily found all asserted claims unpatentable in exparte reexamination proceedings. On January 13, 2021, the court entered an order staying the case pending the conclusion of the exparte reexamination proceedings. While we believe that we have strong non-infringement and invalidity arguments, and that Ramot's damages theories are not supported by prevailing law, we are unable to reasonably estimate the ultimate outcome of this litigation at this time due to uncertainties in the litigation processes. If we do not prevail in court, we believe that any damages ultimately assessed would not be material.

On February 26, 2021, Ramot asserted patent infringement claims against Acacia Communications, Inc. ("Acacia") (which we subsequently acquired) in D. Del, seeking damages, including enhanced damages for allegations of willful infringement, and a running royalty on future sales. Ramot alleges that certain Acacia optical transceiver modules and integrated circuits infringe two of the three patents that Ramot has asserted in its E.D. Tex case. We are currently assessing this case. Due to the early stage of the litigation as well as uncertainties in the litigation processes, we are unable, at this time, to reasonably estimate a potential range of loss, if any, or the ultimate outcome of this litigation.

Monarch On January 21, 2020, Monarch Networking Solutions LLC ("Monarch") asserted patent infringement claims against us in E.D. Tex alleging that certain Cisco routers and firewalls infringe three U.S. patents. Monarch seeks damages, including enhanced damages for alleged willful infringement, and a running royalty on future sales. The E.D. Tex court set trial to begin on July 12, 2021. On May 13, 2020, Monarch filed a second action against us in W.D. Tex, alleging that two factor authentication functionality in Duo and Meraki MR and MX access point products infringe one U.S. patent. Monarch seeks damages, including enhanced damages for alleged willful infringement, and a running royalty on future sales. The W.D. Tex court set trial to begin on November 14, 2021. While we believe that we have strong non-infringement and invalidity arguments, and that Monarch's damages theories are not supported by prevailing law, we are unable to reasonably estimate the ultimate outcome of these litigations at this time due to uncertainties in the litigation processes. If we do not prevail in court, we believe that any damages ultimately assessed would not be material.

Viasat On January 21, 2016, Viasat, Inc. ("Viasat") filed suit against Acacia (which we subsequently acquired) in the California Superior Court for San Diego County ("SDSC") seeking unpaid royalties for breach of contract and the implied

covenant of good faith and fair dealing, and damages for trade secret misappropriation for certain products ("Viasat 1"). Acacia counterclaimed for patent and trade secret misappropriation, contract, and unfair competition claims. On July 17, 2019, the jury found for Viasat on its contract claims, and awarded Viasat \$49 million for unpaid royalties through 2018. The jury further found that Acacia willfully misappropriated Viasat's trade secrets and awarded Viasat \$1. On Acacia's counterclaims, the jury found for Acacia on its contract and trade secret claims and awarded Acacia \$1. Both Acacia and Viasat have pending appeals to the California Court of Appeal. On November 6, 2019, Viasat filed a second suit in SDSC, alleging contract and trade secret claims for Acacia products sold from January 1, 2019 forward ("Viasat 2"). On February 28, 2020, the court stayed Viasat 2 pending the appeal in Viasat 1. On June 9, 2020, Viasat filed a third suit in SDSC ("Viasat 3"). In Viasat 3, Viasat alleges contract and trade secrets claims for sales of additional Acacia products. On August 11, 2020, the court stayed Viasat 3 pending the appeal in Viasat 1.

On July 28, 2017, Acacia filed suit in the Commonwealth of Massachusetts Superior Court - Business Litigation Session against ViaSat alleging claims for defamation, unfair competition, business torts, and declaratory judgment of no trade secret misappropriation. On April 5, 2018, ViaSat counterclaimed with contract, trade secret, and unfair competition claims (collectively, with Viasat 1, Viasat 2 and Viasat 3, the "Viasat Cases"). On December 13, 2018, the Massachusetts court entered an order staying the Massachusetts litigation, which has been extended to June 30, 2021.

While we believe Acacia has strong defenses in each of the Viasat Cases, we are unable to reasonably estimate the ultimate outcome of any of the Viasat Cases at this time due to uncertainties in the litigation processes. If Acacia does not prevail, we believe that any relief ultimately assessed in any of the Viasat Cases would not be material

In addition, we are subject to legal proceedings, claims, and litigation arising in the ordinary course of business, including intellectual property litigation. While the outcome of these matters is currently not determinable, we do not expect that the ultimate costs to resolve these matters will have a material adverse effect on our consolidated financial position, results of operations, or cash flows. For additional information regarding intellectual property litigation, see "Part II, Item 1A. Risk Factors—We may be found to infringe on intellectual property rights of others" herein.

### 15. Stockholders' Equity

### (a) Cash Dividends on Shares of Common Stock

We declared and paid cash dividends of \$0.37 and \$0.36 per common share, or \$1.6 billion and \$1.5 billion, on our outstanding common stock for the third quarter of fiscal 2021 and 2020, respectively. We declared and paid cash dividends of \$1.09 and \$1.06 per common share, or \$4.6 billion and \$4.5 billion, on our outstanding common stock for the first nine months of fiscal 2021 and 2020, respectively.

Any future dividends will be subject to the approval of our Board of Directors.

### (b) Stock Repurchase Program

In September 2001, our Board of Directors authorized a stock repurchase program. As of May 1, 2021, the remaining authorized amount for stock repurchases under this program was approximately \$8.7 billion with no termination date. A summary of the stock repurchase activity for fiscal 2021 and 2020 under the stock repurchase program, reported based on the trade date, is summarized as follows (in millions, except per-share amounts):

Quarter Ended	Shares	We	eighted-Average Price per Share	Amount
Fiscal 2021				
May 1, 2021	10	\$	48.71	\$ 510
January 23, 2021	19	\$	42.82	\$ 801
October 24, 2020	20	\$	40.44	\$ 800
Fiscal 2020				
July 25, 2020	_	\$	_	\$ _
April 25, 2020	25	\$	39.71	\$ 981
January 25, 2020	18	\$	46.71	\$ 870
October 26, 2019	16	\$	48.91	\$ 768

There were \$15 million stock repurchases that were pending settlement as of May 1, 2021. There were no stock repurchases that were pending settlement as of July 25, 2020.

The purchase price for the shares of our stock repurchased is reflected as a reduction to stockholders' equity. We are required to allocate the purchase price of the repurchased shares as (i) a reduction to retained earnings or an increase to accumulated deficit and (ii) a reduction of common stock and additional paid-in capital.

#### (c) Preferred Stock

Under the terms of our Amended and Restated Certificate of Incorporation, the Board of Directors is authorized to issue preferred stock of one or more series and, in connection with the creation of such series, to fix by resolution the designation, powers (including voting powers (if any)), preferences and relative, participating, optional or other special rights of such series, and any qualification, limitations or restrictions thereof, of the shares of such series. As of May 1, 2021, we had not issued any shares of preferred stock.

### 16. Employee Benefit Plans

### (a) Employee Stock Incentive Plans

<u>Stock Incentive Plan Program Description</u> We have one stock incentive plan: the 2005 Stock Incentive Plan (the "2005 Plan"). In addition, we have, in connection with our acquisitions of various companies, assumed the share-based awards granted under stock incentive plans of the acquired companies or issued share-based awards in replacement thereof. Share-based awards are designed to reward employees for their long-term contributions to us and provide incentives for them to remain with us. The number and frequency of share-based awards are based on competitive practices, our operating results, government regulations, and other factors. Our primary stock incentive plan is summarized as follows:

2005 Plan The 2005 Plan provides for the granting of stock options, stock grants, stock units and stock appreciation rights (SARs), the vesting of which may be time-based or upon satisfaction of performance goals, or both, and/or other conditions. Employees (including employee directors and executive officers) and consultants of Cisco and its subsidiaries and affiliates and non-employee directors of Cisco are eligible to participate in the 2005 Plan. As of May 1, 2021, the maximum number of shares issuable under the 2005 Plan over its term was 790 million shares. The 2005 Plan may be terminated by our Board of Directors at any time and for any reason, and is currently set to terminate at the 2030 Annual Meeting unless re-adopted or extended by our stockholders prior to or on such date.

Under the 2005 Plan's share reserve feature, a distinction is made between the number of shares in the reserve attributable to (i) stock options and SARs and (ii) "full value" awards (i.e., stock grants and stock units). Shares issued as stock grants, pursuant to stock units or pursuant to the settlement of dividend equivalents are counted against shares available for issuance under the 2005 Plan on a 1.5-to-1 ratio. For each share awarded as restricted stock or a restricted stock unit award under the 2005 Plan, 1.5 shares was deducted from the available share-based award balance. If awards issued under the 2005 Plan are forfeited or terminated for any reason before being exercised or settled, then the shares underlying such awards, plus the number of additional shares, if any, that counted against shares available for issuance under the 2005 Plan at the time of grant as a result of the application of the share ratio described above, will become available again for issuance under the 2005 Plan. As of May 1, 2021, 257 million shares were authorized for future grant under the 2005 Plan.

#### (b) Employee Stock Purchase Plan

We have an Employee Stock Purchase Plan under which 721 million shares of our common stock have been reserved for issuance as of May 1, 2021. Eligible employees are offered shares through a 24-month offering period, which consists of four consecutive 6-month purchase periods. Employees may purchase a limited amount of shares of our stock at a discount of up to 15% of the lesser of the fair market value at the beginning of the offering period or the end of each 6-month purchase period. The Employee Stock Purchase Plan is scheduled to terminate on the earlier of (i) January 3, 2030 and (ii) the date on which all shares available for issuance under the Employee Stock Purchase Plan are sold pursuant to exercised purchase rights. No shares were issued under the Employee Stock Purchase Plan during each of the third quarters of fiscal 2021 and 2020. We issued 8 million and 9 million shares during the first nine months of fiscal 2021 and 2020, respectively. As of May 1, 2021, 133 million shares were available for issuance under the Employee Stock Purchase Plan.

# (c) Summary of Share-Based Compensation Expense

Share-based compensation expense consists primarily of expenses for stock options, stock purchase rights, restricted stock, and RSUs granted to employees. The following table summarizes share-based compensation expense (in millions):

	Three Mo	nths Ended	Nine Mo	nths Ended		
May	1, 2021	April 25, 2020	May 1, 2021	April 25, 2020		
\$	26	\$ 23	\$ 75	\$ 69		
	49	37	133	107		
	75	60	208	176		
	184	148	522	440		
	140	125	402	371		
	59	49	179	164		
	5	5	26	18		
	388	327	1,129	993		
\$	463	\$ 387	\$ 1,337	\$ 1,169		
\$	88	\$ 81	\$ 264	\$ 321		
	May   \$ 	May 1, 2021 \$ 26 49 75 184 140 59 5 388 \$ 463	\$ 26 \$ 23 49 37 75 60 184 148 140 125 59 49 5 5 388 327 \$ 463 \$ 387	May 1, 2021         April 25, 2020         May 1, 2021           \$ 26         \$ 23         \$ 75           49         37         133           75         60         208           184         148         522           140         125         402           59         49         179           5         5         26           388         327         1,129           \$ 463         \$ 387         \$ 1,337		

As of May 1, 2021, the total compensation cost related to unvested share-based awards not yet recognized was \$3.6 billion which is expected to be recognized over approximately 2.5 years on a weighted-average basis.

### (d) Restricted Stock and Stock Unit Awards

A summary of the restricted stock and stock unit activity, which includes time-based and performance-based or market-based RSUs, is as follows (in millions, except per-share amounts):

	Restricted Stock/ Stock Units	Veighted-Average Grant Date Fair Value per Share	Age	regate Fair Value
Unvested balance at July 27, 2019	100	\$ 38.66		
Granted and assumed	49	42.61		
Vested	(44)	35.20	\$	2,045
Canceled/forfeited/other	(9)	40.45		
Unvested balance at July 25, 2020	96	42.03		
Granted and assumed	35	38.39		
Vested	(27)	39.65	\$	1,188
Canceled/forfeited/other	(11)	42.14		
Unvested balance at May 1, 2021	93	\$ 41.34		

### 17. Comprehensive Income (Loss)

(Gains) losses reclassified out of AOCI

The components of AOCI, net of tax, and the other comprehensive income (loss), for the first nine months of fiscal 2021 and 2020 are summarized as follows (in millions):

	(Los Availab	alized Gains ses) on le-for-Sale stments	Net Unreal (Losses) ( Hedging In	ash Flow	A	Cumulative Translation djustment and ctuarial Gains (Losses)	C	umulated Other omprehensive ncome (Loss)
Balance at July 25, 2020	\$	315	\$	(6)	\$	(828)	\$	(519)
Other comprehensive income (loss) before reclassifications		(150)		16		364		230
(Gains) losses reclassified out of AOCI		(46)		(12)		3		(55)
Tax benefit (expense)		59		(2)		(1)		56
Balance at May 1, 2021	\$	178	\$	(4)	\$	(462)	\$	(288)

### 18. Income Taxes

Tax benefit (expense)

Balance at April 25, 2020

The following table provides details of income taxes (in millions, except percentages):

	 Three Mo	onths	Ended	Nine Mo	nths l	is Ended	
	May 1, 2021		April 25, 2020	May 1, 2021		April 25, 2020	
Income before provision for income taxes	\$ 3,591	\$	3,444	\$ 9,527	\$	10,664	
Provision for income taxes	\$ 728	\$	670	\$ 1,945	\$	2,086	
Effective tax rate	20.3 %	)	19.4 %	20.4 %		19.6 %	

As of May 1, 2021, we had \$2.5 billion of unrecognized tax benefits, of which \$2.1 billion, if recognized, would favorably impact the effective tax rate. We regularly engage in discussions and negotiations with tax authorities regarding tax matters in various jurisdictions. We believe it is reasonably possible that certain federal, foreign, and state tax matters may be concluded in the next 12 months. Specific positions that may be resolved include issues involving transfer pricing and various other matters.

### 19. Segment Information and Major Customers

### (a) Revenue and Gross Margin by Segment

We conduct business globally and are primarily managed on a geographic basis consisting of three segments: the Americas, EMEA, and APJC. Our management makes financial decisions and allocates resources based on the information it receives from our internal management system. Sales are attributed to a segment based on the ordering location of the customer. We do not allocate research and development, sales and marketing, or general and administrative expenses to our segments in this internal management system because management does not include the information in our measurement of the performance of the operating segments. In addition, we do not allocate amortization and impairment of acquisition-related intangible assets, share-based compensation expense, significant litigation settlements and other contingencies, charges related to asset impairments and restructurings, and certain other charges to the gross margin for each segment because management does not include this information in our measurement of the performance of the operating segments.

Summarized financial information by segment for the third quarter and first nine months of fiscal 2021 and 2020, based on our internal management system and as utilized by our Chief Operating Decision Maker ("CODM"), is as follows (in millions):

		Three Mor	nths	Ended		nded		
		May 1, April 25, 2021 2020				May 1, 2021	Ap	ril 25, 2020
Revenue:	_							
Americas	\$	7,262	\$	7,116	\$	21,430	\$	22,106
EMEA		3,483		3,136		9,654		9,553
APJC		2,057		1,730		5,608		5,489
Total	\$	12,803	\$	11,983	\$	36,692	\$	37,147
Gross margin:								
Americas	\$	4,831	\$	4,828	\$	14,383	\$	14,836
EMEA		2,283		2,061		6,322		6,289
APJC		1,331		1,098		3,599		3,511
Segment total		8,445		7,986		24,303		24,636
Unallocated corporate items		(260)				(753)		(637)
Total	\$	8,185	\$	7,771	\$	23,550	\$	23,999

Amounts may not sum and percentages may not recalculate due to rounding.

Revenue in the United States was \$6.4 billion and \$6.3 billion for the third quarter of fiscal 2021 and 2020, respectively, and \$19.1 billion and \$19.7 billion for the first nine months of fiscal 2021 and 2020, respectively.

### (b) Revenue for Groups of Similar Products and Services

We design and sell Internet Protocol (IP)-based networking and other products related to the communications and IT industry and provide services associated with these products and their use.

The following table presents revenue for groups of similar products and services (in millions):

	 Three Mo	nths Ended	Nine Mor	nths 1	Ended
	May 1, 2021	April 25, 2020	May 1, 2021		April 25, 2020
Revenue:					
Infrastructure Platforms	\$ 6,832	\$ 6,447	\$ 19,564	\$	20,566
Applications	1,426	1,363	4,160		4,211
Security	876	778	2,559		2,343
Other Products	6	9	15		27
Total Product	 9,139	8,597	26,298		27,146
Services	3,664	3,386	10,394		10,001
Total	\$ 12,803	\$ 11,983	\$ 36,692	\$	37,147

Amounts may not sum due to rounding. We have made certain reclassifications to the product revenue amounts for prior period to conform to the current year presentation.

### 20. Net Income per Share

The following table presents the calculation of basic and diluted net income per share (in millions, except per-share amounts):

		Three Mo	nths		Nine Mor	nths Ended		
	May 1, April 25, 2021 2020					May 1, 2021		April 25, 2020
Net income	\$	2,863	\$	2,774	\$	7,582	\$	8,578
Weighted-average shares—basic		4,219		4,230		4,224		4,239
Effect of dilutive potential common shares	19 13					13		19
Weighted-average shares—diluted		4,238		4,243		4,237		4,258
Net income per share—basic	\$	0.68	\$	0.66	\$	1.79	\$	2.02
Net income per share—diluted	\$	0.68	\$	0.65	\$	1.79	\$	2.01
Antidilutive employee share-based awards, excluded		15	14		55			42

Employee equity share options, unvested shares, and similar equity instruments granted and assumed by us are treated as potential common shares outstanding in computing diluted earnings per share. Diluted shares outstanding include the dilutive effect of in-the-money options, unvested restricted stock, and restricted stock units. The dilutive effect of such equity awards is calculated based on the average share price for each fiscal period using the treasury stock method. Under the treasury stock method, the amount the employee must pay for exercising stock options and the amount of compensation cost for future service that has not yet been recognized are collectively assumed to be used to repurchase shares.

### Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

### Forward-Looking Statements

This Quarterly Report on Form 10-Q, including this Management's Discussion and Analysis of Financial Condition and Results of Operations, contains forward-looking statements regarding future events and our future results that are subject to the safe harbors created under the Securities Act of 1933 (the "Securities Act") and the Securities Exchange Act of 1934 (the "Exchange Act"). All statements other than statements of historical facts are statements that could be deemed forward-looking statements. These statements are based on current expectations, estimates, forecasts, and projections about the industries in which we operate and the beliefs and assumptions of our management. Words such as "expects," "anticipates," "goals," "projects," "intends," "plans," "believes," "momentum," "seeks," "estimates," "continues," "endeavors," "strives," "may," variations of such words, and similar expressions are intended to identify such forward-looking statements. In addition, any statements that refer to projections of our future financial performance, our anticipated growth and trends in our businesses, future responses to and effects of the COVID-19 pandemic, and other characterizations of future events or circumstances are forward-looking statements. Readers are cautioned that these forward-looking statements are only predictions and are subject to risks, uncertainties, and assumptions that are difficult to predict, including those under "Part II, Item IA. Risk Factors," and elsewhere herein. Therefore, actual results may differ materially and adversely from those expressed in any forward-looking statements. We undertake no obligation to revise or update any forward-looking statements for any reason.

### **OVERVIEW**

Cisco designs and sells a broad range of technologies that have been powering the Internet since 1984. We are integrating intent-based technologies across networking, security, collaboration, applications and the cloud. These technologies are designed to help our customers manage more users, devices and things connecting to their networks. This will enable us to provide customers with a highly secure, intelligent platform for their digital business.

A summary of our results is as follows (in millions, except percentages and per-share amounts):

			Thre	ee Months Ended	1		Nine	e Months Ended	
		May 1, 2021		April 25, 2020	% Variance	 May 1, 2021	A	pril 25, 2020	% Variance

### Three Months Ended May 1, 2021 Compared with Three Months Ended April 25, 2020

In the third quarter of fiscal 2021, we had strong performance across the business and delivered solid revenue growth and earnings per share. As customers have accelerated their digitization and cloud investments in the wake of the COVID-19 pandemic, we have been focusing on executing and innovating to support and assist that transition. Total revenue increased by 7% compared with the third quarter of fiscal 2020. Our product revenue reflected growth in Infrastructure Platforms, Applications, and Security, and we continued to make progress in the transition of our business model to increased software and subscriptions. We remain focused on accelerating innovation across our portfolio, and we believe that we have made continued progress on our strategic priorities. We continue to operate in a challenging macroeconomic and highly competitive environment. While the overall environment remains uncertain, we continue to aggressively invest in priority areas with the objective of driving profitable growth over the long term.

Within total revenue, product revenue increased by 6% and service revenue increased by 8%. The third quarter of fiscal 2021 had 14 weeks, compared with 13 weeks in the third quarter of fiscal 2020, thus our results for the third quarter and first nine months of fiscal 2021 reflect an extra week compared with the corresponding periods of fiscal 2020. We estimate that the total additional revenue associated with the extra week was approximately 3% of revenue growth. In the third quarter of fiscal 2021, total software revenue was \$3.8 billion across all product areas and service, an increase of 13%, with 81% of total software revenue sold as a subscription, reflecting a 7 percentage point increase from the third quarter of fiscal 2020. Total gross margin decreased by 1.0 percentage points. Product gross margin decreased by 1.1 percentage points, largely driven by ongoing costs related to supply chain constraints. The effect of pricing erosion was moderate, partially offset by favorable product mix. We are partnering with several of our key suppliers utilizing our volume purchasing and extending supply coverage, including revising supplier arrangements, to address supply chain challenges. As a percentage of revenue, research and development, sales and marketing, and general and administrative expenses, collectively, increased by 1.1 percentage points due in large part to the impact of the extra week in the third quarter of fiscal 2021. The total impact associated with the extra week on our cost of sales and operating expenses was approximately \$150 million (excluding the impact of share-based compensation expense). Operating income as a percentage of revenue decreased by 1.4 percentage points. Diluted earnings per share increased 5%, driven by a 3% increase in net income.

In terms of our geographic segments, revenue from the Americas increased \$146 million, EMEA revenue increased by \$347 million and APJC revenue increased by \$327 million. The "BRICM" countries experienced product revenue growth of 22% in the aggregate, driven by an increase in product revenue across each of the BRICM countries with the exception of Mexico.

From a customer market standpoint, we experienced product revenue growth in the service provider, public sector and commercial markets, partially offset by a product revenue decline in the enterprise market. We are seeing improvement in business momentum in our customer markets, which we believe was related to an improving global macroeconomic environment.

From a product category perspective, the product revenue increase of 6% was driven by growth in revenue in Infrastructure Platforms of 6%, Applications of 5%, and Security of 13%.

### Nine Months Ended May 1, 2021 Compared with Nine Months Ended April 25, 2020

Total revenue decreased 1%, with product revenue decreasing 3% and service revenue increasing 4%. Total gross margin decreased by 0.4 percentage points due to pricing erosion partially offset by favorable impacts from product mix. As a percentage of revenue, research and development, sales and marketing, and general and administrative expenses collectively increased by 0.8 percentage points. Operating income as a percentage of revenue decreased by 2.7 percentage points. We incurred restructuring and other charges of \$878 million in the first nine months of fiscal 2021, which resulted in a decrease of 12% in net income and a decrease of 11% in diluted earnings per share.

### **COVID-19 Pandemic Response Summary**

During this extraordinary time, our priority has been supporting our employees, customers, partners and communities, while positioning Cisco for the future. The pandemic has driven organizations across the globe to digitize their operations and support remote workforces at a faster speed and greater scale than ever before. We remain focused on providing the technology and solutions our customers need to accelerate their digital organizations. The actions we have taken and are taking include:

### **Employees**

- · Most of our global workforce working from home.
- Seamless transition to work from home with a long-standing flexible work policy, and we build the technologies that allow organizations to stay connected, secure and productive.
- · For the remainder who must be in the office to perform their roles, we are focused on their health and safety, and are taking all of the necessary precautions.

### Customer and Partners

· Provided a variety of free offers and trials for our Webex and security technologies as they dramatically shifted entire workforces to be remote.

### Communities

- Committed significant funds to support both global and local pandemic response efforts.
- Provided technology and financial support for non-profits, first responders, and governments.
- Donated personal protective equipment to hospital workers including N95 masks and face shields 3D-printed by Cisco volunteers around the world.

# **Strategy and Priorities**

As our customers add billions of new connections to their enterprises, and as more applications move to a multicloud environment, the network becomes even more critical. Our customers are navigating change at an unprecedented pace and our mission is to inspire new possibilities for them by helping transform their infrastructure, expand applications and analytics, address their security needs, and empower their teams. We believe that our customers are looking for intent-based networks that provide meaningful business value through automation, security, and analytics across private, hybrid, and multicloud environments. Our vision is to deliver highly secure, software-defined, automated and intelligent platforms for our customers.

For additional discussion of our strategy and priorities, see Item 1. Business in our Annual Report on Form 10-K for the year ended July 25, 2020.

# Other Key Financial Measures

The following is a summary of our other key financial measures for the third quarter of fiscal 2021 (in millions):

	May 1, 2021	July 25, 2020
Cash and cash equivalents and investments	\$ 23,579	\$ 29,419
Deferred revenue	\$ 20,889	\$ 20,446
Inventories	\$ 1,579	\$ 1,282

	_	Nine Mo	nths 1	Ended
		May 1, 2021		April 25, 2020
Cash provided by operating activities	\$	10,950	\$	11,624
Repurchases of common stock—stock repurchase program	\$	2,111	\$	2,619
Dividends paid	\$	4,601	\$	4,491

### CRITICAL ACCOUNTING ESTIMATES

The preparation of financial statements and related disclosures in conformity with accounting principles generally accepted in the United States requires us to make judgments, assumptions, and estimates that affect the amounts reported in the Consolidated Financial Statements and accompanying notes. Note 2 to the Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended July 25, 2020, as updated as applicable in Note 2 to the Consolidated Financial Statements herein, describes the significant accounting policies and methods used in the preparation of the Consolidated Financial Statements. The accounting policies described below are significantly affected by critical accounting estimates. Such accounting policies require significant judgments, assumptions, and estimates used in the preparation of the Consolidated Financial Statements, and actual results could differ materially from the amounts reported based on these policies.

The inputs into certain of our judgments, assumptions, and estimates considered the economic implications of the COVID-19 pandemic on our critical and significant accounting estimates. The COVID-19 pandemic did not have a material impact on our significant judgments, assumptions and estimates that are reflected in our results for the third quarter and first nine months of fiscal 2021. These estimates are listed in our Annual Report on Form 10-K for the year ending July 25, 2020, and include: goodwill and identified purchased intangible assets and income taxes, among other items. The actual results that we experience may differ materially from our estimates. As the COVID-19 pandemic continues to develop, many of our estimates could require increased judgment and carry a higher degree of variability and volatility. As events continue to evolve our estimates may change materially in future periods.

#### Revenue Recognition

We enter into contracts with customers that can include various combinations of products and services which are generally distinct and accounted for as separate performance obligations. As a result, our contracts may contain multiple performance obligations. We determine whether arrangements are distinct based on whether the customer can benefit from the product or service on its own or together with other resources that are readily available and whether our commitment to transfer the product or service to the customer is separately identifiable from other obligations in the contract. We classify our hardware, perpetual software licenses, and SaaS as distinct performance obligations. Term software licenses represent multiple obligations, which include software licenses and software maintenance. In transactions where we deliver hardware or software, we are typically the principal and we record revenue and costs of goods sold on a gross basis.

We recognize revenue upon transfer of control of promised goods or services in a contract with a customer in an amount that reflects the consideration we expect to receive in exchange for those products or services. Transfer of control occurs once the customer has the contractual right to use the product, generally upon shipment or once title and risk of loss has transferred to the customer. Transfer of control can also occur over time for software maintenance and services as the customer receives the benefit over the contract term. Our hardware and perpetual software licenses are distinct performance obligations where revenue is recognized upfront upon transfer of control. Term software licenses include multiple performance obligations where the term licenses are recognized upfront upon transfer of control, with the associated software maintenance revenue recognized ratably over the contract term as services and software updates are provided. SaaS arrangements do not include the right for the customer to take possession of the software during the term, and therefore have one distinct performance obligation which is satisfied over time with revenue recognized ratably over the contract term as the customer consumes the services. On our product sales, we record consideration from shipping and handling on a gross basis within net product sales. We record our revenue net of any associated sales taxes.

Revenue is allocated among these performance obligations in a manner that reflects the consideration that we expect to be entitled to for the promised goods or services based on standalone selling prices (SSP). SSP is estimated for each distinct performance obligation and judgment may be required in their determination. The best evidence of SSP is the observable price of a product or service when we sell the goods separately in similar circumstances and to similar customers. In instances where SSP is not directly observable, we determine SSP using information that may include market conditions and other observable inputs.

We apply judgment in determining the transaction price as we may be required to estimate variable consideration when determining the amount of revenue to recognize. Variable consideration includes potential contractual penalties and various rebate, cooperative marketing and other incentive programs that we offer to our distributors, channel partners and customers. When determining the amount of revenue to recognize, we estimate the expected usage of these programs, applying the expected value or most likely estimate and update the estimate at each reporting period as actual utilization becomes available. We also consider the customers' right of return in determining the transaction price, where applicable. If actual credits received by distributors under these programs were to deviate significantly from our estimates, which are based on historical experience, our revenue could be adversely affected.

See Note 3 to the Consolidated Financial Statements for more details.

### Loss Contingencies

We are subject to the possibility of various losses arising in the ordinary course of business. We consider the likelihood of impairment of an asset or the incurrence of a liability, as well as our ability to reasonably estimate the amount of loss, in determining loss contingencies. An estimated loss contingency is accrued when it is probable that an asset has been impaired or a liability has been incurred and the amount of loss can be reasonably estimated. We regularly evaluate information available to us to determine whether such accruals should be made or adjusted and whether new accruals are required.

Third parties, including customers, have in the past and may in the future assert claims or initiate litigation related to exclusive patent, copyright, trademark, and other intellectual property rights to technologies and related standards that are relevant to us. These assertions have increased over time as a result of our growth and the general increase in the pace of patent claims assertions, particularly in the United States. If any infringement or other intellectual property claim made against us by any third party is successful, or if we fail to develop non-infringing technology or license the proprietary rights on commercially reasonable terms and conditions, our business, operating results, and financial condition could be materially and adversely affected.

### Goodwill and Purchased Intangible Asset Impairments

Our methodology for allocating the purchase price relating to purchase acquisitions is determined through established valuation techniques. Goodwill represents a residual value as of the acquisition date, which in most cases results in measuring goodwill as an excess of the purchase consideration transferred plus the fair value of any noncontrolling interest in the acquired company over the fair value of net assets acquired, including contingent consideration. We perform goodwill impairment tests on an annual basis in the fourth fiscal quarter and between annual tests in certain circumstances for each reporting unit. The assessment of fair value for goodwill and purchased intangible assets is based on factors that market participants would use in an orderly transaction in accordance with the new accounting guidance for the fair value measurement of nonfinancial assets.

In response to changes in industry and market conditions, we could be required to strategically realign our resources and consider restructuring, disposing of, or otherwise exiting businesses, which could result in an impairment of goodwill. There was no impairment of goodwill in each of the first nine months of fiscal 2021 and 2020

The fair value of acquired technology and patents, as well as acquired technology under development, is determined at acquisition date primarily using the income approach, which discounts expected future cash flows to present value. The discount rates used in the present value calculations are typically derived from a weighted-average cost of capital analysis and then adjusted to reflect risks inherent in the development lifecycle as appropriate. We consider the pricing model for products related to these acquisitions to be standard within the high-technology communications industry, and the applicable discount rates represent the rates that market participants would use for valuation of such intangible assets.

We make judgments about the recoverability of purchased intangible assets with finite lives whenever events or changes in circumstances indicate that an impairment may exist. Recoverability of purchased intangible assets with finite lives is measured by comparing the carrying amount of the asset to the future undiscounted cash flows the asset is expected to generate. We review indefinite-lived intangible assets for impairment annually or whenever events or changes in circumstances indicate that the asset might be impaired. If the asset is considered to be impaired, the amount of any impairment is measured as the difference between the carrying value and the fair value of the impaired asset. Assumptions and estimates about future values and remaining useful lives of our purchased intangible assets are complex and subjective. They can be affected by a variety of factors, including external factors such as industry and economic trends, and internal factors such as changes in our business strategy and our internal forecasts.

Our ongoing consideration of all the factors described previously could result in impairment charges in the future, which could adversely affect our net income.

### Income Taxes

We are subject to income taxes in the United States and numerous foreign jurisdictions. Our effective tax rates differ from the statutory rate, primarily due to the tax impact of state taxes, foreign operations, R&D tax credits, foreign-derived intangible income deductions, global intangible low-taxed income, tax audit settlements, nondeductible compensation, international realignments, and transfer pricing adjustments. Our effective tax rate was 20.3% and 19.4% in the third quarter of fiscal 2021 and 2020, respectively, and 20.4% and 19.6% in the first nine months of fiscal 2021 and 2020, respectively.

Significant judgment is required in evaluating our uncertain tax positions and determining our provision for income taxes. Although we believe our reserves are reasonable, no assurance can be given that the final tax outcome of these matters will not be different from that which is reflected in our historical income tax provisions and accruals. We adjust these reserves in light of changing facts and circumstances, such as the closing of a tax audit or the refinement of an estimate. To the extent that the

final tax outcome of these matters is different than the amounts recorded, such differences will impact the provision for income taxes in the period in which such determination is made. The provision for income taxes includes the impact of reserve provisions and changes to reserves that are considered appropriate, as well as the related net interest and penalties.

Significant judgment is also required in determining any valuation allowance recorded against deferred tax assets. In assessing the need for a valuation allowance, we consider all available evidence, including past operating results, estimates of future taxable income, and the feasibility of tax planning strategies. In the event that we change our determination as to the amount of deferred tax assets that can be realized, we will adjust our valuation allowance with a corresponding impact to the provision for income taxes in the period in which such determination is made.

Our provision for income taxes is subject to volatility and could be adversely impacted by earnings being lower than anticipated in countries that have lower tax rates and higher than anticipated in countries that have higher tax rates; by changes in the valuation of our deferred tax assets and liabilities; by changes to foreign-derived intangible income deduction, global intangible low-tax income and base erosion and anti-abuse tax laws, regulations, or interpretations thereof; by expiration of or lapses in tax incentives; by transfer pricing adjustments, including the effect of acquisitions on our legal structure; by tax effects of nondeductible compensation; by tax costs related to intercompany realignments; by changes in accounting principles; or by changes in tax laws and regulations, treaties, or interpretations thereof, including changes to the taxation of earnings of our foreign subsidiaries, the deductibility of expenses attributable to foreign income, and the foreign tax credit rules. Significant judgment is required to determine the recognition and measurement attributes prescribed in the accounting guidance for uncertainty in income taxes. The Organisation for Economic Co-operation and Development (OECD), an international association comprised of 37 countries, including the United States, has made changes to numerous long-standing tax principles. There can be no assurance that these changes, once adopted by countries, will not have an adverse impact on our provision for income taxes. Further, as a result of certain of our ongoing employment and capital investment actions and commitments, our income in certain countries was subject to reduced tax rates. Our failure to meet these commitments could adversely impact our provision for income taxes. In addition, we are subject to the continuous examination of our income tax returns by the Internal Revenue Service (IRS) and other tax authorities. We regularly assess the likelihood of adverse outcomes resulting from these examinations to determine the adequ

### RESULTS OF OPERATIONS

#### Revenue

The following table presents the breakdown of revenue between product and service (in millions, except percentages):

			Three Mor	nths E	nded			Nine Months Ended										
	May 1, 2021		April 25, 2020		Variance Dollars	Variance in Percent		May 1, 2021		May 1, 2021		May 1, 2021		Aı	oril 25, 2020		Variance Dollars	Variance in Percent
Revenue:																		
Product	\$ 9,139	\$	8,597	\$	542	6	%	\$	26,298	\$	27,146	\$	(848)	(3) %				
Percentage of revenue	71.4 %	5	71.7 %						71.7 %		73.1 %							
Service	3,664		3,386		278	8	%		10,394		10,001		393	4 %				
Percentage of revenue	28.6 %	<u> </u>	28.3 %						28.3 %		26.9 %							
Total	\$ 12,803	\$	11,983	\$	820	7	%	\$	36,692	\$	37,147	\$	(455)	(1) %				

We manage our business primarily on a geographic basis, organized into three geographic segments. Our revenue, which includes product and service for each segment, is summarized in the following table (in millions, except percentages):

				Three Mon	ths E	inded					Nine Mont	hs E	Ended	
		May 1, 2021		April 25, 2020		Variance n Dollars	Variance in Percent		May 1, 2021	A	oril 25, 2020		Variance n Dollars	Variance in Percent
Revenue:	,					,								
Americas	\$	7,262	\$	7,116	\$	146	2 %		\$ 21,430	\$	22,106	\$	(676)	(3) %
Percentage of revenue		56.7 %	ó	59.4 %					58.4 %		59.5 %			
EMEA		3,483		3,136		347	11 %		9,654		9,553		101	1 %

APJC		2,057		1,730		327	19 %		5,608		5,489		119	2 %
Percentage of revenue		16.1 %	í	14.4 %					15.3 %		14.8 %			
Total	\$	12,803	\$	11,983	\$	820	7 %	-	\$ 36,692	\$	37,147	\$	(455)	(1) %

Amounts may not sum and percentages may not recalculate due to rounding.

Three Months Ended May 1, 2021 Compared with Three Months Ended April 25, 2020

Total revenue increased by 7%. Product revenue increased by 6% and service revenue increased by 8%. The third quarter of fiscal 2021 had 14 weeks, compared with 13 weeks in the third quarter of fiscal 2020, thus our results for the third quarter of fiscal 2021 reflect an extra week compared with the third quarter of fiscal 2020. We estimate that the total additional revenue associated with the extra week was approximately 3% of revenue growth. Our total revenue reflected growth across each of our geographic segments. Product revenue for the emerging countries of BRICM, in the aggregate, experienced product revenue growth of 22%, with increases in each of these countries with the exception of Mexico.

In addition to the impact of macroeconomic factors, including the IT spending environment and the level of spending by government entities, revenue by segment in a particular period may be significantly impacted by several factors related to revenue recognition, including the complexity of transactions such as multiple performance obligations; the mix of financing arrangements provided to channel partners and customers; and final acceptance of the product, system, or solution, among other factors. In addition, certain customers tend to make large and sporadic purchases, and the revenue related to these transactions may also be affected by the timing of revenue recognition, which in turn would impact the revenue of the relevant segment.

### Nine Months Ended May 1, 2021 Compared with Nine Months Ended April 25, 2020

Total revenue decreased by 1%. Product revenue decreased by 3% and service revenue increased by 4%. Our total revenue reflected declines in Americas, partially offset by growth in EMEA and APJC. Product revenue for the emerging countries of BRICM, in the aggregate, experienced a 9% product revenue decline, with decreases in China, Brazil, Russia and Mexico, partially offset by an increase in India.

### Product Revenue by Segment

The following table presents the breakdown of product revenue by segment (in millions, except percentages):

		Three Mor	ths E	inded			Nine Mont	hs End	iled	
	May 1, 2021	April 25, 2020		Variance Dollars	Variance in Percent	May 1, 2021	April 25, 2020		ariance Dollars	Variance in Percent
Product revenue:										
Americas	\$ 5,014	\$ 5,029	\$	(15)	— %	\$ 15,031	\$ 15,871	\$	(840)	(5) %
Percentage of product revenue	54.8 %	58.5 %				57.2 %	58.5 %			
EMEA	2,647	2,357		290	12 %	7,295	7,308		(13)	— %
Percentage of product revenue	29.0 %	27.4 %				27.7 %	26.9 %			
APJC	1,478	1,211		267	22 %	3,972	3,967		5	— %
Percentage of product revenue	16.2 %	14.1 %				15.1 %	14.6 %			
Total	\$ 9,139	\$ 8,597	\$	542	6 %	\$ 26,298	\$ 27,146	\$	(848)	(3) %

Amounts may not sum and percentages may not recalculate due to rounding.

#### Americas

### Three Months Ended May 1, 2021 Compared with Three Months Ended April 25, 2020

Product revenue in the Americas segment was flat, as the declines in the enterprise and commercial markets were offset by growth in the service provider and public sector markets. From a country perspective, product revenue decreased by 1% in the United States and 14% in Mexico, partially offset by a product revenue increase of 11% in Canada and 7% in Brazil.

### Nine Months Ended May 1, 2021 Compared with Nine Months Ended April 25, 2020

The decrease in product revenue in the Americas segment was driven by declines in the enterprise, commercial and service provider markets. The decreases were partially offset by product revenue growth in the public sector market. From a country perspective, product revenue decreased in the United States, Canada, Brazil and Mexico by 5%, 2%, 18% and 18%, respectively.

### **EMEA**

### Three Months Ended May 1, 2021 Compared with Three Months Ended April 25, 2020

Product revenue in the EMEA segment increased by 12%, with growth in all customer markets. Product revenue from emerging countries within EMEA increased by 4% and product revenue for the remainder of the EMEA segment, which primarily consists of countries in Western Europe, increased by 15%. From a country perspective, product revenue increased by 11% in the United Kingdom, 8% in Germany and 4% in France.

### Nine Months Ended May 1, 2021 Compared with Nine Months Ended April 25, 2020

Product revenue in the EMEA segment was flat, as declines in the commercial and enterprise markets were offset by growth in the service provider and public sector markets. Product revenue from emerging countries within EMEA decreased by 9% and product revenue for the remainder of the EMEA segment increased by 3%. From a country perspective, product revenue declined 2% in the United Kingdom and 3% in France, offset by growth in product revenue of 7% in Germany.

### **APJC**

# Three Months Ended May 1, 2021 Compared with Three Months Ended April 25, 2020

Product revenue in the APJC segment increased by 22%, driven by growth in all customer markets. From a country perspective, product revenue increased in Japan, India, Australia and China by 12%, 66%, 50% and 9%, respectively.

### Nine Months Ended May 1, 2021 Compared with Nine Months Ended April 25, 2020

Product revenue in the APJC segment was flat, with growth in the public sector market offset by declines in the commercial, service provider and enterprise markets. From a country perspective, product revenue increased in Japan, India and Australia by 9%, 2%, and 6%, respectively, offset by a product revenue decrease of 11% in China.

#### Product Revenue by Category

In addition to the primary view on a geographic basis, we also prepare financial information related to product categories and customer markets for various purposes. We report our product revenue in the following categories: Infrastructure Platforms, Applications, Security, and Other Products.

The following table presents product revenue by category (in millions, except percentages):

				Three M	ontl	ns Ended			Nine Mo	nths	Ended	
	]	May 1, 2021	1	April 25, 2020		Variance in Dollars	Variance in Percent	May 1, 2021	April 25, 2020		Variance n Dollars	Variance in Percent
Product revenue:												
Infrastructure Platforms	\$	6,832	\$	6,447	\$	385	6 %	\$ 19,564	\$ 20,566	\$	(1,002)	(5) %
Applications		1,426		1,363		63	5 %	4,160	4,211		(51)	(1) %
Security		876		778		98	13 %	2,559	2,343		216	9 %
Other Products		6		9		(3)	(34) %	15	27		(12)	(44) %
Total	\$	9,139	\$	8,597	\$	542	6 %	\$ 26,298	\$ 27,146	\$	(848)	(3) %

Amounts may not sum and percentages may not recalculate due to rounding. Prior period amounts have been reclassified to conform to the current period's presentation.

### Infrastructure Platforms

### Three Months Ended May 1, 2021 Compared with Three Months Ended April 25, 2020

The Infrastructure Platforms product category represents our core networking offerings related to switching, routing, wireless, and the data center. Infrastructure Platforms revenue increased by 6%, or \$385 million, with growth across the portfolio with the exception of data center. We experienced an increase in Switching revenue with growth in campus switching driven by an increase in sales of our intent-based networking Catalyst 9000 Series. This product revenue growth was partially offset by declines in data center switching. We experienced an increase in sales of routing products driven by growth in the service provider market. Wireless had strong growth driven by our WiFi6 products and Meraki offerings. Revenue from data center declined primarily driven by our server products.

### Nine Months Ended May 1, 2021 Compared with Nine Months Ended April 25, 2020

Revenue from the Infrastructure Platforms product category decreased 5%, or \$1.0 billion, with declines across the portfolio with the exception of wireless. Switching revenue declined in both campus switching and data center switching, although we saw revenue growth in our intent-based networking Catalyst 9000 Series and Nexus 9000 Series. The decrease in routing was driven by declines in the service provider and enterprise markets. We had solid growth in our wireless products driven by our WiFi6 products and Meraki offerings. Revenue from data center decreased driven primarily by our server products.

### Applications

# Three Months Ended May 1, 2021 Compared with Three Months Ended April 25, 2020

The Applications product category includes our collaboration offerings (unified communications, Cisco TelePresence and conferencing) as well as the Internet of Things (IoT) and AppDynamics analytics software offerings. Revenue in our Applications product category increased by 5%, or \$63 million, driven by double digit growth in Webex, growth in Unified Communications, IoT software offerings and AppDynamics, partially offset by declines in Cisco TelePresence.

## Nine Months Ended May 1, 2021 Compared with Nine Months Ended April 25, 2020

Revenue in our Applications product category decreased by 1%, or \$51 million, with declines in Unified Communications and Cisco Telepresence partially offset by double digit growth in Webex and IoT software offerings.

### Security

Three Months Ended May 1, 2021 Compared with Three Months Ended April 25, 2020

Revenue in our Security product category increased 13%, or \$98 million, with growth across the portfolio. Our cloud security portfolio reflected strong double-digit growth and continued momentum with our Duo and Umbrella offerings.

Nine Months Ended May 1, 2021 Compared with Nine Months Ended April 25, 2020

Revenue in our Security product category increased by 9%, or \$216 million, driven by growth across the portfolio. This product revenue increase reflects continued momentum with our Duo and Umbrella offerings.

### Service Revenue by Segment

The following table presents the breakdown of service revenue by segment (in millions, except percentages):

		Three Mor	ths 1	Ended			Nine Mont	hs E	Ended			
	 May 1, 2021	April 25, 2020		Variance in Dollars	Variance in Percent	May 1, 2021	April 25, 2020		Variance in Dollars	Varian in Perc		
Service revenue:												
Americas	\$ 2,248	\$ 2,088	\$	160	8 %	\$ 6,399	\$ 6,235	\$	164		3	%
Percentage of service revenue	61.4%	61.7 %				61.6 %	62.3 %					
EMEA	836	779		57	7 %	2,359	2,245		114		5	%
Percentage of service revenue	22.8 %	23.0 %				22.7 %	22.4 %					
APJC	579	520		59	11 %	1,636	1,521		115		8	%
Percentage of service revenue	15.8 %	15.3 %				15.7 %	15.3 %					
Total	\$ 3,664	\$ 3,386	\$	278	8 %	\$ 10,394	\$ 10,001	\$	393		4	%

Amounts may not sum and percentages may not recalculate due to rounding.

Service revenue increased 8% in the third quarter of fiscal 2021 and increased 4% in the first nine months of fiscal 2021 compared to the corresponding periods of fiscal 2020. The increases in both periods were driven by revenue growth in our maintenance business and solution support offerings. Service revenue increased across all geographic segments. Service revenue benefited from the extra week in the third quarter of fiscal 2021.

### Gross Margin

The following table presents the gross margin for products and services (in millions, except percentages):

			Three M	Ionths Ended				Nine Mo	onths Ended	
	AMC	DUNT		PERCEN	TAGE	AMO	DUNT		PERCE	NTAGE
	May 1, 2021	Apı 20	ril 25, 020	May 1, 2021	April 25, 2020	May 1, 2021		oril 25, 2020	May 1, 2021	April 25, 2020
Gross margin:	 									
Product	\$ 5,717	\$	5,477	62.6 %	63.7 %	\$ 16,626	\$	17,376	63.2 %	64.0 %
Service	 2,468		2,294	67.4 %	67.7 %	6,924		6,623	66.6 %	66.2 %
Total	\$ 8,185	\$	7,771	63.9 %	64.9 %	\$ 23,550	\$	23,999	64.2 %	64.6 %

### **Product Gross Margin**

The following table summarizes the key factors that contributed to the change in product gross margin percentage for the third quarter and first nine months of fiscal 2021, as compared with the corresponding periods in fiscal 2020:

	Product Gross M	argin Percentage
	Three Months Ended	Nine Months Ended
Fiscal 2020	63.7 %	64.0 %
Productivity (1)	(0.1)%	(0.1)%
Product pricing	(1.6)%	(1.5)%
Mix of products sold	0.8 %	1.2 %
Legal and indemnification charge	— %	(0.1)%
Others	(0.2)%	(0.3)%
Fiscal 2021	62.6 %	63.2 %

<sup>(1)</sup> Productivity includes overall manufacturing-related costs, such as component costs, warranty expense, provision for inventory, freight, logistics, shipment volume, and other items not categorized elsewhere.

### Three Months Ended May 1, 2021 Compared with Three Months Ended April 25, 2020

Product gross margin decreased by 1.1 percentage points largely driven by ongoing costs related to supply chain constraints. The effect of pricing erosion was moderate, partially offset by favorable product mix. We also experienced pricing erosion that was driven by typical market factors and impacted each of our geographic segments. The favorable mix was driven by changes in the proportion of products sold from each of our product categories as compared to the corresponding period of fiscal 2020.

During the third quarter of 2021, we continued to manage through supply chain challenges seen industry wide due to component shortages, caused in part by the COVID-19 pandemic. These challenges resulted in increased costs (i.e. component costs, broker fees, expedited freight and overtime) which had a negative impact on product gross margin, and extended lead times to us and our customers. We are partnering with several of our key suppliers utilizing our volume purchasing and extending supply coverage, including revising supplier arrangements, to address supply chain challenges. We believe these actions will enable us to optimize our access to critical components, including semiconductors. We expect these supply chain challenges to continue through at least the end of calendar year 2021.

### Nine Months Ended May 1, 2021 Compared with Nine Months Ended April 25, 2020

Product gross margin decreased by 0.8 percentage points driven by pricing erosion, partially offset by favorable impacts from product mix. In the first nine months of fiscal 2021, as a result of the COVID-19 pandemic, we incurred additional logistics costs, such as freight, which had a negative impact on product gross margin.

# Service Gross Margin

# Three Months Ended May 1, 2021 Compared with Three Months Ended April 25, 2020

Our service gross margin percentage decreased by 0.3 percentage points primarily due to higher headcount-related and delivery costs, partially offset by higher sales volume and to a lesser extent, favorable mix of service offerings.

Our service gross margin normally experiences some fluctuations due to various factors such as the timing of contract initiations in our renewals, our strategic investments in headcount, and the resources we deploy to support the overall service business. Other factors include the mix of service offerings, as the gross margin from our advanced services is typically lower than the gross margin from technical support services.

### Nine Months Ended May 1, 2021 Compared with Nine Months Ended April 25, 2020

Service gross margin percentage increased by 0.4 percentage points due to higher sales volume and favorable mix of service offerings, partially offset by increased headcount-related and delivery costs.

#### Gross Margin by Segment

The following table presents the total gross margin for each segment (in millions, except percentages):

			Three Mo	onths Ended				Nine M	onths Enc	led	
	AMO	DU	NT	PERCEN	TAGE	AMO	OUN	NT		PERCEN	NTAGE
	May 1, 2021		April 25, 2020	May 1, 2021	April 25, 2020	May 1, 2021		April 25, 2020	Ma 20	ıy 1, )21	April 25, 2020
Gross margin:											
Americas	\$ 4,831	\$	4,828	66.5 %	67.8 %	\$ 14,383	\$	14,836		67.1 %	67.1 %
EMEA	2,283		2,061	65.6 %	65.7 %	6,322		6,289		65.5 %	65.8 %
APJC	1,331		1,098	64.7 %	63.5 %	3,599		3,511		64.2 %	64.0 %
Segment total	8,445		7,986	66.0 %	66.6 %	24,303		24,636		66.2 %	66.3 %
Unallocated corporate items (1)	(260)		(215)			(753)		(637)			
Total	\$ 8,185	\$	7,771	63.9 %	64.9 %	\$ 23,550	\$	23,999		64.2 %	64.6 %

<sup>(1)</sup> The unallocated corporate items include the effects of amortization and impairments of acquisition-related intangible assets, share-based compensation expense, significant litigation settlements and other contingencies, charges related to asset impairments and restructurings, and certain other charges. We do not allocate these items to the gross margin for each segment because management does not include such information in measuring the performance of the operating segments.

Amounts may not sum and percentages may not recalculate due to rounding.

### Three Months Ended May 1, 2021 Compared with Three Months Ended April 25, 2020

We experienced a gross margin percentage decrease in our Americas segment due to pricing erosion and negative impacts from productivity, partially offset by favorable impacts from product mix.

Gross margin in our EMEA segment decreased slightly due to pricing erosion, partially offset by favorable impacts from productivity improvements and product mix. Lower service gross margin also contributed to the decrease in the gross margin in this geographic segment.

The APJC segment gross margin percentage increase was due to favorable impacts from product mix, and to a lesser extent, productivity improvements, partially offset by pricing erosion. Higher service gross margin also contributed to the increase in the gross margin in this geographic segment.

The gross margin percentage for a particular segment may fluctuate, and period-to-period changes in such percentages may or may not be indicative of a trend for that segment.

### Nine Months Ended May 1, 2021 Compared with Nine Months Ended April 25, 2020

Gross margin percentage in the Americas segment was flat, driven by favorable product mix, offset by pricing erosion.

The gross margin percentage decrease in our EMEA segment was due to pricing erosion, partially offset by favorable product mix and productivity improvements.

The APJC segment gross margin percentage increase was driven by productivity improvements and favorable product mix, partially offset by pricing erosion.

### Research and Development ("R&D"), Sales and Marketing, and General and Administrative ("G&A") Expenses

R&D, sales and marketing, and G&A expenses are summarized in the following table (in millions, except percentages):

		Three Mon	ths E	inded				Nine Mont	hs En	ded	
	May 1, 2021	April 25, 2020		/ariance Dollars	Variance in Percent	May 1, 2021		April 25, 2020		ariance Dollars	Variance in Percent
Research and development	\$ 1,697	\$ 1,546	\$	151	10 %	\$ 4,836	\$	4,782	\$	54	1 %
Percentage of revenue	13.3 %	12.9 %				13.2 %		12.9 %			
Sales and marketing	2,317	2,192		125	6 %	6,811		6,951		(140)	(2) %
Percentage of revenue	18.1 %	18.3 %				18.6 %		18.7%			
General and administrative	603	457		146	32 %	1,631		1,431		200	14 %
Percentage of revenue	4.7%	3.8 %				4.4 %		3.9 %			
Total	\$ 4,617	\$ 4,195	\$	422	10 %	\$ 13,278	\$	13,164	\$	114	1 %
Percentage of revenue	 36.1 %	 35.0 %				 36.2 %	_	35.4 %			

Our third quarter of fiscal 2021 had an extra week compared with the corresponding period of fiscal 2020.

### R&D Expenses

### Three Months Ended May 1, 2021 Compared with Three Months Ended April 25, 2020

R&D expenses increased due to higher headcount-related expenses in large part to the impact of the extra week in the third quarter of fiscal 2021, higher share-based compensation expense and contracted services spending, partially offset by lower discretionary spending.

We continue to invest in R&D in order to bring a broad range of products to market in a timely fashion. If we believe that we are unable to enter a particular market in a timely manner with internally developed products, we may purchase or license technology from other businesses, or we may partner with or acquire businesses as an alternative to internal R&D.

### Nine Months Ended May 1, 2021 Compared with Nine Months Ended April 25, 2020

R&D expenses increased primarily due to higher headcount-related expenses, higher share-based compensation and contracted services spending, partially offset by lower discretionary spending. The extra week in the first nine months of fiscal 2021 contributed to the increase in headcount-related expenses.

### Sales and Marketing Expenses

# Three Months Ended May 1, 2021 Compared with Three Months Ended April 25, 2020

Sales and marketing expenses increased due to higher headcount-related expenses and contracted services spending, partially offset by lower discretionary spending. The extra week in the third quarter of fiscal 2021 contributed to the increase in headcount-related expenses.

### Nine Months Ended May 1, 2021 Compared with Nine Months Ended April 25, 2020

Sales and marketing expenses decreased primarily due to lower discretionary spending partially offset by higher headcount-related expenses and contracted services spending. The extra week in the first nine months of fiscal 2021 contributed to the increase in headcount-related expenses.

### G&A Expenses

### Three Months Ended May 1, 2021 Compared with Three Months Ended April 25, 2020

G&A expenses increased due to higher headcount-related expenses, higher contracted services spending, higher discretionary spending and the impact from the gain recognized on the sale of property in the third quarter of fiscal 2020. The extra week in the third quarter of fiscal 2021 contributed to the increase in headcount-related expenses.

## Nine Months Ended May 1, 2021 Compared with Nine Months Ended April 25, 2020

G&A expenses increased due to the impact from the gain recognized on the sale of property in the first nine months of fiscal 2020 and higher headcount-related expenses. The extra week in the first nine months of fiscal 2021 contributed to the increase in headcount-related expenses.

### Effect of Foreign Currency

In the third quarter of fiscal 2021, foreign currency fluctuations, net of hedging, increased the combined R&D, sales and marketing, and G&A expenses by approximately \$78 million, or 1.9%, compared with the third quarter of fiscal 2020.

In the first nine months of fiscal 2021, foreign currency fluctuations, net of hedging, increased the combined R&D, sales and marketing, and G&A expenses by approximately \$122 million, or 0.9%, compared with the first nine months of fiscal 2020.

### Amortization of Purchased Intangible Assets

The following table presents the amortization of purchased intangible assets including impairment charges (in millions):

	Three Mo	nth	Ended .	Nine Mor	nths	Ended
	May 1, 2021		April 25, 2020	May 1, 2021		April 25, 2020
Amortization of purchased intangible assets:						
Cost of sales	\$ 187	\$	163	\$ 513	\$	494
Operating expenses	61		34	136		108
Total	\$ 248	\$	197	\$ 649	\$	602

For each of the third quarter and first nine months of fiscal 2021, the increase in amortization of purchased intangible assets was due largely to the amortization of purchased intangibles from our recent acquisitions.

### **Restructuring and Other Charges**

In the first quarter of fiscal 2021, we initiated a restructuring plan, which includes a voluntary early retirement program, in order to realign the organization and enable further investment in key priority areas. The total pretax charges are estimated to be approximately \$900 million. In connection with this restructuring plan, we incurred charges of \$35 million and \$869 million for the third quarter and first nine months of fiscal 2021, respectively. We expect the plan to be substantially completed in fiscal 2021 and estimate it will generate cost savings of approximately \$1.0 billion on an annualized basis over the next few quarters.

We initiated a restructuring plan during fiscal 2020 in order to realign the organization and enable further investment in key priority areas. In connection with this restructuring plan, we have incurred cumulative charges of \$264 million. We expect this restructuring plan to be substantially completed in fiscal 2021.

### **Operating Income**

The following table presents our operating income and our operating income as a percentage of revenue (in millions, except percentages):

	 Three Mo	onths 1	Ended	Nine Mo	nths ]	Ended
	May 1, 2021		April 25, 2020	May 1, 2021		April 25, 2020
Operating income	\$ 3,465	\$	3,414	\$ 9,258	\$	10,373
Operating income as a percentage of revenue	27.1 %	)	28.5 %	25.2 %		27.9 %

## Three Months Ended May 1, 2021 Compared with Three Months Ended April 25, 2020

Operating income increased by 1%, and operating income as a percentage of revenue decreased by 1.4 percentage points. These changes resulted primarily from a revenue increase, partially offset by a gross margin percentage decrease (driven by pricing erosion, partially offset by favorable product mix) and an increase in operating expenses.

## Nine Months Ended May 1, 2021 Compared with Nine Months Ended April 25, 2020

Operating income decreased by 11%, and operating income as a percentage of revenue decreased by 2.7 percentage points. These changes resulted primarily from a revenue decrease, higher restructuring and other charges and a gross margin percentage decrease (driven by pricing erosion, partially offset by favorable product mix).

### Interest and Other Income (Loss), Net

Interest Income (Expense), Net The following table summarizes interest income and interest expense (in millions):

		Thre	e Months Ende	d			Nin	ne Months Ended	1	
	May 1, 2021		April 25, 2020		Variance in Dollars	May 1, 2021		April 25, 2020		Variance in Dollars
Interest income	\$ 153	\$	218	\$	(65)	\$ 488	\$	733	\$	(245)
Interest expense	(111)		(130)		19	(336)		(466)		130
Interest income (expense), net	\$ 42	\$	88	\$	(46)	\$ 152	\$	267	\$	(115)

For each of the third quarter and first nine months of fiscal 2021, the decrease in interest income was driven by both lower interest rates and lower average balances of cash and available-for-sale debt investments. The decrease in interest expense was driven by a lower average debt balance and the impact of lower effective interest rates.

Other Income (Loss), Net The components of other income (loss), net, are summarized as follows (in millions):

	-	Γhre	e Months End	ed			Nin	e Months Ende	xd	
	May 1, 2021		April 25, 2020		Variance in Dollars	May 1, 2021		April 25, 2020		Variance in Dollars
Gains (losses) on investments, net:										
Available-for-sale debt investments	\$ 22	\$	(1)	\$	23	\$ 46	\$	20	\$	26
Marketable equity investments	2		(6)		8	1		(6)		7
Non-marketable equity and other investments	 95		17		78	 120		108		12
Net gains (losses) on investments	 119		10		109	 167		122		45
Other gains (losses), net	(35)		(68)		33	(50)		(98)		48
Other income (loss), net	\$ 84	\$	(58)	\$	142	\$ 117	\$	24	\$	93

### Three Months Ended May 1, 2021 Compared with Three Months Ended April 25, 2020

The change in net gains (losses) on available-for-sale debt investments was primarily attributable to higher realized gains as a result of market conditions, and the timing of sales of these investments. The change in net gains (losses) on non-marketable equity and other investments was primarily due to higher net unrealized gains and higher net realized gains. The change in other gains (losses), net was driven by lower donation expense and favorable impacts from our equity derivatives, partially offset by unfavorable impacts from foreign exchange.

### Nine Months Ended May 1, 2021 Compared with Nine Months Ended April 25, 2020

The change in net gains (losses) on available-for-sale debt investments was primarily attributable to higher realized gains as a result of market conditions, and the timing of sales of these investments. The change in net gains (losses) on non-marketable equity and other investments was primarily due to higher net unrealized gains and lower impairment charges, offset by lower net realized gains. The change in other gains (losses), net was primarily driven by lower donation expense and favorable impacts from our equity derivatives, partially offset by unfavorable impacts from foreign exchange.

### **Provision for Income Taxes**

### Three Months Ended May 1, 2021 Compared with Three Months Ended April 25, 2020

The provision for income taxes resulted in an effective tax rate of 20.3% for the third quarter of fiscal 2021 compared with 19.4% for the third quarter of fiscal 2020. The increase in the effective tax rate was primarily due to a decrease in the tax benefit from foreign income taxed at other than U.S. rates in the third quarter of fiscal 2021 as compared to the third quarter of fiscal 2020.

### Nine Months Ended May 1, 2021 Compared with Nine Months Ended April 25, 2020

The provision for income taxes resulted in an effective tax rate of 20.4% for the first nine months of fiscal 2021 compared with 19.6% for the first nine months of fiscal 2020. The increase in effective tax rate was primarily due to a decrease in the tax benefit from foreign income taxed at other than U.S. rates in fiscal 2021 as compared to fiscal 2020.

### Table of Contents

# CISCO SYSTEMS, INC. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Our effective tax rate will increase or decrease based upon the tax effect of the difference between the share-based compensation expenses and the benefits taken on the company's tax returns. We recognize excess tax benefits on a discrete basis and therefore anticipate the effective tax rate to vary from quarter to quarter depending on our share price in each period.

### LIQUIDITY AND CAPITAL RESOURCES

The following sections discuss the effects of changes in our balance sheet, our capital allocation strategy including stock repurchase program and dividends, our contractual obligations, and certain other commitments and activities on our liquidity and capital resources.

### **Balance Sheet and Cash Flows**

Cash and Cash Equivalents and Investments The following table summarizes our cash and cash equivalents and investments (in millions):

	May 1, 2021	July 25, 2020	Increa	se (Decrease)
Cash and cash equivalents	\$ 7,350	\$ 11,809	\$	(4,459)
Available-for-sale debt investments	16,168	17,610		(1,442)
Marketable equity securities	61	_		61
Total	\$ 23,579	\$ 29,419	\$	(5,840)

The net decrease in cash and cash equivalents and investments in the first nine months of fiscal 2021 was driven by net cash paid for acquisitions and divestitures of \$6.3 billion; cash returned to stockholders in the form of repurchases of common stock of \$2.1 billion, and cash dividends of \$4.6 billion; net decrease in debt of \$3.0 billion and capital expenditures of \$0.5 billion. These uses of cash were partially offset by cash provided by operating activities of \$11.0 billion.

In addition to cash requirements in the normal course of business, we have approximately \$0.7 billion of the U.S. transition tax on accumulated earnings for foreign subsidiaries that is payable in less than one year. Also, \$2.0 billion of long-term debt outstanding at May 1, 2021 will mature within the next 12 months from the balance sheet date. See further discussion of liquidity under "Liquidity and Capital Resource Requirements" below.

We maintain an investment portfolio of various holdings, types, and maturities. We classify our investments as short-term investments based on their nature and their availability for use in current operations. We believe the overall credit quality of our portfolio is strong, with our cash equivalents and our available-for-sale debt investment portfolio consisting primarily of high quality investment-grade securities. We believe that our strong cash and cash equivalents and investments position is critical at this time of uncertainty due to the COVID-19 pandemic and allows us to use our cash resources for strategic investments to gain access to new technologies, for acquisitions, for customer financing activities, for working capital needs, and for the repurchase of shares of common stock and payment of dividends as discussed below.

Securities Lending We periodically engage in securities lending activities with certain of our available-for-sale debt investments. These transactions are accounted for as a secured lending of the securities, and the securities are typically loaned only on an overnight basis. We require collateral equal to at least 102% of the fair market value of the loaned security and that the collateral be in the form of cash or liquid, high-quality assets. We engage in these secured lending transactions only with highly creditworthy counterparties, and the associated portfolio custodian has agreed to indemnify us against collateral losses. We did not experience any losses in connection with the secured lending of securities during the periods presented.

Free Cash Flow and Capital Allocation As part of our capital allocation strategy, we intend to return a minimum of 50% of our free cash flow annually to our stockholders through cash dividends and repurchases of common stock.

We define free cash flow as net cash provided by operating activities less cash used to acquire property and equipment. The following table reconciles our net cash provided by operating activities to free cash flow (in millions):

	Nine Moi	nths l	Ended
	May 1, 2021		April 25, 2020
Net cash provided by operating activities	\$ 10,950	\$	11,624
Acquisition of property and equipment	(530)		(562)
Free cash flow	\$ 10,420	\$	11,062

We expect that cash provided by operating activities may fluctuate in future periods as a result of a number of factors, including fluctuations in our operating results, the rate at which products are shipped during the quarter (which we refer to as shipment linearity), the timing and collection of accounts receivable and financing receivables, inventory and supply chain management,

deferred revenue, and the timing and amount of tax and other payments. For additional discussion, see "Part II, Item 1A. Risk Factors" in this report.

We consider free cash flow to be a liquidity measure that provides useful information to management and investors because of our intent to return a stated percentage of free cash flow to stockholders in the form of dividends and stock repurchases. We further regard free cash flow as a useful measure because it reflects cash that can be used to, among other things, invest in our business, make strategic acquisitions, repurchase common stock, and pay dividends on our common stock, after deducting capital investments. A limitation of the utility of free cash flow as a measure of financial performance and liquidity is that the free cash flow does not represent the total increase or decrease in our cash balance for the period. In addition, we have other required uses of cash, including repaying the principal of our outstanding indebtedness. Free cash flow is not a measure calculated in accordance with U.S. generally accepted accounting principles and should not be regarded in isolation or as an alternative for net cash provided by operating activities or any other measure calculated in accordance with such principles, and other companies may calculate free cash flow in a different manner than we do.

The following table summarizes the dividends paid and stock repurchases (in millions, except per-share amounts):

	DIVIDENDS			STOCK REPURCHASE PROGRAM					
Quarter Ended	 Per Share		Amount	Shares	W	eighted-Average Price per Share		Amount	TOTAL
Fiscal 2021	 ,								
May 1, 2021	\$ 0.37	\$	1,560	10	\$	48.71	\$	510	\$ 2,070
January 23, 2021	\$ 0.36	\$	1,521	19	\$	42.82	\$	801	\$ 2,322
October 24, 2020	\$ 0.36	\$	1,520	20	\$	40.44	\$	800	\$ 2,320
Fiscal 2020									
July 25, 2020	\$ 0.36	\$	1,525	_	\$	_	\$	_	\$ 1,525
April 25, 2020	\$ 0.36	\$	1,519	25	\$	39.71	\$	981	\$ 2,500
January 25, 2020	\$ 0.35	\$	1,486	18	\$	46.71	\$	870	\$ 2,356
October 26, 2019	\$ 0.35	\$	1,486	16	\$	48.91	\$	768	\$ 2,254

Any future dividends are subject to the approval of our Board of Directors.

The remaining authorized amount for stock repurchases under this program is approximately \$8.7 billion, with no termination date.

Accounts Receivable, Net The following table summarizes our accounts receivable, net (in millions):

	2021		2020 2020	Inc	crease (Decrease)
Accounts receivable, net	\$	4,425	\$ 5,472	\$	(1,047)

T.-1- 25

Our accounts receivable net, as of May 1, 2021 decreased by approximately 19%, as compared with the end of fiscal 2020, primarily due to timing and amount of product and service billings in the third quarter of fiscal 2021 compared with the fourth quarter of fiscal 2020.

Inventory Supply Chain The following table summarizes our inventories and purchase commitments with contract manufacturers and suppliers (in millions):

	May 1, 2021		July 25, 2020	Increase (Decrease)	
Inventories	\$ 1.5	579	\$ 1,282	\$ 297	Ī

Inventory as of May 1, 2021 increased by 23% from our inventory balance at the end of fiscal 2020. The increase in inventory was primarily due to an increase in raw materials and higher deferred cost of sales.

We purchase components from a variety of suppliers and use several contract manufacturers to provide manufacturing services for our products. During the normal course of business, in order to manage manufacturing lead times and help ensure adequate component supply, we enter into agreements with contract manufacturers and suppliers that allow them to procure inventory

based upon criteria as defined by us or that establish the parameters defining our requirements and our commitment to securing manufacturing capacity.

Our purchase commitments are for short-term product manufacturing requirements as well as for commitments to suppliers to secure manufacturing capacity. Certain of our purchase commitments with contract manufacturers and suppliers relate to arrangements to secure long-term supply and pricing for certain product components for multi-year periods. A significant portion of our reported purchase commitments arising from these agreements are firm, noncancelable, and unconditional commitments. In certain instances, these agreements allow us the option to cancel, reschedule, and adjust our requirements based on our business needs prior to firm orders being placed. We believe our inventory and purchase commitments are in line with our current demand forecasts. The following table summarizes our purchase commitments with contract manufacturers and suppliers as of the respective period ends (in millions):

Commitments by Period	1	May 1, 2021	July 25, 2020
Less than 1 year	\$	6,461	\$ 3,994
1 to 3 years		1,615	412
3 to 5 years		1,733	_
Total	\$	9,809	\$ 4,406

The increase in purchase commitments with contract manufacturers and suppliers compared with the end of fiscal 2020 was due to arrangements to secure long-term supply and pricing for certain product components for multi-year periods. We are partnering with several of our key suppliers utilizing our volume purchasing and extending supply coverage, including revising supplier arrangements, to address supply chain challenges.

Inventory and supply chain management remain areas of focus as we balance the need to maintain supply chain flexibility to help ensure competitive lead times with the risk of inventory obsolescence because of rapidly changing technology and customer requirements. We believe the amount of our inventory and purchase commitments is appropriate for our revenue levels.

<u>Financing Receivables and Guarantees</u> The following table summarizes our financing receivables (in millions):

	May 1, 2021	July 25, 2020	Increase (Decrease)
Lease receivables, net	\$ 1,713	\$ 2,088	\$ (375)
Loan receivables, net	5,547	5,856	(309)
Financed service contracts, net	2,456	2,821	(365)
Total, net	\$ 9,716	\$ 10,765	\$ (1,049)

Financing Receivables Our financing arrangements include leases, loans, and financed service contracts. Lease receivables include sales-type leases. Arrangements related to leases are generally collateralized by a security interest in the underlying assets. Our loan receivables include customer financing for purchases of our hardware, software and services and also may include additional funds for other costs associated with network installation and integration of our products and services. We also provide financing to certain qualified customers for long-term service contracts, which primarily relate to technical support services. The majority of the revenue from these financed service contracts is deferred and is recognized ratably over the period during which the services are performed. Financing receivables decreased by 10%, as compared with the end of fiscal 2020.

<u>Financing Guarantees</u> In the normal course of business, third parties may provide financing arrangements to our customers and channel partners under financing programs. The financing arrangements to customers provided by third parties are related to leases and loans and typically have terms of up to three years. In some cases, we provide guarantees to third parties for these lease and loan arrangements. The financing arrangements to channel partners consist of revolving short-term financing provided by third parties, with payment terms generally ranging from 60 to 90 days. During fiscal 2020, we expanded the payment terms on certain of our channel partner financing programs by 30 days in response to the COVID-19 pandemic. In certain instances, these financing arrangements result in a transfer of our receivables to the third party. The receivables are derecognized upon transfer, as these transfers qualify as true sales, and we receive payments for the receivables from the third party based on our standard payment terms.

The volume of channel partner financing was \$19.5 billion and \$20.5 billion for the first nine months of fiscal 2021 and 2020, respectively. These financing arrangements facilitate the working capital requirements of the channel partners, and in some cases, we guarantee a portion of these arrangements. The balance of the channel partner financing subject to guarantees was \$1.3 billion and \$1.1 billion as of May 1, 2021 and July 25, 2020, respectively. We could be called upon to make payments under these guarantees in the event of nonpayment by the channel partners or end-user customers. Historically, our payments under these arrangements have been immaterial. Where we provide a guarantee, we defer the revenue associated with the channel partner and end-user financing arrangement in accordance with revenue recognition policies, or we record a liability for the fair value of the guarantees. In either case, the deferred revenue is recognized as revenue when the guarantee is removed. As of May 1, 2021, the total maximum potential future payments related to these guarantees was approximately \$171 million, of which approximately \$22 million was recorded as deferred revenue.

### **Borrowings**

<u>Senior Notes</u> The following table summarizes the principal amount of our senior notes (in millions):

	Maturity Date	N <sub>2</sub>	fay 1, 2021	July 25, 2020
Senior notes:				
Fixed-rate notes:				
2.20%	February 28, 2021	\$	— \$	2,500
2.90%	March 4, 2021		_	500
1.85%	September 20, 2021		2,000	2,000
3.00%	June 15, 2022		500	500
2.60%	February 28, 2023		500	500
2.20%	September 20, 2023		750	750
3.625%	March 4, 2024		1,000	1,000
3.50%	June 15, 2025		500	500
2.95%	February 28, 2026		750	750
2.50%	September 20, 2026		1,500	1,500
5.90%	February 15, 2039		2,000	2,000
5.50%	January 15, 2040		2,000	2,000
Total		\$	11,500 \$	14,500

Interest is payable semiannually on each class of the senior fixed-rate notes, each of which is redeemable by us at any time, subject to a make-whole premium. We were in compliance with all debt covenants as of May 1, 2021.

Commercial Paper We have a short-term debt financing program in which up to \$10.0 billion is available through the issuance of commercial paper notes. We use the proceeds from the issuance of commercial paper notes for general corporate purposes. We had no commercial paper outstanding as of May 1, 2021 and July 25, 2020.

### **Table of Contents**

# CISCO SYSTEMS, INC. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Credit Facility On May 13, 2021, we entered into a 5-year credit agreement with certain institutional lenders that provides for a \$3.0 billion unsecured revolving credit facility that is scheduled to expire on May 13, 2026. The credit agreement is structured as an amendment and restatement of our 364-day credit agreement, which would have terminated on May 14, 2021. As of May 1, 2021, we were in compliance with the required interest coverage ratio and the other covenants, and we had not borrowed any funds under the 364-day credit facility. Any advances under the 5-year credit agreement will accrue interest at rates that are equal to, based on certain conditions, either (a) with respect to loans in U.S. dollars, (i) LIBOR or (ii) the Base Rate (to be defined as the highest of (x) the Bank of America prime rate, (y) the Federal Funds rate plus 0.50% and (z) a daily rate equal to one-month LIBOR plus 1.0%), (b) with respect to loans in Euros, EURIBOR, (c) with respect to loans in Pounds Sterling, SONIA plus a credit spread adjustment, plus a margin that is based on our senior debt credit ratings as published by Standard & Poor's Financial Services, LLC and Moody's Investors Service, Inc., provided that in no event will the interest rate be less than 0.0%. We will pay a quarterly commitment fee during the term of the 5-year credit agreement which may vary depending on our senior debt credit ratings. In addition, the 5-year credit agreement incorporates certain sustainability-linked metrics. Specifically, our applicable interest rate and commitment fee are subject to upward or downward adjustments if we achieve, or fail to achieve, certain specified targets based on two key performance indicator metrics: (i) social impact and (ii) foam reduction. We may also, upon the agreement of either the then-existing lenders or additional lenders not currently parties to the agreement, increase the commitments under the credit facility by up to an additional \$2.0 billion and, at our option, extend the maturity of the facility f

<u>Deferred Revenue</u> The following table presents the breakdown of deferred revenue (in millions):

	May 1, 2021		July 25, 2020	Increas	e (Decrease)
Product	\$	8,698	\$ 7,895	\$	803
Service		12,191	12,551		(360)
Total	\$	20,889	\$ 20,446	\$	443
Reported as:		,			
Current	\$	11,492	\$ 11,406	\$	86
Noncurrent		9,397	9,040		357
Total	\$	20,889	\$ 20,446	\$	443

Deferred product revenue increased primarily due to increased deferrals related to our recurring software offerings. The decrease in deferred service revenue was driven by the impact of ongoing amortization of deferred service revenue.

Remaining Performance Obligations The following table presents the breakdown of remaining performance obligations (in millions):

	May 1, 2021		July 25, 2020	Incr	ease (Decrease)
Product	\$	11,903	\$ 11,261	\$	642
Service		16,235	17,093		(858)
Total	\$	28,138	\$ 28,354	\$	(216)

Total remaining performance obligations decreased 1% in the first nine months of fiscal 2021 compared to the end of fiscal 2020. Remaining performance obligations for product increased 6% compared to the end of fiscal 2020. Remaining performance obligations for service decreased 5%.

### **Contractual Obligations**

### Transition Tax Payable

The income tax payable outstanding as of May 1, 2021 for the U.S. transition tax on accumulated earnings for foreign subsidiaries is \$6.9 billion. Approximately \$0.7 billion is payable in less than one year; \$2.1 billion is payable between 1 to 3 years; and \$4.1 billion is payable between 3 to 5 years.

For our Contractual Obligations see our Annual Report on Form 10-K for the year ended July 25, 2020.

### **Other Commitments**

In connection with our acquisitions, we have agreed to pay certain additional amounts contingent upon the achievement of certain agreed-upon technology, development, product, or other milestones or the continued employment with us of certain employees of the acquired entities. See Note 14 to the Consolidated Financial Statements.

We also have certain funding commitments primarily related to our non-marketable equity and other investments, some of which may be based on the achievement of certain agreed-upon milestones, and some of which are required to be funded on demand. The funding commitments were \$0.2 billion and \$0.3 billion as of May 1, 2021 and July 25, 2020, respectively.

### **Off-Balance Sheet Arrangements**

We consider our investments in unconsolidated variable interest entities to be off-balance sheet arrangements. In the ordinary course of business, we have non-marketable equity and other investments and provide financing to certain customers. Certain of these investments are considered to be variable interest entities. We evaluate on an ongoing basis our non-marketable equity and other investments and customer financings, and we have determined that as of May 1, 2021 there were no material unconsolidated variable interest entities.

On an ongoing basis, we reassess our non-marketable equity and other investments and customer financings to determine if they are variable interest entities and if we would be regarded as the primary beneficiary pursuant to the applicable accounting guidance. As a result of this ongoing assessment, we may be required to make additional disclosures or consolidate these entities. Because we may not control these entities, we may not have the ability to influence these events.

We provide financing guarantees, which are generally for various third-party financing arrangements extended to our channel partners and end-user customers. We could be called upon to make payments under these guarantees in the event of nonpayment by the channel partners or end-user customers. See the previous discussion of these financing guarantees under "Financing Receivables and Guarantees."

### Liquidity and Capital Resource Requirements

While the COVID-19 pandemic has not materially impacted our liquidity and capital resources to date, it has led to increased disruption and volatility in capital markets and credit markets. The pandemic and resulting economic uncertainty could adversely affect our liquidity and capital resources in the future. Based on past performance and current expectations, we believe our cash and cash equivalents, investments, cash generated from operations, and ability to access capital markets and committed credit lines will satisfy, through at least the next 12 months, our liquidity requirements, both in total and domestically, including the following: working capital needs, capital expenditures, investment requirements, stock repurchases, cash dividends, contractual obligations, commitments, principal and interest payments on debt, pending acquisitions, future customer financings, and other liquidity requirements associated with our operations. There are no other transactions, arrangements, or relationships with unconsolidated entities or other persons that are reasonably likely to materially affect the liquidity and the availability of, as well as our requirements for, capital resources.

### Item 3. Quantitative and Qualitative Disclosures About Market Risk

Our financial position is exposed to a variety of risks, including interest rate risk, equity price risk, and foreign currency exchange risk. We have seen an increase in these risks and related uncertainties with increased volatility in the financial markets in the current environment with the COVID-19 pandemic.

#### Interest Rate Risk

Available-for-Sale Debt Investments We maintain an investment portfolio of various holdings, types, and maturities. Our primary objective for holding available-for-sale debt investments is to achieve an appropriate investment return consistent with preserving principal and managing risk. At any time, a sharp rise in market interest rates could have a material adverse impact on the fair value of our available-for-sale debt investment portfolio. Conversely, declines in interest rates as has also happened recently, including the impact from lower credit spreads, could have a material adverse impact on interest income for our investment portfolio. We may utilize derivative instruments designated as hedging instruments to achieve our investment objectives. We had no outstanding hedging instruments for our available-for-sale debt investments are held for purposes other than trading. Our available-for-sale debt investments are not leveraged as of May 1, 2021. We monitor our interest rate and credit risks, including our credit exposures to specific rating categories and to individual issuers. We believe the overall credit quality of our portfolio is strong.

<u>Financing Receivables</u> As of May 1, 2021, our financing receivables had a carrying value of \$9.7 billion, compared with \$10.8 billion as of July 25, 2020. As of May 1, 2021, a hypothetical 50 basis points ("BPS") increase or decrease in market interest rates would change the fair value of our financing receivables by a decrease or increase of approximately \$0.1 billion, respectively.

Debt As of May 1, 2021, we had \$11.5 billion in principal amount of senior fixed-rate notes outstanding. The carrying amount of the senior notes was \$11.5 billion, and the related fair value based on market prices was \$13.5 billion. As of May 1, 2021, a hypothetical 50 BPS increase or decrease in market interest rates would change the fair value of the fixed-rate debt, excluding the \$2.0 billion of hedged debt, by a decrease or increase of approximately \$0.4 billion, respectively. However, this hypothetical change in interest rates would not impact the interest expense on the fixed-rate debt that is not hedged.

## **Equity Price Risk**

Marketable Equity Investments. The fair value of our marketable equity investments is subject to market price volatility. We hold equity securities for strategic purposes or to diversify our overall investment portfolio. These equity securities are held for purposes other than trading. The total fair value of our marketable equity securities was \$61 million as of May 1, 2021. We had no outstanding marketable equity securities as of July 25, 2020.

Non-marketable Equity and Other Investments These investments are recorded in other assets in our Consolidated Balance Sheets. The total carrying amount of our investments in non-marketable equity and other investments was \$1.4 billion and \$1.3 billion as of May 1, 2021 and July 25, 2020, respectively. Some of these companies in which we invested are in the startup or development stages. These investments are inherently risky because the markets for the technologies or products these companies are developing are typically in the early stages and may never materialize. We could lose our entire investment in these companies. Our evaluation of non-marketable equity and other investments is based on the fundamentals of the businesses invested in, including, among other factors, the nature of their technologies and potential for financial return.

# Foreign Currency Exchange Risk

Our foreign exchange forward contracts outstanding as of the respective period-ends are summarized in U.S. dollar equivalents as follows (in millions):

		May 1, 2021				July 25, 2020			
	Notional Amount			Fair Value		Notional Amount			Fair Value
Forward contracts:	<u></u>								
Purchased	\$	2,405	\$		(7)	\$	2,441	\$	1
Sold	\$	1,649	\$		9	\$	1,874	\$	4

At May 1, 2021 and July 25, 2020, we had no option contracts outstanding.

We conduct business globally in numerous currencies. The direct effect of foreign currency fluctuations on revenue has not been material because our revenue is primarily denominated in U.S. dollars. However, if the U.S. dollar strengthens relative to other currencies, such strengthening could have an indirect effect on our revenue to the extent it raises the cost of our products to non-U.S. customers and thereby reduces demand. A weaker U.S. dollar could have the opposite effect. However, the precise

### Table of Contents

indirect effect of currency fluctuations is difficult to measure or predict because our revenue is influenced by many factors in addition to the impact of such currency fluctuations.

Approximately 70% of our operating expenses are U.S.-dollar denominated. In the first nine months of fiscal 2021, foreign currency fluctuations, net of hedging, increased our combined R&D, sales and marketing, and G&A expenses by approximately \$122 million, or 0.9%, compared with the first nine months of fiscal 2020. To reduce variability in operating expenses and service cost of sales caused by non-U.S.-dollar denominated operating expenses and costs, we may hedge certain forecasted foreign currency transactions with currency options and forward contracts. These hedging programs are not designed to provide foreign currency protection over long time horizons. In designing a specific hedging approach, we consider several factors, including offsetting exposures, significance of exposures, costs associated with entering into a particular hedge instrument, and potential effectiveness of the hedge. The gains and losses on foreign exchange contracts mitigate the effect of currency movements on our operating expenses and service cost of sales.

We also enter into foreign exchange forward and option contracts to reduce the short-term effects of foreign currency fluctuations on receivables and payables that are denominated in currencies other than the functional currencies of the entities. The market risks associated with these foreign currency receivables and payables relate primarily to variances from our forecasted foreign currency transactions and balances. We do not enter into foreign exchange forward or option contracts for speculative purposes.

#### Item 4. Controls and Procedures

Evaluation of disclosure controls and procedures. Based on our management's evaluation (with the participation of our principal executive officer and principal financial officer), as of the end of the period covered by this report, our principal executive officer and principal financial officer have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, (the "Exchange Act")) are effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms and is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in internal control over financial reporting. There was no change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during our third quarter of fiscal 2021 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

### PART II. OTHER INFORMATION

### Item 1. Legal Proceedings

For a description of our material pending legal proceedings, see Note 14, "Commitments and Contingencies—(f) Legal Proceedings" in the Notes to Consolidated Financial Statements included in Item 1 of this Form 10-Q.

### Item 1A. Risk Factors

Set forth below and elsewhere in this report and in other documents we file with the SEC are descriptions of the risks and uncertainties that could cause our actual results to differ materially from the results contemplated by the forward-looking statements contained in this report. The descriptions below include any material changes to and supersede the description of the risk factors affecting our business previously disclosed in "Part I, Item 1A. Risk Factors" of our Annual Report on Form 10-K for the fiscal year ended July 25, 2020.

### Risks Related to our Business and Industry

# Our business, results of operations and financial condition have been adversely affected and could in the future be materially adversely affected by the COVID-19 pandemic.

The COVID-19 pandemic and the resulting containment measures have caused economic and financial disruptions globally, including in most of the regions in which we sell our products and services and conduct our business operations. In the second half of fiscal 2020, the COVID-19 pandemic had an impact on our financial results and business operations, with a significant impact in the third quarter of fiscal 2020 on our supply chain where we saw manufacturing challenges and component constraints. The magnitude and duration of the disruption, its continuing impact on us, and resulting decline in global business activity is uncertain. These disruptions include the unprecedented actions taken to try to contain the pandemic such as travel bans and restrictions, business closures, and social distancing measures, such as quarantines and shelter-in-place orders.

The COVID-19 pandemic and the responsive measures taken in many countries have adversely affected and could in the future materially adversely affect our business, results of operations and financial condition. Shelter-in-place orders and other measures, including work-from-home and other policies implemented to protect workers, has and could in the future impact our supply chain. Such disruptions may continue, or worsen, in the future. In addition, current and future restrictions or disruptions of transportation, such as reduced availability of air transport, port closures, and increased border controls or closures, can also impact our ability to meet customer demand and could materially adversely affect us. Our customers have also experienced, and may continue to experience, disruptions in their operations, which can result in delayed, reduced, or canceled orders, and increased collection risks, and which may adversely affect our results of operations. The COVID-19 pandemic may also result in long-term changes in customer needs for our products and services in various sectors, along with IT-related capital spending reductions, or shifts in spending focus, that could materially adversely affect us if we are unable to adjust our product and service offerings to match customer needs.

The recent shift to a remote working environment also creates challenges. For example, governmental lockdowns, restrictions or new regulations has and could in the future impact the ability of our employees and vendors to work with the same speed and productivity in certain areas, even as other areas do not see negative impact. The extent and/or duration of ongoing workforce restrictions and limitations could impact our ability to enhance, develop and support existing products and services, and hold product sales and marketing events to the extent we were able to previously. In addition, malefactors are seeking to use the COVID-19 pandemic to launch new cyber-attacks. The COVID-19 pandemic has also led to increased disruption and volatility in capital markets and credit markets. The pandemic and resulting economic uncertainty could adversely affect our liquidity and capital resources in the future. The inputs into certain of our judgments, assumptions, and estimates considered the economic implications of the COVID-19 pandemic on our critical and significant accounting estimates. The actual results that we experience may differ materially from our estimates. As the COVID-19 pandemic continues to develop, many of our estimates could require increased judgment and carry a higher degree of variability and volatility. As events continue to evolve our estimates may change materially in future periods.

We are continuing to monitor the pandemic and take appropriate actions in accordance with the recommendations and requirements of relevant authorities. The extent of the impact of the COVID-19 pandemic on our operational and financial performance is currently uncertain and will depend on many factors outside our control, including, without limitation, the timing, extent, trajectory and duration of the pandemic, the development and availability of effective treatments and vaccines, the imposition of protective public safety measures, and the impact of the pandemic on the global economy. Potential negative impacts of these external factors include, but are not limited to, material adverse effects on demand for our products and services; our supply chain and sales and distribution channels; collectability of customer accounts; our ability to execute strategic plans; impairments; and our profitability and cost structure. To the extent the COVID-19 pandemic adversely affects our business, results of operations and financial condition, it may also have the effect of exacerbating the other risks discussed in this "Risk Factors" section.

### Our operating results may fluctuate in future periods, which may adversely affect our stock price.

Our operating results have been in the past, and will continue to be, subject to quarterly and annual fluctuations as a result of numerous factors, some of which may contribute to more pronounced fluctuations in an uncertain global economic environment. These factors include:

- Fluctuations in demand for our products and services, especially with respect to service providers and Internet businesses, in part due to changes in the global economic environment
- · Changes in sales and implementation cycles for our products and reduced visibility into our customers' spending plans and associated revenue
- · Our ability to maintain appropriate inventory levels and purchase commitments
- Price and product competition in the communications and networking industries, which can change rapidly due to technological innovation and different business models from various geographic regions
- The overall movement toward industry consolidation among both our competitors and our customers
- The introduction and market acceptance of new technologies and products, and our success in new and evolving markets, and in emerging technologies, as well as the adoption of new standards
- The transformation of our business to deliver more software and subscription offerings where revenue is recognized over time
- Variations in sales channels, product costs, mix of products sold, or mix of direct sales and indirect sales
- The timing, size, and mix of orders from customers
- · Manufacturing and customer lead times
- · Fluctuations in our gross margins, and the factors that contribute to such fluctuations
- The ability of our customers, channel partners, contract manufacturers and suppliers to obtain financing or to fund capital expenditures, especially during a period of global credit market disruption or in the event of customer, channel partner, contract manufacturer or supplier financial problems
- Actual events, circumstances, outcomes, and amounts differing from judgments, assumptions, and estimates used in determining the values of certain
  assets (including the amounts of related valuation allowances), liabilities, and other items reflected in our Consolidated Financial Statements
- How well we execute on our strategy and operating plans and the impact of changes in our business model that could result in significant restructuring charges
- · Our ability to achieve targeted cost reductions
- Benefits anticipated from our investments
- · Changes in tax laws or accounting rules, or interpretations thereof

As a consequence, operating results for a particular future period are difficult to predict, and, therefore, prior results are not necessarily indicative of results to be expected in future periods. Any of the foregoing factors, or any other factors discussed elsewhere herein, could have a material adverse effect on our business, results of operations, and financial condition that could adversely affect our stock price.

### Our operating results may be adversely affected by unfavorable economic and market conditions and the uncertain geopolitical environment.

Challenging economic conditions worldwide have from time to time contributed, and may continue to contribute, to slowdowns in the communications and networking industries at large, as well as in specific segments and markets in which we operate, resulting in: reduced demand for our products as a result of continued constraints on IT-related capital spending by our customers, particularly service providers, and other customer markets as well; increased price competition for our products, not only from our competitors but also as a consequence of customers disposing of unutilized products; risk of excess and obsolete inventories; risk of supply constraints; risk of excess facilities and manufacturing capacity; and higher overhead costs as a percentage of revenue and higher interest expense.

The global macroeconomic environment continues to be challenging and inconsistent, and is being significantly impacted by the COVID-19 pandemic. During fiscal 2020 and the first quarter of fiscal 2021, we continued to see a broad-based weakening in the global macroeconomic environment which impacted our commercial and enterprise markets. We also experienced continuing weakness in emerging countries, and we expect ongoing uncertainty in this market. Additionally, instability in the global credit markets, the impact of uncertainty regarding global central bank monetary policy, the instability in the geopolitical environment in many parts of the world including as a result of the United Kingdom "Brexit" withdrawal from the European Union, the current economic challenges in China, including global economic ramifications of Chinese economic difficulties.

### Table of Contents

and other disruptions may continue to put pressure on global economic conditions. If global economic and market conditions, or economic conditions in key markets, remain uncertain or deteriorate further, we may experience material impacts on our business, operating results, and financial condition.

Our operating results in one or more segments may also be affected by uncertain or changing economic conditions particularly germane to that segment or to particular customer markets within that segment. In addition, reports of certain intelligence gathering methods of the U.S. government could affect customers' perception of the products of IT companies which design and manufacture products in the United States. Trust and confidence in us as an IT supplier are critical to the development and growth of our markets. Impairment of that trust, or foreign regulatory actions taken in response to reports of certain intelligence gathering methods of the U.S. government, could affect the demand for our products from customers outside of the United States and could have an adverse effect on our operating results.

### Our revenue for a particular period is difficult to predict, and a shortfall in revenue may harm our operating results.

As a result of a variety of factors discussed in this report, our revenue for a particular quarter is difficult to predict, especially in light of a challenging and inconsistent global macroeconomic environment, the significant impacts of the COVID-19 pandemic, and related market uncertainty. Our revenue may grow at a slower rate than in past periods or decline as it did in the first quarter of fiscal 2021 and fiscal 2020, and in certain prior periods on a year-over-year basis. Our ability to meet financial expectations could also be adversely affected if the nonlinear sales pattern seen in some of our past quarters recurs in future periods. We have experienced periods of time during which shipments have exceeded net bookings or manufacturing issues have delayed shipments, leading to nonlinearity in shipping patterns. In addition to making it difficult to predict revenue for a particular period, nonlinearity in shipping can increase costs, because irregular shipment patterns result in periods of underutilized capacity and periods in which overtime expenses may be incurred, as well as in potential additional inventory management-related costs. In addition, to the extent that manufacturing issues and any related component shortages result in delayed shipments in the future, and particularly in periods in which our contract manufacturers are operating at higher levels of capacity, it is possible that revenue for a quarter could be adversely affected if such matters occur and are not remediated within the same quarter.

The timing of large orders can also have a significant effect on our business and operating results from quarter to quarter. From time to time, we receive large orders that have a significant effect on our operating results in the period in which the order is recognized as revenue. The timing of such orders is difficult to predict, and the timing of revenue recognition from such orders may affect period to period changes in revenue. As a result, our operating results could vary materially from quarter to quarter based on the receipt of such orders and their ultimate recognition as revenue. Longer than normal manufacturing lead times in the past have caused, and in the future could cause, some customers to place the same or a similar order multiple times within our various sales channels and to cancel the duplicative orders upon shipment or receipt of the product, or to also place orders with other vendors with shorter manufacturing lead times. Such multiple ordering (along with other factors) or risk of order cancellation may cause difficulty in predicting our revenue. Further, our efforts to improve manufacturing lead-time performance may result in more variability and less predictability in our revenue and operating results. In addition, when facing component supply-related challenges we have increased our efforts in procuring components in order to meet customer expectations, which in turn contribute to an increase in purchase commitments. Increases in our purchase commitments to shorten lead times could also lead to excess and obsolete inventory charges if the demand for our products is less than our expectations. We plan our operating expense levels based primarily on forecasted revenue levels. These expenses and the impact of long-term commitments are relatively fixed in the short term. A shortfall in revenue could lead to operating results being below expectations because we may not be able to quickly reduce these fixed expenses in response to short-term business changes. Any of the above factors could h

Supply chain issues, including financial problems of contract manufacturers or component suppliers, or a shortage of adequate component supply or manufacturing capacity that increase our costs or cause a delay in our ability to fulfill orders, could have an adverse impact on our business and operating results, and our failure to estimate customer demand properly may result in excess or obsolete component supply, which could adversely affect our gross margins.

The fact that we do not own or operate the bulk of our manufacturing facilities and that we are reliant on our extended supply chain could have an adverse impact on the supply of our products and on our business and operating results. Financial problems of either contract manufacturers or component suppliers, reservation of manufacturing capacity at our contract manufacturers by other companies, and industry consolidation occurring within one or more component supplier markets, such as the semiconductor market, in each case, could either limit supply or increase costs.

A reduction or interruption in supply, including disruptions on our global supply chain as a result of the COVID-19 pandemic or a significant natural disaster (including as a result of climate change); a significant increase in the price of one or more components; a failure to adequately authorize procurement of inventory by our contract manufacturers; a failure to appropriately cancel, reschedule, or adjust our requirements based on our business needs; or a decrease in demand for our

### Table of Contents

products could materially adversely affect our business, operating results, and financial condition and could materially damage customer relationships. Furthermore, as a result of binding price or purchase commitments with suppliers, we may be obligated to purchase components at prices that are higher than those available in the current market. In the event that we become committed to purchase components at prices in excess of the current market price when the components are actually used, our gross margins could decrease. In addition, vendors may be under pressure to allocate product to certain customers for business, regulatory or political reasons, and/or demand changes in agreed pricing as a condition of supply. Although we have generally secured additional supply or taken other mitigation actions when significant disruptions have occurred, if similar situations occur in the future, they could have a material adverse effect on our business, results of operations, and financial condition

Our growth and ability to meet customer demands depend in part on our ability to obtain timely deliveries of parts from our suppliers and contract manufacturers. We have experienced component shortages in the past, including shortages caused by manufacturing process issues, that have affected our operations, including longer than normal lead times. There is currently a market shortage of semiconductor and other component supply which has affected, and could further affect, lead times, the cost of that supply, and our ability to meet customer demand for our products if we cannot secure sufficient supply in a timely manner. We expect these supply chain challenges to continue through at least the end of calendar year 2021. Additionally, we may in the future experience a shortage of certain component parts as a result of our own manufacturing issues, manufacturing issues at our suppliers or contract manufacturers, capacity problems experienced by our suppliers or contract manufacturers including capacity or cost problems resulting from industry consolidation, or strong demand for those parts. Growth in the economy is likely to create greater pressures on us and our suppliers to accurately project overall component demand and component demands within specific product categories and to establish optimal component levels and manufacturing capacity, especially for labor-intensive components, components for which we purchase a substantial portion of the supply, or the re-ramping of manufacturing capacity for highly complex products. During periods of shortages or delays the price of components may increase, or the components may not be available at all, and we may also encounter shortages if we do not accurately anticipate our needs. We may not be able to secure enough components at reasonable prices or of acceptable quality to build new products in a timely manner in the quantities or configurations needed. Accordingly, our revenue and gross margins could suffer until other sources can be developed.

Our operating results would also be adversely affected if, anticipating greater demand than actually develops, we commit to the purchase of more components than we need, which is more likely to occur in a period of demand uncertainties such as we are currently experiencing. There can be no assurance that we will not encounter these problems in the future. Although in many cases we use standard parts and components for our products, certain components are presently available only from a single source or limited sources, and a global economic downturn and related market uncertainty could negatively impact the availability of components from one or more of these sources, especially during times such as we have recently seen when there are supplier constraints based on labor and other actions taken during economic downturns. We may not be able to diversify sources in a timely manner, which could harm our ability to deliver products to customers and seriously impact present and future sales.

We believe that we may be faced with the following challenges in the future: new markets in which we participate may grow quickly, which may make it difficult to quickly obtain significant component capacity; as we acquire companies and new technologies, we may be dependent on unfamiliar supply chains or relatively small supply partners; and we face competition for certain components that are supply-constrained, from existing competitors, and companies in other markets.

Manufacturing capacity and component supply constraints could continue to be significant issues for us. We purchase components from a variety of suppliers and use several contract manufacturers to provide manufacturing services for our products. During the normal course of business, in order to improve manufacturing lead-time performance and to help ensure adequate component supply, we enter into agreements with contract manufacturers and suppliers that either allow them to procure inventory based upon criteria as defined by us or that establish the parameters defining our requirements. In certain instances, these agreements allow us the option to cancel, reschedule, and adjust our requirements based on our business needs prior to firm orders being placed. When facing component supply-related challenges we have increased our efforts in procuring components in order to meet customer expectations, which in turn contributes to an increase in purchase commitments. Increases in our purchase commitments to shorten lead times could also lead to excess and obsolete inventory charges if the demand for our products is less than our expectations. If we fail to anticipate customer demand properly, an oversupply of parts could result in excess or obsolete components that could adversely affect our gross margins. For additional information regarding our purchase commitments with contract manufacturers and suppliers, see Note 14 to the Consolidated Financial Statements.

# We expect gross margin to vary over time, and our level of product gross margin may not be sustainable.

Our level of product gross margins declined in the first nine months of fiscal 2021 and have declined in certain prior periods on a year-over-year basis, and could decline in future periods due to adverse impacts from various factors, including:

- · Changes in customer, geographic, or product mix, including mix of configurations within each product group
- Introduction of new products, including products with price-performance advantages, and new business models including the transformation of our business to deliver more software and subscription offerings
- · Our ability to reduce production costs
- Entry into new markets or growth in lower margin markets, including markets with different pricing and cost structures, through acquisitions or internal development
- Sales discounts
- Increases in material, labor or other manufacturing-related costs (i.e. component costs, broker fees, expedited freight and overtime), which could be significant especially during periods of supply constraints such as those impacting the market for components, including semiconductors and memory
- · Excess inventory, inventory holding charges, and obsolescence charges
- Changes in shipment volume
- The timing of revenue recognition and revenue deferrals
- Increased cost (including those caused by tariffs), loss of cost savings or dilution of savings due to changes in component pricing or charges incurred
  due to inventory holding periods if parts ordering does not correctly anticipate product demand or if the financial health of either contract manufacturers
  or suppliers deteriorates
- Lower than expected benefits from value engineering
- · Increased price competition, including competitors from Asia, especially from China
- · Changes in distribution channels
- · Increased warranty or royalty costs
- · Increased amortization of purchased intangible assets, especially from acquisitions
- How well we execute on our strategy and operating plans

Changes in service gross margin may result from various factors such as changes in the mix between technical support services and advanced services, as well as the timing of technical support service contract initiations and renewals and the addition of personnel and other resources to support higher levels of service business in future periods.

# Sales to the service provider market are especially volatile, and weakness in orders from this industry may harm our operating results and financial condition.

Sales to the service provider market have been characterized by large and sporadic purchases, especially relating to our router sales and sales of certain other Infrastructure Platforms and Applications products, in addition to longer sales cycles. Service provider product orders decreased during the first quarter of fiscal 2021 and in certain prior periods, and at various times in the past, including in recent quarters, we have experienced significant weakness in product orders from service providers. Product orders from the service provider market could continue to decline and, as has been the case in the past, such weakness could persist over extended periods of time given fluctuating market conditions. Sales activity in this industry depends upon the stage of completion of expanding network infrastructures; the availability of funding; and the extent to which service providers are affected by regulatory, economic, and business conditions in the country of operations. Weakness in orders from this industry, including as a result of any slowdown in capital expenditures by service providers (which may be more prevalent during a global economic downtum, or periods of economic, political or regulatory uncertainty), could have a material adverse effect on our business, operating results, and financial condition. Such slowdowns may continue or recur in future periods. Orders from this industry could decline for many reasons other than the competitiveness of our products and services within their respective markets. For example, in the past, many of our service provider customers have been materially and adversely affected by slowdowns in the general economy, by overcapacity, by changes in the service provider market, by regulatory developments, and by constraints on capital availability, resulting in business failures and substantial reductions in spending and expansion plans. These conditions have materially harmed our business and operating results in the past, and could affect our business and operating results in any future period. Finally, service provider customers typically have longer implementation cycles; require a broader range of services, including design services; demand that vendors take on a larger share of risks; often require acceptance provisions, which can lead to a delay in revenue recognition; and expect financing from vendors. All these factors can add further risk to business conducted with service providers.

#### Disruption of or changes in our distribution model could harm our sales and margins.

If we fail to manage distribution of our products and services properly, or if our distributors' financial condition or operations weaken, our revenue and gross margins could be adversely affected. A substantial portion of our products and services is sold through our channel partners, and the remainder is sold through direct sales. Our channel partners include systems integrators, service providers, other resellers, and distributors. Systems integrators and service providers typically sell directly to end users and often provide system installation, technical support, professional services, and other support services in addition to network equipment sales. Systems integrators also typically integrate our products into an overall solution, and a number of service providers are also systems integrators. Distributors stock inventory and typically sell to systems integrators, service providers, and other resellers. We refer to sales through distributors as our two-tier system of sales to the end customer. If sales through indirect channels increase, this may lead to greater difficulty in forecasting the mix of our products and, to a degree, the timing of orders from our customers.

Historically, we have seen fluctuations in our gross margins based on changes in the balance of our distribution channels. There can be no assurance that changes in the balance of our distribution model in future periods would not have an adverse effect on our gross margins and profitability. Some factors could result in disruption of or changes in our distribution model, which could harm our sales and margins, including the following: competition with some of our channel partners, including through our direct sales, which may lead these channel partners to use other suppliers that do not directly sell their own products or otherwise compete with them; some of our channel partners may demand that we absorb a greater share of the risks that their customers may ask them to bear; some of our channel partners may have insufficient financial resources and may not be able to withstand changes and challenges in business conditions; and revenue from indirect sales could suffer if our distributors' financial condition or operations weaken. In addition, we depend on our channel partners globally to comply with applicable regulatory requirements. To the extent that they fail to do so, that could have a material adverse effect on our business, operating results, and financial condition. Further, sales of our products outside of agreed territories can result in disruption to our distribution channels.

## The markets in which we compete are intensely competitive, which could adversely affect our achievement of revenue growth.

The markets in which we compete are characterized by rapid change, converging technologies, and a migration to networking and communications solutions that offer relative advantages. These market factors represent a competitive threat to us. We compete with numerous vendors in each product category. The overall number of our competitors providing niche product solutions may increase. Also, the identity and composition of competitors may change as we increase our activity in newer product areas, and in key priority and growth areas. For example, as products related to network programmability, such as software defined networking (SDN) products, become more prevalent, we expect to face increased competition from companies that develop networking products based on commoditized hardware, referred to as "white box" hardware, to the extent customers decide to purchase those product offerings instead of ours. In addition, the growth in demand for technology delivered as a service enables new competitors to enter the market. As we continue to expand globally, we may see new competition in different geographic regions. In particular, we have experienced price-focused competition from competitors in Asia, especially from China, and we anticipate this will continue. Our competitors (in each case relative to only some of our products or services) include: Amazon Web Services LLC; Arista Networks, Inc.; Broadcom Inc.; CommScope Holding Company, Inc.; Check Point Software Technologies Ltd.; Dell Technologies Inc.; Dynatrace; F5 Networks, Inc.; FireEye, Inc.; Fortinet, Inc.; Hewlett-Packard Enterprise Company; Huawei Technologies Co., Ltd.; Juniper Networks, Inc.; Enovo Group Limited; LogMeln, Inc.; Microsoft Corporation; New Relic, Inc.; Nokia Corporation; Nutanix, Inc.; Palo Alto Networks, Inc.; RingCentral, Inc.; Slack Technologies, Inc.; Ubiquiti Networks; VMware, Inc.; Zoom Video Communications, Inc.; and Zscaler, Inc.; among others.

Some of our competitors compete across many of our product lines, while others are primarily focused in a specific product area. Barriers to entry are relatively low, and new ventures to create products that do or could compete with our products are regularly formed. In addition, some of our competitors may have greater resources, including technical and engineering resources, than we do. As we expand into new markets, we will face competition not only from our existing competitors but also from other competitors, including existing companies with strong technological, marketing, and sales positions in those markets. We also sometimes face competition from resellers and distributors of our products. Companies with which we have strategic alliances in some areas may be competitors in other areas, and this trend may increase. For example, the enterprise data center is undergoing a fundamental transformation arising from the convergence of technologies, including computing, networking, storage, and software, that previously were segregated. Due to several factors, including the availability of highly scalable and general purpose microprocessors, ASICs offering advanced services, standards based protocols, cloud computing and virtualization, the convergence of technologies within the enterprise data center is spanning multiple, previously independent, technology segments. Also, some of our current and potential competitors for enterprise data center business have made acquisitions, or announced new strategic alliances, designed to position them to provide end-to-end technology solutions

for the enterprise data center. As a result of all of these developments, we face greater competition in the development and sale of enterprise data center technologies, including competition from entities that are among our long-term strategic alliance partners. Companies that are strategic alliance partners in some areas of our business may acquire or form alliances with our competitors, thereby reducing their business with us.

The principal competitive factors in the markets in which we presently compete and may compete in the future include the ability to sell successful business outcomes; the ability to provide a broad range of networking and communications products and services; product performance; price; the ability to introduce new products, including providing continuous new customer value and products with price-performance advantages; the ability to reduce production costs; the ability to provide value-added features such as security, reliability, and investment protection; conformance to standards; market presence; the ability to provide financing; and disruptive technology shifts and new business models.

We also face competition from customers to which we license or supply technology and suppliers from which we transfer technology. The inherent nature of networking requires interoperability. As such, we must cooperate and at the same time compete with many companies. Any inability to effectively manage these complicated relationships with customers, suppliers, and strategic alliance partners could have a material adverse effect on our business, operating results, and financial condition and accordingly affect our chances of success.

# If we do not successfully manage our strategic alliances, we may not realize the expected benefits from such alliances, and we may experience increased competition or delays in product development.

We have several strategic alliances with large and complex organizations and other companies with which we work to offer complementary products and services and, in the past, have established a joint venture to market services associated with our Cisco Unified Computing System products. These arrangements are generally limited to specific projects, the goal of which is generally to facilitate product compatibility and adoption of industry standards. There can be no assurance we will realize the expected benefits from these strategic alliances or from the joint venture. If successful, these relationships may be mutually beneficial and result in industry growth. However, alliances carry an element of risk because, in most cases, we must compete in some business areas with a company with which we have a strategic alliance and, at the same time, cooperate with that company in other business areas. Also, if these companies fail to perform or if these relationships fail to materialize as expected, we could suffer delays in product development or other operational difficulties. Joint ventures can be difficult to manage, given the potentially different interests of joint venture partners.

## Inventory management relating to our sales to our two-tier distribution channel is complex, and excess inventory may harm our gross margins.

We must manage inventory relating to sales to our distributors effectively, because inventory held by them could affect our results of operations. Our distributors may increase orders during periods of product shortages, cancel orders if their inventory is too high, or delay orders in anticipation of new products. They also may adjust their orders in response to the supply of our products and the products of our competitors that are available to them, and in response to seasonal fluctuations in end-user demand. Our distributors are generally given business terms that allow them to return a portion of inventory, receive credits for changes in selling price, and participate in various cooperative marketing programs. Inventory management remains an area of focus as we balance the need to maintain strategic inventory levels to ensure competitive lead times against the risk of inventory obsolescence because of rapidly changing technology and customer requirements. When facing component supply-related challenges, we have increased our efforts in procuring components in order to meet customer expectations. If we ultimately determine that we have excess inventory, we may have to reduce our prices and write down inventory, which in turn could result in lower gross margins.

# We depend upon the development of new products and services, and enhancements to existing products and services, and if we fail to predict and respond to emerging technological trends and customers' changing needs, our operating results and market share may suffer.

The markets for our products and services are characterized by rapidly changing technology, evolving industry standards, new product and service introductions, and evolving methods of building and operating networks. Our operating results depend on our ability to develop and introduce new products and services into existing and emerging markets and to reduce the production costs of existing products. If customers do not purchase and/or renew our offerings our business could be harmed. The COVID-19 pandemic may also result in long-term changes in customer needs for our products and services in various sectors, along with IT-related capital spending reductions, or shifts in spending focus, that could materially adversely affect us if we are unable to adjust our product and service offerings to match customer needs.

The process of developing new technology, including intent-based networking, more programmable, flexible and virtual networks, and technology related to other market transitions— such as security, digital transformation and IoT, and cloud— is complex and uncertain, and if we fail to accurately predict customers' changing needs and emerging technological trends our

business could be harmed. We must commit significant resources, including the investments we have been making in our strategic priorities to developing new products and services before knowing whether our investments will result in products and services the market will accept. In particular, if our model of the evolution of networking does not emerge as we believe it will, or if the industry does not evolve as we believe it will, or if our strategy for addressing this evolution is not successful, many of our strategic initiatives and investments may be of no or limited value. For example, if we do not introduce products related to network programmability, such as software-defined-networking products, in a timely fashion, or if product offerings in this market that ultimately succeed are based on technology, or an approach to technology, that differs from ours, such as, for example, networking products based on "white box" hardware, our business could be harmed. Similarly, our business could be harmed if we fail to develop, or fail to develop in a timely fashion, offerings to address other transitions, or if the offerings addressing these other transitions that ultimately succeed are based on technology, or an approach to technology, different from ours. In addition, our business could be adversely affected in periods surrounding our new product introductions if customers delay purchasing decisions to qualify or otherwise evaluate the new product offerings. We have also been transforming our business to move from selling individual products and services to selling products and services integrated into architectures and solutions, and we are seeking to meet the evolving needs of customers which include offering our products and solutions in the manner in which customers wish to consume them. As a part of this transformation, we continue to make changes to how we are organized and how we build and deliver or technology is incorrect or ineffective, our business could be harmed.

Furthermore, we may not execute successfully on our vision or strategy because of challenges with regard to product planning and timing, technical hurdles that we fail to overcome in a timely fashion, or a lack of appropriate resources. This could result in competitors, some of which may also be our strategic alliance partners, providing those solutions before we do and loss of market share, revenue, and earnings. In addition, the growth in demand for technology delivered as a service enables new competitors to enter the market. The success of new products and services depends on several factors, including proper new product and service definition, component costs, timely completion and introduction of these products and services, differentiation of new products and services from those of our competitors, and market acceptance of these products and services. There can be no assurance that we will successfully identify new product and services or that products, services and technologies developed by others will not render our products, services or technologies obsolete or noncompetitive. The products and technologies in our other product categories and key priority and growth areas may not prove to have the market success we anticipate, and we may not successfully identify and invest in other emerging or new products and services.

# Changes in industry structure and market conditions could lead to charges related to discontinuances of certain of our products or businesses, asset impairments and workforce reductions or restructurings.

In response to changes in industry and market conditions, we may be required to strategically realign our resources and to consider restructuring, disposing of, or otherwise exiting businesses. Any resource realignment, or decision to limit investment in or dispose of or otherwise exit businesses, may result in the recording of special charges, such as inventory and technology-related write-offs, workforce reduction or restructuring costs, charges relating to consolidation of excess facilities, or claims from third parties who were resellers or users of discontinued products. Our estimates with respect to the useful life or ultimate recoverability of our carrying basis of assets, including purchased intangible assets, could change as a result of such assessments and decisions. Although in certain instances our supply agreements allow us the option to cancel, reschedule, and adjust our requirements based on our business needs prior to firm orders being placed, our loss contingencies may include liabilities for contracts that we cannot cancel with contract manufacturers and suppliers. Further, our estimates relating to the liabilities for excess facilities are affected by changes in real estate market conditions. Additionally, we are required to perform goodwill impairment tests on an annual basis and between annual tests in certain circumstances, and future goodwill impairment tests may result in a charge to earnings. We initiated a restructuring plan in the first quarter of fiscal 2021, which includes a voluntary early retirement program. The implementation of this restructuring plan may be disruptive to our business, and following completion of the restructuring plan our business may not be more efficient or effective than prior to implementation of the plan. Our restructuring activities, including any related charges and the impact of the related headcount restructurings, could have a material adverse effect on our business, operating results, and financial condition.

# Over the long term we intend to invest in engineering, sales, service and marketing activities, and in key priority and growth areas, and these investments may achieve delayed, or lower than expected, benefits which could harm our operating results.

While we intend to focus on managing our costs and expenses, over the long term, we also intend to invest in personnel and other resources related to our engineering, sales, service and marketing functions as we realign and dedicate resources on key priority and growth areas, such as Security and Applications, and we also intend to focus on maintaining leadership in

Infrastructure Platforms and in Services. We are likely to recognize the costs associated with these investments earlier than some of the anticipated benefits, and the return on these investments may be lower, or may develop more slowly, than we expect. If we do not achieve the benefits anticipated from these investments (including if our selection of areas for investment does not play out as we expect), or if the achievement of these benefits is delayed, our operating results may be adversely affected.

### We have made and expect to continue to make acquisitions that could disrupt our operations and harm our operating results.

Our growth depends upon market growth, our ability to enhance our existing products, and our ability to introduce new products on a timely basis. We intend to continue to address the need to develop new products and enhance existing products through acquisitions of other companies, product lines, technologies, and personnel. Acquisitions involve numerous risks, including the following:

- Difficulties in integrating the operations, systems, technologies, products, and personnel of the acquired companies, particularly companies with large and widespread operations and/or complex products
- Diversion of management's attention from normal daily operations of the business and the challenges of managing larger and more widespread operations
  resulting from acquisitions
- · Potential difficulties in completing projects associated with in-process research and development intangibles
- Difficulties in entering markets in which we have no or limited direct prior experience and where competitors in such markets have stronger market
  positions
- Initial dependence on unfamiliar supply chains or relatively small supply partners
- · Insufficient revenue to offset increased expenses associated with acquisitions
- The potential loss of key employees, customers, distributors, vendors and other business partners of the companies we acquire following and continuing after announcement of acquisition plans

## Acquisitions may also cause us to:

- Issue common stock that would dilute our current stockholders' percentage ownership
- · Use a substantial portion of our cash resources, or incur debt
- · Significantly increase our interest expense, leverage and debt service requirements if we incur additional debt to pay for an acquisition
- Assume liabilities
- Record goodwill and intangible assets that are subject to impairment testing on a regular basis and potential periodic impairment charges
- · Incur amortization expenses related to certain intangible assets
- Incur tax expenses related to the effect of acquisitions on our legal structure
- · Incur large write-offs and restructuring and other related expenses
- · Become subject to intellectual property or other litigation

Mergers and acquisitions of high-technology companies are inherently risky and subject to many factors outside of our control, and no assurance can be given that our previous or future acquisitions will be successful and will not materially adversely affect our business, operating results, or financial condition. Failure to manage and successfully integrate acquisitions could materially harm our business and operating results. Prior acquisitions have resulted in a wide range of outcomes, from successful introduction of new products and technologies to a failure to do so. Even when an acquired company has already developed and marketed products, there can be no assurance that product enhancements will be made in a timely fashion or that pre-acquisition due diligence will have identified all possible issues that might arise with respect to such products. In addition, our effective tax rate for future periods is uncertain and could be impacted by mergers and acquisitions. Risks related to new product development also apply to acquisitions.

# Entrance into new or developing markets exposes us to additional competition and will likely increase demands on our service and support operations.

As we focus on new market opportunities and key priority and growth areas, we will increasingly compete with large telecommunications equipment suppliers as well as startup companies. Several of our competitors may have greater resources, including technical and engineering resources, than we do. Additionally, as customers in these markets complete infrastructure deployments, they may require greater levels of service, support, and financing than we have provided in the past, especially in emerging countries. Demand for these types of service, support, or financing contracts may increase in the future. There can be

no assurance that we can provide products, service, support, and financing to effectively compete for these market opportunities. Further, entry into other markets has subjected and will subject us to additional risks, particularly to those markets, including the effects of general market conditions and reduced consumer confidence. For example, as we add direct selling capabilities globally to meet changing customer demands, we will face increased legal and regulatory requirements.

## Industry consolidation may lead to increased competition and may harm our operating results.

There is a continuing trend toward industry consolidation in our markets. We expect this trend to continue as companies attempt to strengthen or hold their market positions in an evolving industry and as companies are acquired or are unable to continue operations. For example, some of our current and potential competitors for enterprise data center business have made acquisitions, or announced new strategic alliances, designed to position them with the ability to provide end-to-end technology solutions for the enterprise data center. Companies that are strategic alliance partners in some areas of our business may acquire or form alliances with our competitors, thereby reducing their business with us. We believe that industry consolidation may result in stronger competitors that are better able to compete as sole-source vendors for customers. This could lead to more variability in our operating results and could have a material adverse effect on our business, operating results, and financial condition. Furthermore, particularly in the service provider market, rapid consolidation will lead to fewer customers, with the effect that loss of a major customer could have a material impact on results not anticipated in a customer marketplace composed of more numerous participants.

#### Product quality problems could lead to reduced revenue, gross margins, and net income.

We produce highly complex products that incorporate leading-edge technology, including both hardware and software. Software typically contains bugs that can unexpectedly interfere with expected operations. There can be no assurance that our pre-shipment testing programs will be adequate to detect all defects, either ones in individual products or ones that could affect numerous shipments, which might interfere with customer satisfaction, reduce sales opportunities, or affect gross margins. From time to time, we have had to replace certain components and provide remediation in response to the discovery of defects or bugs in products that we had shipped. There can be no assurance that such remediation, depending on the product involved, would not have a material impact. An inability to cure a product defect could result in the failure of a product line, temporary or permanent withdrawal from a product or market, damage to our reputation, inventory costs, or product reengineering expenses, any of which could have a material impact on our revenue, margins, and net income.

# Due to the global nature of our operations, political or economic changes or other factors in a specific country or region could harm our operating results and financial condition.

We conduct significant sales and customer support operations in countries around the world. As such, our growth depends in part on our increasing sales into emerging countries. We also depend on non-U.S. operations of our contract manufacturers, component suppliers and distribution partners. Our business in emerging countries in the aggregate experienced a decline in orders in the first half of fiscal 2021 and in certain prior periods. We continue to assess the sustainability of any improvements in our business in these countries and there can be no assurance that our investments in these countries will be successful. Our future results could be materially adversely affected by a variety of political, economic or other factors relating to our operations inside and outside the United States, any or all of which could have a material adverse effect on our operating results and financial condition, including the following: impacts from global central bank monetary policy; issues related to the political relationship between the United States and other countries that can affect regulatory matters, affect the willingness of customers in those countries to purchase products from companies headquartered in the United States or affect our ability to procure components if a government body were to deny us access to those components; government-related disruptions or shutdowns; the challenging and inconsistent global macroeconomic environment; foreign currency exchange rates; political or social unrest; economic instability or weakness or natural disasters in a specific country or region, including economic challenges in China and global economic ramifications of Chinese economic difficulties; instability as a result of Brexit; environmental protection regulations (including new laws and regulations related to climate change), trade protection measures such as tariffs, and other legal and regulatory requirements, some of which may affect our ability to import our products to, export our products from or sell our products in various countries or affect our ability to procure components; political considerations that affect service provider and government spending patterns; health or similar issues, including pandemics or epidemics such as the COVID-19 pandemic which could continue to affect customer purchasing decisions; difficulties in staffing and managing international operations; and adverse tax consequences, including imposition of withholding or other taxes on our global operations.

# We are exposed to the credit risk of some of our customers and to credit exposures in weakened markets, which could result in material losses.

Most of our sales are on an open credit basis, with typical payment terms of 30 days in the United States and, because of local customs or conditions, longer in some markets outside the United States. Beyond our open credit arrangements, we have also experienced demands for customer financing and facilitation of leasing arrangements. Our loan financing arrangements may

include not only financing the acquisition of our products and services but also providing additional funds for other costs associated with network installation and integration of our products and services. Our exposure to the credit risks relating to our financing activities may increase if our customers are adversely affected by a global economic downtum or periods of economic uncertainty. There can be no assurance that programs we have in place to monitor and mitigate credit risks will be effective. In the past, there have been significant bankruptcies among customers both on open credit and with loan or lease financing arrangements, particularly among Internet businesses and service providers, causing us to incur economic or financial losses. There can be no assurance that additional losses will not be incurred. Although these losses have not been material to date, future losses, if incurred, could harm our business and have a material adverse effect on our operating results and financial condition. Additionally, to the degree that turmoil in the credit markets makes it more difficult for some customers to obtain financing, those customers' ability to pay could be adversely impacted, which in turn could have a material adverse impact on our business, operating results, and financial condition.

### We are exposed to fluctuations in the market values of our portfolio investments and in interest rates; impairment of our investments could harm our earnings.

We maintain an investment portfolio of various holdings, types, and maturities. Our portfolio includes available-for-sale debt investments and equity investments, the values of which are subject to market price volatility. If such investments suffer market price declines, as we experienced with some of our investments in the past, we may recognize in earnings the decline in the fair value of our investments below their cost basis. Our non-marketable equity and other investments are subject to risk of loss of investment capital. These investments are inherently risky because the markets for the technologies or products they have under development are typically in the early stages and may never materialize. We could lose our entire investment in these companies. For information regarding the market risks associated with the fair value of portfolio investments and interest rates, refer to the section titled "Quantitative and Qualitative Disclosures About Market Risk."

## We are exposed to fluctuations in currency exchange rates that could negatively impact our financial results and cash flows.

Because a significant portion of our business is conducted outside the United States, we face exposure to adverse movements in foreign currency exchange rates, including emerging market currencies which can have extreme currency volatility. An increase in the value of the dollar could increase the real cost to our customers of our products in those markets outside the United States where we sell in dollars and a weakened dollar could increase the cost of local operating expenses and procurement of raw materials to the extent that we must purchase components in foreign currencies. These exposures may change over time as business practices evolve, and they could have a material adverse impact on our financial results and cash flows.

## Failure to retain and recruit key personnel would harm our ability to meet key objectives.

Our success has always depended in large part on our ability to attract and retain highly skilled technical, managerial, sales, and marketing personnel. Competition for these personnel is intense, especially in the Silicon Valley area of Northern California. Stock incentive plans are designed to reward employees for their long-term contributions and provide incentives for them to remain with us. Volatility or lack of positive performance in our stock price or equity incentive awards, or changes to our overall compensation program, including our stock incentive program, resulting from the management of share dilution and share-based compensation expense or otherwise, may also adversely affect our ability to retain key employees. As a result of one or more of these factors, we may increase our hiring in geographic areas outside the United States, which could subject us to additional geopolitical and exchange rate risk. The loss of services of any of our key personnel; the inability to retain and attract qualified personnel in the future; or delays in hiring required personnel, particularly engineering and sales personnel, could make it difficult to meet key objectives, such as timely and effective product introductions. In addition, companies in our industry whose employees accept positions with competitors frequently claim that competitors have engaged in improper hiring practices. We have received these claims in the past and may receive additional claims to this effect in the future.

## Adverse resolution of litigation or governmental investigations may harm our operating results or financial condition.

We are a party to lawsuits in the normal course of our business. Litigation can be expensive, lengthy, and disruptive to normal business operations. Moreover, the results of complex legal proceedings are difficult to predict. An unfavorable resolution of lawsuits or governmental investigations could have a material adverse effect on our business, operating results, or financial condition. For additional information regarding certain of the matters in which we are involved, see Note 14 to the Consolidated Financial Statements, subsection (f) "Legal Proceedings."

# Our operating results may be adversely affected and damage to our reputation may occur due to production and sale of counterfeit versions of our products.

As is the case with leading products around the world, our products are subject to efforts by third parties to produce counterfeit versions of our products. While we work diligently with law enforcement authorities in various countries to block the manufacture of counterfeit goods and to interdict their sale, and to detect counterfeit products in customer networks, and have succeeded in prosecuting counterfeiters and their distributors, resulting in fines, imprisonment and restitution to us, there can be

no guarantee that such efforts will succeed. While counterfeiters often aim their sales at customers who might not have otherwise purchased our products due to lack of verifiability of origin and service, such counterfeit sales, to the extent they replace otherwise legitimate sales, could adversely affect our operating results.

#### Changes in our provision for income taxes or adverse outcomes resulting from examination of our income tax returns could adversely affect our results.

Our provision for income taxes is subject to volatility and could be adversely affected by earnings being lower than anticipated in countries that have lower tax rates and higher than anticipated in countries that have higher tax rates; by changes in the valuation of our deferred tax assets and liabilities; by changes to foreign-derived intangible income, global intangible low-tax income and base erosion and anti-abuse tax laws, regulations, or interpretations thereof; by expiration of or lapses in tax incentives; by transfer pricing adjustments, including the effect of acquisitions on our legal structure; by tax effects of nondeductible compensation; by tax costs related to intercompany realignments; by changes in accounting principles; or by changes in tax laws and regulations, treaties, or interpretations thereof, including changes to the taxation of earnings of our foreign subsidiaries, the deductibility of expenses attributable to foreign income, and the foreign tax credit rules. Significant judgment is required to determine the recognition and measurement attribute prescribed in the accounting guidance for uncertainty in income taxes. The Organisation for Economic Co-operation and Development (OECD), an international association comprised of 37 countries, including the United States, has made changes to numerous long-standing tax principles. There can be no assurance that these changes, once adopted by countries, will not have an adverse impact on our provision for income taxes. Further, as a result of certain of our ongoing employment and capital investment actions and commitments, our income in certain countries was subject to reduced tax rates. Our failure to meet these commitments could adversely impact our provision for income taxes. In addition, we are subject to the continuous examination of our income tax returns by the Internal Revenue Service and other tax authorities. We regularly assess the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of our provis

# Our business and operations are especially subject to the risks of earthquakes, floods, and other natural catastrophic events (including as a result of global climate change).

Our corporate headquarters, including certain of our research and development operations are located in the Silicon Valley area of Northern California, a region known for seismic activity. Additionally, a certain number of our facilities are located near rivers that have experienced flooding in the past. Also certain of our suppliers and logistics centers are located in regions that have been or may be affected by earthquake, tsunami and flooding activity which in the past has disrupted, and in the future could disrupt, the flow of components and delivery of products. In addition, global climate change may result in significant natural disasters occurring more frequently or with greater intensity, such as drought, wildfires, storms, sea-level rise, and flooding. A significant natural disaster, such as an earthquake, a hurricane, volcano, flood or a wildfire, could have a material adverse impact on our business, operating results, and financial condition.

## Terrorism and other events may harm our business, operating results and financial condition.

The continued threat of terrorism and heightened security and military action in response to this threat, or any future acts of terrorism, may cause further disruptions to the economies of the United States and other countries and create further uncertainties or otherwise materially harm our business, operating results, and financial condition. Likewise, events such as loss of infrastructure and utilities services such as energy, transportation, or telecommunications could have similar negative impacts. To the extent that such disruptions or uncertainties result in delays or cancellations of customer orders or the manufacture or shipment of our products, our business, operating results, and financial condition could be materially and adversely affected.

# There can be no assurance that our operating results and financial condition will not be adversely affected by our incurrence of debt.

As of the end of the third quarter of fiscal 2021, we have senior unsecured notes outstanding in an aggregate principal amount of \$11.5 billion that mature at specific dates from calendar year 2021 through 2040. We have also established a commercial paper program under which we may issue short-term, unsecured commercial paper notes on a private placement basis up to a maximum aggregate amount outstanding at any time of \$10.0 billion, and we had no commercial paper notes outstanding under this program as of May 1, 2021. There can be no assurance that our incurrence of this debt or any future debt will be a better means of providing liquidity to us than would our use of our existing cash resources. Further, we cannot be assured that our maintenance of this indebtedness or incurrence of future indebtedness will not adversely affect our operating results or financial condition. In addition, changes by any rating agency to our credit rating can negatively impact the value and liquidity of both our debt and equity securities, as well as the terms upon which we may borrow under our commercial paper program or future debt issuances.

# Risks Related to Intellectual Property

# Our proprietary rights may prove difficult to enforce.

We generally rely on patents, copyrights, trademarks, and trade secret laws to establish and maintain proprietary rights in our technology and products. Although we have been issued numerous patents and other patent applications are currently pending, there can be no assurance that any of these patents or other proprietary rights will not be challenged, invalidated, or circumvented or that our rights will, in fact, provide competitive advantages to us. Furthermore, many key aspects of networking technology are governed by industrywide standards, which are usable by all market entrants. In addition, there can be no assurance that patents will be issued from pending applications or that claims allowed on any patents will be sufficiently broad to protect our technology. In addition, the laws of some foreign countries may not protect our proprietary rights to the same extent as do the laws of the United States. The outcome of any actions taken in these foreign countries may be different than if such actions were determined under the laws of the United States. Although we are not dependent on any individual patents or group of patents for particular segments of the business for which we compete, if we are unable to protect our proprietary rights to the totality of the features (including aspects of products protected other than by patent rights) in a market, we may find ourselves at a competitive disadvantage to others who need not incur the substantial expense, time, and effort required to create innovative products that have enabled us to be successful.

## We may be found to infringe on intellectual property rights of others.

Third parties, including customers, have in the past and may in the future assert claims or initiate litigation related to exclusive patent, copyright, trademark, and other intellectual property rights to technologies and related standards that are relevant to us. These assertions have increased over time as a result of our growth and the general increase in the pace of patent claims assertions, particularly in the United States. Because of the existence of a large number of patents in the networking field, the secrecy of some pending patents, and the rapid rate of issuance of new patents, it is not economically practical or even possible to determine in advance whether a product or any of its components infringes or will infringe on the patent rights of others. The asserted claims and/or initiated litigation can include claims against us or our manufacturers, suppliers, or customers, alleging infringement of their proprietary rights with respect to our existing or future products or components of those products. Regardless of the merit of these claims, they can be time-consuming, result in costly litigation and diversion of technical and management personnel, or require us to develop a non-infringing technology or enter into license agreements. Where claims are made by customers, resistance even to unmeritorious claims could damage customer relationships. There can be no assurance that licenses will be available on acceptable terms and conditions, if at all, or that our indemnification by our suppliers will be adequate to cover our costs if a claim were brought directly against us or our customers. Furthermore, because of the potential for high court awards that are not necessarily predictable, it is not unusual to find even arguably unmeritorious claims settled for significant amounts. If any infringement or other intellectual property claim made against us by any third party is successful, if we are required to indemnify a customer with respect to a claim against the customer, or if we fail to develop non-infringing technology or license the proprietary rights on commercially reasonable terms and conditions, our business, operating results, and financial condition could be materially and adversely affected. For additional information regarding our indemnification obligations, see Note 14(e) to the Consolidated Financial Statements contained in this report. Our exposure to risks associated with the use of intellectual property may be increased as a result of acquisitions, as we have a lower level of visibility into the development process with respect to such technology or the care taken to safeguard against infringement risks. Further, in the past, third parties have made infringement and similar claims after we have acquired technology that had not been asserted prior to our acquisition.

## We rely on the availability of third-party licenses.

Many of our products are designed to include software or other intellectual property licensed from third parties. It may be necessary in the future to seek or renew licenses relating to various aspects of these products. There can be no assurance that the necessary licenses would be available on acceptable terms, if at all. The inability to obtain certain licenses or other rights or to obtain such licenses or rights on favorable terms, or the need to engage in litigation regarding these matters, could have a material adverse effect on our business, operating results, and financial condition. Moreover, the inclusion in our products of software or other intellectual property licensed from third parties on a nonexclusive basis could limit our ability to protect our proprietary rights in our products.

## Risks Related to Cybersecurity and Regulations

Cyber-attacks, data breaches or malware may disrupt our operations, harm our operating results and financial condition, and damage our reputation; and cyber-attacks or data breaches on our customers' networks, or in cloud-based services provided by or enabled by us, could result in claims of liability against us, damage our reputation or otherwise harm our business.

Despite our implementation of security measures, the products and services we sell to customers, and our servers, data centers and the cloud-based solutions on which our data, and data of our customers, suppliers and business partners are stored, are vulnerable to cyber-attacks, data breaches, malware, and similar disruptions from unauthorized access or tampering by malicious actors or inadvertent error. Any such event could compromise our products, services, and networks or those of our customers, and the information stored on our systems or those of our customers could be improperly accessed, processed, disclosed, lost or stolen, which could subject us to liability to our customers, suppliers, business partners and others, give rise to legal/regulatory action, and could have a material adverse effect on our business, operating results, and financial condition and may cause damage to our reputation. Efforts to limit the ability of malicious actors to disrupt the operations of the Internet or undermine our own security efforts may be costly to implement and meet with resistance, and may not be successful. Breaches of security in our customers' networks, or in cloud-based services provided by or enabled by us, regardless of whether the breach is attributable to a vulnerability in our products or services, could result in claims of liability against us, damage our reputation or otherwise harm our business.

Vulnerabilities and critical security defects, prioritization decisions regarding remedying vulnerabilities or security defects, failure of third party providers to remedy vulnerabilities or security defects, or customers not deploying security releases or deciding not to upgrade products, services or solutions could result in claims of liability against us, damage our reputation or otherwise harm our business.

The products and services we sell to customers, and our cloud-based solutions, inevitably contain vulnerabilities or critical security defects which have not been remedied and cannot be disclosed without compromising security. We may also make prioritization decisions in determining which vulnerabilities or security defects to fix, and the timing of these fixes, which could result in an exploit which compromises security. Customers also need to test security releases before they can be deployed which can delay implementation. In addition, we rely on third-party providers of software and cloud-based service and we cannot control the rate at which they remedy vulnerabilities. Customers may also not deploy a security release, or decide not to upgrade to the latest versions of our products, services or cloud-based solutions containing the release, leaving them vulnerabilities and critical security defects, prioritization errors in remedying vulnerabilities or security defects, failure of third-party providers to remedy vulnerabilities or security defects, or customers not deploying security releases or deciding not to upgrade products, services or solutions could result in claims of liability against us, damage our reputation or otherwise harmour business.

#### Our business, operating results and financial condition could be materially harmed by regulatory uncertainty applicable to our products and services.

Changes in regulatory requirements applicable to the industries in which we operate, in the United States and in other countries, could materially affect the sales of our products and services. In particular, changes in telecommunications regulations could impact our service provider customers' purchase of our products and offers, and they could also impact sales of our own regulated offers. In addition, evolving legal requirements restricting or controlling the collection, processing, or cross-border transmission of data, including regulation of cloud-based services, could materially affect our customers' ability to use, and our ability to sell, our products and offers. Additional areas of uncertainty that could impact sales of our products and offers include laws and regulations related to encryption technology, environmental sustainability (including climate change), export control, product certification, and national security controls applicable to our supply chain. For example, new laws and regulations in response to climate change could result in increased energy efficiency for our products and increased compliance and energy costs. Changes in regulatory requirements in any of these areas could have a material adverse effect on our business, operating results, and financial condition.

## Risks Related to Ownership of Our Stock

# Our stock price may be volatile.

Historically, our common stock has experienced substantial price volatility, particularly as a result of variations between our actual financial results and the published expectations of analysts and as a result of announcements by our competitors and us. Furthermore, speculation in the press or investment community about our strategic position, financial condition, results of operations, business, security of our products, or significant transactions can cause changes in our stock price. In addition, the stock market has experienced extreme price and volume fluctuations that have affected the market price of many technology companies, in particular, and that have often been unrelated to the operating performance of these companies. These factors, as

well as general economic and political conditions and the announcement of proposed and completed acquisitions or other significant transactions, or any difficulties associated with such transactions, by us or our current or potential competitors, may materially adversely affect the market price of our common stock in the future. Additionally, volatility, lack of positive performance in our stock price or changes to our overall compensation program, including our stock incentive program, may adversely affect our ability to retain key employees, virtually all of whom are compensated, in part, based on the performance of our stock price.

# Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

- (a) None.
- (b) None
- (c) Issuer Purchases of Equity Securities (in millions, except per-share amounts):

<u>Period</u>	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	That	oroximate Dollar Value of Shares t May Yet Be Purchased Under the Plans or Programs
January 24, 2021 to February 27, 2021	4	\$ 46.22	4	\$	9,060
February 28, 2021 to March 27, 2021	3	\$ 48.37	3	\$	8,910
March 28, 2021 to May 1, 2021	3	\$ 51.81	3	\$	8,730
Total	10	\$ 48.71	10		

On September 13, 2001, we announced that our Board of Directors had authorized a stock repurchase program. The remaining authorized amount for stock repurchases under this program is approximately \$8.7 billion with no termination date.

For the majority of restricted stock units granted, the number of shares issued on the date the restricted stock units vest is net of shares withheld to meet applicable tax withholding requirements. Although these withheld shares are not issued or considered common stock repurchases under our stock repurchase program and therefore are not included in the preceding table, they are treated as common stock repurchases in our financial statements as they reduce the number of shares that would have been issued upon vesting.

# Item 3. Defaults Upon Senior Securities

None

## Item 4. Mine Safety Disclosures

Not applicable.

## Item 5. Other Information

Required Disclosure Pursuant to Section 13(r) of the Securities Exchange Act of 1934, as amended (the "Exchange Act")

Section 219 of the Iran Threat Reduction and Syria Human Rights Act of 2012 and Section 13(r) of the Exchange Act require an issuer to disclose certain information in its annual and quarterly reports, as applicable, if it or any of its affiliates knowingly engaged in certain activities, transactions or dealings with individuals or entities subject to specific U.S. economic sanctions during the reporting period. On March 2, 2021, the U.S. government designated the Russian Federal Security Service (the "FSB") as a blocked party subject to such reporting requirements; however, on the same day, the U.S. Department of the Treasury's Office of Foreign Assets Control issued General License No. 1B (the "OFAC General License"), which generally authorizes U.S. companies to engage in certain transactions and dealings with the FSB necessary and ordinarily incident to requesting or obtaining licenses, permits, certifications or notifications issued or registered by the FSB for the importation, distribution or use of information technology products in Russia.

During the quarter ended May 1, 2021, a subsidiary of Cisco filed notifications with, or applied for import licenses and permits from, the FSB as required pursuant to Russian encryption product import controls for the purpose of enabling Cisco or our subsidiaries to import and distribute certain products in Russia. Neither Cisco nor our subsidiaries generated any gross revenues or net profits directly from such approval activity and neither Cisco nor our subsidiaries sell to the FSB. Cisco expects that we or our subsidiaries will continue to file notifications with and apply for import licenses and permits from the FSB as required for importation and distribution of our products in Russia, if and as permitted by applicable law, including the OFAC General License.

**Item 6. Exhibits**The following documents are filed as exhibits to this report:

Exhibit Number	Exhibit Description	Incorporated by Reference			Filed Herewith	
		Form	File No.	Exhibit	Filing Date	- '
2.1	Agreement and Plan of Merger, dated as of January 25, 2021 by and between Cisco Systems, Inc., a California corporation, and Cisco Systems (DE), Inc., a Delaware corporation	8-K12B	001-39940	2.1	1/25/2021
